To her, I pour out all my pent-up anger, frustration and feelings of helplessness. I tell her I don't expect special favors because I am a staff physician, but that as a person I beg for some semblance of consideration from those who, for the moment, have complete power over me. "You come by every morning," I accuse, "but you never ask if I have any problems. You never give any indication, and neither has anyone else, that you even give a damn."

The nursing supervisor says she is very sorry, and I believe she is. She sends in the dietician who is also sympathetic. After our talk, food trays are left within reach, my meat is cut up and my coffee poured. Medication is now given on schedule. Furthermore, the hospital director soon calls on me. He is sincerely concerned about a client's opinion of the way he runs his business. "What can we do to improve things?" he asks. I really believe he wants to know and I tell him I will try to give him some answers.

The incidents I have singled out from my hospital stay—and believe me, there were many more—are trivial in themselves. Many patients have far more serious complaints, I know. But I find these incidents deeply disturbing because of the attitude they reveal. It's an attitude, I'm ashamed to realize, that starts at the top—with doctors. Did I ever ask one of my hospitalized patients if everything possible was being done to make his stay more comfortable? I don't think so, although I'd have raised the devil if I'd found his medical care being mishandled. My doctor visited me every day, but he never asked.

If physicians see a hospitalized patient as nothing more than a body with an infirmity, rather like a car with a mechanical defect, that viewpoint is likely to be catching. Nurses and aides, technicians and clerical staff who have the most daily contact with patients will adopt the same indifferent attitude.

The American Hospital Association officially recognized several years ago that we have a problem. Hospital care in this country, for all its sophisticated technology, is often callous, frightening and degrading. In 1973, the AHA issued a Patient's Bill of Rights, the first article of which is: "The patient has a right to considerate and respectful care."

Institutions around the country are taking steps to improve the quality of the hospital experience. In over 400 of them there are ombudsmen or patient advocates to whom patients can turn with questions, fears or complaints. Depending on the individual hospital, these personnel can deal with problems that range from complaints about sloppy housekeeping to far more serious matters concerning medical treatment. Someone to whom a patient can speak frankly without fear of retaliation, someone who can explain procedures the medical staff hasn't time to discuss can do much to reduce the tension and conflict in the hospital setting.

A handful of other hospitals have taken even more innovative steps. One, in Boston, has installed "hotline phones" which patients can use to get quick action on complaints about nonmedical matters that have to do with their comfort or convenience. Four hospitals in Wisconsin provide patients with audio tapes that give information on general medical subjects, diagnostic procedures and the like. Some hospitals have training courses, taught by ex-airline stewardesses adept at dealing with people under stress, to improve the attitudes of hospital personnel who come in daily contact with patients and families. In my opinion, every hospital should give such training.

Last year the American Civil Liberties Union published a handbook titled *The Rights of Hospital Patients*. Although it deals primarily with legal rights, it is based, the introduction notes, on two fundamental premises: that the American medical consumer possesses certain rights which he does not forfeit when he enters a hospital, and that most hospitals fail to recognize the existence of these rights. As a medical practitioner, I find that failure shocking.

I am still angry about my hospital experience, but I wouldn't have missed it. Every doctor should be a patient once and see for himself how we are abusing the hospitalized. The best medical treatment is not enough. We also have to give compassion.

(This concludes additional statements submitted today.)

CONCLUSION OF MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977

The PRESIDING OFFICER. Under the previous order, the hour of 11 o'clock having arrived the Senate now will resume consideration of H.R. 3477, and proceed to debate on the amendment by the Senator from Missouri (Mr. DANFORTH) and the Senator from New York (Mr. JAVITS).

The Senate resumed with the consideration of the bill (H.R. 3477) to provide for a refund of 1976 individual income taxes, and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

The PRESIDING OFFICER. The Senator from Missouri.

AMENDMENT NO. 200 (AS MODIFIED)

Mr. DANFORTH. Mr. President, I offer at this time amendment No. 200, as modified.

The PRESIDING OFFICER. The clerk will state the amendment.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment will be printed in full in the RECORD.

The amendment is as follows:

Beginning on page 32, line 1, up to page 37, line 1, in lieu of the material sought to be inserted by the committee amendment, insert thereof the following:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)), a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.
Over $3,200 but not over $4,200	12 percent of taxable income.
Over $4,200 but not over $5,200	$120, plus 13% of excess over $4,200.
Over $5,200 but not over $6,200	$250, plus 15% of excess over $5,200.
Over $6,200 but not over $7,200	$400, plus 16% of excess over $6,200.
Over $7,200 but not over $9,200	$560, plus 18% of excess over $7,200.
Over $9,200 but not over $13,200	$1,280, plus 21% of excess over $9,200.
Over $13,200 but not over $17,200	$2,120, plus 24% of excess over $13,200.
Over $17,200 but not over $21,200	$3,080, plus 27% of excess over $17,200.
Over $21,200 but not over $25,200	$4,160, plus 32% of excess over $21,200.
Over $25,200 but not over $29,200	$5,440, plus 36% of excess over $25,200.
Over $29,200 but not over $33,200	$6,880, plus 39% of excess over $29,200.
Over $33,200 but not over $37,200	$8,440, plus 42% of excess over $33,200.
Over $37,200 but not over $41,200	$10,120, plus 45% of excess over $37,200.
Over $41,200 but not over $45,200	$11,920, plus 48% of excess over $41,200.
Over $45,200 but not over $53,200	$13,840, plus 50% of excess over $45,200.
Over $53,200 but not over $65,200	$17,840, plus 53% of excess over $53,200.
Over $65,200 but not over $77,200	$24,200, plus 55% of excess over $65,200.
Over $77,200 but not over $89,200	$30,800, plus 58% of excess over $77,200.
Over $88,200 but not over $101,200	$37,760, plus 60% of excess over $89,200.
Over $101,200 but not over $121,200	$44,920, plus 62% of excess over $101,200.
Over $121,200 but not over $141,200	$57,360, plus 64% of excess over $121,200.
Over $141,200 but not over $161,200	$70,160, plus 66% of excess over $141,200.
Over $161,200 but not over $181,200	$83,360, plus 68% of excess over $161,200.
Over $181,200 but not over $201,200	$96,960, plus 69% of excess over $181,200.
Over $201,200	$110,760, plus 70% of excess over $201,200.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.
Over $3,200 but not over $4,200	12 percent of taxable income.
Over $4,200 but not over $5,200	$120, plus 14% of excess over $4,200.
Over $5,200 but not over $7,200	$260, plus 17% of excess over $5,200.
Over $7,200 but not over $9,200	$600, plus 18% of excess over $7,200.
Over $9,200 but not over $11,200	$960, plus 21% of excess over $9,200.
Over $11,200 but not over $13,200	$1,380, plus 22% of excess over $11,200.
Over $13,200 but not over $15,200	$1,820, plus 24% of excess over $13,200.
Over $15,200 but not over $17,200	$2,300, plus 26% of excess over $15,200.
Over $17,200 but not over $19,200	$2,820, plus 28% of excess over $17,200.
Over $19,200 but not over $21,200	$3,380 ,plus 30% of excess over $19,200.
Over $21,200 but not over $23,200	$3,980, plus 32% of excess over $21,200.
Over $23,200 but not over $25,200	$4,620, plus 35% of excess over $23,200.
Over $25,200 but not over $27,200	$5,320, plus 36% of excess over $25,200.
Over $27,200 but not over $29,200	$6,040, plus 38% of excess over $27,200.
Over $29,200 but not over $31,200	$6,800, plus 41% of excess over $29,200.
Over $31,200 but not over $35,200	$7,620, plus 42% of excess over $31,200.
Over $35,200 but not over $39,200	$9,300, plus 45% of excess over $35,200.
Over $39,200 but not over $41,200	$11,100, plus 48% of excess over $39,200.
Over $41,200 but not over $43,200	$12,060, plus 51% of excess over $41,200.
Over $43,200 but not over $47,200	$13,080, plus 52% of excess over $43,200.
Over $47,200 but not over $53,200	$15,160, plus 55% of excess over $47,200.
Over $53,200 but not over $55,200	$18,460, plus 56% of excess over $53,200.
Over $55,200 but not over $67,200	$19,580, plus 58% of excess over $55,200.
Over $67,200 but not over $73,200	$26,540, plus 59% of excess over $67,200.
Over $73,200 but not over $79,200	$30,080, plus 61% of excess over $73,200.
Over $79,200 but not over $83,200	$33,740, plus 62% of excess over $79,200.
Over $83,200 but not over $91,200	$36,220, plus 63% of excess over $83,200.
Over $91,200 but not over $103,200	$41,260, plus 64% of excess over $91,200.
Over $103,200 but not over $123,200	$48,940, plus 66% of excess over $103,200.
Over $123,200 but not over $143,200	$62,140, plus 67% of excess over $123,200.
Over $143,200 but not over $163,200	$75,540, plus 68% of excess over $143,200.
Over $163,200 but not over $183,200	$89,140, plus 69% of excess over $163,200.
Over $183,200 but not over $283,200	$102,940, plus 70% of excess over $183,200.
Over $283,200	$172,940, plus 70% of excess over $283,200.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	12 percent of taxable income.
Over $2,700 but not over $3,200	$60, plus 13% of excess over $2,700.
Over $3,200 but not over $3,700	$125, plus 15% of excess over $3,200.
Over $3,700 but not over $4,200	$200, plus 16% of excess over $3,700.
Over $4,200 but not over $6,200	$280, plus 18% of excess over $4,200.
Over $6,200 but not over $8,200	$640, plus 21% of excess over $6,200.
Over $8,200 but not over $10,200	$1,060, plus 22% of excess over $8,200.
Over $10,200 but not over $12,200	$1,500, plus 24% of excess over $10,200.
Over $12,200 but not over $14,200	$1,980, plus 27% of excess over $12,200.
Over $14,200 but not over $16,200	$2,520, plus 29% of excess over $14,200.
Over $16,200 but not over $18,200	$3,100, plus 31% of excess over $16,200.
Over $18,200 but not over $20,200	$3,720. plus 34% of excess over $18,200.
Over $20,200 but not over $22,200	$4,400, plus 36% of excess over $20,200.
Over $22,200 but not over $24,200	$5,120, plus 38% of excess over $22,200.
Over $24,200 but not over $28,200	$5,880, plus 40% of excess over $24,200.
Over $28,200 but not over $34,200	$7,480, plus 45% of excess over $28,200.
Over $34,200 but not over $40,200	$10,180, plus 50% of excess over $34,200.
Over $40,200 but not over $46,200	$13,180, plus 55% of excess over $40,200.
Over $46,200 but not over $52,200	$16,480, plus 60% of excess over $46,200.
Over $52,200 but not over $62,200	$20,080, plus 62% of excess over $52,200.
Over $62,200 but not over $72,200	$26,280, plus 64% of excess over $62,200.
Over $72,200 but not over $82,200	$32,680, plus 66% of excess over $72,200.
Over $82,200 but not over $92,200	$39,280, plus 68% of excess over $82,200.
Over $92,200 but not over $102,200	$46,080, plus 69% of excess over $92,200.
Over $102,200 but not over $152 200	$52,980, plus 70% of excess over $102.200.
Over $152,200 but not over $202,200	$87,980, plus 70% of excess over $152,200.
Over $202,200 but not over $302,200	$122,980, plus 70% of excess over $202,200.
Over $302,200	$192,980, plus 70% of excess over $302,200.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $1,600	No tax.
Over $1,600 but not over $2,100	12 percent of taxable income.
Over $2,100 but not over $2,600	$60, plus 13% of excess over $2,100.
Over $2,600 but not over $3,100	$125, plus 15% of excess over $2,600.
Over $3,100 but not over $3,600	$200, plus 16% of excess over $3,100.
Over $3,600 but not over $5,600	$280, plus 18% of excess over $3,600.
Over $5,600 but not over $7,600	$640, plus 21% of excess over $5,600.
Over $7,600 but not over $9,600	$1,060, plus 24% of excess over $7,600.
Over $9,600 but not over $11,600	$1,540, plus 27% of excess over $9,600.
Over $11,600 but not over $13,600	$2,080, plus 32% of excess over $11,600.
Over $13,600 but not over $15,600	$2,720, plus 36% of excess over $13,600.
Over $15,600 but not over $17,600	$3,440, plus 39% of excess over $15,600.
Over $17,600 but not over $19,600	$4,220, plus 42% of excess over $17,600.
Over $19,600 but not over $21,600	$5,060, plus 45% of excess over $19,600.
Over $21,600 but not over $23,600	$5,960, plus 48% of excess over $21,600.
Over $23,600 but not over $27,600	$6,920, plus 50% of excess over $23,600.
Over $27,600 but not over $33,600	$8,920, plus 53% of excess over $27,600.
Over $33,600 but not over $39,600	$12,100, plus 55% of excess over $33,600.
Over $39,600 but not over $45,600	$15,400, plus 58% of excess over $39,600.
Over $45,600 but not over $51,600	$18,880, plus 60% of excess over $45,600.
Over $51,600 but not over $61,600	$22,480, plus 62% of excess over $51,600.
Over $61,600 but not over $71,600	$28,680, plus 64% of excess over $61,600.
Over $71,600 but not over $81,600	$35,080, plus 66% of excess over $71,600.
Over $81,600 but not over $91,600	$41,680, plus 68% of excess over $81,600.
Over $91,600 but not over $101,600	$48,480, plus 69% of excess over $91,600.
Over $101,600	$55,380, plus 76% of excess over $101,600.".

"TITLE I—PERMANENT INCREASE IN AMOUNT OF STANDARD DEDUCTION AND TAX RATES".

On page 26 strike out lines 8 through line 10 and insert in lieu thereof the following:

On page 26, line 11, strike out "SEC. 201." and insert in lieu thereof "SEC. 101.".

On page 43, lines 8 and 9, strike out "201 and 202" and insert in lieu thereof "101 and 201".

On page 47, immediately before line 11, insert the following:

"TITLE II—SIMPLIFICATION OF INDIVIDUAL INCOME TAXES".

On page 47, line 11, strike out "SEC. 202." and insert in lieu thereof "SEC. 201.".

On page 58, line 9, strike out "SEC. 203." and insert in lieu thereof "SEC. 202.".

On page 59, line 24, strike out "SEC. 204." and insert in lieu thereof "SEC. 203.".

On page 61, line 21, strike out "SEC. 205." and insert in lieu thereof "SEC. 204.".

On page 62, lines 9 and 10, strike out "201 and 202" and insert in lieu thereof "101 and 102".

On page 62, line 16, strike out "201 and 202" and insert in lieu thereof "101 and 201".

On page 64, line 11, strike out "SEC. 206." and insert in lieu thereof "SEC. 205.".

On page 64, line 13, strike out "201, 202, and 204" and insert in lieu thereof "101, 201, and 203".

On page 64, line 16, strike out "205" and insert in lieu thereof "204".

On page 2, in the table of contents, strike out the matter relating to title I and insert in lieu thereof the following:

"TITLE I—PERMANENT INCREASE IN AMOUNT OF STANDARD DEDUCTION AND TAX RATES

"SEC. 101. Change in tax rates and tax tables to reflect permanent increase in standard deduction.

On page 2, in the table of contents, strike out "TITLE II—REDUCTION AND" and insert in lieu thereof "TITLE II—".

On page 2, in the table of contents, strike out "SEC. 201." and insert in lieu thereof "SEC. 101.".

On page 2, redesignate the items relating to sections 202 through 206 as relating to sections 201 through 205.

Mr. BAKER. Mr. President, will the Senator yield briefly to me?

Mr. DANFORTH. I yield 5 minutes to the Senator from Tennessee.

Mr. BAKER. Mr. President, it is my privilege at this time to rise in support of the amendment offered by the distinguished Senator from Missouri (Mr. DANFORTH) and the distinguished Senator from New York (Mr. JAVITS).

It is no suprise to the Members of this body to know that this is a part of the so-called Republican economic package. There were seven bills involved in that undertaking, which were submitted after deliberation by the conference of Republicans earlier this year. I am sure my colleagues will forgive my pride in stating that the decision of the conference was virtualy unanimous. There were 37 Republican Senators who voted for the entire package; there was 1 Senator who abstained from voting in favor of it.

The keystone and centerpiece of that economic package, Mr. President, in my view, is the amendment now pending before the Senate. The importance of it cannot be overstated in terms of its relevance to the current economic situation in this country, and in terms of legislative and governmental policy which will be appropriate to the economic situation as it is almost certain to be in the next few years.

It is truly remarkable that Republicans of divergent philosophies, ideologies, and points of view would agree with such unanimity on the approach that should be taken in this economic matter; but they have. And in agreeing on the approach, they have by implication agreed on the problem as well. That is the question of the appropriate, desirable stimulation of the American economy.

There is no doubt in my mind that the majority of Americans as well as the majority of Republicans and Democrats agree that the present level of economic activity, and particularly the present level of unemployment, is socially, philosophically, and governmentally unacceptable. There is no doubt in my mind that most Americans would agree that stimulation is necessary in order to produce a more desired economic situation. The unemployment level in January of this year, when the Republican economic package was adopted and submitted to the Senate for consideration in the series of bills which I was privileged to introduce on behalf of the conference, was 7.2 or 7.3 percent. The level of unemployment now, in April, as we approach the month of May 1977, according to the latest statistics and figures, is still about the same, something over 7 percent.

The economy as a whole has shown improvement in the last several months, but it is also clear that it is not improving at a rate which relieves us of the obligation to address ourselves to appropriate, cautious, careful, and prudent stimulation.

In a word, Mr. President, the same circumstances that impelled 37 Republicans to agree—I believe really 38 Republicans to agree on the fundamental principles involved—in suggesting that prudent stimulation was in order then, are just as relevant and cogent today.

Mr. President, this is a different ball game, however; a different set of legislative circumstances obtain at this moment primarily because the President of the United States has changed his point of view on the administration's policy for economic stimulation. The President first proposed, as we all know, a tax rebate of $50 to most Americans. The proposal was carefully examined in the Republican conference; it was extensively discussed among all of us in this Chamber, in the cloakrooms, and in private conversations. Many of us had views on the concept of a tax rebate that we freely expressed at that time. On my own part, I suggested that the tax rebate was a novel idea when President Ford proposed it and Congress adopted it, but that in my judgment it did not work very well; it did not have the desired stimulative effect, it was expensive, and it was not particularly cost effective. I thought we should learn from that experience, and, therefore, I was opposed this time to a tax rebate proposal.

But I also indicated that I felt as the distinguished authors of this amendment feel, that the economy requires stimulation, that the middle-income taxpayer and the low-income taxpayer in this country deserve a break, and it has been a long, long time since they have had a break. They need more than just the shot in the arm of a tax rebate; they need somethng they can depend on, something that will encourage them to order and arrange their fiscal affairs on a more permanent basis, presumably with a more permanent stimulative effect on the productive economy.

So I enthusiastically offered my support, in conversation with my colleagues and particularly the distinguished authors of this amenment, in favor of the permanent tax cut. Now, of course, the President of the United States has withdrawn his proposal in support of the $50 rebate, and has substituted nothing in its place.

Mr. President, I think that is the worst of all possible worlds. It is not going to founder the Republic. We are not going to suffer acute financial distress because of it. But I think from the standpoint of fiscal policy, it is a mistake on the administration's part to first offer the $50, and then withdraw it. I suspect some of the taxpayers may have come to depend on that. Some of them may even have spent it. To offer it and then withdraw it, and offer nothing in its place—I had really hoped, Mr. President, that the administration might, after it withdraw its own proposal for economic stimulation, come forward and say, "Look, we think that idea for a permanent tax cut is pretty good."

I had hoped the administration might say something to that effect, and I suspect the administration will propose a permanent tax cut later, but I had hoped they would come forward now and say, "The Republicans and the Democrats have their differences, but we think they have a good idea, and we are glad to support it."

The PRESIDING OFFICER (Mr. CLARK). The Senator's 5 minutes have expired.

Mr. BAKER. Could I have 2 more minutes?

Mr. DANFORTH. I yield the Senator 2 additional minutes.

Mr. BAKER. But that did not occur, so we are left with no alternative at all except the Republican initiative for a permanent tax cut.

Mr. President, I very much hope that our colleagues on the majority side of the aisle, or many of them, can see their way clear to support this proposal. I think the reason and the rationale for it is as great today as it was when it was offered. I hope they will not permit a vacuum to occur in the fiscal stimulation that we should offer the economy. I hope we will not make a mockery of the budgetary process which we have put in place here, and which is distorted by the withdrawal of the President's $50 rebate.

From that standpoint, what we have done is to provide a surplus of unspent moneys, although there is a deficit in terms of the total Federal budget, which is uncommitted money authorized under the budget resolution and up for grabs; and I suspect, knowing us as I do, that we will probably spend it if we do not pass it on to the public in some sort of tax break.

Since the administration has not come forward with some alternative suggestions, allow me briefly to describe it. As a matter of relief for the taxpayer, it provides a tax reduction from 4 to 14 percent concentrated primarily on the lower and middle income taxpayers with incomes of $20,000 or less. This will have two principal effects on the American taxpayer: First, it will mitigate, if only slightly, the continuing inroads of inflation for those on whom the burden of inflation falls the heaviest. Second, it provides a measure of redress, again only slight, for the ever-increasing direct burden of the American family which has almost doubled since the mid-1950's. If for no other reasons than these, this small measure of relief would be worth while.

But these are not the only reasons, because there are important implications to a permanent tax reduction that increases the real spendable income of the American taxpayer and consumer. Although the Nation continues to enjoy a substantial recovery from the recent economic recession, the twin specters of inflation and unemployment remain very much with us, and the prospects for continued economic growth beyond even the immediate future are not encouraging. By itself, this measure will not turn that prospect around, and there will be other measures required; but at least this is one step in the right direction.

Increased spendable income for the taxpayer equates to increased consumer confidence and willingness to recommit income to the economy. This greater degree of confidence on the part of the consumer will, in turn, inspire greater production and investment in increased production capacity necessary for noninflationary economic growth.

Without this increased growth, we have little hope of seriously reducing unemployment below the present level of over 7 percent by 1978. Without this ad-

ditional stimulus and with the presently anticipated economic growth, we can hope to do little more than hold our own with unemployment and have almost no prospect of absorbing into the economy any meaningful percentage of the structurally unemployed.

Perhaps most importantly, Mr. President, it demonstrates to the American public that this Congress can and will provide meaningful and realistic policy for the future economic well-being of the Nation. We owe the public this demonstration and I urge my colleagues to consider well that obligation and vote in favor of this amendment.

I thank the Senator from Missouri for yielding me this time as we approach the end of the debate, and I wish him good luck on the final outcome.

Mr. DANFORTH. Mr. President, the amendment now pending improves on the bill reported by the Finance Committee in the following respects:

First of all, it increases employment by 350,000 additional jobs by the end of 1978 over and above the bill now before us.

Second, this amendment would provide relief for the average taxpayers, or taxpayers with adjusted gross income of less than $20,000 a year, and it would accomplish these two objectives, these two improvements, with only a very negligible effect on the rate of inflation.

The purpose of the bill now before us is still the creation of jobs. It is an economic stimulus proposal. Despite the fact that in the month of March the economy improved somewhat, still the most recent economic forecasts are not as heartening as we might like. Under the most current forecasts by the administration, those which were announced last Friday, unemployment in 1978 will still average 6.4 percent. That is, more than 6 million Americans who want work will not be able to find work in 1978.

It is estimated that the amendment which is now before us would create 350,000 more jobs in 1978 than the bill reported by the Finance Committee. This estimate was made by a staff of the Budget Committee of the Senate and concurred in by the Congressional Budget Office staff.

This bill offers relief for middle-income and low-income taxpayers. In the arguments which have been made before the Senate in the last 4 days, ample evidence has been presented concerning the existing economic status of people who have incomes between the $10,000 and $20,000 level. People in that general bracket who receive $1 in additional salary lose between 40 cents and 50 cents of that extra $1 to either Federal taxes, to State and local taxes, to social security taxes, to inflation, or to a combination of those factors.

The whole thrust of the amendment now before us is to target the benefits for people who have adjusted gross incomes of $20,000 a year or less. In this amendment, 74.1 percent of the benefit would be for people with adjusted gross incomes under $20,000, whereas only 2.2 percent would be for the benefit of those with adjusted gross income of $50,000 or more.

The chairman of the Finance Committee has pointed out, with some truth, that the bill as it now stands without this amendment does provide some relief at least for people in the middle and lower tax brackets. However, the amount of tax saving provided for people who have incomes between $10,000 and $20,000 a year, as the bill is now before us, is less than half of the tax break they would get by virtue of the amendment now pending.

In the bill as it was reported from the Finance Committee, other than extending the existing tax law, there is no new tax benefit for individual taxpayers who itemize their return. People earning $20,000 or less a year, 8.4 million taxpayers, will continue to itemize their returns next year. Therefore, these 8.4 million people with adjusted gross incomes of $20,000 a year or less get nothing out of the bill without the pending amendment.

Furthermore, the bill as it now exists would increase the taxes for 1.75 million Americans who are single people with adjusted gross incomes of $13,750 or more per year. So, for a substantial number of people, including middle income people, the bill as it now exists, as it came out of the Finance Committee, would either do nothing for them, other than extend the existing tax system, or it would actually increase their taxes.

The amendment presented by the Senator from New York and me would solve this problem by offering tax reduction to all taxpayers, but especially targeted to taxpayers in the middle and low income groups.

Furthermore, even for those people who would be benefited by the change in the standard deduction, it is important to note that that benefit would be short-lived. For the average taxpayer the amount that his taxes would be reduced by the change in the standard deduction alone would be wiped out in a period of approximately 1 year by the effect that inflation has in pushing that person into a higher bracket of taxation. That is, without any activity at all on the part of the Congress, when people have their incomes adjusted to compensate for the increase in the rate of inflation, without any change in real income, they are pushed into a higher tax bracket and government takes more from them. By the end of a year, if in this bill we are left with nothing more than an adjustment in the standard deduction, the average taxpayer is going to be paying a larger percent of his income a year from now in taxes than he is paying now.

What this particular amendment would accomplish is to give the average taxpayer at least 3 or 4 years before inflation pushes his tax bracket up to where it is right now.

I yield to the Senator from New York.

Mr. JAVITS. Mr. President, I yield myself 5 minutes.

Mr. President, the importance of the vote today has been very widely noted, and I think it is important. The reason for its critical nature, in my opinion, is that the circumstances not only have changed but the administration, which is the principal opponent which we have in this matter of this particular vote, admits that they have changed, and that they have changed in such a way as to make this approach which we are asking the Senate to accept more valid than ever it was before.

First, the President recognized that it was not a matter of stimulating immediate consumer confidence because he said, in withdrawing the $50 rebate idea, that consumer confidence, in his opinion, was returning. Therefore, we did not need the $50 rebate.

But he also went on to send his three top financial people up here as recently as yesterday and they completely revised their estimates to indicate that while consumer confidence is revived momentarily and, therefore, we do not need the shot in the arm or the pep pill, the $50 rebate, the longer-range situation—and that not so long range at that, to wit, 1978—has very materially decreased in terms of expectations for the United States.

All his people up here did—Mr. Lance, Mr. Blumenthal, and Mr. Schultze—was to fail to supply the answer to the question they themselves presented.

They said, one, real gross national product could fall, compared to their own projection as recently as February, for the calendar year 1977 to 4.9 percent as against the February prediction of 5.4. And that ain't hay, Mr. President. That is $6.2 billion less in real gross national product in 1977.

They said the inflation rate would materially rise from 5.3 percent, predicted in February, to 6.7 percent. This, Mr. President, is to be compared also with a material increase expected in 1978—these are the President's own men speaking—to 5.6 percent inflation compared with their forecast of 5.2. Then, to completely confound the position which they themselves are taking against a personal income tax rate cut, they opine that the average unemployment rate this year would be 7.2 percent, something over 7 million unemployed, rather than 7.1 percent, which was the earlier forecast.

Mr. President, the administration is certainly not giving the proponents of the amendment the better of it, you can be sure of that. They are giving us the worst version of the figures. Yet, even at the worst, because of the tradition of our country—that when you are a high official, you have to come through with the facts, according to what Government departments have them—the facts are as I have stated: to wit, real gross national product down; Consumer Price Index inflation up very materially; unemployment not down, but up.

Under those circumstances, what are we to do? Well, the Senator from Louisiana (Mr. LONG), my beloved and distinguished colleague, chairman of the Committee on Finance, says, "What you are to do is sit and wait until we give you a tax reform act." That is really the only answer that we have had in the course of this debate. But Senator DANFORTH has analyzed that the sitting and waiting proposition means 1 to 3 years.

The last tax reform bill, passed in 1976, took 3 years to pass.

Let us assume that under the pressure which we are under now, this bill will take 1 to 2 years. But, Mr. President, in the meantime, the American economy, by the findings of the administration itself, is in a good way to deteriorate and to get us into a worse recession than we had before.

We had a foreign visitor here, Mr. President, just yesterday—I heard him myself—Denis Healey, Chancellor of the Exchequer of the United Kingdom. They are pretty sensitive to the currents that are in the world. Healey suggested that we are facing the danger of a very serious recession in 1978 unless the more affluent countries—the United States, West Germany, and Japan—can achieve higher economic growth targets.

Mr President, what do we have to offer the American people to achieve higher economic growth targets? We have a personal income tax rate cut to the very middle-income families, who produce the buyers of the big-ticket items, the investors in securities, the professionals, the doctors, the lawyers, the engineers. That has worked before in tax cuts which have produced almost invariably more revenue than the cuts themselves have cost. We have submitted very adequate lists of the history of previous tax cuts and subsequent revenue receipts on that score.

Mr. Healey is a very distinguished foreign visitor, a very keen observer, very highly honored. He warns us about the very thing which we warn the Senate about when we ask it to adopt this amendment.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. JAVITS. I yield myself 2 additional minutes.

Finally, Mr. President, the burden of taxation on the American people, as my colleague (Mr. DANFORTH) has very seriously explained, is the increasing of income, which puts them in higher brackets. I do not like indexation. I think it gives automaticity to inflation, which we have seen in other situations in other countries. But not to be against indexation is not the same thing as not understanding when you are materially curtailing the purchasing power of the people in an unnecessary way. That we are doing through the tax take today. Let us take an average American family, a family with a $12,000 income—that is, an income for tax purposes.

In 1975, such a family paid 8.7 percent of its income in Federal taxes. Under current law, that percentage would increase to 10.5 percent. This proposed tax cut, combined with the proposed changes in the standard deduction, which we subsume and adopt in our amendment, would bring the tax liability to what it was in 1975; further proof of the fact that all we are doing is adjusting for inflated dollars and further proof of the fact that, by doing so, we would be very materially adding to the income for purposes of spending of that very type of family—to wit, in the $12,000 a year bracket, which is considered to be the most analogous to the great rank and file of the American buyer.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. JAVITS. Mr. President, I yield the floor momentarily.

I yield 5 minutes to the Senator from Nebraska.

Mr. CURTIS. Mr. President, we are here discussing this amendment because we think it is good for the economy of the country, and because we think that it will not cost the Treasury anything. Like every other problem in multiplication arithmetic, there are two factors. You multiply one by the other. It is just as important that we have more income, more activity to apply the tax rate as it is to have an adequate rate. Therefore, I believe that, within moderation, tax relief can be granted at times and we actually pick up revenue, rather than lose revenue, as is sometimes predicted.

We can carry that too far. I heard of a young man who read about a gadget to put on his automobile that would save 10 percent of his gasoline, so he bought 11 of them and put them on and expected to have to pump out gasoline after driving a few miles. But within reason we can add to the hopes, the planning, the risking, and the business ventures of the country, as well as to the zeal of workers, whether it is an additional moonlighting job or piecework, or what, and we get more revenue. I believe that. I think the historical figures bear it out.

There is another very impelling reason, and we have touched on it many times before. In these days of inflation, increased prices, wage levels, and everything else, individuals are handling more money than ever before, but their relative position has not improved, because this increase has put them in a higher tax bracket. Therefore, they are entitled to adjustments.

Also, this amendment is very symbolic. A gentleman who could command more press than any other man in the world told the American people that they were going to have a $50 tax rebate. Even if it had gone through, it was not that. It was going to go to millions and millions of people who do not pay any taxes. It was a distribution of money out of the Treasury. So one of the functions of this amendment is to point up the error of that presentation. Although I believe it will not be passed, it would be good for our economy and good for the Treasury if it is.

The human needs that must be met, because people are short of food or shelter or what not, should be met through our welfare programs, not under a guise of something that we say is tax law but really is not. The only way you can grant tax relief is to deal with taxpayers. This is what this amendment does. It gives to those forgotten Americans who labor, produce goods, support their families, carry on the work in our communities, make contributions to churches and charities and other worthwhile things—those are taxpayers.

They are the forgotten, the abused. This says, "We're going to give you just a little bit of tax relief."

Mr. President, I am frank to admit that if I thought this would not spur revenue and add to our deficit, I could not support it. If I did not feel impelled to do something in the way of an inflation adjustment, I could not support it. But both of those factors are here. They are compelling. I hope we can have a very substantial vote in support of this measure.

The PRESIDING OFFICER (Mr. LEAHY). The Senator's 5 minutes have expired.

Mr. CURTIS. Mr. President, I yield the floor.

Mr. JAVITS. Mr. President, I yield 5 minutes to the Senator from Illinois (Mr. PERCY).

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I am very pleased, indeed, that the distinguished Senator from Connecticut (Mr. RIBICOFF) is on the floor, that Senator CURTIS is here, and my distinguished colleague from New York (Mr. JAVITS) and Senator DANFORTH, who have authored the existing amendment.

First, I commend the President for withdrawing the $50 rebate. I think that he, by so doing, was extraordinarily wise, both politically—he has all the credit and none of the blame now—and economically.

It was not needed because it was not the right way to do it. I believe the distinguished Senator from Connecticut (Mr. RIBICOFF) must have known in his heart the Republicans were right on that issue.

We were joined by a number of Democrats who expressed privately their own conviction to the administration that the rebate was the wrong thing to do at this time.

I think it was probably a combination of factors. Certainly, I talked to a number of cabinet officials and indicated we very strongly opposed that.

Senator HANSEN and I were selected by the minority and those who opposed the tax rebate to lead that fight. I was never happier to be relieved of a job in my life when, during the recess, I learned the President receded on that point. I respect his wisdom in so doing.

But I hope the logic of this amendment will appeal to the distinguished Senator from Connecticut because he is a man of great logic. He is a man who does not go partisan routes.

If I could have the distinguished Senator's attention for just a moment, I commend him particularly for his statements yesterday in marking up the energy reorganization bill, that we can all accept advice and counsel from the administration, but we are a separate branch of Government.

Thank God, at certain times during the course of the Nixon administration, let us say, there was no partisanship from many of us on this side of the aisle. We recognized and appreciated the fact that we were set up constitutionally to be separate and we would be abrogating our responsibility to just go along.

I respect very much the influence that Senator RIBICOFF must have had on the administration on the rebate. I hope our arguments on the permanent tax cut will be appealing to him.

I realize this puts many Democrats in a very difficult position. But on the other

hand, this tax bill has to be carved out by the Congress of the United States. Constitutionally, it is very clear, indeed, who has the primary responsibility in this area—the Congress of the United States.

We can listen to the best advice we can get from the executive branch of Government, but the buck stops right here when it comes to taxes.

Mr. RIBICOFF. Will the Senator yield?

Mr. PERCY. I am happy to.

Mr. RIBICOFF. First, I do appreciate the kind comments.

I never thought the tax rebate was a good idea, nor many things in the energy program. I do not think a rebate on automobiles with high mileage is justified.

My Connecticut upbringing makes me feel uneasy giving money to people for what they should do for their own interest. It is hard for me to understand why we should give anyone $400 back for buying an automobile that gives 36 or 37 miles to a gallon.

I am concerned when I know, as the Senator does, that we are going to need a trillion dollars for developing ultimate sources of energy and research for mass transit, so why we do not use that money for that particular purpose with a managing trust fund.

There will be differences. May I say that I am at a loss to understand where the Senator from Illinois stands on some of my differences with the administration on the Department of Energy bill. I thought the Senator from Illinois was with Senator JAVITS and myself and I am a little confused as I read this morning's newspapers.

The PRESIDING OFFICER. The 5 minutes have expired.

Mr. JAVITS. Mr. President, may I suggest to Senator RIBICOFF that they have not used any time. Could he yield time?

Mr. RIBICOFF. Mr. President, I will use it on my time.

So there are these problems.

I have one concern with the proposal of the distinguished Senator from Missouri, for whom I have come to have a fantastically high regard in the short period of time I have known him. I have observed his comments. I am fortunate in serving with him both on the Finance Committee and Governmental Affairs.

My prediction is in the years ahead that he will be one of the most constructive Senators in this whole body.

But what concerns me at this time is the feeling we do need a basic tax reform proposal and by accepting the proposal of the Senator from Missouri and the Senator from New York in their amendment, we will really shunt it aside. That is the one concern I have.

It is not a question of economics, but whether it is premature at this time.

My feeling is that we should not always listen to the President or to members of the executive branch. They are entitled to their point of view, but we do have a definite duty of developing our own program, our own ideas, and should not hesitate, on whichever side of the aisle we are, to push them along.

Mr. JAVITS. Mr. President, I yield 3 additional minutes.

Mr. RIBICOFF. We will be pleased to yield on this side. I am sure we have plenty of time, if the Senator from New York needs it.

Mr. JAVITS. I thank my colleague. We will, if we need it.

Mr. President, I yield 3 additional minutes.

Mr. PERCY. We will deal separately with the energy reorganization bill.

I would like to indicate my very strong support for the pending amendment. I think a permanent tax cut in individual income tax rates, concentrated on middle income taxpayers, makes very good economic and very good social sense at this time.

I do not see why, when the evidence is so overwhelming, we should wait for some future day when we will reform our taxes when we have a tax bill before us that is the Tax Reduction and Simplification Act of 1977, and this certainly fits right into the patterns of this.

I do believe the economy would benefit and we need a stimulant now from the extra boost and confidence that a permanent cut in tax rates would generate.

I say this having spent most of my life convincing people to give up their money for not a necessity, but a purchase, and a type of purchase we can either purchase or not purchase, as we feel compelled. You do not necessarily need it, but do you want it?

Our whole job is somehow to stimulate the private sector, to get this economy going again. The question is, do you do it through the private sector and let people spend their own money, or do you put into effect gigantic public works programs? We have decided to go both routes.

I am simply saying that the tax rebate was a bad idea. Here is a good idea. I have learned that the American public spends on confidence in future income—not $50 in their hand today, but whether they are going to have this tax reduction in the future or whether, in effect, we are freezing the rates and they are going to be paying higher and higher taxes in the future and have less and less spending money of their own.

It is for this reason that I voted for increasing business investment and employment incentives.

The kind of spending that that proposal and the earning proposal would generate is important to the economy continuing on a steady course of growth.

While the economy's progress in recent weeks has been encouraging, there are some areas in which there is continuing cause for concern. A permanent tax cut would address these problems. First, the unemployment rate for the year is now estimated to average 7.2 percent by the administration. The Chase econometric forecast estimates a fourth quarter rate as high as 8.3 percent. Second, the rate of capital investment is not sufficient to assure sufficient capacity as the economy reaches the recovery level and we approach full employment. Third, our productivity growth is disturbingly low relative to our historical growth and the current rate of growth in the other industrialized nations of the world.

The Senator from New York (Mr. JAVITS) has been on that subject as long as I have known him. He recognizes that here is a stagnation in our growth that imperils our competitive position abroad, imperils jobs at home, and is an ominous sign for the future unless we turn it around.

A permanent tax cut would address these problems in two vital respects. It would put additional money in the hands of private sector consumers and it would generate the confidence necessary to induce investment and purchase of durable goods.

The ripple effect of private expenditure is far greater than that of Government expenditure. Expenditure by a person in a home means home furnishings, appliances, carpeting, and so forth.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. PERCY. Mr. President, will the Senator yield me 3 additional minutes?

Mr. JAVITS. I yield.

Mr. PERCY. Those ripple effects are the important considerations we have to take into account as we look at the effect of a permanent tax cut.

To call this proposal a real stimulus proposal is, in a sense, a misnomer. In reality, its effect would be merely to help the American taxpayer stay even.

Earlier this year, I wrote to several leading economists to ask their views on the merits of the various economic stimulus proposals that had been advanced. Alan Greenspan, formerly head of the President's Council of Economic Advisers, responded that he did not believe any stimulus of consumer spending was necessary but that he did favor a cut in individual income tax rates to prevent the tax burden on the average family from rising as inflation pushes individual families into higher income tax brackets.

This phenomenon is easily documented. The marginal individual income tax rates were the same in 1976 as they were in 1967 and in the intervening time period, the personal exemption, standard deduction and several categories of itemized deductions were increased several times. Despite this, the effective tax rate has increase from 11 percent to 11.3 percent.

Inflation has caused personal income taxes to rise since 1967 despite paper lowering of tax liability. This is because the rate brackets, exemptions and allowable deductions have not increased with the rate of inflation. While a worker's income may rise enough to keep up with inflation, as his income increases he automatically enters a higher tax bracket and the real value of exemptions and many deductions decreases. Thus tax liabilities actually rise faster than inflation and real spendable income decreases.

For example, in 1975 the effective personal income tax rate on a family of four earning $8,000 was 4.3 percent; earning $15,000 was 10.7 percent and earning $30,000 was 16.5 percent. Following a 10-percent increase in inflation, the ef-

fective rates will be 5.5 percent, 11.4 percent and 17.6 percent, respectively.

The effect of this phenonemon on consumer's spendable income is a negative one and if we do not adopt the pending proposal, many, if not most, consumers will have less spendable income in real terms at the end of this year than they do now.

So that this is not a big give-away program. This, in effect, is to allow the American consumer to stand still and stay even, rather than regress and have a depressant effect on the economy.

In 1967 the average worker with three dependents had $101.26 in gross spendable weekly earnings. In August 1976, he had $179.94. But in terms of what 1967 dollars could buy, his income rose only to $104.68.

So while we may differ on how much stimulus of private spending is necessary, or whether such stimulus is necessary at all, I have heard no one argue that consumer spending power should be reduced. But this is exactly what will happen in the months ahead if the pending proposal is not adopted.

I commend my colleagues for their leadership in this matter and strongly urge my other colleagues to examine the substance of their argument and adopt the pending amendment.

I say to the distinguished chairman of the Committee on Finance, Senator LONG, who has returned to the Chamber, that he is the first person not to want to go on record as actually having a tax bill labeled "tax reductions" and have the net effect, if we do nothing, of increasing taxes and taking real income away from people simply because of the effect of inflation. In effect, if we do not adopt a permanent tax reduction, that is exactly what we would be doing.

I thank my distinguished colleague.

Mr. JAVITS. Mr. President, Senator DANFORTH and I deeply appreciate the fine analysis just made by Senator PERCY, as he generally does on matters of economic content, such as this.

Mr. TOWER. Mr. President, at the outset it should be recognized that the rebate and a permanent tax cut are not differing solutions to the same problem.

The rebate was proposed to provide a quick stimulus to a perceived lagging demand. When the economic and inflationary indicators jumped recently, they pulled the rug out from under the rebate by removing the justification for it.

Unemployment: Down to 7.3 percent in March;

Retail sales: Up 2.7 percent in February, up 2.4 percent in March;

Industrial production up 1.4 percent in March;

Estimates for annual rate of growth for GNP have risen;

Housing demand up;

Gold prices up;

Upsurge in commodity futures index; and

Advances in wholesale and consumer price indexes.

The permanent tax cut. on the other hand, is a long range solution to a long range problem, based on factors clearly apart from the rebate.

First, instead of stimulating only the demand side of the economic equation, a permanent tax cut would provide an incentive to suppliers as well. An across-the-board cut produces a balanced economic response, and avoids the pitfalls of economic tinkering.

Second, it would offset the effects of inflation, putting more money into peoples pockets, and increasing their incentives to work and invest. Greater take home pay makes an hour of work more rewarding relative to an hour of leisure. Overtime is accepted. Productivity increases. The cost of labor to the firm is reduced while at the same time providing more opportunities for growth.

Incentives to invest are also increased. With a lower overall tax bite, the demanded return on investment is thereby reduced. Projects formerly rejected, now seem promising and are reinstated. As stated in the minority report of the joint economic committee,

> All told, the increased work effort, savings, and investment resulting from the supply effects . . . have a large impact on real output. Getting new employees to work increases supplies of vitally needed products which helps stabilize prices.

Third, a permanent tax cut, unlike pump-priming rebates, is aimed at altering spending habits. Those capital expenses—the high-ticket items—which remain unaffected by a rebate, are directly stimulated simply because their cost is lowered. Additionally increased capital is made available to business.

Investment spending has shown a lackluster performance in the current expansion. Real business capital investment in the fourth quarter of 1976 was nearly 11 percent below that of the fourth quarter of 1973 and only 7 percent above the low point of the business cycle reached in the third quarter of 1975. By the seventh quarter of previous business recoveries, business capital investment had increased on the average of 15 percent after the low point had been reached.

Capital spending needs to be stimulated not only to sustain the present economic expansion but to meet long-run capacity requirements that are needed to insure rising real incomes, meaningful and productive employment opportunities, adequate energy supplies from domestic sources and a cleaner environment.

A number of studies have shown that, in coming years, the private sector must substantially increase its capital investment if the Nation is to achieve its goal of maximizing productive employment and meeting its investment needs. Recent trends in investment spending have been extremely disappointing. Business fixed investment presently represents less than 10 percent of our gross national product. This is down from a high of roughly 11 percent just 10 years ago. Even with substantial increases in spending this year, the ratio of capital spending to GNP will remain under 10 percent, which is far below the ratio that is desirable for long run sustained economic growth. The result has been a marked decline in labor productivity since the mid-1960's, which has added to the upward cost pressures on prices.

It has been estimated that an adequate level of capital spending would be about 12 percent of our Nation's output. This is the level of spending that would be needed if we are to achieve full employment and meet the environmental and energy objectives we desire. Failure to meet these investment needs will result in a loss of job opportunities, higher unemployment, and greatly increased inflationary pressures.

Fourth, a permanent tax cut is needed simply to lift the yoke off our citizenry.

In the early sixties, only 3 percent of all tax returns were affected by marginal tax rates above 30 percent. Today, nearly a third of all tax returns are affected by these rates. Furthermore, the Office of Management and Budget has predicted that within the next 5 years taxes will increase by at least 25–30 percent simply because of inflation pushing people into higher brackets.

Economists generally agree that the maximum level of taxation which could be sustained without serious adverse effects on incentives for growth is 25 percent of national income.

Today, the total tax burden in the United States is somewhere over 40 percent and rising rapidly. Unless the tax burden is reduced, we could soon reach a situation where the average American will be giving back to Government in taxes over 50 percent of his or her earnings each year.

A tax cut, coupled with fiscal responsibility, is the quickest and cleanest way to reduce "big government"—a state of affairs that everyone deplores, but which few are willing to challenge. The tax cut, unlike the rebate, is neither pablum nor placebo, but an effective dose of what the patient needs.

If we are to realize our potential as a nation we must permit the energy, ambitions, productivity, and drive of the American people to continue to operate in a free, and unencumbered society.

Last, Mr. President, let us look at how much this will cost, and whether or not it will be inflationary.

Estimates indicate the cost to be approximately $10 billion for fiscal years 1977 and 1978. This is very modest indeed. Economic studies show the inflationary impact will be minimal.

Additionally, history of tax cuts in the past indicate that the reserves are quickly made up through increased economic activity.

Mr. President, the permanent tax cut is a long range solution to a long range problem. Given time, it will make our economy healthy again by reducing the tax bite of a voracious Government.

Mr. JAVITS. Mr. President, I yield 3 minutes to the distinguished Senator from Delaware (Mr. ROTH).

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. ROTH. Mr. President, I am deeply concerned about the state of the economy. In my judgment, the most important problem this Congress and the new administration faces today is, as our

former President Kennedy said, to get our economy moving again.

I was pleased when the President withdrew his rebate proposal, because it was the wrong answer. In my judgment, what we need today is a long-term solution to our long-term problems.

I was happy to hear the senior Senator from New York yesterday warn Congress about the state of the economy from the long-range point of view.

I was very interested in reading in the newspaper this morning that Britain's Chancellor of the Exchequer has warned against a global recession in 1978. I think his warning gives substantial argument to the need for a permanent tax cut, which will not only have a short-range beneficial effect on our economy but also, more importantly, will bring some life and buoyancy into the economy in the future.

In all candor, as my colleagues know, I favor a much broader-gaged permanent tax cut. I feel very strongly that it is important that not only those on the lower end of the economic scale, but also those who make $20,000, $30,000, and $40,000 a year be given some tax relief because of the pernicious effect that inflation has had on all Americans' standard of living.

I urge the Senate today to support the proposal that has been submitted by the senior Senator from New York and the junior Senator from Missouri, because I think it is a substantial step in the right direction. I believe we should go further. I shall see to it that the Senate has an opportunity to consider further relief for middle America.

I congratulate my colleagues who have developed this proposal as a very important step in the right direction. If we fail to act today, we are holding out no promise to the people who have been unemployed so long. This is one reason why I think it is so extraordinarily important that the permanent tax cut be enacted today, not 6 months or a year from now.

If we adopt this permanent tax cut today, we know there will be something like 600,000 jobs created by the end of 1978, by the end of next year.

So I disagree with those in the administration who have said, "Wait, we are going to come forward with our own proposal sometime this fall or next winter." We cannot afford to wait.

The people who have no jobs today need help now, and that is the reason, Mr. President, why I urge this Congress to provide some strong leadership, to take some initiative, and enact a permanent tax cut now.

I thank the Senator from New York for yielding to me.

The PRESIDING OFFICER. Who yields time?

Mr. DANFORTH. Mr. President, I would like to express the appreciation of the Senator from New York and myself to Senator ROTH for his very excellent remarks.

Much has been said about tax reform. In the past Presidential campaign the need for tax reform was, in fact, one of the main issues that was presented to the American people, and yet when we use the term "tax reform" oftentimes we are not told exactly what the phrase is supposed to mean.

We talk about unfairness in the Internal Revenue Code, and I think there is a basic feeling on the part of the American people that the Internal Revenue Code is unfair, that the tax system is unfair. But oftentimes we throw out that suggestion and we do not have any particular definition of what unfairness is supposed to mean.

To me the greatest unfairness of all, and the one which strikes most at our whole system, is that tax increases can be accomplished in this country not by representative government doing anything, not by any votes of the Congress of the United States, not by any act by the Congress signed into law by the President, but the people can have their taxes increased solely by the effect of inflation pushing them into a higher and higher tax bracket.

Each year, as a matter of fact, the Federal Government raises $6 billion in additional revenue simply because the ordinary citizen is pushed into a higher bracket by the effect of inflation.

Now, it is said if we have a permanent tax reduction we are foregoing in perpetuity additional tax revenues. I would like to dispute that concept because in a period of just a few years the average taxpayer is going to be paying more taxes because of the effect of inflation on his tax bracket than he will be saving as a result of this particular reduction.

So what we are really talking about are maybe 3 or 4 years of relief for the middle-income and low-income taxpayers from the effect that inflation has on their tax rates.

The PRESIDING OFFICER. All time of the Senator from Missouri has expired.

Mr. JAVITS. Mr. President, I think the Senator from Louisiana will yield some time.

Mr. LONG. Mr. President, at the moment I have no requests for time over here, and I will address myself to the amendment in due course. I would be happy to yield some of my time. How much time would the Senator like to have?

Mr. DANFORTH. Three minutes.

Mr. LONG. I yield the Senator 5 minutes.

Mr. DANFORTH. I thank the Senator from Louisiana.

We are told we should wait for tax reform before we have a permanent tax reduction. But we are not told what reform we are supposed to be waiting for.

We are told that the administration is to have a tax reform package next September or October, but we are not told what is going to be in that package.

Yesterday, before the Budget Committee of the Senate, Charles Schultze, the Chairman of the Council of Economic Advisers, indicated that the tax reform will not be in place until 1979. So we are asked to wait for a minimum of 2 years for an unspecified reform, and not to pass a tax reduction now because reform is coming.

Yet, in 2 or 3 years from now, the effect of what we are doing now, if we accept this amendment, will no longer be very helpful because the Government will be making more as a result of inflation than we will be saving as a result of this cut.

Considering the fact that 75 percent or nearly that amount of the benefit of this amendment is directed at taxpayers with adjusted gross incomes of $20,000 a year or less, I do not believe that the group of middle-income taxpayers should be expected to wait 2 or 3 years before they get a tax cut.

Furthermore, considering the fact that this is a stimulus proposal, and that it would create, according to the Congressional Budget Office, 350,000 additional jobs over and above the bill that is before us now by the end of 1978, it seems to me we should not shut the door of employment on these 350,000 who could be employed if we increased the stimulus as a result of the tax reduction that has been proposed by Senator JAVITS and myself, that we should not shut that door of employment in the name of tax reform.

Mr. President, I yield the floor.

Mr. LONG. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator has 42 minutes until 12:40, and then he has an additional 10 minutes at that time.

Mr. LONG. How much time remains for the proponents of the amendment?

The PRESIDING OFFICER. Only 10 minutes which they get at 12:40.

Mr. LONG. I am somewhat at a loss to understand how the timing works out. It is now only about 11:58, and if the Senator from Louisiana has 22 minutes——

The PRESIDING OFFICER. Forty-two minutes; the Senator has 42 minutes.

Mr. LONG. I have 42 minutes?

The PRESIDING OFFICER. Plus 10 extra at 12:40, plus 10 minutes at that time for the opposing side, which would work out to 62 minutes.

Mr. LONG. Mr. President, I do not anticipate I will need the whole 42 minutes, and I will make a statement of position against the amendment. Others may want to have something to say, but in view of the fact that there are no other requests at this moment, I would like to make clear to the proponents of the amendment that I would be pleased to yield some of my time to them if they would like to speak further on it.

Mr. President, those of us who favor the bill and do not favor the amendment feel we have as much stimulation as is justified in the bill at this moment. This is particularly evident if one looks at the Government's fiscal problems. We think we provide enough stimulation with this bill which provides $6 billion in tax cuts by simplification and by increasing the standard deduction, which will be fed into the economy during the year, and which provides $1.4 billion on a full-year basis in an increase in the investment tax credit, and an additional $1.6 billion with the jobs credit proposal.

When one adds all that together, it adds up to an increase of about $9 billion a year in tax reductions or a further tax cut of about $9 billion on an annual

basis over and above the reductions which taxpayers are enjoying at this time. As Senators know, inflation causes taxes to go up and, of course, that is correct.

But, on the other hand, Mr. President, we have estimated that the effects of inflation will increase Government revenues by about $6 billion, and Senators will note that we have $6 billion of tax reductions in this bill in the increase in the standard deduction alone.

So, having retreated from the $50 tax refund, which it was generally agreed might bring about inflationary pressures, it was felt that we should not put the cost of the refund back in the bill with a further tax cut which might tend to be somewhat inflationary.

There is a further problem that is compelling insofar as the manager of the bill is concerned. There is no doubt in my mind that the President is anxious to fulfill his commitment to the American people to propose a major tax reform bill. If that bill is to become law and if we look at the history of other tax reform bills, it will have to entail a major tax reduction. To do it any other way, to try to raise as much money by tax increases as we lose by tax cuts on a tax reform bill tends to mean that you cannot pass the tax reform bill. This happens because there is far more resentment among those who pay more taxes as a result of a tax reform bill than there is appreciation among those who are going to pay less taxes. When you take up a major tax bill, first one item and next another stirs resentment among taxpayers who will have to pay more. The resistance builds. A tax reform bill which does not work out to an overall tax reduction simply cannot become law.

If we pass a $12 billion permanent tax cut now the administration is not going to be able to recommend further tax reduction, and the result would be that the hope of tax reform will be dashed. It could not occur. The American people have been promised that they are going to have a major structural change of a sweeping nature in the tax code. The Senate has confirmed very fine and able men who are to work in that area and who are working on it right now. If we pass a permanent cut now, we would be left in the unfortunate situation of being unable to deliver on that commitment just because of the realities of this Government, that is, experience dictates that for a major tax reform bill to become law, it must necessarily be a bill which entails an overall tax cut of a large dimension.

So, Mr. President, I hope that the amendment will not be agreed to for a number of reasons. One of them is that it prejudices tax reform for the future. Another is that it forecloses some of the options that we need to have available to us in connection with that tax reform.

And furthermore, Mr. President, I am convinced fully in my mind that if the amendment becomes part of the bill, and I would assume that the Senate conferees will be committed to support this amendment in conference, then it means that the bill will not even reach the President's desk because the House conferees will not agree to it and the conferees will be reluctant to yield on it. If it did reach the President's desk he would veto the bill. So all we would be doing is simply to engage in one of these exercises in futility where we talk about the tax cuts which the American people are going to get and then no one gets the tax cut.

Those on the other side of the aisle can well advocate what they would like to see done and when it fails to happen they can point the finger of scorn at the President and blame him for it because he vetoes the bill and his veto will not be overridden. There is not a chance on Earth it will be overridden. But we on this side of the aisle must bear more responsibility than that. Some of us have been around here long enough to have served under Democratic Presidents, and we know that after a President has been in office for 2 years or 4 years, the people, having heard what the Democrats and their candidate for President said in a campaign, expect something to happen.

After 2 years, all the fine speeches and commitments for tax reform go for naught and nothing happens. We talk about things. By the time we get through wrangling and filling the Chamber with oratory, the result is zero; and then the public will blame us.

So, we Democrats, whether we want to or not, are going to have to learn to measure up to a certain degree of responsibility over here on this side of the aisle now that there is a Democrat in the White House. We have a burden to try to help him to put forward a program.

So I would hope, Mr. President, that this amendment will not be agreed to.

If it is not agreed to, and I hope we can defeat it, I hope that our friends on the other side of the aisle will, nevertheless, work with us to try to make this into the best bill we can make of it. I hope that their habits of fiscal responsibility and statesmanship will not depart them merely because they are unable to win on a single amendment here in the Chamber.

They have had the frustration with which some of us are familiar of trying to do what they believe is best for the country and seeing it fail to happen. But I very much hope that they will do what I have tried to do from time to time, that is, to try to work together and arrive at an overall package which even though it does not contain everything I think it should, will, nevertheless, be a good tax bill for the country.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. LONG. I yield to the distinguished Senator from New York.

Mr. JAVITS. I do not pose as a leader of the Republicans, but on this particular case it is a fact that the conference and the ranking minority member have chosen Senator DANFORTH and me to put forward the Republican position. That is a fair statement.

So I have a reaction to what the Senator says.

I agree with the Senator. I do not believe that our side here will stand in the way of a constructive tax bill just because we cannot get what we think is best for the country. But I do think, too, that the President should draw a lesson from this. It would be superficial to say he really kind of jumped the gun in the statement that he is going to veto if this particular type of cut is put into a bill. In the first place, none of his three financial representatives would say that yesterday to the Budget Committee. On the contrary, they assiduously avoided it. And second, the President I think is in this learning process, and I am all with him and for him; I think the Senator knows that about me very well. We want him to succeed because that means the country succeeds. I think this is part of the learning process, too. If we are needed, as the Senator certainly assumes we are, in respect of a constructive tax bill, and we are not to clang the door shut because we do not get what we want, I think it is fair to say that a President should feel the same way and it would be superficial, and I would not argue it; when he changes his mind suddenly on the rebate he could easily change his mind on the veto. That is such a simplistic argument that it is unnecessary to make it. But I do think it is fair to say that we would have hoped the President would have said, "I am against cuts in the personal income tax rates the way they have been proposed. But as a President, as and if a bill comes to me and the time comes I will look it over and I will decide what I ought to do about it."

I just mention that because I suppose we are all in a learning process. We will get along with a new President, and he has to get along with us. I really hope that as he reads this—he is not going to read this RECORD; but he will hear about it and he will know what is going on—he too is instructed by it just as the Senator from Louisiana hopes that we are on this side of the aisle.

Mr. LONG. I thank the Senator.

Mr. President, I feel that the bill before us is really a product of bipartisan cooperation the way it is now. Some of us felt that this bill should have some incentive for employers to employ people and put them to work. When we voted on that issue, my vote was not what the President would have preferred, but it was the vote of the majority of the Senate. The position was also overwhelmingly supported by the majority of those on the other side of the aisle. I just hope that we will be able to work together point by point, item by item, on a package and an overall tax reduction bill which will advance the Nation's interest and which will also be something that everyone here can agree will be generally a good thing for the country.

Now, some people might not be for the investment tax credit, but hopefully they would be for the job credit, or for the standard deduction. Everyone can find something in this bill that he is very pleased about, that he likes, even though there are some things he might not like about it.

So I hope, Mr. President, that the amendment will not be agreed to. However, I assure those on the other side of the aisle that I am every bit as interested in working with them, and I believe the President also is, as they are in trying to

cooperate with those on this side of the aisle in trying to put together a tax reduction proposal and a tax reform proposal that will advance this Nation's interests.

I think both the majority and the minority have made very useful contributions to the bill before us, and I hope we can keep it in its present form when it reaches the President's desk.

I yield to the Senator from Missouri.

Mr. DANFORTH. Mr. President, I have further modifications in the tables contained in amendment No. 200 as modified, and ask unanimous consent that the amendment be further modified to include the changes in the tables that I am now sending to the desk.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment as further modified is as follows:

Beginning on page 32, line 1, up to page 37, line 1, in lieu of the material sought to be inserted by the committee amendment, insert thereof the following:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who make a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)), a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.
Over $3,200 but not over $4,200	12 percent of taxable income.
Over $4,200 but not over $5,200	$120, plus 13% of excess over $4,200.
Over $5,200 but not over $6,200	$250, plus 15% of excess over $5,200.
Over $6,200 but not over $7,200	$400, plus 16% of excess over $6,200.
Over $7,200 but not over $11,200	$560, plus 18% of excess over $7,200.
Over $11,200 but not over $15,200	$1,280, plus 21% of excess over $9,200.
Over $15,200 but not over $19,200	$2,120, plus 24% of excess over $13,200.
Over $19,200 but not over $23,200	$3,080, plus 27% of excess over $17,200.
Over $23,200 but not over $27,200	$4,160, plus 32% of excess over $21,200.
Over $27,200 but not over $31,200	$5,440, plus 36% of excess over $25,200.
Over $31,200 but not over $35,200	$6,880, plus 39% of excess over $29,200.
Over $35,200 but not over $39,200	$8,440, plus 42% of excess over $33,200.
Over $39,200 but not over $43,200	$10,120, plus 45% of excess over $37,200.
Over $43,200 but not over $47,200	$11,920, plus 48% of excess over $41,200.
Over $47,200 but not over $55,200	$13,840, plus 50% of excess over $45,200.
Over $55,200 but not over $67,200	$17,840, plus 53% of excess over $53,200.
Over $67,200 but not over $79,200	$24,200, plus 55% of excess over $65,200.
Over $79,200 but not over $91,200	$30,800, plus 58% of excess over $77,200.
Over $91,200 but not over $103,200	$37,760, plus 60% of excess over $89,200.
Over $103,200 but not over $123,200	$44,920, plus 62% of excess over $101,200.
Over $123,200 but not over $143,200	$57,360, plus 64% of excess over $121,200.
Over $143,200 but not over $163,200	$70,160, plus 66% of excess over $141,200.
Over $163,200 but not over $183,200	$83,360, plus 68% of excess over $161,200.
Over $183,200 but not over $203,200	$96,960, plus 69% of excess over $181,200.
Over $203,200	$110,760, plus 70% of excess over $201,200.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.
Over $3,200 but not over $4,200	12 percent of taxable income.
Over $4,200 but not over $5,200	$120, plus 14% of excess over $4,200.
Over $5,200 but not over $7,200	$260, plus 17% of excess over $5,200.
Over $7,200 but not over $9,200	$600, plus 18% of excess over $7,200.
Over $9,200 but not over $11,200	$960, plus 21% of excess over $9,200.
Over $11,200 but not over $13,200	$1,380, plus 22% of excess over $11,200.
Over $13,200 but not over $15,200	$1,820, plus 24% of excess over $13,200.
Over $15,200 but not over $17,200	$2,300, plus 26% of excess over $15,200.
Over $17,200 but not over $19,200	$2,820, plus 28% of excess over $17,200.
Over $19,200 but not over $21,200	$3,380, plus 30% of excess over $19,200.
Over $21,200 but not over $23,200	$3,980, plus 32% of excess over $21,200.
Over $23,200 but not over $25,200	$4,620, plus 35% of excess over $23,200.
Over $25,200 but not over $27,200	$5,320, plus 36% of excess over $25,200.
Over $27,200 but not over $29,200	$6,040, plus 38% of excess over $27,200.
Over $29,200 but not over $31,200	$6,800, plus 41% of excess over $29,200.
Over $31,200 but not over $35,200	$7,620, plus 42% of excess over $31,200.
Over $35,200 but not over $39,200	$9,300, plus 45% of excess over $35,200.
Over $39,200 but not over $41,200	$11,100, plus 48% of excess over $39,200.
Over $41,200 but not over $43,200	$12,060, plus 51% of excess over $41,200.
Over $43,200 but not over $47,200	$13,080, plus 52% of excess over $43,200.
Over $47,200 but not over $53,200	$15,160, plus 55% of excess over $47,200.
Over $53,200 but not over $55,200	$18,460, plus 56% of excess over $53,200.
Over $55,200 but not over $67,200	$19,580, plus 58% of excess over $55,200.
Over $67,200 but not over $73,200	$26,540, plus 59% of excess over $67,200.
Over $73,200 but not over $79,200	$30,080, plus 61% of excess over $73,200.
Over $79,200 but not over $83,200	$33,740, plus 62% of excess over $79,200.
Over $83,200 but not over $91,200	$36,220, plus 63% of excess over $83,200.
Over $91,200 but not over $103,200	$41,260, plus 64% of excess over $91,200.
Over $103,200 but not over $123,200	$48,940, plus 66% of excess over $103,200.
Over $123,200 but not over $143,200	$62,140, plus 67% of excess over $123,200.
Over $143,200 but not over $163,200	$75,540, plus 68% of excess over $143,200.
Over $163,200 but not over $183,200	$89,140, plus 69% of excess over $163,200.
Over $183,200 but not over $283,200	$102,940, plus 70% of excess over $183,200.
Over $283,200	$172,940, plus 70% of excess over $283,200.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	12 percent of taxable income.
Over $2,700 but not over $3,200	$60, plus 13% of excess over $2,700.
Over $3,200 but not over $3,700	$125, plus 15% of excess over $3,200.
Over $3,700 but not over $4,200	$200, plus 16% of excess over $3,700.
Over $4,200 but not over $6,200	$280, plus 18% of excess over $4,200.
Over $6,200 but not over $8,200	$340, plus 21% of excess over $6,200.
Over $8,200 but not over $10,200	$1,060, plus 22% of excess over $8,200.
Over $10,200 but not over $12,200	$1,500, plus 24% of excess over $10,200.
Over $12,200 but not over $14,200	$1,980, plus 27% of excess over $12,200.
Over $14,200 but not over $16,200	$2,520, plus 29% of excess over $14,200.
Over $16,200 but not over $18,200	$3,100, plus 31% of excess over $16,200.
Over $18,200 but not over $20,200	$3,720, plus 34% of excess over $18,200.
Over $20,200 but not over $22,200	$4,400, plus 36% of excess over $20,200.
Over $22,200 but not over $24,200	$5,120, plus 38% of excess over $22,200.
Over $24,200 but not over $28,200	$5,880, plus 40% of excess over $24,200.
Over $28,200 but not over $34,200	$7,480, plus 45% of excess over $28,200.
Over $34,200 but not over $40,200	$10,180, plus 50% of excess over $34,200.
Over $40,200 but not over $46,200	$13,180, plus 55% of excess over $40,200.
Over $46,200 but not over $52,200	$16,480, plus 60% of excess over $46,200.
Over $52,200 but not over $62,200	$20,080, plus 62% of excess over $52,200.
Over $62,200 but not over $72,200	$26,280, plus 64% of excess over $62,200.
Over $72,200 but not over $82,200	$32,680, plus 66% of excess over $72,200.
Over $82,000 but not over $92,200	$39,280, plus 68% of excess over $82,200.
Over $92,200 but not over $102,200	$46,080, plus 69% of excess over $92,200.
Over $102,200 but not over $152,200	$52,980, plus 70% of excess over $102,200.
Over $152,200 but not over $202,200	$87,980, plus 70% of excess over $152,200.
Over $202,200 but not over $302,200	$122,980, plus 70% of excess over $202,200.
Over $302,200	$192,980, plus 70% of excess over $302,200.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $1,600	No tax.
Over $1,600 but not over $2,100	12 percent of taxable income.
Over $2,100 but not over $2,600	$60, plus 13% of excess over $2,100.
Over $2,600 but not over $3,100	$125, plus 15% of excess over $2,600.
Over $3,100 but not over $3,600	$200, plus 16% of excess over $3,100.
Over $3,600 but not over $5,600	$280, plus 18% of excess over $3,600.
Over $5,600 but not over $7,600	$640, plus 21% of excess over $5,600.
Over $7,600 but not over $9,600	$1,060, plus 24% of excess over $7,600.
Over $9,600 but not over $11,600	$1,540, plus 27% of excess over $9,600.
Over $11,600 but not over $13,600	$2,080, plus 32% of excess over $11,600.
Over $13,600 but not over $15,600	$2,720, plus 36% of excess over $13,600.
Over $15,600 but not over $17,600	$3,440, plus 39% of excess over $15,600.
Over $17,600 but not over $19,600	$4,220, plus 42% of excess over $17,600.
Over $19,600 but not over $21,600	$5,060, plus 45% of excess over $19,600.
Over $21,600 but not over $23,600	$5,960, plus 48% of excess over $21,600.
Over $23,600 but not over $27,600	$6,920, plus 50% of excess over $23,600.
Over $27,600 but not over $33,600	$8,920, plus 53% of excess over $27,600.
Over $33,600 but not over $39,600	$12,100, plus 55% of excess over $33,600.
Over $39,600 but not over $45,600	$15,400, plus 58% of excess over $39,600.
Over $45,600 but not over $51,600	$18,880, plus 60% of excess over $45,600.
Over $51,600 but not over $61,600	$22,480, plus 62% of excess over $51,600.
Over $61,600 but not over $71,600	$28,680, plus 64% of excess over $61,600.
Over $71,600 but not over $81,600	$35,080, plus 66% of excess over $71,600.
Over $81,600 but not over $91,600	$41,680, plus 68% of excess over $81,600.
Over $91,600 but not over $101,600	$48,480, plus 69% of excess over $91,600.
Over $101,600	$55,380, plus 70% of excess over $101,600.".

On page 26 strike out lines 8 through line 10 and insert in lieu thereof the following:

"TITLE I—PERMANENT INCREASE IN AMOUNT OF STANDARD DEDUCTION AND TAX RATES".

On page 26, line 11, strike out "SEC. 201." and insert in lieu thereof "SEC. 101.".

On page 43, lines 8 and 9, strike out "201 and 202" and insert in lieu thereof "101 and 201".

On page 47, immediately before line 11, insert the following:

"TITLE II—SIMPLIFICATION OF INDIVIDUAL INCOME TAXES".

On page 47, line 11, strike out "SEC. 202." and insert in lieu thereof "SEC. 201.".

On page 58, line 9, strike out "SEC. 203." and insert in lieu thereof "SEC. 202.".

On page 59, line 24, strike out "SEC. 204." and insert in lieu thereof "SEC. 203.".

On page 61, line 21, strike out "SEC. 205." and insert in lieu thereof "SEC. 204.".

On page 62, lines 9 and 10, strike out "201 and 202" and insert in lieu thereof "101 and 102".

On page 62, line 16, strike out "201 and 202" and insert in lieu thereof "101 and 201".

On page 64, line 11, strike out "SEC. 206." and insert in lieu thereof "SEC. 205.".

On page 64, line 13, strike out "201, 202, and 204" and insert in lieu thereof "101, 201, and 203".

On page 64, line 16, strike out "205" and insert in lieu thereof "204".

On page 2, in the table of contents, strike out the matter relating to title I and insert in lieu thereof the following:

"TITLE I—PERMANENT INCREASE IN AMOUNT OF STANDARD DEDUCTION AND PERMANENT DECREASE IN TAX RATES

"Sec. 101. Change in tax rates and tax tables to reflect permanent increase in standard deduction and permanent decrease in tax rates."

On page 2, in the table of contents, strike out "TITLE II—REDUCTION AND" and insert in lieu thereof "TITLE II—".

On page 2, in the table of contents, strike out:

"Sec. 201. Change in tax rates and tax tables to reflect permanent increase in standard deductions."

On page 2, redesignate the items relating to sections 202 through 206 as relating to sections 201 through 205.

Mr. LONG. Mr. President, if there are no further requests for time at this point, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. LONG. I yield to the Senator from Delaware.

TIME LIMITATION AGREEMENT ON ROTH AMENDMENT

Mr. ROTH. Mr. President, I would be happy to agree to a consent agreement on my proposed permanent tax cut of 10 percent across the board based on a 2-hour period, 1 hour for my side of the proposition and 1 hour for the opposition, with the agreement that there would be an up and down vote at the end of 2 hours.

Mr. ROBERT C. BYRD. Reserving the right to object—and the Senator has not made a request—with the further provision that the Senator be recognized following the vote on the disposition of the Javits-Danforth amendment, that it be in order for him to call up his amendment and that it be in order. I make that request.

The VICE PRESIDENT. Is there objection? Without objection, it is so ordered.

Mr. ROTH. Just to make certain, it is clear that we will have an up and down vote on that amendment?

Mr. ROBERT C. BYRD. That was in the request.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. LONG. I yield to the Senator from Maine.

Mr. MUSKIE. It seems to me, Mr. President, and this will not take much time, this would be the appropriate occasion to report to the Senate the result of the Budget Committee's deliberations this morning on the third concurrent resolution for the 1977 fiscal year and the first concurrent resolution for fiscal year 1978.

The committee has not concluded its consideration of both resolutions. It has dealt only with the relative size, that being most relevant to the pending debate and the pending bill. We will consider the outlay side this afternoon. That, of course, will involve the rebate related to the $50 tax rebate.

On the revenue side, just to announce the results quickly, the committee voted to raise the revenue floor in the third concurrent budget resolution from $347.7 billion to $349.3 billion. That reflects reestimates of estate and gift taxes and also it reflects the delay in the standard deduction withholding changes. Those two together add $1.6 billion to the revenue estimates for fiscal year 1977 and account wholly for the change.

The committee voted not to raise the revenue floor for the purpose of reflecting the Senate's action on the $50 tax rebate.

It was the committee's view that it still believed that the stimulus that would have been provided by that rebate is still needed by the economy. It may still be needed by the economy. In any case, the committee believed that, since that was its position with respect to our economic needs, it ought to hold to that position by holding a revenue number.

That does not eliminate the budgetary discipline on the outlay side, because we are going to reduce those estimates in order to retain that discipline. But on the revenue side, the fiscal year 1977 number, as approved by the committee this morning, reflects our belief that stimulus is needed in the economy today, as it was earlier this winter.

With respect to fiscal year 1978, the committee, by a positive vote, retained the revenue numbers of the first concurrent resolution, $395.6 billion. That makes no room, in our judgment, for some of the amendments that have already been approved by the Senate, nor does it make room for any permanent tax reduction beyond those already contained in the tax bill.

Members of the committee, nevertheless, disagree about the need for a permanent tax reduction. It was the view of the committee that, with a tax bill pending on the floor, it is virtually impossible for the committee to come up with a floating number on revenues that would necessarily reflect what the Senate and the Congress as a whole do.

We would have preferred it, with the benefit of hindsight, if we could have had the budget resolution examined before action on the tax bill, but, as I have said before, that is history. We are in the middle of that debate and we ought to conclude it and conclude it as quickly as possible at the present time. If, when Congress finally acts on the tax bill, the result is inconsistent with the First Concurrent Budget Resolution in 1978, then, obviously, appropriate action will have to be taken on the floor and we shall have to deal with it at that time.

Mr. LONG. Mr. President, will the Senator yield?

Mr. MUSKIE. Yes.

Mr. LONG. Mr. President, I thank the Senator. I congratulate him for the action of the Committee on the Budget. It seems to the Senator from Louisiana that, with the revenue-spending proposals that the President is proposing and which Members on both sides of the aisle will be offering at this point, there is absolutely no way to estimate precisely where we are going to be in fiscal year 1978. The President made some energy proposals which might raise us a great deal of revenue to offset the cost of certain tax incentives for people who save on energy. While we would like to be able to say that the President's program will pass, history reveals that it is easy for Congress to vote for tax cuts, but much more difficult to persuade it to vote for tax increases.

While we approach all this with good will and a spirit of cooperation, it is really impossible at this moment to predict just where we are going to wind up—if we are going to pass all spending proposals or if we are going to pass all tax reductions or tax increase proposals.

We still have not seen what the President's tax reform proposal is going to look like, and we have not seen what his welfare proposal is going to look like. If the Senator says we are in the dark on the cost of those big items, I do not see how the Senator can hope to give us any final judgment on where we are going to stand in fiscal 1978, other than to say that we are going to try to be fiscally responsible. I believe that is what the Senator is trying to do and I assure him that I want to cooperate with him on that point.

Mr. MUSKIE. I shall make one other point. I say to the Senator, then I shall yield to my good friend who represents the Republican minority on the committee (Mr. DOMENICI).

This is a new administration, with its policy still in the development stage. As the distinguished floor manager said, we do not yet have a very precise or even a very rough estimate of the budgetary impact of the President's energy proposals. OMB has not been able to provide that kind of analysis. CBO has not had the time to develop that kind of analysis, and our own staffs have not. So that question is very much up in the air.

We do have the period between the first concurrent resolution and the second concurrent resolution to take into account developments in these as yet undefined policy areas. The first resolution represents targets and we try to hold to them as closely as possible in order to retain the discipline of the processes. We also recognize that in an area like energy, where policy has just been announced, we are just beginning to debate it; we are just beginning to discuss it; we are just beginning to understand it. Both the President and Congress need some leeway to form final positions before we try to freeze policy decisions into the first concurrent resolution. So, in an area like that, I think the Committee on the Budget has tried to be responsive to the need for flexibility between the two resolutions.

I hope that by September 15, we shall be in a position to set hard targets or hard ceilings. But that lies ahead of us and we have to have some flexibility in the meantime.

In addition, in all candor, I say to the Senator, it is necessary to accommodate the differences of opinion within the Budget Committee, as the Senator finds it necessary to do within the Committee on Finance.

Mr. DOMENICI. Will the Senator yield?

Mr. JAVITS. Mr. President, will the Senator yield so I may ask for the yeas and nays?

Mr. MUSKIE. Of course.

Mr. JAVITS. Mr. President, I ask for the yeas and nays on this amendment.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MUSKIE. Would the Senator from New Mexico like the floor?

Mr. DOMENICI. No, I wish to talk with the Senator from Maine and I shall not take long. I wish to recap some of the statements of the Senator from Maine and see if he agrees and if my understanding is correct.

The revenue ceilings we have agreed on in the Committee on the Budget of $349.3 billion——

Mr. MUSKIE. For fiscal year 1977.

Mr. DOMENICI (continuing). For fiscal year 1977, from the standpoint of policy, obviously would have to be construed to mean that the Committee on the Budget feels that there still is a need for stimulus by way of tax cuts. We agree with that, do we not?

Mr. MUSKIE. The Senator is correct.

Mr. DOMENICI. We also agree that the Danforth-Javits amendment——

Mr. MUSKIE. Will the Senator yield?

Mr. DOMENICI. Indeed.

Mr. MUSKIE. I think it would be helpful if we had printed in the RECORD a statement by the Director of the Congressional Budget Office, Alice Rivlin, yesterday before the committee which reflects that same view.

I ask unanimous consent, Mr. President, that the statement may be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY ALICE M. RIVLIN, DIRECTOR, CONGRESSIONAL BUDGET OFFICE

Mr. Chairman and Members of the Committee: At the Committee's request, I am happy to share some brief observations on the economic outlook. I will address myself to three questions:

Has the economic news through early April provided reasons for altering the economic forecast that I presented to this committee on March 2, or the forecast contained in the Committee's report on the Third Concurrent Resolution for Fiscal Year 1977?

How will the outlook be affected by withdrawal of the $50 rebate assumed in the Third Concurrent Resolution for Fiscal Year 1977?

What is the effect of the shortfall in federal expenditures on the economic outlook?

RECENT ECONOMIC NEWS

The economic statistics of the last few weeks have contained bad news about prices, at least from the consumer's point of view, and good news about economic activity. Before a drastic change in fiscal policy is made, however, these statistics should be examined carefully. It seems to us at the Congressional Budget Office that the recent speedup in the rate of price increase reflects mainly the continued effects of cold weather on food and energy prices, and it does not necessarily presage a permanent increase in the underlying rate of inflation. Recent favorable statistics on economic activity, moreover, probably reflect inventory rebuilding and a rapid rebound from the cold weather. There are reasons to think that this upsurge may be temporary and that it does not justify increased optimism about the level of activity in the second half of the year.

The rate of increase in consumer prices rose from 4.2 percent during the last quarter of 1976 to 10 percent in the three months ending in March, with the biggest single factor being a 15 percent rate of rise in food prices. This sort of increase is not expected to continue, and in fact the food price rise was already beginning to slow down in March. The rise in energy prices continues fairly high, but it has little or no relation to the balance of aggregate demand and supply in the economy. We have also seen some recent increase in the rate of change in prices other than food and energy from their relatively good performance last year. But wage rate changes have remained in the 7 to 8 percent range, and we do not interpret recent developments as evidence that the underlying rate of inflation has moved out of the 4.5 to 6.5 percent range.

OUTPUT GROWTH IN THE FIRST QUARTER

According to the preliminary estimate the rate of growth in national output in the quarter just ended was 5.2 percent—the highest it has been since the first quarter of last year and considerably better than most forecasters had expected. Furthermore, the quarter ended on a high note, with retail sales, industrial output, and employment expanding rapidly. These gains were not unexpected by CBO and other forecasters; the principal surprise since I last testified before you is that the coldweather disruptions were smaller, and the rebound earlier, than we had anticipated in early March. Good news though this was, we may want to look at it in a slightly longer perspective. Compared with a year earlier, real GNP was only 4 percent higher, and the unemployment rate only two-tenths of a percentage point lower.

While we may well see more good news in the immediate future, we have a number of reasons for expecting that growth rates in output will slow after midyear and that the unemployment rate at yearend will be little improved from the current quarter. Much of the present strength in the economy results from temporary factors and high rates of growth are therefore not likely to be maintained through the end of the year.

The first temporary factor is, of course, the rebound from output disruptions caused by the cold weather. For example, the high level of housing starts reported for March probably included starts postponed from January or February. For the quarter as a whole, starts were hardly changed from the final quarter of last year, and we continue to anticipate that the housing sector will contribute less to growth during 1977 than it did during 1976.

Second, the acceleration in growth in the first quarter was entirely due to inventories—final sales growth slowed down in real terms—and the same is likely to be true in the current quarter. After the marked slowing of inventory investment during 1976, businesses apparently found their stocks a little low by the end of the year, and stock rebuilding is currently giving an upward boost to output. By the middle of the year the desired inventory-to-sales ratios are quite likely to be achieved, and output gains should then slow to the rate of growth of real final sales.

CONSUMER BEHAVIOR

Third, over the past two quarters we have seen a dramatic decline in the personal saving rate. This means that consumer spending increased faster than consumer incomes, providing stimulus to final sales. The rising rate of consumer spending was not associated with an increase in consumer confidence. Consumer confidence, as measured by the University of Michigan Survey Research Center in February, was a little better than in November but not quite as high as it had been in the late summer. Saving rate behavior is not perfectly understood, but our best judgment is that the decline in the saving rate has reflected special factors, namely the increased availability of autos this spring, after supply disruptions caused by the Ford Motor strike and the cold weather; and what I would call "involuntary consumption"—high heating requirements in those cold months last winter. In addition, there is the disquieting possibility that some consumers may have raised spending in anticipation of a rebate this spring.

What all this means is that if consumers paid their extra heating bills entirely out of savings, the savings rate is likely to rise from its first-quarter level. If they attempt to rebuild their net money balances by cutting back on other consumption, it will rise even more. And this rise in the saving rate will mean that consumption will now grow more slowly than disposable income.

If consumer confidence is significantly reduced by dropping the rebate or by the prospective energy program, this may depress consumer spending still further. Sindlinger's telephone survey has reported a sharp decline in confidence following the announcement of the energy program, but it remains to be seen whether the decline will last. The energy program has introduced new uncertainties, not only about business conditions in general, but about markets for particular goods and services, and spending is likely to be somewhat unsettled until the uncertainties are resolved. We might expect, for instance, that sales of gas-guzzling cars would be strong but that sales of small cars, and perhaps other energy-saving products as well, might languish until the proposed taxes and subsidies are either put into effect or voted down.

Forecasting aggregate consumer behavior is subject to as much uncertainty as forecasting the rest of the economy—or more—but the latest information we have suggests that in the absence of the rebate consumer spending will be slowing down economic growth rather than leading it over the rest of 1977. What early indications we have on the second quarter go along with this, although they are extremely tentative. New auto sales appear to have slipped a little in the first 20 days of April, though the decline may reflect distortions caused by sales contests. Retail sales excluding autos dropped in the third week of April, following gains earlier in the month.

BUSINESS INVESTMENT

Will the ending of the rebates have offsetting beneficial effects on interest rates, business confidence, and investment? We believe the answer is yes, but that these effects are relatively small.

One reason they are small is that the Federal Reserve was expected, as Chairman Burns testified before this Committee, to allow a temporary bulge in the money supply during the rebate period, which would keep interest rates from rising as much as they would without such an accommodative policy. With the rebates withdrawn, we now presume that there will be no bulge in the money supply either, hence a relatively small and temporary difference in forecast interest rates.

A second reason that the positive effects on investment are relatively small is that the reduced business sales to consumers in the absence of the rebate may offset some of the positive effect of easier credit on the demand for capital goods. Our latest information on demand for capital goods does not cover the period since the withdrawal of the debate. As of March, new orders for nondefense capital equipment were down for the second month in a row, after a very strong January. On a quarterly average basis, orders

were still well above the fourth quarter, and appeared consistent with the spending plans businesses reported to the Commerce Department, which we incorporate in our forecast.

As for business confidence, we have now been told by the Conference Board that assessments of economic conditions by businesses improved between October and February. We have no information later than February, and the rebate looked like a pretty sure thing in February. Right now, judging by the behavior of the stock market, any bolstering of business confidence that followed withdrawal of the rebate may well have been offset by the uncertainties inevitably introduced by the President's announced energy program.

REVISED FORECAST

These judgments by the Congressional Budget Office are summarized in Table 1. Compared with the forecast I presented to you in my testimony of March 2, we have not changed the level of real GNP or unemployment at the end of 1978, but we are forecasting higher rates of unemployment and inflation during 1977. The forecast just released by the Administration is very similar to ours on inflation but near the optimistic end of our range for unemployment.

The withdrawal of the rebate adds 0.2 percent to the unemployment rate at the end of this year, representing the loss of 280,000 jobs. Since the rebate was to be a one-shot rather than a continuing stimulus, we estimated that it would have no effect on employment by the end of 1978.

Withdrawal of the rebate should not have a measurable effect on inflation either. The speedup in inflation that we are projecting during 1977 results from further effects of the cold weather on food and energy prices. This forecast does not include any effects of the President's energy program, which we are now in the process of evaluating. We are now estimating that the cold weather has added more than a point to the rate of change in the Consumer Price Index in 1977, but this has not been enough to raise the underlying inflation rate permanently; inflation reverts to an estimated 4.5 to 6.5 percent during 1978.

TABLE 1.—ECONOMIC PROJECTIONS BASED ON THE 3D CONCURRENT RESOLUTION WITHOUT REBATES

Economic variables	Levels			Rates of change (percent)	
	1976:4 (actual)	1977:4	1978:4	1976:4-1977:4	1977:4-1978:4
GNP (billions of current dollars)	1,745	1,910-1,970	2,100-2,230	10.0-13.0	8.5-13.0
GNP (billions of 1972 dollars)	1,280	1,335-1,355	1,390-1,440	4.3- 5.8	4.0- 6.0
General price index (GNP deflator, 1972=100)	136	143-146	150-156	5.5- 7.0	4.5- 6.5
Consumer price index (1967=100)	174	185-188	193-199	6.5- 7.5	4.5- 6.5
Unemployment rate (percentage points)	7.9	6.8-7.5	5.8-6.8		

Note: Projections include business tax cuts, which have some stimulative effect in 1978.

FEDERAL SPENDING

Still another potential problem for the economy arises from the continuing shortfall in federal spending. When I testified before this Committee in early March, we anticipated a 1977 spending shortfall of at least $5 billion from the third concurrent resolution outlay level. This shortfall was incorporated in our March economic projections. OMB's recent spending estimates include a net downward revision of outlays of $6.1 billion for 1977 due to the shortfall and other factors. Other observers of federal spending have estimated that the shortfall could be as much as $10 billion or more. We are now reviewing the recent OMB estimates and will adjust our scorekeeping tabulations where this appears to be appropriate.

About one-third of OMB's revision in estimated 1977 spending levels is in financial transactions, such as foreign military sales and HUD mortgage market activities, which do not have a significant effect on the "National Income and Product Accounts." The remaining downward adjustment falls mainly in grants to state and local governments e.g., public service jobs, EPA construction, local public works, highway construction, education programs) and in federal purchases (e.g., defense spending, federal construction activities, and energy R & D and strategic petroleum reserves). Spending for farm price supports and social security benefits have been revised upward.

If OMB's estimate of a $6.1 billion shortfall holds, then federal spending trends do not imply any revision of the projections in Table 1. However, if the spending shortfall rises to $10 billion or more and is in federal purchases, grants, or transfers which are counted in the national income and product accounts, we would expect slightly less GNP and more unemployment in 1977 than is shown in the forecast in Table 1.

CHANGING FISCAL POLICY

The Budget Committees and the Congress as a whole assessed the economic situation in March. At that time, they were aware that inventory-building and the recovery from cold weather would lead to some strong economic statistics in the spring. Weighing the economic forecast and the difficult choices involving unemployment and inflation, the Congress decided on an expansionary modification of the budget for fiscal year 1977. The possibility that this modification would lead to an overheated economy and an acceleration of inflation was judged by the Congressional Budget Office and others to be quite small.

In our judgment, recent economic news does not provide any reason for changing this assessment. Favorable statistics on economic growth were expected and do not justify feeling that stimulus would overheat the economy. Nor do the weather-related increases in prices indicate that a rebate would be more inflationary than was thought previously.

Suppose that the economy is clearly heading toward the pessimistic end of our forecast range by summer. Are there fiscal policy alternatives available to the Congress that could return the economy toward the levels of real GNP, employment, and unemployment in the March 2 forecast? Clearly one possibility is a revival of the rebate later in the fiscal year. This alternative would raise no conflict with the third concurrent resolution, as long as the margin created by withdrawal of the rebate is not used up for other tax or spending measures.

Most other tax and spending measures are not likely to have any noticeable effect this year. Permanent cuts in personal and business taxes have effects that build up rather slowly. Similarly, additional spending on countercyclical revenue sharing, public works or public service employment probably could not have a sizable effect by the end of 1977—indeed, we may be having trouble getting existing authorizations for public service employment spent.

While we do not think it likely, we cannot rule out a more optimistic prospect in which the strong growth apparent in the March statistics will be sustained through the second half of the year. But I would remind you, Mr. Chairman, that we have been beguiled by month-to-month irregularities in economic news before. Last year many forecasters, including those at CBO, were misled by an inventory swing in late winter and spring, and failed to anticipate a return to a slower rate of recovery late in the year. I hope that we guard against the possibility of making a similar error in the direction of overoptimism this year.

Mr. DOMENICI. May I take just one step further? I am not asking the chairman what his personal preference is with reference to how we should implement that stimulus. I am not asking for his personal views on that. I am asking just this very simple question: The impact of the permanent tax cut that Senator DANFORTH and Senator JAVITS have before the Senate would be accommodated within that new revenue ceiling. Is that not correct?

Mr. MUSKIE. I am sorry, I was diverted for a moment. I apologize, but I was trying to get a piece of information to anticipate the Senator's question.

Mr. DOMENICI. My question was so simple that the Senator did not have to ask the question.

Mr. MUSKIE. I have rarely found the Senator's questions to be simple.

Mr. DOMENICI. Let me say very specifically that I am not asking for the Senator's preference on how that stimulus should be implemented. The committee has varying views individually, but left the stimulus as the Senator described in the new revenue base. There is no doubt that, if it is the will of the Senate, that figure will accommodate, for the year 1977, the permanent tax cut proposed by Senator DANFORTH and Senator JAVITS. Is that not correct?

Mr. MUSKIE. The Senator is correct. I hasten to add the second point, that the 1978 number would not accommodate it.

Mr. DOMENICI. The Senator has described the 1978 number in his remarks, indicating that the effect of the permanent tax cut might not be accommodated within the $395.6 ceiling in our first concurrent resolution for 1978.

The VICE PRESIDENT. Under the previous order, the remaining 20 minutes before the vote is divided equally between the Senator from New York and the Senator from Missouri and the Senator from Louisiana.

Who yields time?

Mr. LONG. I yield 2 minutes.

Mr. DOMENICI. Two minutes.

On the other hand, if the Senate was to adopt the permanent tax cut contemplated for 1977 and 1978, the Senate Budget Committee would have that before it and the Senate as a body would have that before it when we consider the

yet unpassed first concurrent resolution, is that not correct?

Mr. MUSKIE. The Senator is correct.

Mr. DOMENICI. And there may be other tax implications in the ensuing months from the President's energy package, and others that will impact on that, which we would also take into consideration between the first and second concurrent resolutions, is that not correct?

Mr. MUSKIE. The Senator is correct.

Mr. DOMENICI. I thank the Senator from Maine.

The VICE PRESIDENT. Who yields time?

Mr. DANFORTH. Mr. President, during the last 4 days, most of the arguments for and against the proposal in amendment No. 200 have been debated at great length. But by way of summation, I would like to point out in a very few minutes what this amendment does that the bill as reported by the Finance Committee does not do.

First of all, this amendment, if it is adopted by the Senate, will create by the end of 1978 350,000 more jobs than would be created by the bill as was reported by the Finance Committee.

The current forecasts by the administration indicate that in 1978 6.4 percent of the American work force will still be unemployed. More than 6 million Americans will still be out of work next year.

What we propose to do is to use this permanent tax cut as a measure of additional stimulus.

As I understand the colloquy that just took place, the Budget Committee concurs that additional stimulus by way of tax relief is called for.

Second, what this proposal does is offer additional relief to medium-income and low-income taxpayers.

As was pointed out during the course of the debate, for taxpayers who earn $12,000, $15,000, $20,000 a year for a family of four, right now, for every additional dollar of income they make between 40 cents and 50 cents is taken away either by inflation, or by social security taxes, or by Federal taxes, or by State and local taxes.

It is our position that that is wrong and that something should be done about it. This proposal offers relief which is targeted specifically to the medium-income and low-income taxpayers; 74.1 percent of the benefit from this tax reduction would be aimed at taxpayers with adjusted gross income of less than $20,000.

It is quite true that the bill as reported by the Finance Committee offers some relief for this same group of taxpayers. But the amendment that has been offered by Senator JAVITS and myself would offer twice as much tax relief for taxpayers between the $10,000 and $20,000 adjusted gross income brackets.

The present bill as reported by the Finance Committee does nothing for 8.4 million Americans who next year will not claim the standard deduction, but will itemize deductions, and who have adjusted gross incomes of less than $20,000.

Our amendment will provide tax relief for that 8.4 million people not accounted for by the Finance Committee's bill.

Furthermore, the Finance Committee's bill would actually increase taxes for 1¾ million Americans who are single taxpayers, who take the standard deduction, and have incomes of over $13,750 a year.

We are told that we are to wait for reform and not have permanent tax reduction now. We have not been told what the proposed reforms are. But I would simply like to suggest in summing up that the people who are expected to do the waiting are not the people who are favored in this country, but the middle-income and low-income taxpayers who are being asked to wait and the 350,000 people now out of work who would be provided jobs with this amendment.

The VICE PRESIDENT. Who yields time?

Mr. JAVITS. Mr. President, I yield myself the remaining time that we have on this side.

Mr. President, I think the economic argument is irrefutable. It has now been sustained by the three principal financial representatives of the administration itself, to wit, that the economy shows a lagging rather than a galloping trend forward, that the forecast for 1978 nationally and internationally demands an effective tax stimulus, that an effective tax stimulus is directed at the classes that buy big ticket items and invest, to wit, the professional groups and groups up to the $20,000 in income. Our amendment is directly reaching that group.

If anything, a good many of the economic models promise doom for 1978, as does Dennis Healey, the Chancellor of the Exchequer of Britain.

Now, what is the argument against us?

The argument against us is a cynical one, Mr. President, that we should wait for the President's tax reform package.

I say it is cynical for two reasons. One, it asks us to run the risk that we will not have available the stimulus which a tax reduction will give us at the time when we need it the most, which is right now by the admission of everybody, practically, and going into 1978.

Second, it is cynical because it says that the American voter has to be bribed in order to agree to tax reform, otherwise he will not agree to it.

Mr. President, I remember, when I was a boy, advertisements of a flour company in Minneapolis called Pillsbury Mills. Their slogan was, "Eventually, why not now?"

Eventually, Mr. President, why not now? Why run the risk which we are asked to run by foregoing this tax reduction at this particular time when all the stars are pointing right for it? The vacuum is there. The President has pulled out his recommendation and we have come forward with a proposal which fits the present situation precisely because it is permanent.

It results in readjusting without indexing, which I am against and which I do not think is sound, the tax brackets of the individual American taxpayer.

It inspires a sense of confidence. It does not cost us an inordinate amount of money based upon the calculations of the Budget Committee and our own calculations. It is directly pointed at the very people who can do the economy the most good for the future, to wit, the middle-income groups.

As I said a minute ago, the only reason for opposing us, really—and it has been remarkable how that goal has come out in the course of the debate in which we mined a lot of rock and other products—is that it is opposed only because it is to be done when the President is ready to give us a tax reform package, notwithstanding, as Senator DANFORTH so properly analyzed, that that will take 1 to 3 years to present.

Mr. President, I am a liberal. Everybody knows that, Mr. President. It may be a little surprising to see me on this side, but it is entirely sound, and all of the debate has shown it and this argument shows it.

This is when the country can use it the best and this is the time to give it to the country, Mr. President.

Eventually, why not now?

The VICE PRESIDENT. Who yields time?

We are under controlled time, who yields time?

Mr. JAVITS. Mr. President, do we have any time left?

The VICE PRESIDENT. There is 1 minute remaining.

Mr. JAVITS. I yield it to Senator CURTIS.

The VICE PRESIDENT. The Senator from Nebraska.

Mr. CURTIS. Mr. President, in this closing minute of the debate I say that the passage of this amendment is necessary to keep the commitment of both the Congress and the executive.

It is very proper that the rebate idea be withdrawn. It was not a tax rebate. It was destined to go to millions of people who are not paying taxes. Their needs should be taken care of through welfare and other means. But the taxpayers thought that something was coming to them.

One of the virtues of this amendment is that only taxpayers will share it. It will give some encouragement and some help and some inflation adjustment to households of people who work, who produce our goods, who pay the taxes. This involves the great majority of our people.

I am also convinced that a lowering of the rates tends to increase the income and the activity in our economy. If I felt that this amendment would add to the deficit, I would not support it. I think that the contrary will be true, and I urge adoption of the amendment.

The VICE PRESIDENT. Who yields time?

Mr. RIBICOFF. Mr. President, we want to reserve the last 3 minutes. I will be pleased to yield additional time on this side, reserving the last 3 minutes for anyone on this side of the aisle who would like some time.

Mr. BELLMON. Mr. President, will the Senator yield 1 minute?

Mr. RIBICOFF. I yield.

Mr. BELLMON. Mr. President, I simply take this minute to point out to the Senate the testimony of the present head of the President's Economic Advisory Council, Mr. Schultze, who testified earlier that because of inflation, the American taxpayers will be paying about $13

billion more in fiscal 1977 in taxes than in previous years.

As everyone knows, as inflation goes up and people's salaries are adjusted upward to keep their purchasing power relatively steady, they lose because they move into higher income tax brackets. According to Mr. Schultze, this is going to prove to be a tax liability of some $13 billion for this fiscal year, and next year it will be roughly twice that.

The permanent tax reduction which has been proposed by Senator DANFORTH and Senator JAVITS is a way of adjusting that and compensating for part of the loss to the American taxpayers who are going to suffer. If this amendment is rejected, what the Senate is doing, in effect, is voting for a $13 million per year tax increase for American taxpayers. That would serve as a very significant break in the economy and could bring about the kind of recession from which we are now recovering.

The VICE PRESIDENT. Who yields time?

Mr. RIBICOFF. Mr. President, I have 2 more minutes to yield to the other side of the aisle.

I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that Mr. Peter Davis, of the committee staff, be allowed the privilege of the floor during the entire consideration of the tax bill.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, I yield the remainder of the time to the distinguished majority leader.

Mr. ROBERT C. BYRD. Mr. President, several recent economic indicators suggest that the recovery is proceeding and that there is some danger of overexpansion in 1978. Housing starts were 2.1 million in March, compared to 1.5 million last year. Retail sales were up 2.7 percent in February and 2.4 percent in March, an annual growth rate of more than 30 percent. Gross national product, adjusted for inflation, was up at a rate of 5.2 percent in the first quarter of 1977, compared to a rate of 2.6 percent in the fourth quarter of 1976. Industrial production rose 1 percent in February and 1.4 percent in March, an annual growth rate of 15 percent.

The rate of inflation has also increased in recent months. Consumer prices rose by 2.6 percent in the first 3 months of 1977, an annual inflation rate of 10 percent. Wholesale prices rose at an annual rate of 10.2 percent in the first 3 months of 1977.

Mr. President, I recognize the appeal that this amendment has. I recognize that it is the kind of amendment that, especially on the surface, makes it difficult to vote against. But we are threatened with the specter of double-digit inflation; and I am concerned, as are many of our colleagues, that a permanent tax cut of this magnitude would be unnecessarily inflationary.

This amendment would reduce Federal revenues by $2.1 billion in fiscal year 1977 and $10.4 billion in fiscal year 1978. This loss in revenue could impair the ability of Congress to enact legislation in the future to meet changing economic conditions, which have fluctuated greatly recently.

Such a permanent tax cut also would greatly impair the comprehensive tax reform which is much needed, since the impetus for such reform would be hindered by a piecemeal approach.

There will be a time when the economy is once again operating at a high level of employment. At that time, large budget deficits, such as we have this fiscal year, will no longer be appropriate, and we will have to have a balanced budget or even a budget surplus. While it is true that a more prosperous economy will mean higher tax revenues, if this amendment passes, there will not be enough revenue to balance the budget. We will regret it if we mortgage our future by giving away the tax revenues we will need to balance the budget during periods of prosperity, for then we will be faced with the painful task of enacting tax increases.

It is the wrong time for a general and permanent tax reduction. The economic problems facing our country such as inflation and unemployment, require more effective, targeted, legislation.

Mr. President, for these reasons, I hope that the Senate will reject the pending amendment.

Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, earlier this month I cosponsored the Javits-Danforth permanent tax cut amendment on which we are soon to vote. At that time, it appeared that some kind of economic stimulus was necessary, and the only other alternative being offered was President Carter's $50 rebate, a program which I strongly opposed.

Since then the administration has wisely withdrawn its rebate proposal and the most recent economic indicators show a general economic recovery from the hard winter. I have therefore reviewed my position on the need for additional economic stimulus through permanent tax cuts. Frankly, as much as I agree with the need to reduce the tax burden on lower and middle income taxpayers, tax cuts at this time will add to the Federal budget deficit which is already unacceptably high.

Unemployment in March dropped 0.2 point to 7.3 percent. While we all agree that this is still too high, long-term forecasts predict further reductions in the unemployment rate through the end of the year. Total employment rose over half a million in March to 89.5 million. This sustains the expansion which has totaled 1.7 million since last October. Also, the constant dollar GNP rose at an annual rate of 5.2 percent in the first quarter of 1977, a considerable improvement over the 2.6 percent growth during the last quarter of 1976. Housing starts in March rose 17 percent above February, and are 49 percent above March of 1976. Industrial production rose 1.4 percent in March, which is a 1 percent increase over February and a 5.5 percent increase over March 1976. March retail sales increased 2 percent over February and are 12 percent over March 1976. Finally, capacity utilization, the measurement of total output in relation to total production capacity, was 82 percent in March as compared to 80.7 percent in February and 80 percent in January according to the Federal Reserve Board.

It is my understanding that the net revenue loss of the tax cut amendment—after calculating the effect of the amendment in reducing unemployment and stimulating spending—is about $8.9 billion over the next 2 years. While this is certainly an improvement over the more costly rebate proposal offered by President Carter and still supported by several of my colleagues here in the Senate, it represents an additional drain on our budget resources at a time of high deficit spending. Therefore, it is my intention to vote against this amendment this afternoon, although I do so reluctantly.

Mr. President my colleagues are aware of my commitment to a more equitable and simplified tax system. During the past two Congresses I have introduced tax legislation designed to bring this about. I will be reintroducing my Simpliform Tax Act in the near future. While I recognize the need to reduce taxes for lower and middle income taxpayers, I would prefer that this be done within the framework of a comprehensive tax reform; not the kind of "reform" we have had in the past where in reality we have further complicated a nearly indecipherable tax code.

Mr. LUGAR. Mr. President, I rise to lend my full support to the pending amendment which I have cosponsored. The permanent tax cut for low- and middle-income taxpayers provided for in this amendment is desperately needed by these income groups.

I was delighted and encouraged that President Carter withdrew his support for the $50 rebate which he had previously requested and that the Senate concurred quickly by deleting that provision from the pending bill.

The individual American taxpayer who provides the largest share of Federal revenues needs a permanent tax cut now. The tax reduction should be heavily weighted toward middle-income taxpayers—those most heavily burdened by taxation and inflation.

A permanent tax cut would allow taxpayers to commit themselves to buying more durable goods like major appliances and automobiles. This, in turn, would boost overall consumer demand and spur economic activity.

Inflation has made a permanent tax cut more advisable than ever. Inflation pushes taxpayers into higher income tax brackets and reduces the value of the exemptions and deductions they are allowed when filing their income tax returns. The result is that taxpayers must pay higher tax rates—but on the same or lower amounts of real income.

Presently, nearly 40 percent of the total income of American taxpayers is taken by Federal, State, and local governments and redistributed to other Americans by these various governments. I would like to see this growing stranglehold of governments loosened, and one way to do it is to provide substantial, certain, and lasting Federal tax cuts.

Many who advocate a one-time tax cut argue that tax rates should be kept high to provide future money for more Government spending programs that the new administration and the Congress may want to try. These same people feel confident that more general benefit to the Nation will come by taking money from some Americans and redistributing it to others.

But at this point in our history, it is from middle-income citizens and from businesses, large and small, that money is being taken—the money that might create the new jobs that many Americans need.

The case for permanent tax reduction is a strong one. A permanent tax cut would stimulate economic growth, increase investment and productivity, and decrease unemployment.

A permanent tax would encourage business investment based on increased and continuing consumer demand.

A permanent tax cut would offset some of the effects of inflation and would sustain the current economic recovery.

I encourage my colleagues to support this amendment.

TAX CUT AMENDMENT

Mr. DOLE. Mr. President, today we have an opportunity to do something to help the low and middle income taxpayers of this country. We have before us an amendment that will provide tax relief for 90 percent of all taxpayers in this country. I am pleased to be a cosponsor of this amendment.

This proposal, if enacted, would provide timely and meaningful assistance to those Americans who are struggling day to day to keep up with the cost of living. It would provide a meaningful economic stimulus and would help reduce the unacceptable 7.3-percent level of unemployment.

GROWING TAX BITE

Mr. President, probably the most difficult inflation problem nearly every American faces is the indirect increase in taxes from year to year. Every time a taxpayer gets an increase in income to offset the cost-of-living increase, he also gets a bigger tax bite.

In 1975, the increase in taxes due to inflation was about $13 billion. In 1976, it was $5 to $6 billion. In 1977, it will probably be about $5 billion and in 1978, about $8 billion.

Mr. President, that is as much or more than this amendment would reduce taxes. The amendment is $2.5 billion in fiscal year 1977, and $9.4 billion in fiscal year 1978.

So this amendment just offsets the automatic tax increase due to inflation.

Everybody talks about inflation. Few understand it. Nobody likes it. But it shows up every day in higher consumer prices for just about everything and every day we all preach against it but few ever propose a satisfactory way to combat it.

Traditionally, most of the blame for the skyrocketing cost of living is placed on farmers and businessmen. Each is duly chastised once a month when the Government releases the latest Consumer Price Index. Unfortunately, we tend to focus on readily identifiable price increases in things like the cost of food, clothing, and housing. Yet underlying higher costs for retail products, services, and food is a single, not-so-readily identifiable force: The skyrocketing cost of Government and the taxes we pay to support it.

Over the past decade, taxes, which are the most visible portion of the cost of Government, have expanded their bite of the family budget more rapidly than any other cost-of-living item. Since 1950, Government spending has increased by nearly 600 percent for every man, woman, and child in America. By contrast, per capita clothing, food, and shelter expenses grew at about 170 percent, 145 percent, and 200 percent, respectively, over the same period.

Government spending has grown astronomically and so have the income taxes, payroll taxes, and property taxes needed to finance it. In fact, it will not be until the first week in May that the average American worker will have earned enough income to pay all his taxes—Federal, State, and local—for this year.

And just recently, OMB revised the inflation projection upward from 5.3 percent to 6.7 percent for 1977, which makes the tax bite even bigger.

So, Mr. President, if we want to do something to help the average working American, let us pass the tax-cut amendment which will provide relief for 90 percent of the taxpaying population.

REDUCE UNEMPLOYMENT

Mr. President, we have 7 million persons unemployed presently, 2½ million of those are heads of households.

Only a few months ago, the Senator from Kansas heard repeated promises on almost a daily basis about how we should reduce unemployment. Yet today, the administration has abandoned all forms of tax stimulus for the economy.

This past Monday, OMB published new economic forecasts projecting a continuation of the unemployment rate at about the same level we have now.

So apparently, the Carter administration now accepts a high level of 7.3 percent unemployment.

In view of the forecast and all the promises we have heard, the Senator from Kansas simply cannot believe that the Carter administration has not recognized the need for economic tax stimulus.

The amendment we have before us today will bolster the consumer confidence and spending of low- and middle-income taxpayers. It will provide the continuing income availability that is essential for consumers to purchase the large ticket items like automobiles, houses, and appliances that require a month-to-month payment.

It is the consumer spending for these kinds of items that will stimulate the economy and result in increased employment.

Mr. President, this amendment is the kind of action we need to take to help put those 7 million people and those 2½ million heads of households back to work.

Last week, the Senate Finance Committee heard testimony from representatives of several construction trade unions about the tremendous need for employment. Mr. Thomas Murphy, president of the Bricklayers International Union, eloquently illustrated the need for jobs. He pointed out that the Federal Government is providing a $650,000 grant to train construction workers.

But the workers have no place to go for a job once they are trained. The training is good, but we need to provide some economic stimulus to open up those jobs and to provide the work opportunity.

The Senator from Kansas would like to point out that the tax cut proposal has widespread support. Mr. Bob Georgine, president of the Building & Construction Trades Unions, told the Senate Finance Committee the other morning, and I quote:

> In direct answer to your question, we do favor tax relief and we think the sooner the better. We would like to see the administration move on it as quickly as possible.

Mr. Georgine went on to explain how a few years ago, we passed a tax incentive that was able to get rid of large backlog of houses and condominiums that opened the way for new construction and many more jobs.

TIMELY ACTION

Yesterday, the Senate Budget Committee, of which I am a member, held hearings on the economic impact of the President's withdrawl of tax stimulus. We heard from Secretary Blumenthal, Mr. Lance, and Mr. Schultze. They reiterated a message we heard from Secretary Woodworth in the Senate Finance Committee last week. The administration plans to send up a comprehensive tax reform message later this year. They expect some substantial tax relief at that time.

Unrealistically, they anticipate that the tax bill will be passed quickly so that the tax relief is provided in a timely

manner. As the distinguished chairman of the Finance Committee pointed out last week, we spent about 4 years getting the Tax Reform Act of 1976 enacted. The comprehensive reform package the administration plans to send up this fall will surely not be less controversial and less difficult to pass than the Tax Reform Act of 1976.

So as I understand the administration, they are favorable to a tax reduction, except they would like to coordinate it with tax reform.

Mr. President, now is the time to approve this tax cut amendment. The administration is totally unrealistic about the time it will take to get another tax bill through the Congress.

This amendment is not a "boondoggle" bill that will benefit taxpayers who do not need the help. It is realistic tax relief for the middle- and low-income taxpayers.

Mr. President, I urge the adoption of this amendment.

The VICE PRESIDENT. The hour of 1 o'clock having arrived, under the previous order, the question is on agreeing to the amendment of the Senator from Missouri and the Senator from New York. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Idaho (Mr. CHURCH) is necessarily absent.

The result was announced—yeas 40, nays 59, as follows:

[Rollcall Vote No. 107 Leg.]

YEAS—40

Baker	Domenici	Javits
Bartlett	Durkin	Laxalt
Bellmon	Garn	Lugar
Biden	Goldwater	Mathias
Brooke	Griffin	McClure
Case	Hansen	McIntyre
Chafee	Hatch	Packwood
Curtis	Hayakawa	Pearson

NOT VOTING—1

Church

So the Danforth-Javits amendment was rejected.

Mr. LONG. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The VICE PRESIDENT. Under the previous order the Senator from Delaware is recognized.

Mr. ROBERT C. BYRD. Mr. President, will the Senator from Delaware yield me just a couple minutes?

Mr. BUMPERS. Mr. President, could we have order?

The VICE PRESIDENT. The Senate will be in order.

Mr. ROTH. I am happy to yield to the Senator.

Mr. ROBERT C. BYRD. I thank the Senator.

The VICE PRESIDENT. The Senate will be in order.

Mr. ROBERT C. BYRD. Mr. President, will the Senator from Delaware yield the floor and the Senator from Louisiana yield me a couple minutes?

Mr. ROTH. I am happy to yield the floor.

Mr. ROBERT C. BYRD. May we have order?

Mr. LONG. I yield the Senator 2 minutes.

The VICE PRESIDENT. The Senate will be in order.

The Senator will first submit his amendment so the clerk can state it.

UP AMENDMENT NO. 158

Mr. ROTH. Mr. President, I send to the desk my amendment to provide a 10 percent across-the-board tax cut for all American taxpayers.

The VICE PRESIDENT. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Delaware (Mr. ROTH), for himself and Mr. CURTIS, Mr. HATCH, Mr. HAYAKAWA, Mr. PROXMIRE, Mr. MCCLURE, Mr. LAXALT, Mr. LUGAR, Mr. GARN and Mr. PACKWOOD proposes an unprinted amendment numbered 158.

Mr. ROTH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. RIEGLE). Without objection, it is so ordered.

The amendment is as follows:

On page 32, beginning with line 1, strike out through the matter appearing before line 1, on page 37, and in lieu of the material sought to be inserted by the committee amendment, insert thereof the following:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)), a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.

Over $67,200 but not over $73,200	$26,720, plus 53.1% of excess over $67,200.
Over $73,200 but not over $79,200	$30,260, plus 54.9% of excess over $73,200.
Over $79,200 but not over $83,200	$33,920, plus 55.8% of excess over $79,200.
Over $83,200 but not over $91,200	$36,400, plus 56.7% of excess over $83,200.
Over $91,200 but not over $103,200	$41,440, plus 57.6% of excess over $91,200.
Over $103,200 but not over $123,200	$49,120, plus 59.4% of excess over $103,200.
Over $123,200 but not over $143,200	$62,320, plus 60.3% of excess over $123,200.
Over $143,200 but not over $163,200	$75,720, plus 61.2% of excess over $143,200.
Over $163,200 but not over $183,200	$89,320, plus 62.1% of excess over $163,200.
Over $183,200	$103,120, plus 63.4% of excess over $183,200.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	17.6% of the excess over $2,200.
Over $2,700 but not over $3,200	$70, plus 13.5% of excess over $2,700.
Over $3,200 but not over $3,700	$145, plus 14.4% of excess over $3,200.
Over $3,700 but not over $4,200	$225, plus 15.3% of excess over $3,700.
Over $4,200 but not over $6,200	$310, plus 17.1% of excess over $4,200.
Over $6,200 but not over $8,200	$690, plus 18.9% of excess over $6,200.
Over $8,200 but not over $10,200	$1,110, plus 21.6% of excess over $8,200.
Over $10,200 but not over $12,200	$1,590, plus 22.5% of excess over $10,200.
Over $12,200 but not over $14,200	$2,000, plus 24.3% of excess over $12,200.
Over $14,200 but not over $16,200	$2,630, plus 26.1% of excess over $14,200.
Over $16,200 but not over $18,200	$3,210, plus 27.9% of excess over $16,200.
Over $18,200 but not over $20,200	$3,830, plus 30.6% of excess over $18,200.
Over $20,200 but not over $22,200	$4,510, plus 32.4% of excess over $20,200.
Over $22,200 but not over $24,200	$5,230, plus 34.2% of excess over $22,200.
Over $24,200 but not over $28,200	$5,990, plus 36.0% of excess over $24,200.
Over $28,200 but not over $34,200	$7,590, plus 40.5% of excess over $28,200.
Over $34,200 but not over $40,200	$10,290, plus 45.0% of excess over $34,200.
Over $40,200 but not over $46,200	$13,290, plus 47.5% of excess over $40,200.
Over $46,200 but not over $52,200	$16,590, plus 54.0% of excess over $46,200.
Over $52,200 but not over $52,200	$20,190, plus 55.8% of excess over $52,200.
Over $62,200 but not over $72,200	$26,390, plus 57.6% of excess over $62,200.
Over $72,200 but not over $82,200	$32,790, plus 59.4% of excess over $72,200.
Over $82,200 but not over $92,200	$39,390, plus 61.2% of excess over $82,200.
Over $92,200 but not over $102,200	$46,190, plus 62.1% of excess over $92,200.
Over $102,200	$53,090, plus 63.0% of excess over $102,200.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $1,600	No tax.
Over $1,600 but not over $2,100	12.6% of the excess over $1,600.
Over $2,100 but not over $2,600	$70, plus 13.5% of excess over $2,100.
Over $2,600 but not over $3,100	$145, plus 14.4% of excess over $2,600.
Over $3,100 but not over $3,600	$225, plus 15.3% of excess over $3,100.
Over $3,600 but not over $5,600	$310, plus 17.1% of excess over $3,600.
Over $5,600 but not over $7,600	$690, plus 19.8% of excess over $5,600.
Over $7,600 but not over $9,600	$1,130, plus 22.5% of excess over $7,600.
Over $9,600 but not over $11,600	$1,630, plus 25.2% of excess over $9,600.

"If the taxable income is:	The tax is:
Over $11,600 but not over $13,600	$2,190, plus 28.8% of excess over $11,600.
Over $13,600 but not over $15,600	$2,830, plus 32.4% of excess over $13,600.
Over $15,600 but not over $17,600	$3,550, plus 35.1% of excess over $15,600.
Over $17,600 but not over $19,600	$4,330, plus 37.8% of excess over $17,600.
Over $19,600 but not over $21,600	$5,170, plus 40.5% of excess over $19,600.
Over $21,600 but not over $23,600	$6,070, plus 43.2% of excess over $21,600.
Over $23,600 but not over $27,600	$7,030, plus 45.0% of excess over $23,600.
Over $27,600 but not over $33,600	$9,030, plus 47.7% of excess over $27,600.
Over $33,600 but not over $39,600	$12,210, plus 49.5% of excess over $33,600.
Over $39,600 but not over $45,600	$15,510, plus 52.2% of excess over $39,600.
Over $45,600 but not over $51,600	$18,990, plus 54.0% of excess over $45,600.
Over $51,600 but not over $61,600	$22,590, plus 55.8% of excess over $51,600.
Over $61,600 but not over $71,600	$28,790, plus 57.6% of excess over $61,600.
Over $71,600 but not over $81,600	$35,190, plus 59.4% of excess over $71,600.
Over $81,600 but not over $91,600	$41,790, plus 61.2% of excess over $81,600.
Over $91,600 but not over $101,600	$48,590, plus 62.1% of excess over $91,600.
Over $101,600	$55,490, plus 63.0% of excess over $101,600.

On page 47, immediately before line 11, insert the following:

TITLE II—ADDITIONAL REDUCTION AND SIMPLIFCATION OF INDIVIDUAL TAXES

On page 64, line 13, strike out "201, 202, and 204" and insert in lieu thereof "101, 201, and 203".

On page 64, line 16, strike out "205" and insert in lieu thereof "204".

On page 2, in the table of contents, strike out the matter relating to title I and insert in lieu thereof the following:

TITLE I—PERMANENT INCREASE IN AMOUNT OF STANDARD DEDUCTION

SEC. 101. Change in tax rates and tax tables to reflect permanent increases in standard deduction.

On page 2, in the table of contents, strike out "TITLE II—REDUCTION" and insert in lieu thereof "TITLE II—ADDITIONAL REDUCTION".

On page 2, in the table of contents, strike out the item relating to section 201 and redesignate the items relating to sections 202 through 206 as relating to sections 201 through 205.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, we started debate on this bill on the 18th of April which was the Monday following the nonlegislative period. Today is Wednesday, the 27th of April.

I think it is incumbent upon the Senate, if it can possibly do so, to complete action on this bill this week. This would mean that the Senate would have to stay in late today, perhaps, come in early tomorrow, stay in late tomorrow, come in early Friday, and stay in late Friday. So I would hope that Members would adjust their schedules accordingly.

I think we have a responsibility to work our will on this measure. There will be amendments offered. Senators will have an opportunity to vote on them, but I hope that Senators will be prepared to call up their amendments and to enter into time agreements on them where time agreements can be reached, so that the Senate can dispose of this measure this week.

This would mean, then, that at the early part of next week we would take up the conference report on the economic stimulus package and follow that with economic stimulus appropriation which has been on the calendar now for well over a month.

So I make this plea to Senators that they be as cooperative as they possibly can with the managers of the bill and with the leadership in the effort to complete action on this measure this week and, as I say again, it will mean rollcall votes daily, lengthy sessions, early and late, beginning today.

I thank the Senator.

Mr. ROTH. Mr. President, I yield myself such time as I may require.

Mr. HATCH. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. ROTH. I yield.

Mr. HATCH. Mr. President, I ask unanimous consent, that Mr. Craig Roberts, of my staff, be accorded the privilege of the floor during the debate on this measure.

The PRESIDING OFFICER (Mr. ABOUREZK). Without objection, it is so ordered.

Will the Senator from Delaware suspend until the Senate is in order? The Chair asks all Senators who are conversing to please stop their conversations, so that the debate may be heard. The Senator from Delaware is requested not to proceed until the Senate is in order.

The Senator may proceed.

Mr. ROTH. Mr. President, my amendment provides a 10-percent across-the-board tax cut for the American taxpayer.

This plan provides substantial and much needed relief to all working Americans.

We stand at the threshold of a new political era. The Nation has just selected a new President. We join him in facing unprecedented challenges abroad and in developing sound energy, environmental, and urban policies at home.

But neither our foreign objectives nor our domestic needs will be met unless the Nation once again regains her economic vitality.

And the very source of that vitality—indeed the Nation's future as a dynamic free enterprise economy is being snuffed out by the stifling taxes levied on America's work force.

The Congressional Budget Office informs me that the amendment I am proposing here today will increase our GNP by $43 billion and create 920,000 taxpaying jobs by the end of next year. If we adopt it, we will put more money into the hands of those who work and invest. We will stimulate the investment needed to create jobs and we will begin to put America back to work.

The most recent economic forecasts indicate that our economy will grow slower, inflate faster, and count more unemployed than we have in the past. Although increased consumer spending has stimulated the most recent mini-recovery, most economic analysts doubt that consumer activity will continue at the same rate. Moreover, there are no signs of an upturn in business plant and equipment investment—a bellwether for economic activity.

The President's proposed energy program has dramatically highlighted the economic malaise. According to one national poll, the Sindlinger poll, the energy program has jolted consumer confidence and created massive uncertainty. In the last 10 days Sindlinger has recorded the largest drop in consumer confidence since he began surveying consumer confidence 22 years ago.

I am deeply concerned, that unless a permanent tax cut is enacted, consumer and business confidence will surely decline further and will not be strong enough to stimulate the spending and investment needed to get the economy moving and to create new jobs.

I believe the Congress would be making a serious mistake in passing an opportunity to create almost 1 million new taxpaying jobs in the private economy. An across-the-board tax reduction will breathe life into our free enterprise system. By removing the shackles imposed on the private economy by an excessive tax rate, we will increase job-creating investments, stimulate consumer spending and expand the economy. Lower tax rates will allow the private economy to spend, save, invest, and produce. This country prospered and grew because we allowed the private economy to generate the growth and jobs needed to provide upward mobility for all Americans.

But our heavy reliance over the past 15 years on bigger Government and more

and more Federal spending has drained the life and vitality out of our private economy.

We are facing a fundamental choice today—a choice between bigger and bigger Government and higher tax rates; or a more efficient stronger private economy, capable of creating real jobs and a strong future for all Americans.

Lower tax rates will fuel industrial expansion and stimulate job-producing investments in the private economy. But these job-producing investments will occur only if we increase the aftertax rewards for working, saving, investing, and producing.

An across-the-board tax rate reduction will stimulate supply, and it will stimulate production. Most important, we would be unharnessing the individual incentive and creativity that built this Nation to create nearly a million new jobs with a future.

THE KENNEDY TAX CUTS

President John F. Kennedy successfully used an across-the-board tax cut to "get the country moving again."

At that time, in 1963, the Nation's economy faced similar problems.

In a special message to Congress in 1963, Kennedy described them. He said:

The chief problem confronting our economy is its unrealized potential—slow growth, underinvestment, unused capacity and persistent unemployment. The result is lagging wage, salary and profit income, smaller take-home pay, insufficient productivity gains, inadequate Federal revenues, and persistent budget deficits. One recession has followed another, with each period of recovery and expansion fading out earlier than the last.

The President, then, faced the same type of economic problems that we face now, yet he wisely rejected the massive increases in Federal spending and temporary tax cuts that have been offered as solutions today.

Kennedy realized then, as we should realize now, that the largest single barrier to full employment and a higher rate of economic growth was the heavy drag of Federal income taxes on private purchasing power, investment, and initiative.

Kennedy said:

Our tax system siphons out of the private economy too large a share of personal and business purchasing power and reduces the incentive for risk, investment, and effort—thereby aborting our recoveries and stifling our national growth.

The Kennedy tax cuts reduced individual income tax rates from a range of 20 to 90 percent to rates of 14 to 70 percent, and reduced corporate tax rates from 52 to 48 percent. These tax rate reductions stimulated a 5-year period of unprecedented economic growth, low inflation, and high employment.

The Kennedy tax rate reductions worked in 1963. Similar tax rate reductions will work in 1977.

IMPACT ON INFLATION

As many of us know from our own harsh experience, under our tax system, inflation and economic growth push taxpayers into higher tax brackets, automatically forcing people to pay a higher percentage of their income in taxes. According to testimony received by the Joint Economic Committee, the excessive inflation in 1971–74 has increased the effective tax rates on the average working family from 19 to 22 percent and produced roughly $30 billion in inflation-induced tax increases. This heavy tax burden reduced consumer income and purchasing power, slowed economic growth, and contributed to the 1974–75 recession.

Permanent tax cuts are essential to offset the large inflation-induced tax increases of the past few years. While the temporary tax rebates of 1975 stimulated the economy temporarily, inflation resulted in an estimated $5.1 billion hidden tax increase in 1976. A chart, prepared by the staff of the Joint Committee on Taxation, shows the impact of the estimated inflation-induced tax increase in 1976.

Mr. President, I ask unanimous consent that the chart to which I referred be printed in the RECORD at this point.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

1976 TAX INCREASE CAUSED BY INFLATION

[Dollars in millions]

Adjusted gross income class (thousands)	Present law tax	Inflation induced tax increase [1]	Percentage distribution	Average tax increase
Under $5	$660	$166	3.2	$23
$5 to $10	10,194	664	13.0	36
$10 to $15	19,971	760	14.9	48
$15 to $20	23,767	831	16.3	71
$20 to $30	33,682	1,177	23.0	119
$30 to $50	22,512	823	16.1	250
$50 to $100	16,700	514	10.0	545
$100 and over	13,600	179	3.5	844
Total	141,087	5,113	100.0	

[1] Staff estimate of the excess of actual taxes in 1976 over what taxes would have been had the tax brackets, the personal exemption, and the minimum and maximum standard deduction been adjusted upward by the 5.8-percent increase in the consumer price index 1976 over 1975.

Note: Details may not add to totals because of rounding.

Mr. ROTH. Although Congress has enacted only one major tax increase in the last 10 years, the Vietnam war surcharge, the total tax bill on the average American has increased steadily. According to a recent analysis covering the 10-year period through 1974, total taxes increased faster than wages and salaries, GNP, and national income.

In the past few years, the inflationary and tax pressures on the average American family have became almost unbearable.

Inflation has increased the cost of living by nearly 80 percent in the last 10 years. A house that sold for $25,000 in 1967 now sells for $47,000. The cost of a college education has more than doubled in the past 10 years, and the cost of buying a new car has increased by more than 40 percent. And although the average salary has increased, the increased inflation and tax burden have siphoned off more and more of people's income.

For example, an average worker earned $7,327 in 1965 and paid $657, or 8.9 percent of his income, in Federal income taxes. In 1975, this same worker earned $14,203 and paid $1,469, more than 10 percent, in Federal income taxes.

When the effects of inflation are factored in, this worker's real salary increased only about 12 percent, while his real tax burden increased 28 percent, more than double his wage rate increase.

The administration has recently estimated that inflation would increase by 6.7 percent in 1977. This inflation will produce a hidden tax increase of between $8 to $10 billion on American workers. Combined with the $5.1 billion inflation tax increase in 1976, the American taxpayers face a higher tax burden of between $13 to $15 billion for 1976 and 1977 alone.

The Office of Management and Budget informed us that the inflation tax will raise the tax rate on the median family of four from 11.4 percent of income in 1976 to 15.8 percent of income in 1982, a 30-percent increase. According to a study conducted by the Advisory Commission on Intergovernmental Relations, this inflation tax will impose a major burden on all taxpayers, including those with incomes over $20,000. By 1980, taxpayers earning between $20,000 to $28,000 a year will have a tax increase, caused solely by inflation, of $862. Taxpayers earning between $30,000 to $42,000, face an inflation induced tax increase of $1,743.

This steadily increasing inflation tax has increased the tax burden on all Americans. And unless we reduce the tax burden on all Americans, we face slower economic growth and continuing high rates of unemployment.

SAVINGS AND INVESTMENT

Besides reducing consumer purchasing power and demand, the heavy tax burden has seriously retarded savings and investment in the economy. Tax rate reductions increase consumer take-home pay and stimulate consumer spending and demand on a permanent basis. In addition, permanent tax cuts also increase the incentive to save, invest, and produce. This increased savings, investment and production will stabilize prices, produce greater economic growth, and create permanment tax-paying jobs.

The high tax rates have discouraged savings and investment in new factories, homes, and equipment—which is the main reason for our high rates of unemployment and slow economic growth. In fact, the United States devotes a lower percentage of total GNP to savings and investment than any other major industrial nation. Japan devotes 35 percent of its GNP to private investment; West Germany devotes 26 percent, and France 25 percent. The United States devotes less than 18 percent to private investment.

High tax rates mean lower savings and investment, which in turn means less growth and fewer jobs. This is what has already happened in Great Britain, and it is beginning to be reflected in this country at the State level.

Mr. HANSEN. Mr. President, will the Senator from Delaware yield?

Mr. ROTH. I am happy to yield to the Senator from Wyoming.

Mr. HANSEN. Mr. President, if I understand the distinguished Senator from Delaware correctly, he said that the in-

vestment—and I would like to have him repeat those figures—in Great Britain and in France were—how much?

Mr. ROTH. Japan devotes 35 percent of its gross national product to private investment. It, of course, is a nation that has a rapidly expanding economy. Western Germany devotes 26 percent and they have experienced the same economic growth. Even France has invested 25 percent. But the United States, in contrast to those three countries, is currently devoting only 18 percent to private investment.

Mr. HANSEN. Then my question to the distinguished Senator is: Does the Senator attribute this relatively small investment of the GNP in industry producing jobs to be a result of the high taxes that we have in the United States?

Mr. ROTH. Absolutely. I think the fact that we have stifling tax rates mean that people are not saving and investing, people in business do not have confidence in the future. The combination of these elements means that we have a stagnating economy rather than one that is rapidly growing. That is the reason I think it is so important if we are going to build confidence in this Nation that we give people a substantial tax reduction that will show them that this Congress has confidence in the private sector and is willing to show that confidence by action.

Mr. HANSEN. Does the Senator from Delaware share my opinion that it is to this sector of the economy that we must look for the jobs we need to create in order to make significant inroads in the reduction of unemployment in this country and, furthermore, to expand opportunities for people who are not yet in the labor market?

Mr. ROTH. Absolutely. As I indicated, my proposal will create, by the end of this year, 380,000 jobs in the private sector. They will not run out when the Federal funding ends. They will stay. They will be enduring.

At the end of next year, we are told by the Congressional Budget Office, that it will create almost 1 million new jobs, 920,000 jobs, to be exact. That means a saving of between $14 billion and $16 billion expended by the Federal Government by taking those people off the unemployment rolls.

Mr. HANSEN. That is a very important point the distinguished Senator is making. I hope Senators will keep that in mind as they make their individual evaluations of the merit of his amendment. I thank my colleague.

Mr. ROTH. I appreciate the words of the Senator from Wyoming. On that point, I would like to emphasize one reason why I feel so strongly that we cannot wait for action. That is that if we pass this tax cut today, it means, by the end of this year, 380,000 jobs; by the end of 1978, nearly a million jobs. But if we do as the administration is proposing—wait until this fall or wait until next year—we are delaying the creation of these jobs in the private sector.

We cannot afford to wait. These people want work now. They want meaningful work. That is the reason that I say we must have a permanent tax cut today.

As I said, Mr. President, higher tax rates mean lower savings and investment, which in turn means less growth and fewer jobs. This is what has already happened in Great Britain, and it is beginning to be reflected in this country at the State level.

The northeastern part of the country is clearly losing industry and jobs to the South and Southwest, where the tax burden on individuals and industry is considerably lower than in the Northeast.

REVENUE IMPACT

Opponents of a permanent tax cut argue that permanent tax cuts erode the Federal Government's revenue base. They claim that permanent tax cuts will result in massive revenue losses and increase the Federal budget deficit.

But history shows that permanent tax cuts do not erode the revenue base or increase Federal budget deficits. In fact, in each of the 10 major tax cuts since 1946, revenue has not been lost but has, instead, increased as a result of the tax cuts.

Permanent tax cuts will create more taxpaying jobs, produce a greater increase in GNP, and expand the economy enough to provide more, not less, Federal revenues.

This is exactly what happened when the Kennedy tax cuts were enacted. Although the Treasury Department estimated a 6-year revenue loss of $89 billion, the increased economic growth caused by the tax cuts resulted in an actual revenue gain of $54 billion, a $143 billion increase, as the following chart illustrates:

KENNEDY TAX CUTS—ESTIMATED REVENUE LOSS VERSUS ACTUAL REVENUE GAIN

[In billions]

Year	1963	1964	1965	1966	1967	1968	Total
Treasury-estimated revenue loss	−2.4	−5.2	−13.3	−20.0	−23.7	−24.4	−89.0
Actual revenue gain	+7.0	+6.0	+4.0	+14.0	+19.0	+4.0	+54.0
Differences	+9.4	+11.2	+17.3	+34.0	+42.7	+28.4	+143.0

Source: Library of Congress.

Every businessman knows that overpricing a product can actually reduce revenue. He also knows that lowering a too-high price can produce a greater percentage increase in purchases than the percentage cut in price.

We face the same situation today with our tax structure. When a product or activity is taxed, less is produced. This applies to labor and capital as well. When we lower tax rates on labor and investment, the economy expands. Workers have more incentive to work overtime. Small businessmen work longer hours. Professional people take shorter vacations. People save more, invest more, hire more workers, and produce more. As the economy expands and more taxpaying jobs are created, tax revenues rise and Federal spending on unemployment compensation falls.

One of the reasons we have such a large budget deficit is that we are spending billions and billions of dollars on unemployment compensation, food stamps, and welfare programs for the unemployed.

The permanent tax cut that I am proposing will create almost 1 million new jobs in the private economy.

According to a Library of Congress study, a reduction in the unemployment rate of 1 percentage point—which is approximately 1 million jobs—would reduce the Federal budget deficit by an estimated $14 to $16 billion.

Permanent tax cuts will not increase the budget deficit and will not erode the Federal revenue base. Permanent tax cuts will expand the economy, create permanent taxpaying jobs, and increase Federal revenues and reduce Federal spending so much that the budget deficit will be reduced, not increased.

MIDDLE-INCOME RELIEF

Permanent tax cuts will provide well deserved tax relief to working, middle-income taxpayers—the men and women most ignored and overburdened by their Government. Almost 80 percent of all individual income taxes are paid by taxpayers with incomes over $15,000, yet Congress has consistently denied these taxpayers any real tax relief.

Taxpayers who itemize their deductions, such as those who own a home or who have large medical expenses, will receive no relief from the increased standard deduction approved by the Finance Committee, which I support. These taxpayers, particularly those families where both the husband and wife work, should not—and I emphasize the word, "not"—be denied tax relief.

The heavy tax burden represents a very real threat to all Americans, and it especially threatens minorities, the poor, women, and young people who expect upward mobility in the future. Our nation was built on the premise of excellence and productivity where performance and ability are rewarded. We must recognize that the heavy tax burden on working Americans, and particularly the denial of tax relief to anyone earning over a certain income level, threatens to push this country into a rut of mediocrity and no growth.

The amendment I am offering today would provide substantial and permanent relief to all taxpayers. When combined with the increased standard deduction already approved by the Senate Finance Committee, this amendment would provide the largest percentage reductions to low- and middle-income taxpayers.

This amendment will reduce the tax burden on the American economy and stimulate the economic expansion needed to create permanent new jobs in the private economy.

An across-the-board tax rate reduction of 10 percent will increase consumer purchasing power and stimulate the type of job producing investments and pro-

duction needed to put America back to work.

This permanent tax cut will offset the inflation induced tax increases of the past two years, and it will insure that more and more of the American workers earnings will not be swallowed up by inflation and higher taxes.

Mr. President, Americans have traditionally anticipated that hard work and perseverance would produce a higher standard of living and upward mobility. But the crushing tax burden now imposed on the American economy has slowed the country down, and increased the prospects of downward mobility for too many Americans. This has eroded confidence in the economy, and contributed to our sluggish economic growth.

Jack Kennedy realized 14 years ago that the high rates of taxation were strangling economic growth and impeding the full employment of our resources. He reduced taxes across the board, and the private economy expanded at an unprecedented rate.

The Kennedy tax reductions worked in 1963. Another across-the-board tax reduction will work in 1977.

Mr. President, at this time, I would be happy to yield to the Senator from Utah such time as he sees fit to use.

The PRESIDING OFFICER. How much time does the Senator yield?

Mr. ROTH. I yield 15 minutes at this time to the Senator.

WE MUST CUT THE TAX RATES ON ALL AMERICANS NOW

Mr. HATCH. Mr. President, I wish to associate myself with the excellent remarks of my distinguished colleague from Delaware.

Mr. President, the Senate must not miss this opportunity to reduce the tax burden on work, employment, saving, and investment. The American people expect—and deserve—tax relief, and now that good sense has prevailed and the rebate has been abandoned, we have the opportunity to do what should have been done from the beginning—cut the tax rates permanently for all Americans.

The temporary rebate was not designed to get Government out of the taxpayers' pockets or off their backs. It was merely a temporary license for some Americans to pick the pockets of other Americans. It would not have built the economy, but, instead, it would have built the political handout constituencies. The rebate was favored by its advocates, because they claimed it would hold on to the tax base and allow increasing Government spending programs in the following years.

However, the rebate would not have held on to the tax base. It would have held it down. Because of congressional action, the claims on the tax base are already growing faster than the tax base. Hard political choices will soon have to be made unless politicians take action to increase the tax base. The only way this can be done is by cutting the tax rates across the board.

The most successful tax cut in the post war years was the Kennedy tax cut. It got the economy moving again, but the inflation of the past decade has canceled out Kennedy's reforms by driving all taxpayers, both individuals and businesses, into higher tax brackets. To revitalize the economy, we must reinstitute the Kennedy tax rate reductions.

It is necessary to put our economic problems into perspective. Unemployment, inflation, the deficit, the frightening problems of the social security system all come under the general problem of economic growth.

Growth—we have not had enough of it. We have not had enough growth of real production to create the jobs we need to reduce our unemployment rate. We have not had enough growth of real production to raise the American standard of living at the rate it is rising in other industrial nations. We have not had enough growth of real production to enlarge the tax base enough to eliminate the deficits in the Federal budget, and to fight inflation. We have not had enough growth in real production to enlarge the tax base enough to avoid the awesome prospect of having to triple the social security tax rate over the working life of those now entering the labor force.

If the Senate will not take effective measures to increase the growth rate, it will have to do without adequate defense, all its health care proposals, or currently promised social security benefits, because the tax base to fund these three largest budget items will not exist.

Why have we not had enough growth? The purely technical answer is that we have not had enough savings. The basic economic equation is that total national savings must be identically equal to the sum of investment and the Federal deficit. We can do two things with income—we can save it or we can consume it. The amount that is consumed is not available for investment in new factories, mines, farms, or housing. The amount that is consumed is not available for financing the Federal deficit. Only savings can be used for investment and for bailing out the Federal Government when it overspends. And given the Government's propensity to overspend, there is not really that much left for investment. If we want more economic growth, we need more investment, and that means that we need lower tax rates.

The United States has had the lowest savings rate in the Western World in the postwar period. And just look at the results: In 1950 the United States had roughly twice the per capita income of Sweden or Switzerland. By 1974, these countries surpassed the United States in per capita income, and they were quickly followed by Belgium and Denmark. Now, West Germany, Canada, France, and Japan are not very far behind.

This spectacular growth of our trading partners has stemmed from their deliberate attempts to increase their rates of saving and investment. I ask unanimous consent that two tables be printed at this point in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

II.—COMPARATIVE REAL GROSS DOMESTIC PRODUCT, REAL GDP PER CAPITA, AND REAL GDP PER EMPLOYED CIVILIAN, 6 COUNTRIES, 1950–75 [1]—OUTPUT BASED ON INTERNATIONAL PRICE WEIGHTS

[United States=100]

Year	Gross domestic product per capita							
	Sweden	Switzerland	Canada	Japan	France	Germany [2]	Italy	United Kingdom
1950	59.0	62.7	76.0	17.8	49.4	39.3	26.0	57.2
1955			76.1	22.7	61.6	52.2	29.9	58.4
1960	77.0	84.4	78.8	31.6	60.9	65.6	36.6	62.4
1965	96.2	98.0	81.2	41.6	64.8	67.8	39.1	60.8
1967			81.3	47.3	66.4	64.3	41.0	59.1
1970	112.2	111.5	85.7	61.5	75.0	74.7	45.8	60.3
1971			88.0	64.0	77.0	75.3	45.4	60.8
1972			87.8	65.6	76.8	73.7	44.3	59.5
1973			88.7	68.1	77.0	73.8	46.7	59.0
1974	123.4	122.2	92.1	68.4	81.4	76.0	47.0	61.1
1975	123.5	114.3	93.5	71.0	81.6	75.8	45.8	61.9

WAGE INCREASES, INVESTMENT, AND SAVING

	1965–75 percent change in real wages and fringe benefits [1]	Investment as percent of GNP averages, 1960–73		Household savings ratios, 1976 estimated (percent)
		Total	Total minus home building	
United States	15.7	17.5	13.6	6–8
Canada	48.5	21.8	17.4	10–12
Japan	137.9	35.0	29.0	24–26
Belgium	103.8	NA	NA	NA
France	77.4	24.5	18.2	16–18

Source: Bureau of Labor Statistics.

Mr. HATCH. Mr. President, the first table shows the comparative real gross domestic products per capita in several major Western countries, and their rapid rate of gain on the United States. The second chart shows the relationship between investment as a percent of GNP, and the percent change in real wages and fringe benefits in the major Western nations. The United States came in dead last in the share of investment in GNP. Not surprisingly we also came in dead last in real wage and fringe benefit increases for 1965 to 1975. While U.S. wages and fringe benefits rose less than 16 percent over this period, those in Canada rose 48 percent, those of Britain, Switzerland, Sweden, Germany, and France rose between 50 percent and 80 percent, and those of Belgium, Italy and Japan rose more than 100 percent in the same time period.

Clearly, if we want more jobs and higher wages, we have got to increase the rate of savings and investment.

Why is the rate of saving so low in this country? The rate of saving is low primarily because it does not pay people to set money aside the way it used to. Over the past 25 years, Government spending has gone from roughly 21 percent of GNP to more than 35 percent of GNP, at the Federal, State, and local levels. Over that same period of time, Federal income taxes on typical American workers and social security taxes have increased dramatically. State and local taxes have risen even faster.

Typical industrial workers who, only 4 or 5 years ago, faced Federal income marginal tax brackets of 17 or 19 percent, now face brackets of 22 percent, and these marginal rates rise every year with inflation. It is the marginal rates which determine how much of any overtime pay, or added interest from added savings that these people get to keep. Similarly, higher-income people, with the country's highest propensity to save and invest, have found their marginal rates climbing ever higher. It is reaching the point that more and more people are discouraged by very low after-tax yields on money that they had saved.

Remember the good old days when thrift used to be a virtue? Over the last 20 years, the Government has made a mockery of thrift. Not only has it been the country's leading example of profligate spending and waste, but it has drastically penalized those who have chosen to save, rather than spend. In 1960, someone could have put money aside in a savings account at 4 percent interest and would have lost one point to inflation, and one point to taxes, for a real increase each year of 2 percent on his money. That same person today would probably have his money in a 7-percent account, losing five points to inflation, three points to taxes, and ending with a real loss of 1 percent on every dollar he put in the bank. This is how the Federal Government rewards those who save.

Another way in which the Federal Government has managed to discourage savings is through its mishandling of the Social Security System. This system is regarded as a pension plan by its participants, but it is really a system of transferring funds from current workers to current retirees. In a private pension plan, or in retirement programs of countries like Sweden, each group of workers sets aside money during its own working lifetime for its own retirement. These savings are invested to expand real output in the economy, so that the workers can live on the accumulated principal and interest, which is their share of that expansion, after they retire. In the United States, workers and employers pay a social security tax which is not saved and is not invested. It is transferred immediately to retirees for immediate consumption.

Many economists have pointed out that insofar as Americans feel they can rely on social security payments for retirement income, they feel they can afford to save less during their working years. This has reduced the savings rate of such families by as much as 40 to 50 percent.

Unlike Sweden, the United States does not make up for this lower savings rate with Government saving. We do not run surpluses to build up the Social Security Trust Fund, nor do we avoid Government deficits which require the Government to borrow what would otherwise be private investment capital. This means that the Government takes much of what little saving is left, and diverts it from productive, private, growth-oriented uses.

Our low savings rate is one of the reasons for the low rates of investment, growth, and real wage increases in the United States. This in turn means a slow rate of growth of the social security tax base, which necessitates higher tax rates. These higher tax rates further discourage hiring and work effort, compounding the problem.

Obviously, we have to encourage an increase in the rate of savings. We also have to encourage the utilization of that savings in productive private investment.

The creeping tax rates that we have experienced over the last 20 years have gradually reduced the rate of return, after taxes, that the typical investor can expect. There are millions of potential investors who look at the after-tax return on investments, and who decide to spend out of their capital for a trip to Bermuda, instead of reinvesting. Consequently, we devote fewer resources to new housing, new mines, and new factories. We hold down the growth in the stock of capital and, as a consequence, we hold down the growth in wages. Wages are determined by the capital-labor ratio, the amount of tools and equipment that a worker has to work with. Countries with a high stock of tools and equipment per worker have high wages. Countries with a growing stock of tools and equipment per worker have growing wages. If we want more jobs and higher wages, tax rates must come down to increase the after-tax reward to those who provide the tools and equipment which we need.

The marginal tax rate on equity capital in this country is nearly 80 percent, counting property taxes, corporate income taxes—both State and Federal—payroll taxes, excise taxes, and taxes on dividends distributed. No wonder firms have been having a harder and harder time expanding. Investment used to be a virtue. There used to be a time when people looked with favor on those who brought a new factory into town, or who expanded existing local industries. Now these people are punished through punative tax laws, which say "Eat, drink, and be merry, because if you don't squander it the Government will."

I would like to point out that the same disincentive effects produced by marginal tax rates on savings and investment also discourage the supply of labor. People considering overtime these days find themselves with a far lower aftertax reward for that extra effort than in years past. Remember when leisure used to be frowned upon, and labor was considered a virtue? Not any more. The Government has stated, in no uncertain terms, that anyone who tried to work harder will be punished for it. I ask unanimous consent to have printed in the RECORD at this point a Wall Street Journal editorial entitled "Tax the Rich."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

TAX THE RICH!

In what has become an annual event, the Treasury Department last week reported that 230 of the nation's wealthiest individuals paid no federal income taxes in 1975. Of the 34,121 persons who reported adjusted gross incomes of $200,000 or more, 230 paid no tax. In 1974, the number was 244. In 1973, 154.

Since early 1969, when lame-duck Treasury Secretary Joseph Barr initiated this festivity by announcing that 200 rich Americans had escaped taxes by crawling through loopholes, the government has been trying to do something about it. Loopholes have been closed left and right. A minimum tax has been legislated, then increased. IRS, treating the annual figure as a source of embarrassment, bends every effort to reduce it. But more rich people are paying no taxes than in 1969, and the economy is in much worse shape now than it was then.

It stands to reason, and we thoroughly believe, that the U.S. economy would benefit enormously if the rich paid more taxes. We have been arguing this, at least implicitly, for years. What we have not been able to get the politicians to understand, though, is that you can't get rich people to pay more in tax *revenues* by raising their tax *rates*. If you raise the rates, it becomes even more profitable for them to hire lawyers and accountants to find them loopholes, and the cost of this misdirected effort is a dead loss to the economy. Or they stop working entirely and dissipate their capital drinking champagne and sailing yachts, which is also a dead loss to the economy. Either way, they contribute less in tax revenues, and the burden of supporting government expenditures falls on the middle class and poor.

Consider what would happen to a "good" rich person who refuses to use loopholes and prefers hard work to sailing yachts. He decides to invest $1 million of his capital in a widget factory in New York City, which will employ hundreds. He will run it himself, arranging the financing, assembling the personnel, finding the markets, and so forth. Give him a year to get off the ground, but say he is lucky enough in the second year to make a 10% profit on his invested capital. This is after his workers have paid federal, state and local income taxes and the widget company has paid property taxes, license fees, etc.

Of the $100,000 profit, the city clears away roughly $5,700, leaving $94,300. The state

clears away about 10 percent of that, leaving $84,870. The IRS, levying at progressive rates, snatches $38,000, leaving $46,870. Our good rich person then pays this to himself as a dividend.

Being rich, our man is of course in the highest personal income-tax brackets, and after paying $4.3 percent to the city ($2,015) has $44,855 left. The state clips him for 15 percent of that ($6,728) and leaves him $38,-127. Uncle Sam "nicks" him for 70 percent of that, which is $26,689, leaving him with $11,438.

Thus, on the investment of $1 million in capital and two years hard work in assembling an enterprise that is risky to begin with, this lucky fellow who turned a profit of $100,000 has $11,438 to spend. He has given up two years on his yacht to gain $5,719 in annual income. If he had invested in tax-free municipals, he would have gained roughly $60,000 in annual income and could have remained on his yacht instead of fighting New York City traffic, City Hall, and the widgetmakers union.

Ralph Nader's loophole closers calculate that if you closed the loopholes the "bad" rich people would be forced to pay taxes. This assumes the bad rich will be forced to risk $1,000,000 and two years' hard work for $5,719 in after-tax income. Even Fritz Mondale, we will guess, would feel uncomfortable with this assumption.

Why not tax the rich by lowering the rates they face? They will thus be enticed back from their yachts and once again assemble widget plants in New York City, with tax revenues flowing to Washington, Albany and City Hall not only from them, but also from all those who would then be usefully employed in widgetmaking. By all means, tax the rich! But do it right, and in this fashion lift the burdens of taxation from those who aren't rich.

Mr. HATCH. Mr. President, this editorial shows how a combination of personal and corporate income taxes, Federal, State, and local, can reduce the rate of return on capital and labor to less than one-half percent, leaving millions of people to give up on the difficult job of managing their own business, and causing them instead to dump their holdings into municipal bonds and sit back doing nothing. This results in a drastic reduction of the tax base, and a drastic reduction in real output which we desperately need to feed, house, and clothe our population.

Some politicians will not agree to across the board tax rate reductions, because they believe the so-called rich will pay less taxes as a result, and they are not willing to treat the rich equally as other taxpayers. These politicians simply do not understand how taxation works, and they are senselessly introducing class warfare into the United States. I am inserting a table in the RECORD at this point. It is from the Internal Revenue Service statistics of income. It shows that as the top tax rate fell, the number of tax returns in the top bracket grew and the percent of total tax collected from the top bracket also grew. The IRS figures show that lower tax rates result in the rich paying more taxes and a greater percent of total taxes.

Mr. President, I ask unanimous consent to have printed in the RECORD a table showing special income tax returns with adjusted gross incomes above $100,000.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

INCOME TAX RETURNS WITH ADJUSTED GROSS INCOMES ABOVE $100,000

Year	Number of returns filed	Percent of total tax collected	Top tax rate (percent)
1960	24,523	5.4	91
1961	29,730	6.2	91
1962	27,174	5.1	91
1963	29,498	5.1	91
1964	36,501	6.3	77
1965	46,013	7.6	70
1966	53,166	7.5	70
1967	67,021	8.5	70
1968	82,223	9.2	75.25
1969	82,111	8.2	77
1970	77,690	6.8	71.75
1971	91,020	7.9	70

Mr. HATCH. Mr. President, the answer to this apparent puzzle is clear. Allowing the rich to keep more of what they earn encourages them to take their money out of tax-free bonds, loopholes, and tax shelters and invest it where they can earn a higher rate of return. Thus, the tax base and thereby the tax revenues to the Government both grow. In short, the rich pay more total taxes.

Between 1960 and 1972, only once, as the tax rates came down from 91 to 70 percent, did the number of returns filed go lower instead of higher and did the percent of tax collected go lower instead of higher; but even then, it was much higher than when the 91 percent top tax rate was in effect.

All of our social, political, and economic problems reduce to one basic problem: that is how to encourage savings, investment, and work effort to produce greater economic growth than we have had over the past few years. Fortunately, there is one set of policies which can produce this result. That policy is tax rate reduction, as advocated by my friend, Senator ROTH.

Tax cuts work on the supply side, by rewarding those who produce additional savings, investment, and labor.

A lower tax rate on a person's top, marginal bracket makes added hours of work more worthwhile than before in terms of take-home pay. The supply of work effort rises.

Likewise, the lower marginal tax rate makes the return on additional savings rise. People who were formerly choosing more consumption and more leisure are induced to choose instead more investment and more work.

The same situation holds true for investment. Those who have expanded their businesses as much as they care to at the current high tax rates will make the added effort to earn additional income if marginal tax rates are reduced.

Throughout this discussion, I have been stressing marginal tax rates, the rates people pay on their last few dollars of earnings. When economists keep throwing the term "marginal" around, they are not just doing it for their health. They stress marginal tax rates instead of average tax rates, because it is marginal rates that can change behavior.

Let me illustrate the importance of marginal tax rates, using corporate taxes as an example. Assume two identical countries in which all corporations currently earn $1 million in profit, and there are no corporate taxes.

Country "A" decides to raise revenue by imposing an unchanging annual license fee of $500,000 on every corporation. In effect, it starts out taking 50 percent of profits.

Country "B" imposes a 25-percent corporate income tax, and starts taking 25 percent of profits.

Which country will grow faster? Is it "A" with high Government revenue, or "B" with less?

"A" will grow faster. If a firm in "A" invests a certain amount of money to double its output and profit, it pays no tax on its second $1 million. Before the investment, its average payment to the Government was 50 percent of profits. But its marginal tax rate is zero. It keeps all of the second $1 million.

If a firm in "B" invests the same amount of money to double its output and profit, it pays $250,000 of the second $1 million to the Government, as well as the first. Its return is $750,000, only three-fourths of the return to investment in "A." Its average tax rate is only 25 percent. But is marginal tax rate is also 25 percent, and that is what does the damage.

A tax cut that affects rates on the first few dollars of income may lower average tax rates. But if the tax cut does not affect the last few dollars of income, it does nothing to add to incentives to work, save, and invest to earn additional income.

What all this means is very simple. We have to reduce marginal tax rates in order to increase the country's growth rate. This will very quickly expand the tax base, allowing us to raise more revenue, at lower tax rates, from a rapidly growing economy. This will help to close the deficit, thus eliminating inflation and increasing investment further, the revenue it needs for such urgent matters as defense, health care, and the rescue of the Social Security System.

Now let me stress one important point here. All tax rates must come down. Roughly 25 percent of all families with roughly 50 percent of all income hence, more than 50 percent of all potential saving and investment—are in the higher tax brackets. If these rates are not reduced along with all others—if the tax cut does not affect the last few dollars of everyone's income—we will be throwing away over half of the potential savings, potential growth, and potential job formation and real wage increase that a tax rate reduction can provide.

We need to repeat the Kennedy tax cut. It was permanent, something people could count on for the future. It reduced personal income tax rates in every bracket to encourage everyone, including those with the biggest share of total income, to save more and to take the risks of investment, because of the higher after-tax rate of return. And the corporate tax rate reduction and investment tax credit increased the after-tax rate of return to business investment.

The Kennedy tax rate reduction produced an investment boom—exactly what is missing in the present recovery. Demand or spending, which Congress is

always worrying about, took care of itself as employment and paychecks rose.

We have an easy choice to make here today. If we do not make it, we will have hard political choices to make in the future. Congress cannot continue to create growing claims on the national income while simultaneously holding down the growth in income by inflationary policies and high tax rates. It is time to remove the tax barrier to full employment and unleash the country's saving potential and work effort in order to provide a real increase in everyone's standard of living instead of just transferring money from one group to another. Work, employment, savings, and investment should be seen by the Congress as valued things to be rewarded instead of punished. I hope we will put our political prejudices aside and unite in taking a step that will allow all Americans to pull together once again in creating a higher standard of living for all.

The PRESIDING OFFICER (Mr. SARBANES). Who yields time?

The Senator from Delaware.

Mr. ROTH. How much time does the Senator from Wyoming wish?

Mr. HANSEN. Six minutes.

Mr. ROTH. I yield 6 minutes to the Senator from Wyoming.

Mr. HANSEN. Mr. President, I never supported President Carter's rebate proposal. I appreciated Chairman LONG's imagery when he noted that the rebate would have had an effect similar to throwing $50 bills from the top of the Washington Monument. In my own State of Wyoming, the rebate would have been virtually useless. I cite some examples by one of my constituents: She said:

> We live on a ranch 42 miles from our principal shopping center; at the rate of 16 cents per mile allowed by the State, $50 would not quite get me home from my fourth trip to town.
>
> It would pay for registering only 10 of our purebred calves, which are the only source of our ranch income.
>
> It would buy only 25 bales of hay, and we are feeding 100 bales per day.
>
> It would pay for only one-tenth of a single page ad in the Hereford Journal.
>
> It would pay the auctioneer, whom we engage for our annual sale, only 15 minutes.
>
> With only $50 we wouldn't dare call a plumber.
>
> If we had to go to the hospital, $50 might pay costs until noon.
>
> We should pay our dues to our Stockmen's organization and send the remainder of the $50 for lobbyists in Congress.
>
> Hopefully they could persuade the President and Congress to SAVE the band-outs, SAVE the bookkeeping, SAVE the checkwriting, and SAVE the postage. Cutting expenses in Washington is a more practical way to stimulate the economy than sending us $50 and then increasing our taxes $100 to cover the expense.

The rebate was a foolish idea. The press noted that it even made the President himself "queasy." Let me tell my fellow Senators that I did agree with the President's queasiness.

I do wish to speak out today in support of a permanent tax reduction for Americans. My support arises not just from the dollars and cents of the reduction. The revenue impacts of past tax reductions speak for themselves. Other Senators have spoken about the economics of a permanent reduction and have spoken clearly and persuasively. I wish to speak about what I see as one conceptual benefit of passing a permanent reduction. Simply stated, this reduction is a vote of confidence in the American people. We will say to them, "We believe that you can and should have control over your own resources."

I noted with interest an article in the January 22, 1977, issue of the New Republic, written by my distinguished colleague on the Finance Committee, the junior Senator from New York. The article developed the thesis that our concept of government has run amuck. The government, built on a foundation of mutual benefit and protection for all citizens, has strayed from those benevolent purposes, and, with the worthwhile intent of helping and caring for citizens, has become the enforcement agent for volumes of tangled regulations and a regulator of behavior. The article continued, stating that:

> The decline of government is inexorably associated with the crisis of the economy.

It describes the rise in unemployment, the regional stagnation occurring in some parts of the country, and the social disorganization that goes along with those problems.

From his article, I have drawn the conclusion that our Government simply cannot continue to take resources from our people with the promise that more and more services will be provided by what we would hope would be a benevolent and compassionate government. We have seen too many examples of good intentions which cause hardships. The financial straits of New York City are a prime example. There are others: All of us shudder at the prospect of confronting businessmen who grapple with OSHA. The Wyoming Insurance Commission writes to me weekly for clarifications of various pension programs. The procedural scrapping that took place just 2 weeks ago here in this chamber over disability and sick pay illustrates the way that our good intentions can be distorted.

I suggest, Mr. President, that one way we can show our good faith is to allow citizens to keep their resources. Let us not take 50 cents of every dollar from our citizens and tell them how we will spend it. Let us rather preserve for the people their integrity by allowing them to keep more of what they earn, so that they can provide for themselves and for their families. I can assure Senators that if we provide tax relief for millions of Americans, we, too, shall preserve our own integrity as a legislative body.

Mr. President, I yield back the remainder of my time.

Mr. ROTH. At this stage I yield 5 minutes to the junior Senator from Idaho.

Mr. McCLURE. I thank the Senator from Delaware for yielding this time to me, as well as my thanks to him for authoring the amendment which is now before the Senate of which I am proud to be a cosponsor.

Mr. President, I have a rather lengthy statement, together with certain attachments. I rather have the impression, after the last vote of this body, as well as the current attendance on the floor, that the Senate is not predisposed to debate the issue or to listen to the arguments on the debate, but I do believe we are faced with an increasing dilemma in our society today when government is taxing away more and more of the capacity of our society to build for the future of this country.

Mr. President, the objective of this amendment is to accelerate the formation of the investment capital required to expand both job opportunities and productivity in the private sector of our economy.

Creating jobs presents all of us with a serious challenge. There is no question we have an unemployment rate that is too high. This is a problem now—and it requires a solution now—because we will not be able to pretend we are out of the economic woods until it is solved.

There are those who would address the problem through costly programs to provide a Government-financed job to every person who is employable but who cannot find work in private business. These proposals would eat up taxes while offering, at best, only a temporary solution to the unemployment problem. There is little that can soften their devastating, inevitable inflationary effects.

It seems to me this approach is both outdated and wrong-headed. It is outdated because it is the same approach taken in the 1930's, nearly 45 years ago, when this country—along with the rest of the world—was plunged into a depression so deep extraordinary measures were called for. In 1933, for example, nearly 13 million Americans were unemployed—or more than 25 percent of the total civilian work force.

Certainly the times we live in now are very different. In the economy of 1977 there must be—and there are—better ways of tackling our unemployment problem than turning back to the solutions devised in a different era now far behind us. It is ironic those advocating the big government approach think of themselves as innovative and forward-looking, when in fact they are looking backward for their answers.

Of course there are lessons to be learned from history; and a look at history gives adequate evidence of the extent to which our prosperity depends on the availability and use of private capital. For example, just 100 years ago, it took a week to produce the same amount of wheat that today can be produced with just a single hour of human labor What did it? The steel plow, tractor, harvester, better seed, and cheap transportation. All of these in turn were made possible by the use of investment capital.

Capital is the key word. Capitalism—the use of funds to build plants and to replace equipment—has been the most important factor in raising our standard of living and it can be the answer to a steady economic recovery and continued stable growth.

This tax cut will create jobs in the private sector of our economy. It would

eliminate the need for expanded Federal grants and loan programs by reducing unemployment and returning persons to self-sufficiency and a tax-generating rather than a tax-consuming status. It would encourage additional savings and investments by the individual, stimulate home construction, and assure an increase in real purchasing power by the work force.

The many pressing economic issues facing Congress today—inflation, unemployment, capital, and energy needs—are interdependent with respect to their comprehension and solution. How do we deal with these problems? Should Congress increase Federal spending providing public service employment and public works programs or should it return decisionmaking to the people by way of the marketplace? I opt for the second solution. Reliance on Government assistance is not the answer. For example, for every full $1 billion spent on public employment, no more than 50,000 jobs are created, and they are not usually permanent. This is not a substantial increase in light of the further effects on the economy due to increased Federal spending. Increased spending means either an even larger Federal budget deficit—which is already predicted to reach $70 billion—or increased tax demands.

The unavoidable truth is that deficits must be financed. The Government has two choices—to borrow from the Federal Reserve or to finance by borrowing from the private sector. When the Government borrows from the Federal Reserve, the supply of money increases relative to the supply of goods, thus sooner or later forcing prices to rise and the value of dollars to fall. Government agencies with their newly created dollars are able to bid away goods and services from the private sector where the majority of capital formation takes place.

When the Government borrows from the private sector, no new money is created. The Government sells bonds to the private sector which in turn must reduce either private current consumption or investment. Because Government expenditures consist heavily of transfer payments which go for current consumption, the net effect in time is increased demand for currently produced goods rather than a demand for goods produced in the future. In short, more now can only be achieved at the price of less in the future.

The supply of goods relative to the demand is therefore decreased and average prices rise. The Federal Reserve could step in to purchase the bonds in order to keep private investment dollars available, but this action would only cause an increase in the total money supply and further inflation. In either case, inflation or crowding out is the ultimate result. Formation of capital drops due to the lack of available investment capital.

Because we have been so caught up in our ever-increasing rate of consumption, America has fallen behind in its investment rate. Investment in new plant and equipment, per person added to the labor force in the 1970's was 22 percent less than that invested in 1956 and 1965. Our rate of capital formation was one of the lowest in the major industrialized nations. On the other hand, France and Germany have doubled their industrial capacity and Japan has tripled its capacity. America has gradually lost a competitive edge in the world market and consequently fewer jobs are available. The United States will have to provide jobs for 7 million more people in the labor force by 1980 and in addition upgrade productivity and earning power of the present labor force. An average investment of $35,000 to support each worker with plant and equipment will be needed.

Every dollar invested in capital does not necessarily go into expansion alone. Some must also be used for replacement of aging capital—at inflated prices, conversion of existing assets into similar but more technically advanced ones, or to purchase pollution abatement equipment and OSHA-mandated compulsory but nonproductive items. Those dollars which are ultimately invested in new plant and equipment are the keys to an expanding and fully employed economy. This amendment recognizes that fact and further recognizes that this investment activity can be most efficiently undertaken within the private sector and in response to free market forces.

Up to now I have been concentrating on the point that Congress must curtail expenditures and reduce deficits, thus putting the financial wherewithal back in the hands of the private sector. Government must also reduce its tax demands on individuals and businesses. This amendment will help to accomplish these objectives. It alone cannot accomplish all that is necessary to assure an adequate investment in job-creating capital for the next 10 years, but it is an initial step in the right direction.

One thing we must always remember is that people pay taxes and ultimately people bear the tax burdens of corporations. They pay direct taxes: Individual income tax, sales tax, gasoline and fuel taxes, gifts and estate taxes. They pay indirectly through high prices paid for purchased goods and services. Corporation income tax, real estate and sales taxes paid by businesses are passed on to the consumer.

Last year, the Secretary of Commerce announced that each household pays $14.06 in taxes for every $1 billion spent by the Federal Government. This amount is found by dividing the number of U.S. households—71,120,000—into $1 billion and is known as the T-dollar used to show the impact of Federal spending on the average taxpayers. The average consumer cannot relate to $1 billion, $10 billion or $100 billion spent by the Government. But when Congress spends $10 billion on a Federal project the consumer, by use of the T-dollar, will realize it is $140 of his own money. In 1929 Federal, State and local tax collections constituted only 13 percent of total national income. By 1950, it had risen to 26 percent. By 1974, it had risen to 40 percent. By 1985, total Government's share of national personal income could be 54 percent—more than half the people's earnings—if present trends are allowed to continue. These figures do not reflect the effects of inflation—the great unlegislated tax. When the Government spends money, it is spending tax dollars—hard-earned dollars of the consumer.

In February I introduced legislation which addresses not only the need for a permanent reduction in individual income taxes and the need for additional savings by private citizens by allowing a tax credit of up to $1,000 on savings and investments, but it also confronts the need to reduce the heavy tax burden of corporations, a burden which is ultimately passed on to the consumer. We must reduce corporate taxes for a number of reasons:

First, high taxes are passed along to the consumer as higher charges for goods and services. Lower corporate taxes would mean lower prices for you and me;

Second, high corporate taxes mean that corporations have fewer net dollars to spend for inventory and equipment replacement, expansion and purchase of new equipment. This means a loss of jobs. There is no new construction, so construction trade unemployment remains high or continues to escalate. Jobs are also lost within the company itself for a lack of replacement of older equipment. Plans to expand are postponed and no new jobs are created;

Third, with more money going to taxes, less is available for salaries and increased fringe benefits for employees; and

Fourth, fewer funds are available to pay dividends to the company's stockholders. The stockholders come from all walks of life with one thing in common—they depend upon dividends to maintain their standards of living.

The ability of business to create jobs and thereby reduce unemployment depends on its ability to equip present workers with the proper tools and equip new workers with more plant and equipment. All this requires further investment.

Now you may ask—what kind of loss to the Treasury will result from enactment of the bill? This could mean less revenues, thereby increasing the deficit. Crowding out of investment capital and inflation could follow the financing of that deficit. Let me make some points in this regard which I think will interest you.

Time and time again through legislation, areas where spending should be cut have been cut. And there can be more reductions. It is my hope the ever-increasing growth of Government can be reduced in order to avoid more deficit spending.

There is much evidence that the losses in revenue will be substantially offset by additional revenues generated through increased productivity and jobs created. Federal expenditures will decrease with people moving from a nonproductive, Government-supported status to a tax-generating status.

It is my contention that any decline in revenues would soon be renewed and overcome. Several years ago the Canadian Government cut corporate taxes drastically. The effective rate of taxation

was reduced from 49 percent to 40 percent, amid cries that it would bring a substantial decline in revenue. But because of the large increase in productivity and jobs generated by that tax cut, there were no losses in revenue. Instead, a surplus was generated.

The Jobs Creation Act is just one attempt at tax reform but all tax reform should share the same objectives:

First, assuring more jobs within the private sector, so as to reduce unemployment and to return persons to a tax-generating, instead of a tax-consuming, status;

Second, increasing our standard of living in real, not inflated terms;

Third, improving production efficiency, so as to produce more goods at less cost, goods which are improved in their quality; and

Fourth, attaining a durable, stable economic recovery without added reliance on the instrument of Government and Federal policies, which too often have unforeseen and counterproductive effects.

To achieve goals such as sound growth, fuller employment, and adequate capital formation, we should look to the enterprise of free men, not to big government.

These reforms can help us move toward real, sustained growth built on productivity and real wages. The rejection of them can hurt us by sending us into self-defeating artificial inflationary growth. Congress must make a choice and make it soon and there is little room for error.

Although the Senate, by its vote on the Danforth-Javits amendment, has already said it relies more upon Government than upon individual initiative. I have not yet abandoned the hope that Members of this body will exercise their independent judgment. Peanut rolling power should not roll the Senate.

In February I again introduced legislation designed to accelerate capital investment and with it job creation and productivity in the private sector. The bill, S. 503, the Jobs Creation Act of 1977, is essentially the same bill I introduced last October. At that time the official unemployment rate exceeded 8 percent and prospects for a rapid recovery were less bright than they are today. Despite this recent improvement there is more, not less, need for tax changes which will increase the pool of savings available for capital formation. During the next 5 years the challenge which the private sector must face is a considerable one.

Its parameters may be stated in both human and financial terms. Between now and 1980 we must create at least 12 million jobs for those who are currently unemployed and for several million new entrants to the labor force. In order to accomplish this monumental task and provide for the future security of these same jobholders, American industry must invest over this current decade close to $1,500 billion as measured in 1972 constant dollars. Stated another way, between 1975 and 1980, fixed capital investment must equal 12 percent of our projected gross national product.

The required annual rate of investment in fixed capital is substantially higher than the 10.4 percent rate which characterizes the period from 1965 to 1970.

The consequences of our failure to save and invest at this 12 percent rate will be both predictable and painful. The growth in our labor force will not be matched with a growth in job opportunities, new entrants will be discouraged, job habits and skills will not be learned, income maintenance programs—entitlement and otherwise—will increase, Federal deficits will rise rather than fall, productivity will decline and inflation will become not episodic but endemic as deficits are created and monetized.

At the Federal level, the impact of unemployment is staggering. Each 1 percent increase in the unemployment rate above 4 percent results in revenue losses and expenditure increases totaling $16 to $18 billion. For as long as unemployment rates remain at high levels, budgetary balance cannot be achieved and efforts to hold inflation in check become increasingly less successful as the rate of money creation exceeds the annual rate of production of goods and services.

The Federal Government can do little to alter the size of the labor force or its growth. However, efforts can be made to insure that sufficient capital investment is available to create the jobs which a growing labor force demands. That is the purpose of the Jobs Creation Act and the tax changes which the act requires.

Let me turn briefly to the subject of capital needs. We have all seen the results of several studies of capital needs. Among them one stands out as complete in the sense that it relates capital investment to a series of established national goals such as full employment, rising GNP, energy conservation, capital replacement, and a cleaner environment. In that same context it examines aggregate investment needs and relates them in dollar terms to the realization of each of our many goals in a disaggregate form. The study to which I am referring was requested by the Council of Economic Advisers and was performed by the Bureau of Economic Analysis. The results of that research were made generally available in December of 1975.

The approach followed by the Bureau was as follows:

First. GNP and its major components were projected through 1980.

Second. The aggregate GNP projections were disaggregated by industry group.

Third. Input-output analysis then related final industry sales to domestic investment requirements by industry.

Fourth. Historic capital input requirements were then adjusted by industry to reflect the demands of environmental regulations which currently exist.

Fifth. Finally, investment needs were related to energy conservation and increasing energy independence.

The figures which resulted represent a clear challenge to this society for they indicate that the price of a brighter future is a less profligate present. We cannot perpetuate an approach to our Federal tax law and Federal budget which rewards consumption and penalizes saving and investment. Over 200 years ago Adam Smith, in reflecting on the causes of the wealth of nations, concluded that wealth lies not in our hoards of precious metals, but in the productive interactions of land, labor, and capital. Our material success is related not to the fact that we work harder or longer today than we did 200 years ago, but rather that we work more productively with an ever-expanding capital base.

As a nation, we stand at a crossroads. One road, that traveled by Great Britain, has the immediate appeal associated with redistributing existing wealth; but it also holds in store the ultimate pain of sharing not the wealth but the resultant poverty. The other, less frequently traveled road, promises continued progress and gradual enrichment of all members of society. The proposals of the Jobs Creation Act are all directions to pursue the path which we have so successfully traveled in the past. Their rapid implementation will reduce revenues at the Federal level only slightly and for a short period.

While we are told that the power to tax is the power to destroy, we must also realize that the power to tax can become the power to create. It is to this creative power that the amendment is addressed.

Mr. President, I ask unanimous consent that an editorial which appeared in the Wall Street Journal on August 4, 1976, one that appeared on April 26, 1977, and my letter to the editor of the Washington Star on May 26, 1976, all be made a part of my remarks at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Aug. 4, 1976]

THE KEMP COUNTER

Jack Kemp, who stepped down as quarterback of Buffalo's pro football team to become a hard-charging Congressman, has diagramed a play by which the Republican team could steal the Democrats' unemployment issue. He has rounded up 132 congressional cosponsors for his Jobs Creation Act of 1975, but so far has been stiff-armed by both President Ford and Governor Reagan.

Congressman Kemp's insight is that the way to stimulate the economy is to cut taxes, especially taxes that retard job-creating investments and the savings that finance them. Thus his bill would allow individuals to take tax credits for additional savings of up to $1,000, reduce corporate tax rates, and speed up depreciation and investment credits. A provision in the companion Senate bill sponsored by Senator James McClure, and separately endorsed by Mr. Kemp, would index the personal tax schedules to that taxpayers are not pushed up into higher tax brackets by inflation.

These measures would be a tremendous spur to economic growth now and in the future. Democrats habitually denounce any cut in corporate taxes as a sop for the rich, but in fact the major beneficiaries would be the major shareholders, which are the pension funds of the workingman. Keynesians of course have a congenital bias against savings, but in fact an increase in the rate of return for capital would call out investment spending even in the short term. With a greater reward for putting people to work and a greater reward for working, there would be more work, more jobs and less unemployment.

Why should Congressman Kemp have

trouble selling this to his party's presidential contenders? Chiefly because they believe that tax cuts would conflict with the priority of containing inflation. Their theory is that unemployment is the price to be paid for stopping inflation. In this view, the trick is to pare down the growth in government spending, to pare down the deficits, to allow the Fed to pare down money growth. Unemployment would be sticky in the short run, but the economy will grow in the long run.

There is much to be said for this theory, especially in contrast with Jimmy Carter's proposal to fight unemployment and worry about inflation later. With modern income support systems, unemployment is a less pressing social problem than formerly, and it seems clear to us that the recent recession and the accompanying unemployment were caused by the raging inflation. Unemployment is not likely to be reduced for very long unless there is further progress against inflation, and that clearly is the first economic priority.

Yet the conflict between this priority and Congressman Kemp's kind of tax cut is more perceived than real. There is more than a bit of Keynesian brainwashing in the standard Republican belief that tax cuts cause deficits, that deficits stimulate the economy and that a stimulated economy causes inflation. In fact, inflation is caused by excessive monetary growth. Such money growth is often stimulated by large deficits, because the Fed feels under pressure to create enough money and credit to meet the borrowing demands of both government and business. But if a tax cut directly finances business investment and thus relieves borrowing demand, the Fed could continue to restrain money and slow inflation.

In any event, it is far from clear that a tax cut will always cause a deficit. It depends on whether it succeeds in stimulating the economy enough that the lower rates yield a larger net revenue. Economist Norman B. Ture has estimated that the Kemp bill would add $151.4 billion to the GNP in the first year after the trend rate, thus increasing federal tax revenues by $5.2 billion. If all the increased productivity that would result from higher investment went into real wages, they would grow by 8.2% over the trend. Alternatively, if the productivity went entirely into employment, 7.2 million new jobs would be added. His tentative calculations show bigger advances in succeeding years.

The White House spurned the Kemp bill after the Treasury pooh-poohed such calculations, keeping its eye instead on potential losses to the federal government, from lower rates. The great irony will be if Jimmy Carter is elected and succeeds in stimulating the economy by ending the double-taxing of corporate dividends, as he has promised to do.

We can't vouch for Dr. Ture's calculations, but we do respect him as an economist. As for Jack Kemp, we can't help but note that his Buffalo district has a 12% unemployment rate and that he won re-election last time out with 73% of the vote. The GOP needs an employment program, and especially in terms of getting a serious debate going on the issue, it could do a lot worse than Mr. Kemp's.

[From the Wall Street Journal, April 26, 1977]

CONGRESS AND THE ECONOMY

We don't know how long it will last, but after three months of the Carter administration, the Democratic Congress has clearly outperformed the White House on economic policy. It is hard to believe, but for the first time in recent memory the business and financial community has reason to look to Capitol Hill for protection against the excesses of the Oval Office.

It was the House that beat back the AFL–CIO's common-situs picketing bill, which Mr. Carter had pledged to sign The House almost scrapped the President's ill-conceived $50 rebate scheme, mauling it so badly that Mr. Carter had to abandon it or be embarressed by having the Senate do it for him.

Congress is also being viewed as a bulwark against Mr. Carter's energy program. It has become a cliche in the financial community to talk of the energy package as being "a cloud hanging over the market," with investors nervously assuring each other that Congress won't let it pass. Yet there is Mr. Carter vowing he will push it through even if it costs him a second term.

It might easily have cost him his first term had he last fall come out for steep energy taxes and controls instead of making his campaign pledge of energy price deregulation. That pledge, now mothballed, probably provided him with his victory margin over Gerald Ford in the energy-producing states. The locus of political forces now pressing for deregulation, which is the only solution to the nation's energy problems, now resides in the House of Representatives.

And what about positive ideas to expand the U.S. economy? Again, the pressures are in the Congress, the resistance in the White House. Now that he has scrapped his $50 rebate, Mr. Carter is arguing that the economy doesn't need help of any kind, that all indicators are up but the stock market. The stock market, which is the most reliable single indicator we have of future economic activity, has been relentlessly sliding since Inauguration Day, rallied briefly with the death of the rebate and started plunging again with the announcement of the energy program.

Against the President's wishes, the Senate has insisted on preserving the investment and job credit tax provisions of the original economic package. This is a very messy and inefficient means of reducing the corporate income tax. But the Senate's heart, at least, is in the right place.

In the next few days, the Senate will have a chance to add to its record in this regard. It will be voting on Republican measures to expand the economy through permanent reductions in personal income-tax rates. The idea, which the Republicans willingly credit to President Kennedy, who got the economy moving in the 1960s through similar rate reductions, is so popular among Senate Democrats that President Carter has had to announce he will veto the measure if it comes to his desk, thereby hoping to discipline Senators of his party who might be tempted to vote with the GOP.

There are two Republican amendments. One, offered by Senators Danforth of Missouri and Javits of New York, is a politically timid measure that clings to Keynesian economics for theoretical support. It limits rate reductions to income classes below $20,000, the idea being to keep Republicans from helping the rich.

But the reason rate reductions are in order is that the inflation of the past four years has pushed all Americans into higher tax brackets, increasing their real rates of taxation without benefit of legislation. The process has numbed incentives for people in classes above $20,000 as well as those below. And as inflation continues, so does the process. If the Senate fails to enact personal rate reductions, taxes will not remain unchanged. Instead, everyone's taxes will go up, since inflation will push everyone up the progressive rate schedule.

The second Republican amendment, offered by Senator Roth of Delaware, deals directly with this problem. It proposes a permanent 10% across-the-board reduction in personal income-tax rates. Theoretical footing for the idea rests on classical economic theory, which holds that tax rates can get so high that they both dampen economic activity and lower revenues.

There seems to be sufficient Senate support, in private, to pass the Roth amendment. Whether enough Democrats are ready to vote for a measure the President threatens to veto will be known this week. For the nation's sake, we hope there will be. President Carter, too, would eventually come to appreciate this surprising and unexpected performance on Capitol Hill.

HUMPHREY-HAWKINS NO FRIEND OF FULL EMPLOYMENT AND STABLE PRICES

THE EDITOR,
The Washington Star,
Washington, D.C.

DEAR EDITOR:

During the past month, a number of articles dealing with the Humphrey-Hawkins or Full Employment and Balanced Growth Act have appeared in the Washington media. The need for a fully employed economy is not really open to question or debate. However, the manner in which the goal is best achieved is the subject of intense disagreement. Senator Humphrey, the principal sponsor of this measure, concluded that the enactment of the Humphrey-Hawkins Bill would achieve the twin goals of full employment and price stability. He began with the basic premises that work and productivity are better than welfare and waste, and that the full utilization of human and capital resources is in the national interest.

Obviously, I would not argue with either of these sentiments. In fact, they have my full and unqualified support. I do, however, disagree with the notion that the consequence of the enactment of the Humphrey-Hawkins Bill would, in fact, be a fully employed economy with stable prices.

The bill itself is first and foremost an attempt to initiate a system of national economic planning. It assumes that the economy fails to achieve its full potential only because of an absence of an economic plan at the Federal level. In short, Senator Humphrey says that individuals and institutions plan their activities in order to realize their objectives. In short, if planning is good for General Motors, it must be good for America. This type of reasoning reveals a dazzling level of misapprehension, both about planning at General Motors and its applicability for planning a national economy. Within a complex environment, such as that faced by any large corporation, planning is a decentralized activity designed to force decision-making down to the lowest level in the organization where the information is readily available and the best decisions can be made. The national economic planning envisioned by Senator Humphrey is the reverse of this. It is monolithic and forces economic decisions away from the market place and into the upper reaches of the highest levels of the Federal bureaucracy. It is there that decisions relating to prices, capital allocation and availability, employment and wages will be made. These basic determinations will no longer be arrived at through the unfettered and free interaction of individuals in the market place.

My opposition to national economic planning, as proposed by Senator Humphrey, is only, in part, based upon a philosophical commitment to a free market system. I also reject it on the pragmatic basis that it simply does not work. Planning can be compared to an automobile trip. If we are to arrive at our destination, we must know where we are, where we are going, how long it will take, who is going to drive and how much the trip will cost. When it comes to the economy, we simply cannot answer these kinds of questions with a high level of accuracy.

If an economic plan is to be successful,

the planner must know where the economy is now and where it is likely to be in the next 18 months or so. Surely our experience over the past two years should have convinced us that we are unable to state with precision where we are in the economic cycle. However, even if we were, we would not be able to prescribe the appropriate monetary or fiscal policy to be enacted now which would be appropriate in direction and degree for the future time period in which that policy would begin to exert its effects. In this regard, you have only to recall that we were all putting on WIN buttons when subsequent data revealed that we had already lost. The economic plan is therefore unlikely to be appropriate since we have a limited understanding of where we are and where we are going. In addition to these disadvantages, we really know little about the effectiveness of the vehicles of monetary and fiscal policy to move us from one point to another in an orderly and efficient manner.

However, even in the unlikely event that these initial obstacles to effective planning could be eliminated, could the planners offer a course of action which represents the best possible way to achieve full employment and stable prices? Would the planners and the planning mechanisms be freed from the competing and contradictory demands of lobbies, pressure groups, and powerful constituencies? I think not, and am forced to conclude that optimal results would never be achieved. In short, the plan would reflect the political golden rule. That is to say, those who have the gold, or the power, will make the rules.

The final issue with which Senator Humphrey must come to grips is the issue of cost.

What is the cost of this proposed journey into an economic Utopia? In a word, the price tag is staggering. Hearings which have been held to date have brought forth testimony from liberals such as Charles Schultz and Andrew Brimmer to the effect that the enactment of the Humphrey-Hawkins Bill would result in severe inflation. With special reference to the idea of establishing the Government as an employer of last resort, Dr. Schultz, a former Director of the Bureau of the Budget said:

"The direct and indirect effects of this on the inflationary problem would be extremely serious, once the bill was in full operation. Labor would become very scarce over a broad range of semiskilled and unskilled jobs in private industry. Wage rates would rise sharply and prices would follow; the size of the government's jobs programs would grow rapidly, as workers left lower paying private job for the higher wages stipulated in Section 402 of the bill."

The inflationary effects of Senator Humphrey's proposal result not from the fact that it seeks to create full employment, but rather that it merely camouflages unemployment. Employment describes a situation in which those who labor create real goods and services which can be sold and the wages earned can be used to purchase the larger amounts of product which have been created. However, if those who are "employed" by government produce nothing or fail to produce an amount of product consistent with the wages they are paid, then their consumption of goods and services must be subsidized by others who are productive. To this extent the effect of Humphrey-Hawkins is to continue and to accelerate the ongoing process of income redistribution in an indirect, invisible and random manner.

Finally, Senator Humphry has indicated that the net cost of the bill, as fully implemented, would run between 8–12 billion dollars. In order to reach this conclusion, one must make any number of heroic assumptions and in addition fail to count the indirect costs of inflation which would be borne by the entire nation. Even on a direct cost basis, however, should the Federal Government be forced to provide three million jobs by 1980, a conservative figure, the cost per job, to include salary, supervision and investment, would exceed $15,000. Thus, the total gross cost would be $45 billion less any offsets resulting from taxes paid and reduced welfare and unemployment payments. The actual level of such offsetting revenues and savings is probably low. Our experience with programs of this type indicates that only 20 percent of the participants were formerly either receiving unemployment compensation or public assistance.

In short, the Humphrey-Hawkins Bill is at best well intentioned, but poorly conceived legislation. At worst, it is a blueprint for national economic disaster.

Sincerely yours,

JAMES A. MCCLURE,
U.S. Senator.

May 26, 1976.

Mr. McCLURE. I thank the Senator from Delaware for yielding me the time.

Mr. ROTH. Mr. President, I mentioned to the distinguished chairman of the Committee on Finance that the amendment in its present form did not properly reflect all the way through the 10-percent change in the tax brackets. I ask unanimous consent to modify the amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The amendment will be so modified.

The amendment, as modified, is as follows:

On page 32, beginning with line 1, strike out through the matter appearing before line 1, on page 37, and in lieu of the material sought to be inserted by the committee amendment, insert thereof the following:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)), a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.
Over $3,200 but not over $4,200	12.6% of the excess over $3,200.
Over $4,200 but not over $5,200	$126, plus 13.5% of excess over $4,200.
Over $5,200 but not over $6,200	$261, plus 14.4% of excess over $5,200.
Over $6,200 but not over $7,200	$405, plus 15.3% of excess over $6,200.
Over $7,200 but not over $11,200	$558, plus 17.1% of excess over $7,200.
Over $11,200 but not over $15,200	$1,242, plus 19.8% of excess over $11,200.
Over $15,200 but not over $19,200	$2,034, plus 22.5% of excess over $15,200.
Over $19,200 but not over $23,200	$2,934, plus 25.2% of excess over $19,200.
Over $23,200 but not over $27,200	$3,942, plus 28.8% of excess over $23,200.
Over $27,200 but not over $31,200	$5,094, plus 32.4% of excess over $27,200.
Over $31,200 but not over $35,200	$6,390, plus 35.1% of excess over $31,200.
Over $35,200 but not over $39,200	$7,794, plus 37.8% of excess over $35,200.
Over $39,200 but not over $43,200	$9,306, plus 40.5% of excess over $39,200.
Over $43,200 but not over $47,200	$10,926, plus 43.2% of excess over $43,200.
Over $47,200 but not over $55,200	$12,654, plus 45.0% of excess over $47,200.
Over $55,200 but not over $67,200	$16,254, plus 47.7% of excess over $55,200.
Over $67,200 but not over $79,200	$21,978, plus 49.5% of excess over $67,200.
Over $79,200 but not over $91,200	$27,918, plus 52.2% of excess over $79,200.
Over $91,200 but not over $103,200	$34,182, plus 54.0% of excess over $91,200.
Over $103,200 but not over $123,200	$40,662, plus 55.8% of excess over $103,200.
Over $123,200 but not over $148,200	$51,822, plus 57.6% of excess over $123,200.
Over $148,200 but not over $163,200	$63,342, plus 59.9% of excess over $143,200.
Over $163,200 but not over $183,200	$75,222, plus 61.2% of excess over $163,200.
Over $183,200 but not over $203,200	$87,462, plus 62.1% of excess over $183,200.
Over $203,200	$99,882, plus 63.8% of excess over $208,200.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.
Over $3,200 but not over $4,200	12.1% of the excess over $3,200.
Over $4,200 but not over $5,200	$126, plus 14.4% of excess over $4,200.
Over $5,200 but not over $7,200	$270, plus 16.7% of excess over $5,200.
Over $7,200 but not over $9,200	$594, plus 17.1% of excess over $7,200.
Over $9,200 but not over $11,200	$936, plus 19.8% of excess over $9,200.

"If the taxable income is:	The tax is:
Over $11,200 but not over $13,200	$1,332, plus 20.7% of excess over $11,200.
Over $13,200 but not over $15,200	$1,746, plus 22.5% of excess over $13,200.
Over $15,200 but not over $17,200	$2,196, plus 24.3% of excess over $15,200.
Over $17,200 but not over $19,200	$2,682, plus 25.2% of excess over $17,200.
Over $19,200 but not over $21,200	$3,186, plus 27.9% of excess over $19,200.
Over $21,200 but not over $23,200	$3,744, plus 28.8% of excess over $21,200.
Over $23,200 but not over $25,200	$4,320, plus 31.5% of excess over $23,200.
Over $25,200 but not over $27,200	$4,950, plus 32.4% of excess over $25,200.
Over $27,200 but not over $29,200	$5,598, plus 34.2% of excess over $27,200.
Over $29,200 but not over $31,200	$6,282, plus 36.9% of excess over $29,200.
Over $31,200 but not over $35,200	$7,020, plus 37.8% of excess over $31,200.
Over $35,200 but not over $39,200	$8,532, plus 41.5% of excess over $35,200.
Over $39,200 but not over $41,200	$10,152, plus 43.2% of excess over $39,200.
Over $41,200 but not over $43,200	$11,616, plus 45.9% of excess over $41,200.
Over $43,200 but not over $47,200	$11,934, plus 46.8% of excess over $43,200.
Over $47,200 but not over $53,200	$13,806, plus 47.5% of excess over $47,200.
Over $53,200 but not over $55,200	$16,776, plus 51.4% of excess over $53,200.
Over $55,200 but not over $67,200	$17,784, plus 52.2% of excess over $55,200.
Over $67,200 but not over $73,200	$24,048, plus 53.1% of excess over $67,200.
Over $73,200 but not over $79,200	$27,234, plus 54.9% of excess over $73,200.
Over $79,200 but not over $83,200	$30,528, plus 55.8% of excess over $79,200.
Over $83,200 but not over $91,200	$32,760, plus 56.7% of excess over $83,200.
Over $91,200 but not over $103,200	$37,296, plus 57.6% of excess over $91,200.
Over $103,200 but not over $123,200	$44,208, plus 59.4% of excess over $103,200.
Over $123,200 but not over $143,200	$56,088, plus 60.3% of excess over $123,200.
Over $143,200 but not over $163,200	$68,148, plus 61.2% of excess over $143,200.
Over $163,200 but not over $183,200	$80,388, plus 62.1% of excess over $163,200.
Over $183,200	$92,808, plus 63.3% of excess over $183,200.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	17.6% of the excess over $2,200.
Over $2,700 but not over $3,200	$63, plus 13.5% of excess over $2,700.
Over $3,200 but not over $3,700	$130, plus 14.4% of excess over $3,200.
Over $3,700 but not over $4,200	$202, plus 15.3% of excess over $3,700.
Over $4,200 but not over $6,200	$299, plus 17.1% of excess over $4,200.
Over $6,200 but not over $8,200	$621, plus 18.9% of excess over $6,200.
Over $8,200 but not over $10,200	$999, plus 21.6% of excess over $8,200.
Over $10,200 but not over $12,200	$1,431, plus 22.5% of excess over $10,200.
Over $12,200 but not over $14,200	$1,881, plus 24.3% of excess over $12,200.
Over $14,200 but not over $16,200	$2,367, plus 26.1% of excess over $14,200.
Over $16,200 but not over $18,200	$2,889, plus 27.9% of excess over $16,200.
Over $18,200 but not over $20,000	$3,447, plus 30.4% of excess over $18,200.
Over $20,200 but not over $22,200	$4,059, plus 32.4% of excess over $20,200.
Over $22,200 but not over $24,200	$4,707, plus 34.2% of excess over $22,200.
Over $24,200 but not over $28,200	$5,391, plus 36.8% of excess over $24,200.
Over $28,200 but not over $34,200	$6,831, plus 42.5% of excess over $28,200.
Over $34,200 but not over $40,200	$9,261, plus 45% of excess over $34,200.
Over $40,200 but not over $46,200	$11,961, plus 47.5% of excess over $40,200.
Over $46,200 but not over $52,200	$14,931, plus 54.2% of excess over $46,200.
Over $52,200 but not over $62,200	$18,171, plus 55.8% of excess over $52,200.
Over $62,200 but not over $72,200	$23,751, plus 57.6% of excess over $62,200.
Over $72,200 but not over $82,200	$29,511, plus 59.4% of excess over $72,200.
Over $82,200 but not over $92,200	$35,451, plus 61.2% of excess over $82,200.
Over $92,200 but not over $102,200	$41,571, plus 62.1% of excess over $92,200.
Over $102,200	$47,781, plus 63.8% of excess over $102,200.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $1,600	No tax.
Over $1,600 but not over $2,100	12.6% of the excess over $2,600.
Over $2,100 but not over $2,600	$63, plus 13.5% of excess over $2,100.
Over $2,600 but not over $3,100	$130.50, plus 14.4% of excess over $2,600.
Over $3,100 but not over $3,600	$202.50, plus 15.3% of excess over $3,100.
Over $3,600 but not over $5,600	$279, plus 17.1% of excess over $3,600.
Over $5,600 but not over $7,600	$621, plus 19.2% of excess over $5,600.
Over $7,600 but not over $9,600	$1,017, plus 22.5% of excess over $7,600.
Over $9,600 but not over $11,600	$1,467, plus 25.2% of excess over $9,600.
Over $11,600 but not over $13,600	$1,971, plus 23.5% of excess over $11,600.
Over $13,600 but not over $15,600	$2,547, plus 32.4% of excess over $13,600.
Over $15,600 but not over $17,600	$3,195, plus 35.1% of excess over $15,600.
Over $17,600 but not over $19,600	$3,897, plus 37.8% of excess over $17,600.
Over $19,600 but not over $21,600	$4,653, plus 40.5% of excess over $19,600.
Over $21,600 but not over $23,600	$5,463, plus 43.2% of excess over $21,600.
Over $23,600 but not over $27,600	$6,327, plus 45.2% of excess over $23,600.
Over $27,600 but not over $33,600	$8,127, plus 47.7% of excess over $27,600.

"If the taxable income is:	The tax is:
Over $33,600 but not over $39,600	$10,989, plus 49.5% of excess over $38,600.
Over $39,600 but not over $45,600	$13,959, plus 52.2% of excess over $39,600.
Over $45,600 but not over $51,600	$13,091, plus 54.2% of excess over $45,600.
Over $51,600 but not over $61,600	$20,331, plus 55.8% of excess over $51,600.
Over $61,600 but not over $71,600	$25,911, plus 57.1% of excess over $61,600.
Over $71,600 but not over $81,600	$31,671, plus 59.4% of excess over $71,600.
Over $81,600 but not over $91,600	$37,691, plus 61.2% of excess over $81,600.
Over $91,600 but not over $101,600	$43,731, plus 67.1% of excess over $91,600.
Over $101,600	$49,941, plus 63% of excess over $101,600.

On page 47, immediately before line 11, insert the following,

TITLE II—ADDITIONAL REDUCTION AND SIMPLIFICATION OF INDIVIDUAL INCOME TAXES

On page 47, line 11, strike out "SEC. 202." and insert in lieu thereof "SEC. 201.".

On page 58, line 9, strike out "SEC. 203." and insert in lieu thereof "SEC. 202.".

On page 59, line 24, strike out "SEC. 204." and insert in lieu thereof "SEC. 203.".

On page 61, line 21, strike out "SEC. 205." and insert in lieu thereof "SEC. 204.".

On page 62, line 16, strike out "201 and 202" and insert in lieu thereof "101 and 201".

On page 64, line 11, strike out "SEC. 206." and insert in lieu thereof "SEC. 205.".

On page 64, line 13, strike out "201, 202, and 204" and insert in lieu thereof "101, 201, and 203".

On page 64, line 16, strike out "205" and insert in lieu thereof "204".

On page 2, in the table of contents, strike out the matter relating to title I and insert in lieu thereof the following:

TITLE I—PERMANENT INCREASE IN AMOUNT OF STANDARD DEDUCTION

SEC. 101. Change in tax rates and tax tables to reflect permanent increase in standard deduction.

On page 2, in the table of contents, strike out "TITLE II—REDUCTION" and insert in lieu thereof "TITLE II—ADDITIONAL REDUCTION".

On page 2, in the table of contents, strike out the item relating to section 201 and redesignate the items relating to sections 202 through 206 as relating to sections 201 through 205.

The PRESIDING OFFICER. All of the time of the Senator from Delaware on the amendment has expired.

Mr. LONG. Mr. President, if the Senator from Delaware desires further time I would be happy to yield him some of my time if he wishes more time.

Mr. ROTH. I appreciate that. We will want a few minutes a little later. I would like to have at least 5 minutes for myself.

Mr. LONG. Mr. President, I ask unanimous consent that 5 minutes be assigned to the Senator from Delaware from my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. If he needs more time we will vield more time.

Mr. President, those of us on the majority side, in general, do not favor the amendment generally for the same reasons that we stated with regard to the previous amendment, the Danforth-Javits amendment.

This amendment would mean an additional revenue loss for fiscal year 1978 of $25 billion.

I would point out, Mr. President, that if tax reductions will stimulate the economy then we should begin to see some results with the bill that we have here. President Ford recommended what was about a $17 billion tax cut in order to stimulate the economy. We passed it, and then we renewed it. While I am sure it did some good, it did not achieve what he hoped for it and what Congress hoped for it.

The Senator's amendment, as I understand it, is a 10-percent across-the-board tax cut. Frankly, Mr. President, I really think that that type of tax cut does not have as much of a stimulative effect as something like the investment tax credit, the jobs tax credit, or the extension of the small business tax cuts that are already in the tax bill. Of course, there is room for a difference of opinion. But in my judgment, Mr. President, and I think in the judgment of a majority of this Senate, we would have a more effective stimulant if we had a tax reduction of a type which required people to do something in order to get the reduction, as is the case with the investment tax credit. In other words, if a businessman would have to make a further investment or would have to hire more people to get the benefit of the Roth amendment, I would think that it would be a more efficient vehicle for stimulating the economy.

But, Mr. President, we would point out that the Government deficit is shocking the way it stands today, with these tax reductions hoping to stimulate the economy. We are worried about inflation from the deficit coupled with some of the tax cuts recommended to the extent that the President has withdrawn his proposal for a $50 tax rebate, and what the Senator is proposing would cost a great deal more than even the $50 rebate.

I know that the Senator thinks, and I am sure he is in good faith in thinking, that his proposal will stimulate the economy. Well, it might, and then again it might not. Keep in mind if you are going to stimulate new investments, a 12-percent investment tax credit is what business has been asking for, and if that will not move them, it is hard to believe anything would move big business. When you give a jobs credit of 50 percent against the first $4,200 paid to small business people, if they will not hire more people when you give them that type of incentive it is hard to believe that just an across-the-board tax cut to put more money in circulation would do it.

And the deficit that we would have if this amendment fails to move the economy would be absolutely shocking. This is a $23 billion tax reduction for 1978. With this amendment we would be in for a tax reduction of about $48 billion. I submit, Mr. President, that that just would not be fiscally responsible.

If the economy were stimulated as the Senator believes it would be, it is our estimate that you would still lose about two-thirds of the revenue involved here so that that would still be a tax cut of about $40 billion; even if the economy were stimulated it would be very much in a deficit position.

This amendment, Mr. President, would provide $25 billion of revenue loss and 60 percent of that would go to people who have incomes of $20,000 or more. That, of course, is contrary to the philosophy of the President and the Democrats, generally, as we would like to see most of the increase in purchasing power for spending going to those who need it the most and, therefore, who we believe would spend it.

For those reasons, Mr. President, we cannot support this amendment and as the manager of the bill, I urge the Senate to vote against it.

I appreciate the good intentions of the Senator from Delaware and those who join with him in urging this amendment. I honestly believe, however, that nothing would be achieved.

Mr. KENNEDY. Mr. President, will the Senator yield for a question?

Mr. LONG. I yield for a question.

Mr. KENNEDY. It is my understanding that there are several major points that are made by the proponent of this amendment and those who have spoken for him.

One is the fact that the inflation impact in our society has meant that more and more people are paying in taxes a greater percentage of their income. Will the Senator not agree with me, generally, it is those in the lowest income bracket who have been most adversely affected by inflation? When you look at the items on the Consumer Price Index, they are basically food, fuel, and health-care costs. Those are the three major items. There is only so much that a family can do in cutting back on food or fuel. And the Finance Committee has attempted, with the $35 credit and also with the increase in the standard deduction, to focus greater attention on low-income taxpayers.

So it would appear to me that, as to the issue of inflation, the Finance Committee has approached the issue by increasing the standard deduction with the $35 credit. The committee has tried to focus tax relief on lower-income groups and has attempted to ease the burden of inflation on those most affected. I would have liked to see more of an effort in those areas. But I do think that we should recognize how that issue has been handled.

Will the Senator, as the chairman of the Finance Committee, not agree that the purpose of the $35 credit and the increased standard deduction was to provide some equity and benefit to those in the lowest-income and middle-income groups, and to reduce the burden of inflation?

Mr. LONG. Yes; I do agree with that,

and I say to the Senator, also, that we have a problem here with which the Senator has been very much aware and with regard to which he has educated the Senate. The public, frankly, perhaps thinks it is even worse than it is. But we both know that we do have some taxpayers who really are getting the best of it these days, even after we pass the tax reform proposals. There are some people who by taking advantage of every complicated provision in the tax laws, with good tax planning, good lawyers, and good accountants, are getting by without paying more than about 20 percent of their income in taxes even though they are making a lot of money.

This provision would give an across-the-board tax cut with 60 percent of the reduction going to those who are making more than $20,000. In many cases, this would mean a tax cut to a lot of people who are not paying enough the way it is right now by any fair standard.

We really ought to reform the Tax Code, as the people have been promised we would reform it, and we ought to take a really close look at these people who, by way of good tax planning, are able to get by with paying very little taxes, and see that they pay substantially more taxes than they do now.

Those people would get a tax cut under this proposal, even though they ought to pay more, and that would postpone the day when tax reform could be accomplished. If we lose all this revenue, we are not going to be able to pass a major tax reform bill which would make those who are getting all the best of it pay substantially more, while whose who are getting the worst of it would get their taxes cut. This really postpones the day when that could happen.

I am aware that the President of the United States is very much concerned about the fact that he feels that the bill is losing too much revenue the way it is now. After he withdrew his $50 tax credit proposal, in which he had pride of authorship, while he did not say it, I have not the slightest doubt, having visited with him to discuss the problem, that if this amendment is on the bill when it goes to his desk, the bill will just be vetoed, and when the time comes the people will not gain anything.

There was a cartoon by the famous Herblock in the Washington Post of just yesterday that illustrated a problem that we had better start thinking about. It showed people who had apparently found their way across a desert landscape to an oasis, or what appeared to be one, even though, when they got to it, it was dry. That had a caption "The $50 Rebate" on it. Then they looked up and saw in the distance another mirage, which was labeled "The Energy Program."

After a while people are going to get pretty impatient with us talking about all these things that never happen. I think we would be better off to stay with something within the realm of possibility. We have a bill that has a chance to become law. As of now, I think its chances are very good. But if we load the bill down with things the President believes to be fiscally irresponsbile, we are not going to do anyone a favor.

Mr. KENNEDY. I appreciate the comment.

The chairman of the Finance Committee has indicated that about 60 percent of the benefit of this amendment would go to those in the top brackets. If we are talking about trying to do something for the low- and middle-income groups, the credit approach that has been taken in the past, could be built on and expanded to provide more advantage to the low- and middle-income groups.

Another argument that has been made is in terms of the need for new capital investment. Certainly that is very important. Again, we are going to have the President's recommendations later this year. But does not the Senator agree with me that whether you favor a tax credit, or accelerated depreciation, or some other incentive, most economists agree that other methods are better to stimulate new capital formation than a tax cut?

The Senator, I am sure, is familiar with the Library of Congress study that was made last year. They analyzed the various means by which to stimulate the economy, and they found that an incremental investment credit would be the most effective way to develop new capital, and that a general tax cut was the least effective way.

Does not the Senator agree with me that there are other more effective ways of developing new capital, rather than an across the board tax cut?

Perhaps the case can be made on other grounds for a tax cut, but in terms of capital formation, it is perhaps the most inefficient way; does not the Senator agree?

Mr. LONG. I think so. As the Senator knows, in my view we ought to implement the suggestion that we have been discussing here for some time now about the refundable tax credit in the so-called tax reform law. The Senator testified for it before the committee, and that is a provision on which I will work with the Senator when we have the tax reform bill before the committee and when we study it this year. I think that has an enormous potential.

But if we vote for this big tax cut now, if it should become law, it will pretty well kill the opportunity to do that kind of thing.

We would have what we think would be a much more efficient tool to move the economy which would then not be available to us, because we would have used up all our revenue on an across-the-board tax cut, without pinpointing areas where we think there is the greatest potential.

Mr. KENNEDY. Finally President Carter has made his recommendation to Congress with regard to the rebate and the business tax cuts; after he had seen the figures on the first quarter, he felt that these tax reductions were no longer justified. Is it not true that the impact of this proposal on the economy would be felt primarily next year, rather than this year, when we do not know what the economic indicators are going to be, or what the rate of inflation or GNP growth, or unemployment will be? So it is a rather inefficient way of meeting the broader kinds of responsibilities that we have, is it not, in terms of our general economic situation? Is it not true that the principal revenue impact is prospective, a year from now, as to which time we do not have that kind of information?

It seems that in attempting to coordinate our country's fiscal and monetary policy, this proposal is not wise from an economic point of view. If the economy needs such stimulation then, we can make the judgment as to what is the fairest and most equitable way. But it makes no sense today to try to make that judgment now.

Will the Senator agree that, given the uncertainty as to where we will be in terms of unemployment and the general economic picture, we would be wise to withhold support for this proposal?

Mr. LONG. I believe so. Mr. President, how much time remains to me?

The PRESIDING OFFICER. The Senator from Louisiana has 34 minutes remaining, and the Senator from Delaware has 5 minutes.

Mr. LONG. I yield the Senator from Delaware an additional 10 minutes.

Mr. ROTH. Mr. President, I yield 5 minutes to our distinguished ranking minority member, the Senator from Nebraska (Mr. CURTIS).

Mr. CURTIS. Mr. President, I rise in defense of the common man. It is apparent from the last vote that any amendment from this side is going to have a rather difficult time to get adopted. But I rise to state the case for the taxpayer.

This particular amendment has a great deal of virtue. One of its greatest virtues is that it is an equitable tax cut for every taxpayer.

As I go up and down the land, it does not make any difference what economic group I talk to, they think they are paying too much in taxes, and they are right.

The people of low income are paying too much taxes. They do not have enough left with which to live. The people who have the good fortune to advance a little bit to a little more income, who are the potential buyers of homes and other things, say, "Our group is taxed too much."

They are right. They are taxed too much.

When we go up to the upper level of the middle class where there is a group of people who have the capability, the imagination, the creativeness, and maybe the good luck, to plunge out and be owners and employers of many other people, they say, "We cannot do it if it all goes to taxes. We are being taxed too much."

They are right. The people of wealth say they are taxed too much, and they are right. Maybe they do not need their income, but we need them. We need capital to build factories; we need capital to make expansions. It takes a good many thousands of dollars to create one job.

Every man has to give that which he has, and only the people with funds can provide funds for others. If we tax them at a rate so that if the plan succeeds they get but a small part of it themselves, we are taxing them too much.

I maintain that from the standpoint of fairness, from the standpoint of our economy, to make it go, a tax return ought to be just to people of all income tax brackets.

We ought to apply some of the good sense here in Federal taxation that we apply on the local level. If one man has one farm and another has 10 farms of equal value, the one with 10 farms pays 10 times as much.

It is not so on the Federal level. If one man has x amount of income and somebody else has 10 times that much, he will not get off with paying 10 times as much tax. He will probably pay a great deal more.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. CURTIS. Will the Senator yield 1 additional minute?

Mr. ROTH. I yield 1 additional minute.

Mr. CURTIS. Mr. President, I believe that to give everybody a tax break would spurt this economy, there would be more income, more activity, more transactions, more social security taxes paid, more income taxes paid, more excise taxes paid, and that the Treasury would not suffer.

I have no quarrel with those who want to protect the Treasury. So do I. I am ready to go on a pay-as-you-go basis tomorrow. But if we do, there have to be some changes around here. In the last 2 weeks we have added $3 billion of expenditures by amendments on the floor to previous bills. It goes on and on and on.

We have out in the wings a gigantic public works bill costing $4 billion.

Let us do something for the taxpayers. Let us stop that bill at the door. We do not need it. It will do more harm than good. Let us reduce expenditures and reduce taxes. If we put this country on a pay-as-we-go basis, we could not stop the prosperity which would come about.

I thank my friend for yielding.

Mr. McCLURE. Will the Senator from Delaware yield 1 minute.

Mr. ROTH. I yield 1 minute.

Mr. McCLURE. I wanted to ask the Senator from Nebraska if he might agree with the Senator from Idaho that the gas guzzlers of Detroit are not nearly as dangerous to the economy of this country as are the tax guzzlers in Washington.

Mr. CURTIS. No, this Washington crowd leads them all.

Mr. ROTH. I yield 3 minutes to the Senator from California.

Mr. HAYAKAWA. Mr. President, I am very much interested in this tax cut proposed by Senator ROTH.

We have before us two different kinds of tax cuts. The first applies to those with incomes of $20,000 a year and less, and the other applies to those with incomes above $20,000.

There is considerable difference in the impact of these two proposals for a tax cut. We have all been bewailing the state of the economy, which has been in a sluggish state for many years. We have tried, not too effectively, to influence that economy by taxing the rich heavily in order to make transfer payments to the not so rich. This matter of transfer payments has gone on and on until it has created a huge, huge deficit in our national budget.

The proposal to give tax cuts to those whose incomes are $20,000 or less does not hit at the people who have money to invest and who are accustomed, when they find a surplus, to making those investments, whereas a tax cut for those with incomes above that figure hits directly at those people who, when they find a surplus, are willing to invest, are willing to produce venture capital, risk capital, for business enterprises that otherwise could not get off the ground.

If we are really looking for a stimulus for the economy, then it seems to me we must encourage those who have money to invest and leave money at their disposal to invest. Otherwise, we are not encouraging people to put up the capital which makes economic growth possible.

And, Mr. President, we must have economic growth. We are being handicapped or hindered in this way, and we have been for a long, long time. It seems to me that Senator ROTH, the distinguished Senator from Delaware, has an idea that really has a future. I believe there is similar legislation being seriously considered in the House as well as in the Senate. We have something to look forward to as we push in this direction so that investment can be encouraged and the economy can get healthy again.

Thank you, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. LONG. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from Louisiana has 24 minutes remaining, and the Senator from Delaware has 5 minutes remaining.

Mr. LONG. I yield 7 minutes to the Senator from Delaware.

Mr. ROTH. Mr. President, I yield myself 5 minutes.

Mr. President, I am deeply concerned at the lack of faith, the lack of confidence, that is being expressed in America and in our economy.

As I mentioned earlier, President Kennedy, in nearly identical circumstances, urged that we give the private sector an opportunity to show what it can do. He said:

> Lets get this country moving again by providing the opportunity for all Americans to share in the good of this country.

He proposed doing it by an across-the-board tax cut that benefited all—not just the poor, not just the rich, not just the middle class but all Americans.

Mr. President, I am deeply disturbed that people do not recognize the hardship being faced by working Americans today. I am not only talking about those who are making $5,000 and $10,000 and $15,000. I am also talking about those who make $20,000, $30,000, and $40,000. I should like to read to the Senate what the New Republic, a liberal magazine, has to say about this. I think it is very interesting.

> It may be the first time in our history, depressions aside, when middle-class Americans can reasonably anticipate for their children the long-range prospect of downward mobility. The middle-class may not be a precise term; some sociologists think it obscures more than it illuminates. But many people who work at jobs—those who do not operate businesses or practice professions, also think of themselves as middle-class. In very substantial ways they are. This is, in fact, the distinctive achievement of the labor movement.

The New Republic continues, and I heartily agree when it says:

> So it is a serious political crisis when the American middle-class—an inchoate group straddling a broad range of incomes and life styles—feels itself strapped and is so. Unwanted like most revolutions, this revolution of declining expectations cannot be seen as just, and will not be seen as inevitable by those who experience it. They may not save or spend prudently; they may want automobiles too large both for their needs and the society's resources; the media they rely on for information may not be reliable, and what they prefer as entertainment, sometimes seems violent or vulgar or both. Nonetheless, in the modern economy the middle-class is not a privileged class, and it should not be treated as if it were.

Mr. President, I say, as the New Republican said, that not only those on the lower scale need help. What is wrong, I ask, wrong with helping those in the $20,000, $30,000, or $40,000 bracket? They are paying higher taxes because of the inflation caused by this Congress, by its deficit spending. It is about time that we recognize that they deserve some relief.

Are we men of so little faith, so little confidence in the future, that we are afraid to do today what Jack Kennedy did in the 1960's, when he said, "Let us give the private sector a chance to operate"? He proposed a tax reduction from 91 to 70 percent on the top end and from 20 to 14 percent on the low end, and by taking a chance, by having faith, by having confidence in our economy, in our private enterprise system, he got this country moving again.

To the big spenders, who are afraid to give a break to the American taxpayer, the working taxpayer, I say this: If you look at every tax cut in the last 20 years, it has not meant less revenue for the Federal Government; it has meant more revenue. So we are not mortgaging the future. We are not limiting the opportunity for new programs. Instead, we are increasing them.

But, more important, by acting now, we are creating nearly a million jobs by the end of next year for those people who are not employed.

You know and I know that they cannot wait. They want to go to work today. In all candor, the only reason that I believe we are not moving today is that the administration is not yet ready to move.

They talk about tax reform. Mr. President, I proposed last year, and Congress enacted, a measure requiring the Joint Committee on Taxation to come up with its recommendations for tax reform and simplification by this summer. I am as committed as any man here to the concept of simplification and tax reform that is meaningful. But we cannot wait

to get this economy moving. We must act today. Congress must show that it can seize the initiative and not wait until the White House speaks.

That is what Watergate was all about. Congress failed to provide the kind of leadership the constitutional framers saw as its proper role. That is what I am urging right now that we do: That we seize the initiative; we enact a tax cut that will be meaningful in capital formation, that will give a break to all Americans; and by doing so, show that we have confidence in our future and faith in this great Nation.

Mr. McCLURE. Will the Senator yield for just one comment?

Mr. ROTH. I am happy to yield.

Mr. McCLURE. I thank the Senator for yielding and I congratulate him on a very strong and forceful statement.

I think one thing that might be added to the dialog that has gone on on the Floor today, with regard to this amendment and the last one that was turned down by the Senate, is that the administration witnesses before the Budget Committee yesterday—Secretary of the Treasury Blumenthal, Budget Director Lance, and the Chairman of the Council of Economic Advisers, Charlie Schultze—all admitted under questioning that their proposals for a tax reduction could not be in effect prior to fiscal 1979. So we are not talking about delaying from now until August the benefits of a tax cut. We are saying to the taxpayers of this country, "You are not going to get any more tax relief before 1979."

I think this should be very clearly understood for the record right now, that those of us who voted for the last amendment and those of us who support this amendment are in favor of tax relief for the taxpayers of this country now, not 2 years from now.

Mr. ROTH. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Delaware has 3 minutes remaining.

Mr. ROTH. I yield 1 minute to the Senator from Alaska.

Mr. STEVENS. Mr. President, I support this amendment. In doing so, I state that it is a change of position as far as I am concerned, because, in the past, I have opposed tax reductions of this type.

As I see the course ahead of us, the young people of this country are going to be oppressed. We are going to give tax relief to those of our generation who did not properly insulate their homes. That tax relief is going to be paid for by future generations. The only thing that I know of that is going to give hope to future generations, the young people of this country, that we mean business in our statements that we will be certain that they, too, can afford the higher costs that are coming by taxation or increase in the market price of oil or gas, is by saying that we are willing to reduce permanently the amount that Government takes from people in the future.

I supported the last amendment on that basis and I intend to support this amendment on that basis, also.

Mr. HARRY F. BYRD, JR. Mr. President, how much time does the Committee on Finance have left?

The PRESIDING OFFICER. Seventeen minutes are remaining. The Senator from Delaware has 2 minutes remaining.

Mr. HARRY F. BYRD, JR. Would the Senator from Delaware want 5 or 7 minutes of that time?

Mr. ROTH. I would appreciate that.

Mr. HARRY F. BYRD, JR. I yield 7 minutes to the Senator from Delaware.

Mr. KENNEDY. May I have the attention of the Senator from Virginia? Will he reserve a little time for me to speak in behalf of the Finance Committee's position on this amendment?

Mr. HARRY F. BYRD, JR. Yes; the Finance Committee has 17 minutes left. I propose to yield 7 minutes to the Senator from Delaware, which will leave 10. If the Senator needs more than that——

Mr. KENNEDY. No; that will be fine. Perhaps after the comment of the Senator from Delaware, I shall make a response.

The PRESIDING OFFICER. The Senator from Virginia yields 7 minutes to the Senator from Delaware.

Mr. ROTH. I make a point of order that a quorum is not present.

Mr. KENNEDY. Mr. President, I shall be glad to use some of that time. Will the Senator yield me 5 minutes?

Mr. HARRY F. BYRD, JR. I yield 5 minutes to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, during the remarks of the Members who support the amendment of the Senator from Delaware, they recalled the recommendations that were made during the early 1960s for stimulating the economy.

I think there are two important factors to recognize that were not mentioned by the Senator from Delaware. First, we were facing a considerably different economic situation in the early 1960s compared to the present time.

We did have a high unemployment. It was over 7 percent in early 1961. But we were virtually free from the forces of inflation. The total increase in the Consumer Price Index from 1961 through 1963 was only about 3 percent. Inflation was running about 1 percent a year then. We had a period of price stability. We had stability in the Consumer Price Index, which is quite different from the facts we are facing today. So the economic situation was considerably different.

In both situations we had significant unemployment, but the factor of inflation was considerably different.

Beyond that, Mr. President, the messages that came from the President to Congress in 1962 and 1963 also linked tax reform with tax reduction.

The messages that came up in 1962 advocated repeal of the oil depletion allowance, advocated reform of accelerated depreciation and new taxes on multinational corporations. A whole range of proposals affecting tax equities and tax justice was made. Part of the argument made by the Senate Finance Committee is to give us the opportunity later on this year to analyze recommendations in terms of the most effective way of developing new capital and the ways we can achieve greater tax fairness and equity.

I remind my friends on the other side of the aisle, we did this in 1969. We had a new administration, yet in a 1-year period we acted on the 1969 Tax Reform Act. It did not take a long time. We had a Congress that was interested in tax reform and an administration which advanced important proposals at that time. Then again in 1976 we passed within a single Congress some important measures directed toward tax justice and tax reform.

Mr. President, for the reasons that have been mentioned here earlier today, if we are seriously interested in the process of new capital formation, we would have a difficult time finding economists who believe this is the most effective way of doing it.

The investment credit for example, has a greater impact on the development of new capital than a general tax cut.

If we are interested in dealing with the tax equity issue, there is nothing that is suggested in the amendment of the Senator from Delaware that is going to adjust the marriage penalty and many of the other kinds of tax inequities and injustice in the current law. The amendment is premature. It ought to be considered as part of the proposals for comprehensive tax reform including the recommendations which the President indicates he will send to the Congress this year.

He said he would make recommendations in energy, and he did so this past week in what has been the most far-reaching and comprehensive energy report ever made to Congress. He says he will do it in September in terms of tax reform, and it seems to me the better part of wisdom that we wait and consider those recommendations.

For those reasons, I hope that the amendment will not be agreed to.

The PRESIDING OFFICER (Mr. FORD). The 5 minutes have expired.

Who yields time?

The Senator from Virginia has all the time.

Mr. HARRY F. BYRD, JR. The Senator from Virginia yielded 7 minutes of that time to the Senator from Delaware.

The PRESIDING OFFICER. The Senator is correct.

Mr. HATCH addressed the Chair.

Mr. HARRY F. BYRD, JR. Mr. President, I am glad to yield 2 additional minutes to the Senator from Massachusetts so that he may respond to a question from the Senator from Utah.

Mr. HATCH. Mr. President, one of the major points is that we would not have the inflation we have today, partly the result of the high tax rates that hold down investment, it seems to me, in the output of goods, while at the same time Washington continues to pump up the economy.

So actually, we are arguing something that Washington is doing that is creating the difficulty.

Mr. KENNEDY. There has been a

variety of factors which have affected the inflation rate.

Mr. HATCH. Not the high tax parts——

Mr. KENNEDY. As I listen to the Senators from the other side of the aisle, any time we try to increase meals on wheels for the elderly and neighborhood health center programs, they are always talking about the deficit, and how such increases will be highly inflationary.

But here, those Senators do not mind increasing the deficit. They are not concerned about the problems of inflation.

Mr. HATCH. I point out to the Senator, John Kennedy's tax cuts paid for themselves, added more revenues to take care of some of the things the Senator has been complaining about. The problem is, we keep spending.

The PRESIDING OFFICER. The 2 minutes have expired.

Mr. KENNEDY. May I have 45 seconds?

Mr. ROTH. Yes.

Mr. KENNEDY. The Senator is correct about the effect on revenues. But the Senator has not been able to link the impact of the cuts themselves to the effect on revenues. The cuts occurred at times when we were beginning to see an expanding economy.

It is always interesting to say we get more revenues, but the challenge is to link the particular increase in revenues with the reductions and that correction has not been made by the proponents of this amendment. The testimony which is before the Finance Committee, the Library of Congress studies made and the Budget Committee observations, quite clearly indicate that in the area of new capital formation, there are many better and more efficient ways to achieve the goal.

We can take $10 billion and throw it out in the street in the front of the Capitol and someone will pick it up and spend it, so there will be some increase in spending and growth. If the economy is growing anyway, the revenue may be made up. But that is not a very efficient way. There is no cause and effect relation between the growth and the revenue loss.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HATCH. May I have 15 seconds?

Mr. ROTH. How many minutes do I have?

The PRESIDING OFFICER. The Senator has 7 minutes.

Mr. HATCH. May I have 30 seconds?

Mr. ROTH. One minute.

Mr. HATCH. The Senator just admitted that a tax cut across the board would increase revenue for the Federal Government which may purport to do many other things. It seems to me if we look at the charts and what it has done, every time we have a tax cut we have an increase in revenues and productivity of the GNP, and many other things that seem to turn out well.

I point out to the Senator, the 10-percent rate reduction will pull the rich out of some of their tax shelters, causing them to earn more taxable income because they can keep more of it. It has been a proven fact, every time we reduce that, they will not only keep more of it, they will spend more of it and pay more in income tax.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. ROTH. I yield the Senator 1 additional minute.

Mr. HATCH. The important point I am trying to make is that the way to tax the rich and have them be happy about being taxed is with a tax cut across the board, which will pull them out of the shelters and cause them to start investing in America.

Mr. KENNEDY. Mr. President, will the Senator yield me 40 seconds?

Mr. HARRY F. BYRD, JR. I have only 2 minutes remaining.

Mr. KENNEDY. Thirty seconds?

Mr. HARRY F. BYRD, JR. I yield the Senator 30 seconds.

Mr. KENNEDY. If we were to accept the reasoning of the Senator from Utah, why not abolish all taxes and let the revenues roll in? Obviously, that does not make any sense.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. ROTH. I yield.

Mr. McCLURE. I say to the Senator from Massachusetts in connection with what he said about reducing taxes to zero and seeing the revenues roll in, try raising the taxes to a hundred percent and see how the revenues roll in.

Mr. ROTH. Mr. President, we are facing a fundamental choice today, a choice between bigger and bigger government and higher tax rates or a more efficient, stronger private economy capable of creating real jobs and a strong future for all Americans. That is the choice. That is the choice we are making this afternoon by voting on my amendment.

President Kennedy said in the early 1960's that the high taxes were having a stagnating effect on the economy. That was true then and it is true today.

I am amazed that some of my colleagues on the other side do not see any equity in giving tax relief not only for those receiving $15,000 and less but also for those who are earning $20,000, $30,000, and $40,000. We are giving them no tax break today.

All we are trying to do is to put the American working man and working woman back into the position they were in before this inflation affected them. Frankly, it would take a great deal more than 10 percent. The only way we are going to get this economy moving, and moving strongly, is through the private sector. We must show the American people that we think the economy is capable of building up and creating meaningful jobs.

I already have pointed out that my amendment, if adopted today, will mean an additional 920,000 jobs by the end of next year. I ask this, is there a better approach—permanent jobs in the private sector—or shall we continue the other route, of spending more and more money for public jobs that are not adding to the productivity of this country and are inflation bent? It seems to me that the choice is clear.

It is important that we recognize that the situation is serious. The Washington Post, in today's editorial on a discussion of the tax bill, points out the following, and I hope everybody will listen:

> In February, the administration predicted a real economic growth rate of 5.4 percent this year, inflation rate for consumers of 5.1 percent. Now it has revised downward the growth rate to 4.9 percent and the inflation rate up to 6.2 percent. This means higher inflation this year than in 1976 as well as slower growth. The idea that the American economy is stabilizing itself under present policies appears to be wrong.

Mr. President, I hope that the Members of the Senate will listen to these words. This is what the Washington Post is saying about this tax package:

> There is nothing in the present severely abrogated tax bill that will make any great difference in these trends one way or the other.

What I am suggesting is that we make this tax package truly an economic stimulus that will give the economy, as President Kennedy said, the chance to show what it can do. By enacting this tax cut, we will create meaningful jobs in the private sector; and by giving a tax break to all Americans, we will be showing that productivity and hard work still pay off in this great Nation.

The PRESIDING OFFICER. The time of the Senator has expired.

The Senator from Virginia has 2 minutes remaining.

Mr. LONG. Mr. President, I believe that our position in opposition to this amendment is clear. We smply do not buy the Senator's optimistic assumption that an across-the-board tax cut of 10 percent will stimulate the economy to anywhere near the degree the Senator thinks it would. I can picture ourselves with an additional deficit. If the economy does move, it is our estimate that the feedback would be only about one-third of what this would give us. That would make the bill's $23 billion tax cut, if you take into consideration the extenders as well as the new revenue losses, grow to a minimum of a $40 billion tax cut. Neither the administration nor those of us on this side of the aisle agree for one moment that that is the best way to put together a package to stimulate the economy.

We think there are other things, such as a refundable tax credit, to provide specific incentives in certain areas that very likely would have more effect. We think that further revenue losses beyond what is already in the bill before us should await the tax reform bill, which will be a major undertaking. To adopt this amendment would foreclose the opportunity to have meaningful tax reform in this Congress.

For those reasons, Mr. President, we do not believe that the amendment should be agreed to.

I fully appreciate the very noble intentions of the Senator from Delaware. He is a statesman and a great Senator. I regret that he is in error on occasion, but that happens to all of us from time to time. I am sure that I am no exception to that.

Mr. President, I honestly believe that if the amendment is agreed to, we are

not going to have any tax cut for anybody. That being the case, I hope the amendment will not be agreed to.

Mr. DOLE. Mr. President, the Senator from Kansas rises in support of the amendment by the Senator from Delaware.

The Senate just completed voting on another tax cut amendment. The Senator from Kansas supported that amendment. But in many ways this amendment is superior to the one we just voted on.

In my view, the most significant aspect of this amendment is the relief it provides for middle-income taxpayers. It seems to me that the heart and soul of this country is the average American who provides the day-in, day-out labor and toil that has made this country great. They are the Americans who provide the bulk of the consumer spending that is essential to the continued economic growth of this Nation.

But the middle-income American has been laboring under a growing tax burden. It is an indirect tax increase that needs no specific act of Congress. It is the tax increase that is imposed on every American due to inflation, as I referred to previously in an earlier statement.

Central to the ethic that has made our economy the greatest in the world, is the belief that we have some opportunity to get ahead—that every American has the potential for some upward mobility. But in recent years, especially the years with high-inflation rates, a pay increase does not always mean a very significant improvement in income. For, when Americans receive an increase in income to help them offset the cost of living in their struggle to meet their bills, the tax bite also increases. A raise in income means a higher tax bracket and even heavier tax burden than before.

The tax load is already excessive. It reduces incentive, and it is a restriction on the entire economy.

Adoption of this tax cut amendment would be a stimulent to the economy and to the creation of new jobs. These arguments have been presented many times previously.

This amendment in my view, does not prejudice our desire to provide tax reform at a later date, if and when the administration provides us with their tax recommendations. This is a simple provision. It does not complicate the tax code. It simply provides an across-the-board cut.

I have heard expressions of concern that this will lower revenue receipts so that we could not afford to have further cuts in tax reform. But, the record shows that the tax cut proposed by President Kennedy and by previous administrations has actually resulted in an increase in tax revenues. When we stimulate the economy, we get an increase in revenues from the greater level of sales and income.

At the earliest, we are looking at tax reform about 2 to 4 years from now. It seems to me that the effect of this tax cut will not even be felt at that time in any way that would prejudice or inhibit our opportunity to enact tax reform.

What this amendment does provide is meaningful and much needed relief for overtaxed Americans. It is particularly significant for those middle-income Americans who have received little or no assistance in the Finance Committee bill as it presently stands.

I urge the adoption of this amendment.

Mr. LONG. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. They have not been ordered.

Mr. LONG. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time having expired, the question is on agreeing to the amendment of the Senator from Delaware. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

(At this point Mr. METZENBAUM assumed the Chair.)

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Michigan (Mr. RIEGLE), and the Senator from Idaho (Mr. CHURCH) are necessarily absent.

I also announce that the Senator from Illinois (Mr. STEVENSON) is absent because of illness.

I also announce that if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "nay."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BARTLETT) is absent due to illness.

The result was announced—yeas 33, nays 62, as follows:

[Rollcall Vote No. 108 Leg.]

YEAS—33

Baker	Griffin	Provmire
Bellmon	Hansen	Roth
Byrd,	Hatch	Schmitt
Harry F., Jr.	Hayakawa	Schweiker
Chafee	Heinz	Stafford
Curtis	Helms	Stevens
Danforth	Laxalt	Thurmond
Dole	Lugar	Tower
Domenici	McClure	Wallop
Durkin	Packwood	Weicker
Garn	Pearson	
Goldwater	Percy	

NAYS—62

Allen	Gravel	Meicher
Anderson	Hart	Metcalf
Bayh	Haskell	Metzenbaum
Bentsen	Hatfield	Morgan
Biden	Hathaway	Moynihan
Brooke	Hollings	Muskie
Bumpers	Huddleston	Nelson
Burdick	Humphrey	Nunn
Byrd,	Inouye	Pell
Robert C.	Jackson	Randolph
Cannon	Javits	Ribicoff
Case	Johnston	Sarbanes
Chiles	Kennedy	Sasser
Clark	Leahy	Scott
Cranston	Long	Sparkman
Culver	Magnuson	Stennis
DeConcini	Mathias	Stone
Eagleton	Matsunaga	Talmadge
Eastland	McClellan	Williams
Ford	McGovern	Young
Glenn	McIntyre	Zorinsky

NOT VOTING—5

Abourezk	Church	Stevenson
Bartlett	Riegle	

So Mr. ROTH's amendment was rejected.

Mr. LONG. Mr. President, I have discussed this amendment with the leadership on the other side of the aisle.

At this point I believe that we should be able to get a unanimous-consent agreement to at least expedite the flow of legislation on this bill and I, therefore, ask unanimous consent that the remaining committee amendments be agreed to en bloc and as agreed to be treated as original text for the purpose of further amendment except that the Haskell amendment, No. 198, agreed to by the Senate on April 21, 1977, be agreed to as having been agreed to in lieu of the matter proposed to be inserted by the committee amendment to section 302 of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. CURTIS. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 195

Mr. GOLDWATER. Mr. President, I call up my amendment No. 195.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona (Mr. GOLDWATER) for himself, Mr. INOUYE, and Mr DECONCINI, proposes amendment No. 195.

On page 119, between lines 15 and 16, insert the following new section:

SEC. 408. RESTORING THE DEDUCTIBILITY OF EXPENSES FOR ATTENDING CERTAIN CONVENTIONS IN THE NORTH AMERICAN AREA.

(a) IN GENERAL.—Section 274(h) (relating to foreign conventions) is amended by—

(1) striking out "outside the United States" in paragraph (2) and inserting in lieu thereof "outside the North American area",

(2) amending subparagraph (A) of paragraph (6) to read as follows:

"(A) FOREIGN CONVENTION DEFINED.—The term 'foreign convention' means any convention, seminar, or similar meeting held outside the North American area and the Trust Territory of the Pacific.", and

(3) adding at the end of paragraph (6) the following new subparagraph:

"(E) NORTH AMERICAN AREA.—The term 'North American area' means the United States, its possessions, and the area lying west of the thirtieth meridian west of Greenwich, east of the international dateline, and north of the Equator, but not including any country of South America."

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to conventions beginning after December 31, 1976.

Mr. MATHIAS. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. MATHIAS. I ask unanimous consent that Mr. Michael Cooper of my staff be allowed the privilege of the floor during the remainder of debate on this bill and votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, I will be very happy to accept limited time on this amendment.

Mr. LONG. Mr. President, I am willing to limit time to 10 minutes on each side as far as I am concerned.

Mr. CURTIS. Mr. President, may we have order? A very important amendment has been offered.

Mr. LONG. I will ask unanimous consent that the time on the amendment be limited to 10 minutes on each side.

Mr. GOLDWATER. I was going to suggest 15 minutes because I do have cosponsors, and I do not see them in the Chamber.

Mr. LONG. Then I ask unanimous consent that it be a half hour equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. GOLDWATER. I yield myself what time I need.

Mr. President, I call up my amendment No. 195, which I introduce for myself and Senators INOUYE, DECONCINI, and STEVENS.

Mr. President, the amendment would remove restrictions on tax deductions—

The PRESIDING OFFICER. Will the Senator from Arizona suspend while we obtain quiet in the Chamber? Will Senators take their seats, or retire to the cloakrooms?

Mr. ROBERT C. BYRD. Mr. President, does the Senator plan to ask for the yeas and nays?

Mr. GOLDWATER. I do not care for the yeas and nays.

Mr. LONG. I would suggest we see what the debate brings forth. Maybe we can take the amendment.

Mr. GOLDWATER. Mr. President, the amendment would remove restrictions on tax deductions for attending meetings in foreign countries within North America. It is similar to language which was included in section 602 of the Senate Finance Committee report on the Tax Reform Act of 1976, but was dropped from the final law.

Mr. President, last year Congress enacted sweeping restrictions and bookkeeping requirements on tax deductions for attending conventions, educational seminars, and similar meetings in foreign countries. These provisions are considered to be so harsh and confusing by U.S. associations that hundreds of previously scheduled foreign meetings are being canceled. The result is untold damage to the economies of several friendly foreign nations.

In particular, I have just received a cable from Mexico City which verifies the very serious harm this law is having upon the economy of our sister nation. I regret to say it has caused the cancellation of 90 large conventions that otherwise would have taken place in Mexico. This has resulted in the loss of 250 million pesos to Mexico—$12.5 million in just 4 months.

Let me point out that it is not only Mexico's economy that suffers. There is a substantial reverse effect also. I am referring to the heavy loss of purchases which Mexicans will not make in U.S. border communities as the direct result of their weakened purchasing power. Remember, when Mexico loses substantial convention business, she has less money to buy American goods.

Now, Mexico has had a $9 billion trade deficit with the United States in the last decade. She has bought that much more of goods and products in the United States than we have purchased from her. She is able to fund a part of those purchases by the revenues obtained from hosting international meetings. Yet, we have enacted a law that reduces her ability to buy our exports.

Mr. President, the same thing is true of our neighbor to the north, Canada. She is our major trading partner. The two-way trade between Canada and the United States is about $50 billion.

The United States enjoyed a surplus of $610 million in 1976 as the result of the exchange of visitors between Canada and the United States. This is remarkable when you consider that visitors from Canada, a nation of 21 million people, contributed that much more to the local economies of the United States than visitors from our country, a nation of 216 million persons, spent in Canada.

Mr. President, I believe there is a question of fairness involved here. It is the height of hypocrisy for us to enact laws which discourage reciprocal travel by our citizens to foreign countries at the same time we are enjoying great benefits from the same kind of travel.

Let me point out that the U.S. Travel Service believes more foreign delegates attend conventions within the United States than the other way around. In fact, the International Congress Calendar now lists the United States as the No. 1 international convention site, hosting 14 percent of all international conventions scheduled for the period up to October 1985. For us to discourage visits to foreign conventions has every appearance to the host countries of regarding them out of favor.

Next, I should mention that our action is injuring U.S. properties as much as it is foreign ones. Many U.S.-owned hotels abroad are suffering great losses of business as a result of section 602. And, our international airlines are losing thousands of passengers who would have attended foreign meetings.

Northwest Orient, for example, has calculated that nearly $9 million of its revenues were produced by U.S. passengers who attended international conventions during 1975. Pan American reports it received $15 million in the passenger revenues of Americans who visited foreign meetings in 1975. In all, U.S. carriers may receive over $100 million in passenger revenues from U.S. delegates who attend foreign meetings. All this is put in jeopardy by section 602.

Finally, I am afraid that if section 602 is not checked now, the next step will be to abolish any deductions for conventions attended within the United States. After all, some 15,000 conventions and seminars were held within the United States last year and the costs of attending these events far exceeded the expenses of attending foreign meetings.

Mr. President, over 4,000 of those meetings were in my State of Arizona. Tourism is the biggest industry we have in the State.

According to a new study published by Arizona State University, tourism produced $2¼ billion of revenues in Arizona last year. The same kind of statistics could be presented for many other States.

Now, the question is do we encourage foreign governments to retaliate against visits to our country? Or do we look upon travel as a two-way street, with reciprocity as our guide?

Mr. President, in conclusion I find it strange that we of all people would discourage travel by our citizens. Travel, both within and outside of the United States, is one of the liberties guaranteed by the Constitution.

Moreover, we have pledged in the Helsinki agreement to "facilitate the convening of meetings as well as travel by delegations, groups, and individuals."

Mr. President, I would prefer to repeal section 602 entirely, but in deference to members of the House Ways and Means Committee who have asked for an opportunity to hold full-scale hearings on the subject, I have decided not to reopen the entire provision today. I do believe we should restore the exemption for our sister nations in North America without further delay and I urge that the amendment be adopted.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. GOLDWATER. I am happy to yield to the Senator from Nebraska.

Mr. CURTIS. I hope that the amendment of the distinguished Senator from Arizona will be adopted. I think the provision was unwise at the beginning. It does not recoup any revenue of any consequence for the Treasury. In fact, I think its effect is adverse. It does disrupt a lot of business plans. It is very unfair to that segment of our private enterprise system that is involved in conventions, and it is a very unfriendly act toward our neighbors. This is a much-needed correction, and I commend the Senator for offering it.

Mr. GOLDWATER. Mr. President, I am happy to yield 4 minutes to the Senator from Hawaii.

Mr. INOUYE. Mr. President, I yield 2 minutes of it to the Senator from New York.

Mr. MOYNIHAN. I thank the distinguished Senator from Hawaii.

Mr. President, I rise to state my agreement with the remarks of the distinguished and beloved Senator from Arizona. As has been said in this Chamber, the existing law prejudices our relations—indeed it can be thought to have the quality of an unfriendly act toward neighbors with whom we have especially close and cherished relationships.

I would like to state that tomorrow,

on behalf of myself and 22 other Senators, I shall offer an amendment which calls the attention of the President of the United States to the fact that the Canadian Government has adopted a measure in its internal revenue code which adversely affects the flow of commerce between Canadian businesses and American broadcasters. We feel this is unfortunate. We hope the President will address himself to this serious question with a view to adjusting these outstanding differences through the diplomatic process. Adoption of the amendment offered by Senators GOLDWATER and INOUYE will be an important gesture by this Chamber.

Thank you, Mr. President.

Mr. INOUYE. Mr. President, my distinguished colleague from Arizona has presented the case very vividly and very correctly. I would like to join him in suggesting to our colleagues that the present law does not operate in the best economic interests of the United States.

The original drafters of the restrictive language felt if there were not going to be conventions held overseas, they would be held here.

However, what is happening is that tourism between the United States and Canada and the United States and Mexico, which heretofore has been a two-way street, is becoming a one-way street. If ever a situation invites retaliation this is it. Should retaliation ever occur, the United States will be the loser because, as my colleague from Arizona has stated, last year we had a favorable balance in our travel accounts with Canada and Mexico.

Accordingly, this amendment offered by my colleague from Arizona would exempt Canada, Mexico, Bermuda, and the Caribbean islands from present law.

I would hope that the chairman of the committee would accept this amendment. I think it is a reasonable one. It does not repeal the law. It just exempts a small group. I am certain the House will give this matter serious consideration this afternoon.

Mr. KENNEDY. Mr. President, who is controlling the time?

Mr. LONG. I control the time in opposition. I would be glad to yield 2 minutes to the Senator.

Mr. KENNEDY. Mr. President, I would like to ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President——

Mr. LONG. How much time does the Senator wish?

Mr. KENNEDY. Will the Senator yield 5 minutes?

Mr. LONG. Mr. President, I yield 5 minutes to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I would hope the Senate would reject the amendment of the Senator from Arizona. I believe it is important to understand what the situation is with regard to convention trips to the Caribbean, the Bahamas, and Canada, and Mexico.

These travelers already get two tax-paid trips a year. The present law provides two deductible trips a year for foreign conventions. They can go to the Bahamas once as a member of an organization and they can go to the Bahamas another time for another organization meeting.

As a deductible expense under the Internal Revenue Code, about half of that trip is being paid by the American taxpayers. There are not many blue collar workers or fishermen from Massachusetts or shoe workers who are getting half of their foreign trip paid for by the Internal Revenue Code.

This amendment in effect would say, "You can go down there once, you can go down there twice, and you can go down there a third time or a fourth time, or any number of times, and still get a tax deduction for the trip."

Mr. President, when we are talking about the interests of the United States and the magnificent places that are available for conventions within the United States, why should we subsidize these trips to conventions in foreign nations? That, I think, is a rather basic and fundamental issue.

It should not be thought, Mr. President, that we are putting absolute prohibition on deductions for conventions overseas. They can already deduct two conventions a year under the existing law. This was a liberalization of the recommendations made by the Senate Finance Committee in the legislation which came to the floor last year.

To the extent that we have the difficulties and complications with our neighbors in Canada on other issues, I think we ought to urge those responsible in the State Department and Treasury Department to attempt to negotiate those problems. We should not give up this bargaining chip unilaterally.

It is my understanding that the Treasury Department is strongly opposed to this measure.

We can go down the list of various organizations and where they are meeting. The Indiana Optometric Association was meeting in the Bahamas.

I have a list from the debate of last year. I will make it a part of the RECORD again this year. It is a list of various organizations holding conventions in the Bahamas. No one begrudges them going down there, not once and not twice. But sometime, I believe, we ought to draw the line.

Mr. President, I ask unanimous consent that the list to which I referred may be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

NASSAU/PARADISE ISLAND, CONVENTIONS AND MEETINGS 1974

Names	Origin	Size	Hotel	Dates
Penn Mutual Life Insurance Co	Philadelphia, Pa	170	E.B.H	Jan. 20–23.

Prudential Insurance Co	Nationwide		800	do	Apr. 28–May 1.
Ohio Hospital Association	Ohio		60	Xanadu Princess	Mar. 3–8.
CUNA Mutual Life Insurance			100	do	Mar. 8–17.
BanKers Life	Iowa		33	Xanadu Princess	Mar. 20–23.
Do	do		100	Lucayan Beach Hotel	Mar. 24–27.
Prudential Insurance Co	National		350	Bahamas Princess	Mar. 27–30.
Tufts Association of Orthodontists	do		150	Xanadu Princess	Mar. 31–Apr. 4.
General Contractors Association	do		140	Lucayan Beach	Jan. 19–26.
Ethyl Corp	do		85	Bahamas Princess	Jan. 13–16.
Christenson Cheverolet Group	do		16	Xanadu Princess	Jan. 19–24.
National Association of Conveniences Stores	do		150	do	Jan. 20–24.
Schaifer Brewing Co	New York		60	Bahamas Princess	Jan. 31–Feb. 4.
G.A.F. Corp	New Jersey		60	do	Feb. 10–13.
Acacia Mutual Life	Washington		125	Lucayan Beach	Feb. 10–14.
Bishop Food Company	New York		120	Grand Bahama Hotel	Feb. 22–Mar. 1.
S. S. Fritz Jr. Inc	Pennsylvania		360	Bahamas Princess	Feb. 24 and Apr. 17.
Do	do		200	do	Mar. 3 and Apr. 22.
Rocke Laboratories	New Jersey		300	do	Feb. 24–28.

It does seem to me that this is the place to draw the line. I think our convention areas here in the United States could use this business. The revenue effect is negligible either way we vote on this measure; the same deductions will be taken, but they will be taken for conventions in the United States.

Mr. GOLDWATER. The Senator is correct that a man or a woman can go to as many conventions as they wish. This is not the objection. There are the ground rules which were written into last year's tax law which already caused 91 cancellations in Mexico. I do not know how many have been cancelled in the Bahamas, the Caribbean or Canada. I directed my attention to Mexico.

It is a fact that the deduction process has usually been so liberal and so easy, and still is in this country, but does not apply in the other countries of North America. That is the objection that organizations have raised. It is not that they object to going outside of the country. Sometimes it is impossible to have conventions in this country. There are just not enough convention sites. The bookkeeping entailed in this section 602 would cause any one of us to say it is just too bothersome to go, and not go.

Mr. KENNEDY. Mr. President, will the Senator yield 1 additional minute?

Mr. LONG. I yield.

Mr. KENNEDY. The fact of the matter is, as everyone in this body knows, what we are really talking about are tax underwritten vacations in some of the loveliest spots in the world, such as those in Mexico. Acapulco is a wonderful, lovely, beautiful place. But why should the Internal Revenue Code pay for half the trip? The Federal Government pays for half of it. Under present law, they can already go to Mexico twice a year and deduct the expenses of the trips. The only question is whether we are going to lift the limit and say they can go three or four times or once a month to Mexico. I would commend convention sites in the United States to these foreign travelers. We need the business in New England. In Massachusetts we have some nice convention sites. It gets a little colder in the winter, but it is nice in the summer. We can use that business.

We are saying, "That is fine, if you want to go twice to foreign countries, with half of the expenses paid by the Internal Revenue Code." But let us draw the line someplace.

The line was drawn at a reasonable place for two conventions. I fail to see why we should permit a third.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. LONG. I will yield more time.

Mr. KENNEDY. I withhold any further comment at this time.

Mr. GOLDWATER. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Arizona has 2 minutes remaining and the Senator from Louisiana has 9 minutes remaining.

Mr. GOLDWATER. I yield to the Senator from Texas.

Mr. TOWER. Mr. President, the peso has been devalued several successive times and this has wrought havoc with the economy along the Mexican-American border all the way to Brownsville. We are already talking about disaster assistance from the Federal Government to these border areas. With the failure to strike the amendment of the Senator from Arizona, we strike another blow at Mexico and another blow to Mexico. We have already loaned them $950 million to shore up the peso, and it looks as if more will be required.

Too, we are always talking about the illegal alien problem in this country. One of the reasons we have it is the sad economic condition of Mexico. Those who oppose this amendment I hope will complain no longer about the illegal aliens from Mexico in this country. We have already cut off one of their principal dollar areas. That was the bracero program. We insisted on doing that. Now we continue to do this sort of thing to the people south of the border, who should be our friends and the health of whose economy is enormously important to us.

I certainly hope the amendment of the Senator from Arizona will be adopted.

Mr. GOLDWATER. I thank my friend from Texas.

In answer to my friend from Massachusetts, I have heard the argument that section 602 is supposed to prevent people from taking vacations and then deducting that on their tax returns, but there were already stringent tax rules that would stop that kind of abuse. Under the former law, travel expenses could be deducted only when the primary purpose of the trip was to advance the taxpayer's trade or business.

Now, instead of a commonsense rule, there is so much redtape involved and restrictions on what kind of expenses can be deducted that many, many businesses and associations believe it is not worth the trouble. The per diem restriction has not been followed by the United States itself for Government employees. These rules are so nit-picking that they have the effect of stopping foreign travel

altogether. The correct solution is to enforce the rules we had, rather than to substitute a new law that completely fails to comprehend the needs of business and the need for communication with the outside world.

Mr. President, I hope that this amendment will prevail.

The PRESIDING OFFICER (Mr. NUNN). All the time of the Senator from Arizona has expired. The Senator from Louisiana has 9 minutes.

Mr. LONG. I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, the fact of the matter is that, unless you want to send an IRS man on each of these visits, it is virtually impossible to enforce. That has been the situation for some period of time. It is because of the unenforceability of those regulations that the Senate, in its wisdom, set the two-trip per year limitation. It was trying to get away from these regulations. That is really the purpose of the limitation.

I can understand that there are many businessmen in Arizona and Texas who would like to keep going down to Mexico for tax-subsidized vacations in the wintertime or other times of year. I think we might as well understand the nature of this amendment.

The logic seems to be that if we clog those roads and bridges with businessmen going to conventions, the illegal aliens coming the other way will find it a little harder to get across the border.

We know what is basically at stake. The question is whether we are serious about curtailing the tax abuse of expense account living in the Internal Revenue Code. We took a step in the right direction last year, and we should not undo it now.

The limit now in the law is a fair and reasonable one in terms of halting the abuse in this area. We have convention cities all over the United States. They may be a little colder in the winter. But certainly, any of these business organizations can carry out their business there. There is no reason to open up this loophole once again. Once we close a loophole, we see how hard it is to keep it shut.

Mr. LONG. Mr. President, the Treasury opposes this amendment. I have my serious doubts that the House will take it if the Senate agrees to it, because this amendment basically is an amendment that states the Senate's position of last year. We went to conference then with the House after Mr. INOUYE offered an amendment which prevailed, which was even more considerate of those who want to hold conventions overseas than this one.

Then the House was absolutely adamant that they would not accept the Senate position. Basically, this is the Senate's position of last year, applied to the North American Continent.

I believe we have to recognize that, while the Senate was favorable to it last year and may well be now, the administration opposes it and the chances are not very good that it would be agreed to in conference if accepted by the Senate.

This amendment is in the proper area for tax reform, Mr. President. What we brought back from conference is nothing to be proud of. While it permits people to hold meetings overseas or in Mexico or the Caribbean islands, it does impose on them a bookkeeper's nightmare. The burden of recordkeeping is so great that people just feel that if they have to keep all those records, they prefer to forget about it. They would rather not go than try to keep all those records. So something will have to be done in that area.

I personally would prefer to see this matter in the tax reform bill, but I recognize, Mr. President, that this was the view of the Senate last year, expressed by an overwhelming vote. I suspect that it is what we shall want to do about it at this time.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. MAGNUSON. I want to mention to the Senator from Louisiana, the Senator from Massachusetts, and others, since the Senator from Massachusetts suggested that maybe there should be some negotiations on matters of this kind, that naturally, the Canadians do not like our tax restrictions on foreign conventions. However, there are several matters in which we think they are discriminating against us, matters which ought to be brought to the attention of the Canadian Government. I even suggested, when the Prime Minister of Canada was down here, that one of these items of discrimination be brought up on the agenda.

The Canadians, for instance, now have a law which will not allow a Canadian businessman to broadcast on an American television or radio station and use it as a business advertising deduction. The result is that in my own State of Washington, the city of Bellingham, which is right on the border—a good-sized town, 190 some miles from Vancouver, which is the second largest town in Canada—loses millions of dollars worth of business because of that discrimination.

There are some other discriminations I could mention.

Mr. LONG. Mr. President, I must insist that I have the floor, because I must yield some time to others opposing the amendment. Unless I can get some additional time—may I get an extension of 2 minutes to both sides?

The PRESIDING OFFICER. Is there objection?

Mr. GOLDWATER. I object.

The PRESIDING OFFICER. The objection is heard.

Mr. KENNEDY. May I ask one question of the Senator from Washington?

Mr. MAGNUSON. Yes.

The PRESIDING OFFICER. The Senator from Louisiana has the time. Does the Senator from Louisiana yield time?

Mr. LONG. I yield to the Senator from Massachusetts 1 minute.

How much time do I have left?

The PRESIDING OFFICER. The Senator has two and a half minutes left.

Mr. MAGNUSON. Mr. President, I ask unanimous consent that the Senator from Louisiana, or both sides, be given 5 more minutes so we can discuss this matter.

Mr. GOLDWATER. I object.

The PRESIDING OFFICER. Objection is heard.

Who yields time?

Mr. KENNEDY. Will the Senator yield me 30 seconds?

Mr. LONG. Yes.

Mr. KENNEDY. Will the Senator from Washington not agree that this ought to be a process of negotiation? If we accept the amendment of the Senator from Arizona, I think we would be giving up a useful bargaining chip.

Mr. MAGNUSON. That is the point I am making. Tomorrow, the Senator from New York and 30 other Senators and I are going to bring up a resolution calling attention to this discrimination.

Mr. LONG. I yield my remaining time to the Senator from Pennsylvania.

Mr. SCHWEIKER. Mr. President, I rise in opposition to this amendment for two major reasons. First, I question the need for Americans to attend more than two foreign conventions in any given year. The restriction imposed on overseas conventioneering in last year's tax bill was a moderate and reasonable one. To overturn the present law would only hurt American jobs and tourism. If Americans find it absolutely necessary to attend more than two conventions a year, they should give our own economy a boost by spending their money in Florida, Hawaii, or the Poconos of Pennsylvania.

Second, I oppose this amendment because the Canadian Government has been unwilling to reconsider a policy which has brought serious economic injury to certain businesses in this country, and yet wants us to unilaterally amend our tax laws to facilitate convention travel by U.S. citizens in Canada.

I speak of bill C–58, the Canadian law which denies the deductibility under Canadian income tax law of advertisements placed by Canadian firms on U.S. television stations for the purpose of reaching Canadian viewers. This measure grew out of the wave of nationalism which swept over Canada some time ago. This movement considered the influence of American culture and American television to be detrimental to Canada.

The practical effect of bill C–58 has been to threaten the economic stability of a number of U.S. television stations whose signals reach Canadian viewers. In Erie, Pa., for example, one TV station has suffered an 80-percent decrease in its advertising revenues from Canada since C–58 was enacted last year. Such a decrease, over an extended period of time, can make the difference between life and death for small broadcasting operations.

To repeat, Mr. President, until the Canadian Government demonstrates a willingness to enter into serious discussions

on the question of C-58, no serious consideration should be given by this Government to facilitating convention travel by Americans in Canada or any other foreign country.

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. SCHWEICKER. Yes, I yield.

Mr. HEINZ. Mr. President, I too, rise in opposition to this amendment and I would like to associate myself with the remarks of my senior colleague from Pennsylvania. I commend him for so accurately and forthrightly setting forth the reasons why this amendment should be defeated.

The PRESIDING OFFICER. All time has expired. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Idaho (Mr. CHURCH), the Senator from Michigan (Mr. RIEGLE), and the Senator from South Dakota (Mr. ABOUREZK) are necessarily absent.

I also announce that the Senator from Illinois (Mr. STEVENSON) is absent because of illness.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "nay."

Mr. STEVENS. I announce that the Senator from Massachusetts (Mr. BROOKE) and the Senator from Virginia (Mr. SCOTT) are necessarily absent.

I further announce that the Senator from Oklahoma (Mr. BARTLETT) is absent due to illness.

The result was announced—yeas 45, nays 48, as follows:

[Rollcall Vote No. 109 Leg.]

YEAS—45

Baker	Hayakawa	Morgan
Clark	Huddleston	Moynihan
Cranston	Humphrey	Packwood
Curtis	Inouye	Pearson
DeConcini	Jackson	Pell
Dole	Javits	Roth
Domenici	Johnston	Sasser

Chiles	McIntyre	Zorinsky
Culver	Metcalf	
Danforth	Metzenbaum	

NOT VOTING—7

Abourezk	Church	Stevenson
Bartlett	Riegle	
Brooke	Scott	

So Mr. GOLDWATER's amendment was rejected.

The PRESIDING OFFICER. The bill is open to further amendment.

UP AMENDMENT NO. 160

Mr. HANSEN. Mr. President, I send to the desk an unprinted amendment which would add a new section at the end of H.R. 3477, the Tax Reduction and Simplification Act of 1977. The provisions of this amendment are identical to those found in S. 734.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wyoming (Mr. HANSEN) proposes an unprinted amendment numbered 160.

The amendment is as follows:

At end of bill, add the following:

(a) Part III of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to items specifically excluded from gross income) is amended by redesignating section 124 as 125, and by inserting after section 123 the following new section:

"SEC. 124. INTEREST.

"(a) IN GENERAL.—In the case of an individual, gross income does not include any amount received as interest or dividends on a time or demand deposit with—

"(1) a commercial or mutual savings bank the deposits and accounts of which are insured by the Federal Deposit Insurance Corporation or which are otherwise insured in accordance with the requirements of the law of the State in which the bank is located,

"(2) a savings and loan association, building and loan association, or similar association, the deposits and accounts of which are insured by the Federal Savings and Loan Insurance Corporation or which are otherwise insured in accordance with the requirements of the law of the State in which the association is located, or

"(3) a credit union, the deposits and accounts of which are insured by the National Credit Union Administration Share Insurance Fund or which are otherwise insured in accordance with the requirements of the law of the State in which the credit union is located.

"(b) LIMITATION.—The amount of interest excluded under subsection (a) for the taxable year shall not exceed $100 ($200 in the case of a husband and wife who make a joint return under section 6013).".

(b) The table of sections for such part is amended by striking out the last item and inserting in lieu thereof the following items:

"Sec. 124. Interest.
"Sec. 125. Cross references to other Acts.".

(c) The amendments made by this section apply to taxable years beginning after December 31, 1977.

Mr. CURTIS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator's point is well made. The Senate will suspend until Senators take their seats and cease conversation. The Senate is not in order.

Mr. STONE addressed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming has the floor.

Mr. HANSEN. I would be happy to yield to my friend from Florida.

Mr. STONE. I thank the Senator from Wyoming.

Mr. President, I ask unanimous consent that Mr. Bill Pursley of my staff have the privilege of the floor during the deliberations and votes on this bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none and it is so ordered.

Mr. STONE. I thank the Chair and I thank the Senator from Wyoming.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. HANSEN. Mr. President, this legislation would provide an exclusion from income of the first $100 earned in interest or, in the case of individuals filing a joint return, the first $200 earned as interest income. This measure would be effective January 1, 1978. It is estimated that it will result in a revenue reduction of $1.3 billion. However, notwithstanding this revenue reduction, there are significant benefits to be gained from encouraging savings among American citizens.

Our present tax system has a fundamental bias against capital formation and savings. The origin of this bias is the multiple taxation of income which is saved and invested. We tax all income people earn from their productive labors, and then we tax the interest and the dividends people earn on the money they put away for future use. Individuals must pay taxes on essentially all the income they earn, whether they spend it immediately, or invest it.

This amendment is a very modest proposal. The interest income excluded from income is specifically limited to funds derived from banks, thrift institutions, credit unions, savings and loan associations, and other institutions which encourage savings. Now, Mr. President, $100 in interest, per annum, represents just a modest savings account. Here in our own Senate Credit Union, which pays 6.25 percent compound interest, an individual would earn $100 per year on an account of about $1,600. This is a very small contingency fund, in my view. If we expect Americans to save for a rainy day, for retirement, for homes, for recreation time with their families, then we would do well to provide some small incentive for savings.

Mr. President, the May 2, 1977, issue of U.S. News & World Report has a feature story entitled "Squeeze on the Middle Class." I commend that article to Senators, and note that it contained a pie slice diagram entitled "Where the Money Goes." It shows the proportion of money a family of four spends to maintain a relatively comfortable standard of living. I find that there is no slice of pie for savings. Americans pay more in taxes than they do for food. In the face of the pressure on their dollars, they do not devote a fixed portion of income for savings.

Let me quote from part of that article:

People are frank to admit it: They're making more money than ever before, but they keep falling further and further behind rising costs. . . .

Sparse spending. Frugality is the order of the day—shopping carefully for the most inexpensive food, making their own clothes, using second-hand furniture, postponing purchase of a new car, cutting down on home heating and cooling costs. . . .

Worry over how to obtain college educations for the children is almost universal. For some, it means sending the youngsters

to a cheaper State school instead of the private institution that had been the goal. For others, the future may hold no college at all.

Not surprisingly, bitterness runs deep through middle-class families, many of whom feel cheated of what they regard as their reasonable expectations. Still, most retain some degree of optimism.

One interviewee in the article made a good point. He said:

I'm not sure if I feel abandoned or not, but I feel disillusioned about the prospects of anybody helping us out in any way. I don't think that there's any relief in sight. The only thing we can do is help ourselves as much as we can.

We should help Americans help themselves.

The goal of tax simplification is advanced with this proposal. Again, the proposal is modest in the relief it provides, but it nonetheless does give some aid to individuals who receive these fairly small amounts of interest. The proposal would eliminate some reporting requirements on the part of many financial institutions, as well.

Encouraging savings has another benefit. If we encourage savings. we can take a preliminary step toward encouraging desperately needed capital formation in our country.

Between 1960 and 1973, it turns out that the United States has experienced less growth in productivity than any other industrialized country in the Western world. To be sure, other countries started lower or suffered great and reparable destruction during World War II, but the large gap between the United States and other Western countries in real income per capita has narrowed considerably, even from pre-World War II levels.

What has the United States been doing so differently to result in such disappointing economic growth? One of the main reasons for our slowdown is that the American economy has been devoting too many of its resources to consumption and to Government and not enough of them to the capital formation which makes growth possible. In fact, of all the Western industrial countries, the United States has devoted the smallest fraction of its gross national product since 1960 to private capital formation. Even the British have devoted a larger proportion of output to capital formation than we have.

If investors had invested in 1975 as they did in 1969, there would have been 35.5 million investors. Instead, in 1975, there were only 25.27 million. That is a loss of over 10 million people. In 1969, the average size portfolio of investors was $7,100. By 1975 it was $10,000. If investors had been motivated to invest at the same rate in 1975 as in 1969, that portfolio would have been an equivalent of $103 billion in equity capital available for new jobs, new products, and new services. Approximately 4 million new jobs could have been created in the private sector alone, reducing our unemployment rate to 3.5 percent.

A chinese proverb says that a journey of a thousand miles must begin with one step. This proposal is the first step we can take toward encouraging the savings needed to gather the capital needed for our continued economic growth.

Mr. President, there is no time agreement on this amendment, but if the distinguished floor manager of the bill would like to be heard, I would be happy to yield to the distingushed ranking minority member on the Committee on Finance.

The PRESIDING OFFICER (Mr. BUMPERS). The Senator from Nebraska.

Mr. CURTIS. Mr. President, I commend the distinguished Senator from Wyoming for presenting to the Senate this factor in our income tax law.

We have had at times various provisions of law that made a part of the dividends that someone received free from tax. Back in the Eisenhower administration we enacted the dividend credit. It was a good law. It was later repealed.

Now we have a dividend exclusion of $100 a year. There are many citizens, however, who just do not feel it appropriate that they invest in stocks. Their only chance to put their savings someplace is in a savings account where they can withdraw interest and also withdraw their principal.

This involves young people who are taught to save money. It involves a great many elderly people who have a few dollars laid aside for a rainy day, and it would be unwise for them to take the risk of investing in the stock market, so they put their money into a savings and loan or a savings account in a bank. We, however, tax every dollar of the interest.

Mr. President, all this amendment does is provide an exclusion of $100 interest on the part of each taxpayer. It is very modest. It would be a recognition by our Government that we favor the institution of saving and that it is a good idea for people of all ages to save money.

As a matter of fact, saving is one of the most potent forces against inflation. If someone has a certain number of dollars and he saves part of it, there are that many dollars that are not competing in the marketplace for goods, and someone else is going to buy cheaper because of it.

It was that sage of New England, Calvin Coolidge, who said:

Americans should practice thrift not to save money but to save men and women.

In other words, it builds a character that is very much of an asset to our country.

Mr. President, if someone makes a political contribution of $100, it is tax free, and there are some awful candidates who they could contribute it to. There are some very good ones. It would be impossible to censor and supervise their giving. But the fact is you can write a check for $100 to the biggest crackpot in the country whose program has no chance of being ever heard about, and if it did it would wreck the country, but you can get a tax writeoff of $100 for it.

Under the name of charity, education, and religious contributions there is no way the Government could say that your religious contribution has to be one of the mainline religious. It can be one that you, you, or you think would be destructive to our land, but they get it.

We have tax incentives for everything but for saving money.

I expect Congress may have some very strong principles against saving money because they never save any for the taxpayers, but that is hardly any justification for them to treat the people that way.

Thrift is an important institution in our land. I know of some savings and loan associations in my State that have separate windows and boxes there so the little tots can go in and deposit a dollar or a half dollar or $5, because the American people know the virtue of saving. It is time that the Government of the United States recognized it.

This is a very modest thing. It will give a little equality to those people who cannot and should not be taking the risk of the stock market or other investments where they might get a capital gain, but they save and retard inflation by not being so much competitors in the marketplace, and they lay aside money so that when that day comes they are not dependent upon all of the rest of the taxpayers. And I maintain that is worth recognition on the part of our Government in the very modest exclusion that we are asking for here, $100.

I do not take all of these estimates as sacred and absolutely correct. I believe if we do some things that are right, sound, and promote those activities that should be promoted somehow it makes our economy go better and there is more prosperity and more income from which to levy a tax.

Again I commend the distinguished Senator from Wyoming for speaking out in behalf of the small savers of the country who by self-denial, oftentimes, practice this very important characteristic of saving.

Mr. HANSEN. Mr. President, I thank the distinguished Senator from Nebraska for his kind words. I observe that there is much merit in what he has said.

A few days ago the distinguished chairman of the Finance Committee hosted a luncheon at which were guests from Great Britain, the Chancellor of the Exchequer and the Secretary of State for Trade. As Senators know these distinguished members of the Government of Great Britain are members of the Labor Party in England. Yet the important thing that I recall about what was said at that luncheon was that England recognizes the relationship of investing a larger proportion of the gross national product back into business than we are investing here in this country. The laborers of England, the unions there, recognize this fact. I know his excellency, Mr. Healey, observed that he was hoping that he could persuade the union movement in England to understand that productivity has to increase at a rate not less than wages increase or England would be in trouble.

He made one further observation that struck me as particularly significant, and that was that the revenues that England hopes to receive, and indeed in all likeli-

hood will, from the oil discoveries in the North Sea will be used not to go into social programs, as we seem so insistent to do in the United States, but rather to repay the loans that have been granted by the International Monetary Fund to England to pay the interest on their national debt and, in a word, to help encourage the accumulation of capital, recognizing, as England does, that that has to be the only way out of their economic difficulty. That is the way that we expand jobs. That is the way that England is expanding jobs.

This amendment and the remarks made by the distinguished ranking minority member of the Finance Committee underscore the fact that though we may try to bring about a mutation of economic law, we cannot succeed any better than any other country does. We pursue that course at great risk to our economic vitality.

I appreciate the kind words of the Senator from Nebraska, and I recognize and yield time to the distinguished Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, currently, under section 116 of the Internal Revenue Code there is excluded from gross income the first $100—$200 for a joint return—of dividend income received by an individual, estate, or trust from a taxable domestic corporation. I rise today in support of a similar exclusion for interest or dividend income earned by individuals on a time or demand deposit with an insured commercial savings bank, savings and loan association, or credit union.

The effects of such an exclusion would comport with the purpose of this comprehensive program to decrease unemployment and to stimulate capital formation. Specifically, this proposal would provide an additional incentive for taxpayers to save. It would encourage deposits in savings accounts, thus increasing the supply of mortgage money. In turn, the homebuilding industry would be further stimulated.

Such a proposal would also help to equalize the treatment of those who save with those who invest in equity and other securities. The exclusion of a portion of interest would help to lessen the discrimination against this type of investment as compared to other investments. Dividends are subject to an exclusion, capital gains are taxed at reduced rates if long-term, and State and local bonds are exempt from Federal, and often State, income taxation.

Mr. President, I think that there is an excellent opportunity before this body to eliminate many of the burdensome inequities in the tax system which trouble the American people. This exclusion of interest income is one way to take advantage of the opportunity. Accordingly, I ask my distinguished colleagues to join me in full support of this measure.

Mr. President, in closing, I commend the able and distinguished Senator from Wyoming for offering this amendment, and assure him that in my opinion he is rendering the country a good service if we can get the amendment adopted.

Mr. HANSEN. I thank the distinguished Senator from South Carolina for his kind words and his very astute observations. I yield to the distinguished Senator from North Carolina.

Mr. HELMS. I thank the able Senator from Wyoming.

Mr. President, I support the amendment offered by the distinguished Senator from Wyoming. His amendment would provide added incentives for savings, and that will have an entirely good impact on the economy.

By providing encouragement to savings by excluding from taxes, the first $100 of interest and dividends received each year, we do a couple of important, worthwhile things. I mention dividends because, while it is a technical point, savings and loan associations do not pay interest, they pay dividends. But I think the word "interest" in the amendment refers as well to dividends paid by savings and loans.

This amendment would urge more people to save a little more. That would mean more funds available in the economy for business investment and that means more jobs.

Second, it will encourage people to put aside more for retirement. That will mean that more people will be independent in their retirement, and in instances of financial hardship.

Our Nation has one of the lowest rates of reinvestment in the world. At this time, we take less than 20 percent of our output and put it back into our productive capacity. That 20 percent must pay for depreciation and growth. It is not enough. Nations such as Germany reinvest 28 percent of their GNP. Japan reinvests 36 percent. It is no wonder that we have some tough competition in world markets.

In fact our reinvestment rate is about the same—or a little lower—as the rate of Great Britain and Italy. We all know the condition of their economies.

Without trying to give my colleagues a lesson in economics, I would just mention that without a higher rate of capital formation—without more money being put into new plants, machines, industries—we will not have a higher standard of living in the future that we all want for our children and our fellow citizens. We will not have a higher standard of living because there will not be as high a rate of output.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. HELMS. I am happy to yield to the Senator from Nebraska.

Mr. CURTIS. Is it not true that our non-Government savings and loan associations are responsible for financing the building of more homes, many times over, than all the Government housing programs?

Mr. HELMS. The Senator is absolutely correct.

Mr. CURTIS. Is not the amount that is available for home building based upon, at least one important factor, the amounts that people save and put into those institutions?

Mr. HELMS. The Senator is correct, of course.

Mr. CURTIS. Does the Senator believe that to grant to savings accounts the same consideration we do to dividends would encourage such savings?

Mr. HELMS. Unquestionably. That is what the free enterprise system is all about, and that is why I commend the Senator from Wyoming for this amendment.

There can be no increase in output without an increase in productivity, and productivity is determined by the amount and quality of capital each worker has to use. In other words, it will take great amounts of added capital investment to provide the sophisticated plant and equipment needed in the coming years to provide the Nation with a higher standard of living.

The amendment of my colleague will help, in an important way, to increase the amount of money this Nation invests in its future.

Finally, though the amendment would reduce tax revenues, I believe that the added productivity in the economy and the added income subsequently generated by that productivity, will more than make up for this loss.

Mr. HANSEN. Mr. President, I thank the Senator from North Carolina for his well chosen words. He has added to our understanding. I yield now to the distinguished Senator from Idaho.

Mr. McCLURE. Mr. President, I commend the Senator from Wyoming for having offered this amendment. I will take time only to repeat what I said earlier today with regard to another amendment, as to the very great need for capital formation if we are to create the number of jobs necessary in the next decade.

I wish to concentrate for a moment on the effect of the small investment, the small savings by average citizens, not those with massive investment portfolios, not even those who have investment portfolios from which they now get some benefit from the $100 dividend exclusion. But I think it is unfair for us to treat those who have portfolios of stocks differently from those who have small amounts of money in the country banks, the credit unions, and the savings and loan institutions across this land.

I think all our citizens ought to have an equal opportunity to save and an opportunity to have fair and equal treatment of those savings, whether it be by way of a stock investment or a savings in a local savings institution.

There is another matter that is of very high concern, at least judging from the words uttered in this body, and that is the plight of the housing industry and the opportunity of a lot of our people to have decent housing.

A large proportion of the small savings of the people of this country finds its way into savings and loan institutions, and a high proportion of that money finds its way into the money undergirding the housing industry of this country.

Housing starts are up over a few months ago, but if we are to sustain those levels of housing starts, we must have adequate mortgage financing, and there is no better way to insure that adequate mortgage financing than to give some

small incentive to savers to place their money in savings accounts.

I commend the Senator from Wyoming for the amendment. It is a small but significant step in that direction. This amendment, I am advised, if adopted will reduce revenues by about $200 million a year. That is a small investment compared to the billions of dollars that we try to channel toward the housing industry in a variety of other ways, and it will help accomplish substantial justice, as well as following the American traditions of thrift and saving that we ought to be encouraging. Again I commend the Senator from Wyoming on his amendment.

Mr. HANSEN. Mr. President, I thank my colleague from Idaho for his kind remarks. If no one else wishes to speak on my side of the issue, I yield to the Senator from Louisiana.

Mr. LONG. Mr. President, in full operation, in 1978, this amendment would represent a revenue loss of $1.3 billion.

This is the type of thing that ought to be considered in connection with a tax reform bill, Mr. President. We have something of this sort in the law with regard to taxation of dividends, but that is to relieve the double taxation of dividends.

I hope, Mr. President, that the amendment will not be agreed to at this time. I would hope that those who are interested in the amendment would discuss it when the tax reform bill comes along. I hope the Senate will not agree to this amendment at this time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

(Putting the question)

The noes appear to have it.

Mr. CURTIS. Division, Mr. President.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

Mr. CURTIS. I withdraw my request.

Mr. LONG. I withdraw my suggestion of the absence of a quorum.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was rejected.

UP AMENDMENT NO. 161

Mr. CURTIS. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) proposes an unprinted amendment numbered 161.

Mr. CURTIS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place add a new section as follows:

SECTION 1. SHORT TITLE.

This Act may be cited as the "American Stock Ownership Plans of 1976".

SEC. 2. AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME.

Subchapter D of chapter 1 of the Internal Revenue Code of 1954 (relating to deferred compensation, etc.) is amended by adding at the end thereof the following new part:

"PART III—AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME

"SEC. 428. AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME.

"(a) AMERICAN STOCK OWNERSHIP PLAN FOR THOSE OF MODEST INCOME.—For the purposes of this section, the term 'American stock ownership plan' means a trust created or organized in the United States for the exclusive benefit of an individual or his beneficiaries, but only if the written governing instrument creating the trust meets the following requirements:

"(1) Except in the case of a rollover contribution described in subsection (d)(4)—

"(A) no contribution will be accepted unless it is in cash;

"(B) contributions will not be accepted for the taxable year in excess of $1,500 on behalf of any individual; and

"(C) contributions will not be accepted on behalf of any individual for the 2 taxable years succeeding the taxable year in which a payment or distribution taxable to the individual under subsection (d)(2) is made.

"(2) The trust is designed to invest solely in common stock of domestic corporations.

"(3) The trustee is a bank (as defined in section 401(d)(1)) of such other person who demonstrates to the satisfaction of the Secretary that the manner in which such other person will administer the trust will be consistent with the requirements of this section. An individual for whose benefit the trust is maintained may be granted, under the written governing instrument, the power to control the investment of the trust funds either by directing investments (including reinvestments, disposals, and exchanges) or by disapproving proposed investments (including reinvestments, disposals, or exchanges).

"(4) The assets of the trust will not be commingled with other property except in a common trust fund or common investment fund.

"(5) Contributions received by the trustee during a particular taxable year will be allocated to a separate class year account. Dividends and capital gains and losses received or realized by the trustee during a particular taxable year will be allocated among class year accounts on any reasonable basis. The interest of an individual in each class year account may not be paid or distributed before the end of the 7th taxable year following the taxable year for which such class year account was established, except in the case of death or disability.

"(6) The interest of an individual in the balance in his class year accounts is nonforfeitable.

An individual for whose benefit a class year account is maintained may be granted, under the written governing instrument, the right to direct the trustee as to the manner in which the common stock allocated to such account is to be voted.

"(b) AMERICAN STOCK OWNERSHIP ANNUITY.—For purposes of this section, the term 'American stock ownership annuity' means a contract for a viable annuity, as determined under regulations prescribed by the Secretary, issued by an insurance company which meets the following requirements:

"(1) Except in the cast of a rollover contribution described in subsection (d)(4)—

"(A) no premium will be accepted unless it is in cash;

"(B) the annual premium under the contract will not exceed $1,500 and any refund of premiums will be applied before the close of the calendar year following the year of the refund toward the payment of future premiums; and

"(C) premiums will not be accepted for the 2 taxable years succeeding the taxable year in which a payment or distribution taxable to the individual under subsection (d)(2) is made.

"(2) All assets attributable to premium payments will be invested solely in common stock of domestic corporations.

"(3) Assets attributable to the contract will not be commingled with other property except in a segregated asset account established for such annuity contracts.

"(4) Premiums that are received by the insurance company during a particular taxable year will be allocated to a separate class year account. Dividends and capital gains and losses on stock attributable to the contract that are received or realized by the insurance company during a particular taxable year will be allocated among class year accounts on any reasonable basis. The interest of an owner in each class year account may not be paid or distributed before the end of the 7th taxable year following the taxable year for which such class year account was established, except in the case of death or disability.

"(5) The entire interest of the owner is nonforfeitable.

The owner may be granted, under such an annuity contract, the right to direct the insurance company as to the manner in which the common stock allocated to him is to be voted, and the power to control the investment of assets attributable to premium payments either by directing investments (including reinvestments, disposals, and exchanges) or by disapproving proposed investments (including reinvestments, disposals, or exchanges).

"(c) ACCOUNTS ESTABLISHED BY EMPLOYERS AND CERTAIN ASSOCIATIONS OF EMPLOYEES.—A trust created or organized in the United States by an employer for the exclusive benefit of his employees or their beneficiaries, or by an association of employees (which may include employees within the meaning of section 401(c)(1)) for the exclusive benefit of its members of their beneficiaries, shall be treated as American stock ownership plans (described in subsection (a)), but only if the written governing instrument creating the trust meets the following requirements:

"(1) The trust satisfies the requirements of paragraphs (1) through (6) of subsection (a).

"(2) There is a separate accounting for the interest of each employee or member.

The assets of the trust may be held in a common fund for the account of all individuals who have an interest in the trust.

"(d) TAX TREATMENT OF DISTRIBUTIONS.—

"(1) IN GENERAL.—Except as otherwise provided in this subsection, any amount paid or distributed out of American stock ownership plans or under an American stock ownership annuity shall be deemed to have been withdrawn first from contributions accepted for the taxable year in which the payment or distribution is received and then from the earliest class year accounts on a first-in, first-out basis. Amounts deemed to have been withdrawn from a class year account or accounts shall be included in the gross income of the payee, distributee, or individual for whose benefit such plan or annuity was established, as the case may be, for the taxable year in which the payment or distribution is received. The basis of any person in each class year account is zero.

"(2) CAPITAL GAINS TREATMENT.—Any amount deemed to have been withdrawn from a class year account established more than 7 years before the taxable year in which the payment or distribution is received, and any amount paid or distributed on account of the death of the individual for whose benefit the American stock ownership plans or American stock ownership annuity was established, shall be treated as a gain from the sale or exchange of a capital asset held for more than 6 months.

"(3) PREMATURE DISTRIBUTIONS.—

"(A) IN GENERAL.—If any portion of a payment or distribution from American stock ownership plans or under an American stock ownership annuity to or on behalf of the individual for whose benefit such plan or annuity was established is deemed to have been withdrawn from a class year account established during the 7 years before the taxable year in which the payment or distribution is received, then unless such payment or distribution is made on account of the death of the individual for whose benefit the plan or annuity was established, such individual's tax under this chapter for the taxable year in which such payment or distribution is received shall be increased by an amount equal to 10 percent of such portion of the payment or distribution.

"(B) DISABILITY.—Subparagraph (A) shall not apply if the amount paid or distributed is attributable to the taxpayer becoming disabled within the meaning of section 72 (m)(7).

"(4) ROLLOVER CONTRIBUTION.—An amount is described in this paragraph as a rollover contribution if it meets the requirements of subparagraphs (A) and (B).

"(A) IN GENERAL.—Paragraph (1) does not apply to any amount paid or distributed out of American stock ownership plans or under an American stock ownership annuity to the individual for whose benefit the plan or annuity was established if the entire amount received (including money and other property) is paid into an American stock ownership plan or an American stock ownership annuity for the benefit of such individual not later than the 60th day after the day on which he receives the payment or distribution. Any such amount shall, in the hands of the transferee, be deemed to be held in the same class year account as that from which the payment or distribution was made.

"(B) LIMITATION.—This paragraph does not apply to any amount described in subparagraph (A) received by an individual from American stock ownership plans or under an American stock ownership annuity if at any time during the 3-year period ending on the day of such receipt such individual received any other amount described in that subparagraph from American stock ownership plans or under an American stock ownership annuity which was not includable in his gross income because of the application of this paragraph.

"(5) EXCESS CONTRIBUTIONS RETURNED BEFORE DUE DATE OF RETURN.—Paragraph (1) does not apply to the distribution of any contribution paid during a taxable year to American stock ownership plans or for an American stock ownership annuity to the extent that such contribution exceeds the amount allowable as a deduction under section 220 if—

"(A) such distribution is received on or before the day prescribed by law (including extensions of time) for filing such individual's return for such taxable year,

"(B) no deduction is allowed under section 220 with respect to such excess contribution, and

"(C) such distribution is accompanied by the amount of net income attributable to such excess contribution.

Any net income described in subparagraph (C) shall be included in the gross income of the individual for whose benefit the plan or annuity was established for the taxable year in which received.

"(6) TRANSFER OF PLAN OR ANNUITY INCIDENT TO DIVORCE.—The transfer of an individual's interest in American stock ownership plans or an American stock ownership annuity to his former spouse under a divorce decree or under a written instrument incident to such divorce is not to be considered a taxable transfer made by such individual notwithstanding any other provision of this subtitle, and such interest at the time of the transfer is to be treated as American stock ownership plans or an American stock ownership annuity of such spouse, and not of such individual. Thereafter such plan or annuity for purposes of this subtitle is to be treated as maintained for the benefit of such spouse.

"(7) EFFECT OF PLEDGING PLAN OR ANNUITY ASSETS AS SECURITY.—If, during any taxable year of the individual for whose benefit American stock ownership plans for an American stock ownership annuity is maintained, that individual uses the plan or annuity or any portion thereof as security for a loan, the portion so used shall not be treated as distributed to such individual except to the extent that the lender forecloses upon the security.

"(e) TAX TREATMENT OF AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME.—

"(1) EXEMPTION FROM TAX.—Any American stock ownership plans for those of modest income is exempt from taxation under this subtitle unless such plan has ceased to be an American stock ownership plan by reason of paragraph (2). Notwithstanding the preceding sentence, any such plan is subject to the taxes imposed by section 511 (relating to imposition of tax on unrelated business income of charitable, etc., organizations).

"(2) LOSS OF EXEMPTION.—

"(A) IN GENERAL.—If, during any taxable year of the individual for whose benefit any workingman's stock ownership plan is maintained, the plan engages in any one of the disqualifying transactions described in subparagraph (B), the plan will cease to be an American stock ownership plan as of the first day of such taxable year. For purposes of this paragraph, the separate account for any individual within an American stock ownership plan maintained by an employer or association of employees is treated as a separate American stock ownership plan.

"(B) DISQUALIFYING TRANSACTIONS.—For purposes of this paragraph, the term 'disqualifying transaction' means—

"(i) the acquisition of common stock from the individual for whose benefit the plan was established, except in the case of a rollover contribution described in subsection (d)(4);

"(ii) the acquisition of common stock for more than adequate consideration from a 'disqualified person' as defined in section 4975(e), applied as though the provisions thereof related to American stock ownership plans;

"(iii) the sale of common stock for less than adequate consideration to a disqualified person as so defined;

"(iv) borrowing to acquire common stock; or

"(v) loaning plan assets to the individual for whose benefit the plan was established without the receipt of adequate security and a reasonable rate of interest.

"(C) PLAN TREATED AS DISTRIBUTING ALL ITS ASSETS.—In any case in which a plan ceases to be an American stock ownership plan by reason of subparagraph (A) as of the first day of any taxable year, paragraph (1) of subsection (d) shall apply as if there were a distribution on such first day in an amount equal to the fair market value (on such first day) of all assets in the plan (on such first day).

"(3) COMMINGLING AMERICAN STOCK OWNERSHIP PLAN AMOUNTS IN CERTAIN COMMON TRUST FUND AND COMMON INVESTMENT FUNDS.—Any common trust fund or common investment fund of American stock ownership plan assets which is exempt from taxation under this subtitle does not cease to be exempt on account of the participation or inclusion of assets of a trust exempt from taxation under section 501(a) which is described in section 401(a), or of an individual retirement account described in section 408(a).

"(f) COMMUNITY PROPERTY LAWS.—This section shall be applied without regard to any community property laws.

"(g) CUSTODIAL ACCOUNTS.—For purposes of this section, a custodial account shall be treated as a trust if the assets of such account are held by a bank (as defined in section 401(d)(1)) or another person who demonstrates, to the satisfaction of the Secretary or his delegate, that the manner in which he will administer the account will be consistent with the requirements of this section, and if the custodial account would, except for the fact that it is not a trust, constitute American stock ownership plans for those of modest income described in subsection (a). For purposes of this title, in the case of a custodial account treated as a trust by reason of the preceding sentence, the custodian of such account shall be treated as the trustee thereof.

"(h) REPORTS.—The trustee of an American stock ownership plan and the issuer of an American stock ownership annuity shall make such reports regarding such plan or annuity to the Secretary or his delegate and to the individuals for whose benefit the plan or annuity is, or is to be, maintained with respect to contributions, distributions, and such other matters as the Secretary or his delegate may require under regulations. The reports required by this subsection shall be filed at such time and in such manner and furnished to such individuals at such time and in such manner as may be required by those regulations.

"(i) CROSS REFERENCE.—

"For tax on excess contributions to an American stock ownership plan or annuity, see section 4976."

SEC. 3. CONTRIBUTIONS TO AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME

(a) IN GENERAL.—Part VII of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to additional itemized deductions for individuals) is amended by redesignating section 221 as 222 and by inserting after section 220 the following new section:

"SEC. 221. CONTRIBUTIONS TO AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME

"(a) DEDUCTION ALLOWED.—In the case of an individual, there is allowed as a deduction amounts paid in cash during the taxable year by or on behalf of such individual for his benefit—

"(1) to American stock ownership plans for those of modest income described in section 428(a), or

"(2) to an American stock ownership annuity described in section 428(b).

No deduction shall be allowed for the 2 taxable years succeeding the taxable year in which a payment on distribution taxable to such individual under section 428(d)(2) is made. For purposes of this title, any amount paid by an employer to such American stock ownership plan or for such an American stock ownership annuity constitutes payment of compensation to the employee (other than a self-employed individual who is an employee within the meaning of section 401(c)(1)) includible in his gross income, whether or not a deduction for such payment is allowable under this section to the employee after the application of subsection (b).

"(b) LIMITATIONS AND RESTRICTIONS.—

"(1) MAXIMUM DEDUCTION.—The amount allowable as a deduction under subsection

(a) to an individual for any taxable year may not exceed an amount equal to 15 percent of the compensation includible in his gross income for such taxable year, or $1,500, whichever is less, multiplied by a fraction, the denominator of which is $20,000 and the numerator of which is $20,000 minus the excess of such compensation over $20,000.

"(2) RECONTRIBUTED AMOUNTS.—No deduction is allowed under this section with respect to a rollover contribution described in section 428(d)(4).

"(c) DEFINITIONS AND SPECIAL RULES.—

"(1) COMPENSATION.—For purposes of this section, the term 'compensation' includes earned income as defined in section 401(c)(2).

"(2) MARRIED INDIVIDUALS.—The maximum deduction under subsection (b)(1) shall be computed separately for each individual, and this section shall be applied without regard to any community property laws.".

(b) DEDUCTION ALLOWED IN ARRIVING AT ADJUSTED GROSS INCOME.—Section 62 of such Code (defining adjusted gross income) is amended by adding at the end thereof the following new paragraph:

"(14) AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME.—The deduction allowed by section 221 (relating to American stock ownership plans).".

SEC. 4. TAX ON EXCESS CONTRIBUTIONS TO AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME.

Chapter 43 of the Internal Revenue Code of 1954 (relating to qualified pension, etc., plans) is amended by adding at the end thereof the following new section:

"SEC. 4976. TAX ON EXCESS CONTRIBUTIONS TO AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME.

"(a) TAX IMPOSED.—In the case of—

"(1) an American stock ownership plan (within the meaning of section 423(a)), or

"(2) an American stock ownership annuity (within the meaning of section 428(b)),

established for the benefit of any individual, there is imposed for each taxable year a tax in an amount equal to 6 percent of the amount of the excess contributions to such individual's plans or annuities (determined as of the close of the taxable year). The amount of such tax for any taxable year shall not exceed 6 percent of the value of the plan or annuity (determined as of the close of the taxable year). The tax imposed by this subsection shall be paid by such individual.

"(b) EXCESS CONTRIBUTIONS.—For purposes of this section, the term 'excess contributions' means the sum of—

"(1) the excess (if any) of—

"(A) the amount contributed for the taxable year to the plans or annuities other than a rollover contribution described in section 428(d)(4)), over

"(B) the amount allowable as a deduction under section 220 for such contributions, and

"(2) the amount determined under this subsection for the preceding taxable year, reduced by the excess (if any) of the maximum amount allowable as a deduction under section 220 for the taxable year over the amount contributed to the plans or annuities for the taxable year and reduced by the sum of the distributions out of the plans or annuities (for all prior taxable years) which was included in the gross income of the individual for whose benefit such plan or annuity was established under section 428(d)(1).

For purposes of this subsection, any contribution which is distributed from the plan or annuity in a distribution to which section 428(d)(5) applies shall be treated as an amount not contributed."

SEC. 5. PENALTY FOR FAILURE TO PROVIDE REPORTS ON AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME.

Subchapter B of chapter 68 of the Internal Revenue Code of 1954 (relating to assessible penalties) is amended by adding after section 6690 the following new section:

"SEC. 6398. FAILURE TO PROVIDE REPORTS ON AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME.

"(a) IN GENERAL.—The person required by section 428(h) to file a report regarding an American stock ownership plan or an American stock ownership annuity at the time and in the manner required by section 428(h) shall pay a penalty of $10 for each failure unless it is shown that such failure is due to reasonable cause.

"(b) DEFICIENCY PROCEDURES NOT TO APPLY.—Subchapter B of chapter 63 (relating to deficiency procedures for income, estate, gift, and certain excise taxes) does not apply to the assessment or collection of any penalty imposed by subsection (a)."

SEC. 6. CONFORMING AMENDMENTS.

(a) The second sentence of section 46(a)(4) of the Internal Revenue Code of 1954 (relating to investment credit) and the second sentence of section 50A(a)(3) of such Code (relating to work incentive credit) are each amended by inserting after "certain retirement accounts)," the following: "section 428(d)(3)(A)(ii) (relating to additional tax on income from certain American stock ownership plans),".

(b) Subparagraph (A) of section 56(c) of such Code and subparagraph (A) of section 56(e)(1) of such Code (relating to minimum tax for tax preferences) are each amended by striking out section "531" and inserting in lieu thereof "428(d)(3)(A)(ii), 531".

(c) Subparagraph (B) of section 801(g)(1) of such Code (relating to contracts with reserves based on a segregated asset account) is amended by adding at the end thereof the following new sentence: "An American stock ownership annuity (as defined in section 428(b)) shall be deemed to meet the requirements of clause (ii)."

(d) Section 801(g)(7) of such Code is amended to read as follows:

"(7) BASIS OF ASSETS HELD FOR QUALIFIED PENSION PLAN CONTRACTS AND AMERICAN STOCK OWNERSHIP ANNUITY.—In the case of contracts described in subparagraph (A), (B), (C), (D), or (E) of section 805(d)(1), or in section 428(b), the basis of each asset in a segregated asset account shall (in addition to all other adjustments to basis) be—

"(A) increased by the amount of any appreciation in value,

"(B) decreased by the amount of any depreciation in value,

to the extent that such appreciation and depreciation are from time to time reflected in the increases or decreases in reserves or other items in paragraph (6) with respect to such contracts."

(e) The third sentence of section 901(a) of such Code (relating to foreign tax credit) is amended by inserting after "certain retirement accounts)," the following: "against the tax imposed for the taxable year under section 428(d)(3)(A)(ii) (relating to additional tax on income from certain American stock ownership plans),".

(f) Section 3401(a)(12) of such Code (relating to exemption from collection of income tax at source on certain wages) is amended by adding at the end thereof the following new subparagraph:

"(E) for a payment described in section 220(a) if, at the time of such payment, it is reasonable to believe that the employee will be entitled to a deduction under such section for such payment; or".

(g) Subsection (d) of section 6047 of such Code (relating to information relating to certain trusts and annuity and bond purchase plans) is amended to read as follows:

"(d) OTHER PROGRAMS.—

"(1) INDIVIDUAL RETIREMENT SAVINGS.—To the extent provided by regulations prescribed by the Secretary or his delegate, the provisions of this section apply with respect to any payment described in section 219(a) and to transactions of any trust described in section 408(a) or under an individual retirement annuity described in section 408(b).

"(2) AMERICAN STOCK OWNERSHIP PLANS FOR THOSE OF MODEST INCOME.—To the extent provided by regulations prescribed by the Secretary or his delegate, the provisions of this section apply with respect to any payment described in section 221(a) and to transactions of any plan described in section 428(a) or under an American stock ownership annuity described in section 428(b)."

(h) Section 4(b) of the Employee Retirement Income Security Act of 1973 is amended—

(1) by striking out "or" at the end of paragraph (4),

(2) by striking out the period at the end of paragraph (5) and by inserting in lieu thereof "; or", and

(3) by adding at the end thereof the following new paragraph:

"(6) such plan is American stock ownership plans for those of modest income (as defined in section 428(a) of the Internal Revenue Code of 1954) or an American stock ownership annuity (as defined in section 428(b) of such Code)."

SEC. 7. CLERICAL AMENDMENTS.

(a) The table of sections for part VII of subchapter B of chapter 1 of the Internal Revenue Code of 1954 is amended by striking out the item relating to section 220 and inserting in lieu thereof the following:

"Sec. 221. Contributions to American stock ownership plans for those of modest income.

"Sec. 222. Cross references."

(b) The table of parts for subchapter D of chapter 1 of such Code is amended by adding at the end thereof the following:

"Part III. American stock ownership plans for those of modest income."

(c) The table of sections for chapter 43 of such Code is amended by adding at the end thereof the following new item:

"Sec. 4976. Tax on excess contributions to American stock ownership plans for those of modest income."

(d) The table of sections for subchapter B of chapter 68 is amended by inserting after the item relating to section 6697 the following new item:

"Sec. 6698. Failure to provide reports on American stock ownership plans for those of modest income."

SEC. 8. EFFECTIVE DATES.

(a) The amendments made by sections 1 through 3 shall take effect on July 1, 1977, and shall apply to taxable years beginning after December 31, 1976.

(b) The amendments made by sections 4 through 7 shall take effect on July 1, 1977.

Mr. CURTIS. This amendment is identical with the bill I introduced along with other cosponsors S. 736, the Broadened Stock Ownership Plan, BSOP.

not lost their sense of fiscal responsibility, but we are championing a concept today. Tomorrow or the next day we will be asked to vote for a $4 billion boondoggle in public works jobs and spending. When we appropriate money to create a make-work job, it runs for a year. What happens at the end of the year? The money is gone and the man is out of work again.

We are actively responsible over here, but we say that we have faith in private enterprise; that this economy will go forward if we remove some of the impediments.

In spite of the growth of the country, we have far fewer individuals owning stock in America than ever before. It takes an investment to create a business, and it takes a business to provide jobs.

This amendment is sometimes called BSOP, broadened stock ownership plan.

The American stock ownership plan will provide an incentive for taxpayers in the low and moderate income brackets to buy and hold common stocks in American industry.

How does it work? A taxpayer, for any taxable year, may deduct up to 15 percent of his earned income for such taxable year or $1,500, whichever is less. The plan is so drawn that the maximum allowable deduction of $1,500 would be available for a taxpayer with earned income of $20,000 and thereafter the amount deductible would be phased down to zero at $40,000 income.

Will this provision provide a benefit for taxpayers whose annual income from any source exceeds $40,000? The answer is "No."

This, Mr. President, is an opportunity for the have-nots to become owners of the American industry. It is limited to people of modest income, those who have enough money or enough earned income. They are not getting all the fringe benefits; they are not getting food stamps. They spend all their lives working with their hands to provide their daily bread and here is an incentive for them to become owners.

How long must the stocks be held? Seven years.

If the stocks are held for 7 years and then sold, how are the proceeds taxed? As capital gains.

If dividends are received on the stocks, how are they taxed? As ordinary income.

What are the arguments in favor of this amendment? What good will it accomplish? It will provide additional needed capital for American industry.

It opens the door to everybody, it does not make any difference where they work. They may be self-employed. They can take 15 percent of their income or $1,500, whichever is less, and buy stock and get a tax deduction for their expenditure. The maximum $1,500 is reached at $20,000 earned income. It phases down to zero at $40,000.

The individual with great property or very much property and income will not get anything in this.

Second. It will provide broadened ownership for American industry. Why not make the American dream available to all? Everyone here has read and heard about individuals who, somehow, bought a few shares every month, kept it for 30 or 40 years, and they became financially independent. Here is an incentive and an assistance to help people do those things.

Third. It will provide a tax break for low-income taxpayers who depend on their own earnings.

If they quit work, we would heap tens and tens of thousands of dollars of taxpayers' money upon them, rent subsidies, housing subsidies, school lunches, breakfasts, food stamps. If they are unemployed, medicaid. All of these things. That is why so many people find it more profitable to be unemployed than employed.

Here is something that we can do for people who pay their own way.

Fourth. It will promote thrift and savings.

Fifth. It will provide an incentive for taxpayers, particularly young taxpayers, to start a stock ownership plan and build an estate, thus contributing to self-reliance and lessening the ultimate need for additional social and welfare benefits.

Why do we have budget problems? Does the Federal Government have budget problems? We have budget problems because everyone turns to the Treasury of the United States to solve all problems. We have a large budget because, for all the contingencies of life, whether it is age or illness or whatnot, we turn to the Government. This will be of some help in reversing the trend and making it possible for people to take care of themselves.

Why is it that the great rank and file of working citizens must turn to their Congressmen and Senators and say, "Our costs are such that my paycheck is all gone, please vote in a program to take care of us"?

This will reverse that trend. This is the type of thing that will meet our budget problems. Our budget problems will only be solved when there are less Government programs. Assuming enactment effective January 1, 1978, the staff of the Joint Committee on Internal Revenue Taxation has determined that the revenue estimates for this program are less than $50 million for fiscal year 1978.

Imagine, $50 million to help people who support themselves to save a little bit when they are knocking on the door out here with a conference report for $4 billion of boondoggle. Four hundred and ten million dollars for fiscal year 1979 and $469 million for fiscal year 1980.

That is all it would cost to make the American dream of people who start out poor and work hard become owners in America. That is all it would cost. The revenue effect of this program depends on how many people will take advantage of it. It will take a while to get in motion, and the results, the improvement to our economy, the lessening of the pressure for Government expenditures and programs, will be great.

Mr. President, I am not unaware that there are not votes present to carry this, but I am also very much aware that turning it down is embracing statism, government, more relief, more welfare, and making it harder for the people of low income who work with their hands all their lives to support themselves, to accumulate something, and establish an independent position. Those are the people to whom we should open up the door and let the American dream come true.

Mr. President, I yield the floor to the Senator from Indiana. We do not have controlled time.

Mr. LUGAR. Mr. President, may I have some time?

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. I thank the Chair.

Mr. President, I associate myself with the remarks of the Senator from Nebraska. I think it is tremendously important, as we discuss tax policy and think about the revival of our economy, the acceleration of that economy, and the movement toward full employment, to think through again one facet of the capital question. Clearly, the problem that has been expressed by so many in America is that persons of little means, or persons of moderate income and moderate means, have not been participating fully in our American economy because they do not own very much of it.

The problems have become more acute due to inflation in the last few years because so many people have simply found it very difficult to keep pace with the cost of living. They have probably suffered substantial reversals and, even in the case of fairly affluent families, some reversals in terms of true income. The ability to put away money for saving, to say nothing about investing it in equity stocks, has not been present for them.

The purpose of this amendment—and it is a very important purpose—is to try to break through this cycle in which people of moderate and low income in this country, who want to be a part of our capital structure, have incentive to do that, really a very substantial incentive, provided in this amendment. I wish to recognize how disparate this ownership presently is and how adverse, really, to those of low and moderate income.

For example, I quote from the Internal Revenue Service tables of 1971: Families with less than $5,000 of income in this country at that time held only 2.4 percent of the aggregate market value of common stocks in this country. Those in the $5,000 to $9 999 brackets held only 7 percent, in addition; those in the $10,000 to $15,000 bracket, 8.9 percent; at $15,000 to $25,000, 12.8 percent.

Then we accelerate more rapidly. Those with income from $25,000 to $50,000 held 17.8 percent; $50,000 to $100,000, 20.9 percent. Those with incomes of $100,000 or over own 30.2 percent of the common stocks in this country.

Very frequently, people of a liberal persuasion have lamented this fact, that those of high income, and, sometimes, those of very large net worth in this country own an abnormal amount of the common stocks in the country. I suspect that it is important, as we take a look at a restructuring that might bring new growth in our economy, that we think how we might bring new growth of hope and very effective ownership, for

that matter, by those of low and moderate income.

I think this is a very effective means of bringing this about, and it is time to think about it.

Clearly, we are facing, if not a capital shortage in the country, a need to accelerate capital accumulation. That can occur in many ways. It can occur in large corporate earnings. It can occur with the Federal Government simply aggregating more money and investing in one way or another in capital expenditures, as we are inclined to do. But I think that a course that ought to be followed is that of encouraging persons of low and moderate income to invest in common stocks. Obviously, the incentive factor here is that a deduction of 15 percent of income could be set aside for them to do so so long as these stocks were held in trust for at least a 7-year period of time.

It is not a suggestion that is radical or very different from the IRS proposals and others that are being offered in various other committees of this body with regard to housing. We are talking today specifically about common stock ownership and owning part of the assets of this country.

I am hopeful that the U.S. Senate will take a very good look at the prospects here, as well as at the tables of ownership presently, and really strike a blow for those of low and moderate income who want to participate in capitalism in this country. I think that we have a vehicle with which to do so. Therefore, I ask the support of this body for the amendment which has been introduced by my colleague, the distinguished Senator from Nebraska (Mr. CURTIS).

Mr. CURTIS. Mr. President, I thank the distinguished Senator from Indiana for his helpfulness. This is something that it is very evident that the majority are not going to allow to be placed in this bill at this time. I think it is a very great mistake. I think that the Carter package for our economy is awfully bad medicine. I think it is going to do more harm than good, and I believe these private enterprise approaches are going to be much better. However, I am aware that we have a rule and a tradition here that an amendment has to have a majority vote in order to be adopted.

It is quite a task to impose upon the reading clerks and the others every time, so, Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Are there any further amendments?

UP AMENDMENT NO. 162

Mr. CURTIS. Mr. President, I offer an unprinted amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) proposes unprinted amendment No. 162.

At the appropriate place add a new section as follows:

That (a) section 116 of the Internal Revenue Code of 1954 (relating to partial exclusion of dividends received by individuals) is amended by striking out "$100" each place it appears, and by inserting in lieu thereof the following: "$600 ($1,200 in the case of a husband and wife making a joint return under section 6013)".

(b) The amendments made by this section apply to taxable years beginning after December 31, 1977.

Mr. CURTIS. Mr. President, this would raise the dividend exclusion to $600 a year. This, along with these other proposals, would go a long way toward giving us a vibrant economy that will grow and provide jobs. Unfortunately, the administration and the majority have some different ideas. We are going to spend billions creating manmade jobs. Sure, they will be fine for the fellows who are on them. But it solves nothing. At the end of the year, the money is gone and they become unemployed again. So what we ought to do here is do those things that will cause our private enterprise system to grow.

If we make a change in tax laws—and everybody knows they are harsh, and everybody knows that they retard activity in investment—if we make some changes in those and someone hires an additional employee, or three or four, or starts a new business, if it succeeds, it does not last for just a year. It goes on and on. Other things take off from it, and that is the way great industries are built.

Now, Mr. President, why is it that there are fewer people today that are owners in America than before? In 1969, we had a labor force of 80 million and we had 30 million investors. By 1975, the labor force had grown to 93 million, but the investors had dropped down to 25 million.

If investors had invested in 1975 as they did in 1968, there would have been 35 million of them. That is a loss of 10 million people who would have been investing. The size of their investments have dropped.

Here is something else, Mr. President. The well-financed industries have research departments, improved equipment, modern technology, they pay the highest wages and they do the best job in competing against foreign production, but when they are crippled they cannot do that, they hire fewer people, do a poorer job of competing and because they are just tugging along, they are not able to pay the highest of wages.

This proposal would be an inducement for more ownership in America.

The previous amendment that I offered was to get people of very low income, reaching the maximum of $20.000, to become started. This would take care of everybody.

Corporate income is taxed twice. A corporation is created and it pays the corporate tax. Then if there is any profit, it is distributed, they pay it to the shareholders and they pay again.

We ought to be in here with something to grant relief in a greater way from the double taxation of dividends. But this is a starter. It is a little something we can do.

In the tax return, we could exclude $100 in dividends, and what is proposed is $600.

All the arguments that I made for more investments apply to this, but it also deals with the very important thing that is the double taxation of the same earnings.

A corporation pays a tax of 48 percent on everything it earns. That is a hefty tax. Then they distribute those profits and the person who receives them is taxed again, at ordinary rates, except that he can exclude $100 of that.

This would be a small step in relieving us from the double taxation of dividends.

Mr. President, this program that the minority offered is far more financially responsible than the program we are trying to counteract where billions of dollars will be spent each year, will cure nothing, will discourage investment, and will not do anything to make us more competitive in the world, nothing to give us more jobs.

In those bills, they talk about billions. This would only cost $200 million each year.

Mr. President, I may have something further to say in a moment.

Mr. HATCH. Will the Senator yield to me?

Mr. CURTIS. I am happy to, but it is not controlled time.

Mr. HATCH. Fine.

The PRESIDING OFFICER (Mr. MATSUNAGA). The Senator from Utah.

Mr. HATCH. Mr. President, the Tax Reform Act of 1969 and the subsequent revisions through 1976 have so drastically deteriorated the personal investment climate in this country that more than 10 million people who normally would be investors in our free enterprise system have decided not to invest. At an average investment portfolio size of $10,000, over $100 billion has not been invested by individuals who were motivated not to invest by the severe penalties of the 1969–76 tax laws. The result has been significant increases in the Consumer Price Index, unacceptable increases in the rate of unemployment and continuing Federal budget deficits.

Four specific provisions in the tax laws during this period have been responsible for this serious deterioration of the personal investment climate in the United States:

First. Capital gains taxes have increased from 25 percent to between 42½ and 51½ percent as a maximum.

Second. Capital loss writeoffs have been reduced from 100 to 50 percent since 1969.

Third. Excess investment interest has now been limited to $10,000.

Fourth. Minimum taxes and tax preferences associated with capital gains have increased individuals' taxes from 30 to 35 percent.

If our country is to have any possibility of reducing unemployment, controlling inflation, and balancing our national budget, there must be a significant improvement in the investment climate.

I have been very interested today to hear the comments by some members of the majority. I have been very impressed that they are concerned about further budget deficits.

The fact of the matter is that a lot of these suggestions we have been bringing up have been opposed, because they

might lead to further budget deficits in the eyes of certain members of the majority, even though our arguments, and I think the arguments of many sound economists, are that they would decrease the budget deficits.

In this particular case, the $100 dividend exclusion was put in with the small investor in mind.

When it was put in, prices were a lot lower and money would buy more. Today, the $100 dividend exclusion is not much help to the small investor and, basically, it is no incentive to attract capital into American industry.

For the past few years, the number of small stockholders in American business has been declining. We need to restore the value to the small investor of the dividend exclusion, which has been eroded by inflation. Enlarging the exclusion to $600 will restore the real value of the exclusion and encourage the small investor to increase his ownership stake in the American economy.

We have 31 million investors in America and in the free enterprise system, but we should have many more than that. I think many more people would invest if they had the $600 dividend exclusion.

If many more would, and, specifically, the 10 million I have spoken of, they would have an average portfolio size of $10,000 which would produce somewhere in the neighborhood of $100 billion invested capital in American business.

We are talking about millions of jobs that would last. Millions of private sector jobs versus the public sector jobs. Public sector jobs continue to throw us more and more into deficit financing and huge budgetary deficits that add to this national debt we all know exists, the interest against which is more than the total Federal budget was just 25 years ago. I might mention, that interest is the third largest budgetary item in the Federal budget.

The thing that bothers me is that I think we ought to be encouraging the average American to invest in the free enterprise system, because in so doing he is going to start to have a greater understanding and knowledge about how the free enterprise system works, he will have incentives to see that it works. He will then understand that the salvation of this country is not more Federal Government employment. The answer is more private employment by stable companies that have more invested capital to stimulate more jobs and train more people who will then be paying taxes. And of course, this will help to bolster such items as the social security system that we know is now in a $2 trillion to $4 trillion unfunded status.

We need some of these incentives for the little guy in America. Sometimes I wonder whether it would not be better for all Americans if we could provide incentives to individuals who are not high-wage earners to get into the great American free enterprise system and invest in it. But under the present circumstances, I am afraid we are defeating that opportunity. In a real sense, we are only encouraging the Federal Government to continue deficit spending programs and to continue the large budget deficits. This is hurting the average citizen in America.

Mr. KENNEDY. Mr. President, I hope this amendment will not be accepted by the Senate this afternoon.

There are a few items that should be pointed out during the course of the debate on this measure. One is the cost to the Treasury. It is my understanding that it is close to $1.3 billion a year. If that is the cost to the Treasury, we should think of where the benefits are going to go. More than two-thirds of the benefits are going to go to those in the top income brackets in this country. That is a factor which should be understood very clearly as we begin this debate. The fact that it is a deduction instead of a credit means that the largest benefits go to the wealthiest individuals.

Furthermore, the proponents are interested in trying to bring new investors into the stock market. But there is no suggestion that this $600 exclusion would be only for new investors. It would be available to all present investors, too; therefore, it would be a windfall to those already receiving large amounts of dividends.

It is not keyed to new investors. It will be an extraordinary windfall to those who already are investing.

Mr. President, we have to ask ourselves why this tax subsidy is needed in our free economy to move people into stocks and move them away from savings accounts or savings and loans, which are the basis for new housing and new building construction, or to take them out of municipal bonds, by which municipalities are facing up to their responsibilities, or to move them out of corporate bonds. Why do we want to add this particular incentive?

What is the justification, what is the wisdom, what is the economic rationale for using the Internal Revenue Code to move people into that type of investment? If the economy is strong, investors will come out of the woodwork. It does not seem to me to be wise, nor do I think the case has been made here this afternoon for this sort of Federal intervention and Federal subsidy.

There is a point which the proponents make which I feel does deserve attention, and that is the problem of corporate dividends being taxed on two occasions. President Carter has talked about this issue. It is a matter of concern to me. He has indicated that it may be part of the recommendations to be made in September. It has important implications in terms of other factors affecting investment and the development of investment capital.

It seems to me that it is important that we deal with that issue, because I think there may be cases in terms of equity and fairness, but it has other implications which ripple out from action that is taken.

So, Mr. President, I hope that this amendment will not be agreed to by the Senate.

Mr. CURTIS. Mr. President, I am about to withdraw the amendment; but before I do so, I should like the RECORD to show that the Senate had an opportunity to grant some relief from the double taxation of dividends, but the Senate went in another direction.

Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Are there further amendments?

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 220

Mr. KENNEDY. Mr. President, I call up amendment 220 and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an amendment No. 220.

The PRESIDING OFFICER. Without objection, the reading of the amendment will be waived, and the amendment will be printed in the RECORD.

The amendment is as follows:

On page 89, lines 8 and 9, strike out "At the election of the taxpayer, there" and insert in lieu thereof "There".

On page 89, beginning with line 12, strike out through line 5 on page 90.

On page 90, line 6, strike out "'(c)" and insert in lieu thereof "'(b)".

On page 103, beginning with line 3, strike out through line 22 on page 104 and insert in lieu thereof the following:

"(d) REFUND OF PORTION OF INVESTMENT CREDIT.—

"(1) Paragraph (3) of section 46(a) (relating to limitation based on amount of tax) is amended to read as follows:

"'(3) LIMITATION BASED ON AMOUNT OF TAX.—

"'(A) Notwithstanding paragraph (1) and except as provided in subparagraph (B), the credit allowed by section 38 for the taxable year shall not exceed—

"'(i) so much of the liability for tax for the taxable year as does not exceed $25,000, plus

"'(ii) for taxable years ending on or before the last day of the suspension period (as defined in section 48(j)), 25 percent of so much of the liability for tax for the taxable year as exceeds $25,000, or

"'(iii) for taxable years ending after the last day of such suspension period 50 percent of so much of the liability for tax for the taxable year as exceeds $25,000.

"'(B) If the amount determined under paragraph (1) for the taxable year exceeds the limitation imposed by subparagraph (A) for the taxable year, and the excess is attributable (in whole or in part) to the amount determined under subparagraph (B) of paragraph (1), then the amount of the credit allowed by section 38 for the taxable year shall be increased (over the amount of the limitation imposed by subparagraph (A)) by an amount equal to so much of the excess so attributable as does not exceed the smaller of—

"'(i) 50 percent of so much of the liability for tax for the taxable year as exceeds $25,000, or

"'(ii) one-third of the amount of the excess so attributable.

"'(C) In applying clause (iii) of subparagraph (A) to a taxable year beginning on or before the last day of such suspension period and ending after the last day of such suspension period, the percent referred to in such subparagraph shall be the sum of 25 percent plus the percent which bears the same ratio to 25 percent as the number of days in such year after the last day of the suspension period bears to the total number of days in such year. The amount otherwise determined under this paragraph shall be reduced (but not below zero) by the credit which would have been allowable under paragraph (1) for such taxable year with respect to suspension property but for the application of section 48(h)(1).'.

"(2) Paragraph (1) of section 46(b) (relating to general rule for carryback and carryover of unused credits) is amended by inserting after 'subsection (a)(1)(B)' the second time it appears the following: 'shall be reduced by the amount of any overpayment made under the last sentence of section 6401(b) and, as so reduced,'.

"(3) Section 6401(b) (relating to amounts treated as overpayments) is amended by adding at the end thereof the following sentence: 'Except in the case of an organization which is exempt from the tax imposed by chapter 1, there shall be considered as an overpayment the amount by which one-third of the amount determined under clause (ii) of section 46(a)(3)(B) exceeds the amount determined under subparagraph (B) of section 46(a)(3).'.

"(4) The amendments made by this subsection shall apply to—

"(A) property to which subsection (d) of section 46 of the Internal Revenue Code of 1954 does not apply, the construction, reconstruction, or erection of which is completed by the taxpayer after December 31, 1976, but only to the extent as a basis thereof attributable to construction, reconstruction, or erection after such date and before January 1, 1981,

"(B) property to which such subsection (d) does not apply, acquired by the taxpayer after December 31, 1976, and before January 1, 1981, and placed in service by the taxpayer before January 1, 1981, and

"(C) property to which such subsection (d) applies, but only to the extent of the qualified investment (as determined under subsections (c) and (d) of section 46 of such Code) with respect to qualified progress expenditures made after December 31, 1976, and before January 1, 1981.".

On page 114, line 3, strike out "The amendments" and insert in lieu thereof "except as otherwise provided in this section, the amendments".

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator yield for a question?

Mr. KENNEDY. I yield.

Mr. ROBERT C. BYRD. Mr. President, would the Senator agree to a 1-hour time limitation on the amendment, to be equally divided?

Mr. RIBICOFF. It is satisfactory with me.

Mr. CURTIS. May we inquire what the amendment is about?

Mr. KENNEDY. It is a refundable investment credit amendment, a very commendable one. [Laughter.]

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be such a time limitation on the amendment.

The PRESIDING OFFICER. Is there objection? There being no objection, the time is limited to 1 hour on this amendment, to be equally divided.

Who yields time?

Mr. KENNEDY. Mr. President, I yield myself 15 minutes.

The PRESIDING OFFICER. The Senator is recognized for 15 minutes.

Mr. KENNEDY. Mr. President, the purpose of this amendment is to substitute a one-third refundable investment credit for the alternative 2-percent investment credit in the committee bill. The refundable credit would be in addition to the jobs credit. A firm could take both. By contrast, under the committee bill, a firm much choose either the jobs credit or the investment credit.

Mr. President, if this amendment is adopted, there would be no net change in the revenue effect of the present legislation. The cost of the refundable credit is essentially the same as the 2-percent investment credit which it replaced.

Mr. President, I would like to make a brief explanation, then outline very quickly the types of firms that would be benefited under this program, and then point out some of the current inequities and, finally, review very briefly the history of the concept of refundability of credits in the Senate.

Under present law, a taxpayer can take the 10-percent investment credit in an amount equal to no more than 50 percent of the taxpayer's tax liability. For airlines and railroads, the limit was raised to 100 percent—the 100-percent fill-up—by the 1976 act; utilities received the 100-percent fill-up in 1975.

Any credit in excess of this amount is disallowed in the current year, even though the investment has been made in that year, but can be carried back 3 years, or forward for 7 years to offset past or future tax liability.

A taxpayer who has no tax liability for the year gets no current benefit from the investment credit even though he has made qualified investments. Many firms that need help the most will not receive any current benefit from the credit. No firm can qualify for the credit, unless it incurs some tax liability. And even firms with some tax liability may be ineligible for the benefits, or for the full amount of the benefits, because of the limitations that apply to the credit.

The amendment guarantees that virtually every firm will receive some stimulus from the tax package. The amendment achieves this result by providing for partial—one-third—refundability of the present 10-percent investment tax credit. A firm will calculate the amount it would receive if the credit was fully refundable and receive a refund equal to one-third of that amount—the one-third level was chosen to produce the same $1.2 billion revenue effect as the 12 percent investment credit.

For example, assume that during the recession, a firm suffered substantial losses, and will not incur any tax liability for 1977. However, in 1977 the firm is experiencing a recovery and buys new machinery and equipment costing $1 million. The firm would qualify for a 10-percent investment credit equal to $100,000. Under present law, the firm would receive no tax benefit at all. By contrast, under the proposed amendment the business would receive a 1977 tax refund of $33,333, or one-third of $100,000. The remaining $66,667 of investment credit would be carried forward, as under present law.

Or, as another example, assume a firm that is expanding would incur a 1977 tax of $100,000 on its income. It buys machinery and equipment costing $2 million. Under present law, it can use the investment credit to offset only 50 percent of its tax liability. Therefore, in 1977, it can use only $50,000 of its available $200,000 investment credit. Under the proposed amendment, it could take an additional $50,000 credit in 1977, or one-third of the remaining $150,000.

There are at least five categories of firms that would receive the benefits of the investment credit. All of these firms would be penalized by increasing the credit to 12 percent:

New firms, with large initial investment expenses;

Firms hurt by the recession, with little or no tax liability because of large loss carryovers from the recession;

Rapidly growing firms, with substantial investments compared to tax liability;

Small businesses, with large investments compared to tax liability, or with investments bunched in 1 year, and

Firms currently in financial difficulty, but still making investments.

Mr. President, new firms frequently do not incur any tax liability for the first several years they are in business, since their large start-up costs often exceed their income. Nonetheless, these firms must make significant investments in machinery and equipment. It is no help to these firms to tell them that they will get an investment credit seven years from now. They need financial assistance now to help pay for the costly machinery and equipment that they require in order to get started in their operations. The current 10 percent investment does not provide that assistance. Increasing the current credit to 12 percent is even more restrictive, since firms bumping against the present limits will be unable to use the additional 2 percent. But a partially refundable credit can give new firms immediate cash to help offset costs of vital plant machinery and equipment.

Other firms, over the past 3 years, have suffered losses due to the severe recession in the economy. These losses resulted not from mismanagement, but from poor economic conditions over which they had no control. However, for tax purposes, these losses will reduce or eliminate their tax liability during 1977 and 1978. An additional 2 percent investment credit is of no help to these firms; it merely increases the carryover of already unusable investment credits. A refundable investment credit will provide needed immediate stimulus for these firms to make capital investments.

Many rapidly expanding firms are already at or above the 50 percent limit. However, these firms are still expanding their capital investments; they are pre-

cisely the firms that should be provided encouragement. The refundable investment credit provides that incentive.

Refundability of the investment credit means that firms which suffered losses during the recession, new businesses with large initial expenses, and rapidly expanding firms will be able to obtain some benefit from the credit. I believe these are the firms on which the Senate should focus its tax stimulus effort at this time, rather than the large corporations with comfortable profit margins, which can make capital investments without further Federal financial aid.

According to Treasury estimates, only 68 percent of the eligible investment credits at the 10 percent level for 1977 will actually be claimed on 1977 tax returns. If the credit goes to 12 percent, only 56 percent of the credits would be claimed, as more and more firms become trapped by the limits of the credit.

If $1.2 billion is to be spent for business tax relief through the investment credit, it is better to distribute that relief to firms that currently do not get any benefit from the credit, not to the 68 percent of the firms that already do get the benefit.

Increasing the current 10 percent credit to 12 percent simply provides a windfall to firms that were already going to invest in any event.

Moreover, 2 percent increase is a drop in the bucket for firms already using the 10 percent credit. A one-third refundable credit means that firms not benefiting at all from the present credit would receive a 3.3 percent credit, or almost two times—67 percent—greater stimulus than the 2 percent credit. In fact, the stimulus is even greater, since going from 0 to 3.3 percent is more significant than going from 10 to 12 percent.

The refundable credit is not a reward for inefficient or mismanaged or failing firms. In fact, the present rules unfairly penalize firms with financial difficulties. A refundable credit makes an investment cost the same for all firms. The problem under the current credit is that its benefits go only to well-off firms. Rather than calling a refundable credit "welfare" for failing firms, it would be more accurate to call the current credit "welfare" for wealthy firms.

The current credit is an unfair and discriminatory subsidy: The investment credit is the major program by which the Federal Government provides financial assistance to industry. In fiscal year 1977, $8.6 billion will go to corporations and $2 billion to individuals, for a total investment subsidy of $10.6.

Because of its present limitations, however, the program is inequitable and discriminatory. Two firms can make identical investments, yet one of them may receive the investment credit currently and one may not.

When General Motors buys a $100,000 machine, it pays only $90,000 because of the investment credit. It makes no sense to say that American Motors must pay the full $100,000 for the same machine. Yet this is precisely the discrimination caused by current law, which favors wealthy firms at the expense of less affluent and struggling firms.

If the investment credit program were run as a direct subsidy program through the Commerce Department, no one would try to condition the subsidy for capital investment on the amount of a taxpayer's income tax liability to the Treasury. Instead, two taxpayers who made a $100 investment would receive a $10 Commerce Department check, regardless of their tax situation. The refundable amendment moves us in the direction of this more rational system.

In effect, the current law allows a profitable corporation to buy a $100 machine for $90, whereas an unprofitable corporation must pay the full $100. There is no economic justification for this discrimination, which distorts the free market by allowing some firms to purchase assets for 10 percent less than other firms. This discrimination will increase if the investment credit is raised to 12 percent. A refundable credit would end this discrimination by making the cost of assets the same for all companies.

Mr. President, the distribution of the current investment credit is extremely inequitable.

Two-thirds of the present $11 billion credit, or $7 billion, goes to the top 0.1 percent of corporations. A 2 percent increase in the credit will have little impact on the capital investment programs of these giants.

Only 2.9 percent of credit goes to the bottom 71 percent of corporations.

In 1975, four firms received 20 percent of the credit:

	Million
A.T. & T.	$750
GM	95
Exxon	59
U.S. Steel	51

Thus, the 12 percent credit is tax relief for these four giants.

Thirty-nine corporations claimed credits of $10 million or more each. These firms claimed 30 percent of the total profit.

Of the $1.2 billion cost of the refundable credit, for investments made in 1978, four-tenths of a billion would go to firms with zero or negative taxable income, and seven-tenths would go to firms with positive taxable income.

Mr. President, the comparative distribution of the current credit and the refundable credit is very interesting:

Seventy-three percent of the current credit goes to firms with taxable income over $10 million; only 44 percent of the refundable credit would go to such firms.

Twelve percent of the refundable credit goes to firms with taxable income of $500,000 or less; 42 percent of the refundable credit would bo to such firms.

In addition, Mr. President, there are numerous precedents for refundable credits in the Senate:

In 1975, under Senator LONG's leadership, Congress enacted the first refundable credit—the $400 earned income credit for low-income workers.

In 1976, the Senate adopted refundable energy tax credits to encourage the goal of energy conservation. The provisions were later dropped in the conference with the House.

In 1976, the Senate also voted to make the child care credit refundable, but the refundable feature was dropped in the conference with the House.

In 1974, the Treasury, under Secretary Simon, proposed that the then existing 7-percent investment tax credit be made refundable.

On April 7, 1977, Senator LONG introduced S. 1270, a bill to make the investment credit refundable on a permanent basis.

In 1974, the investment credit was increased from 7 to 10 percent, thereby exacerbating the discrimination against firms that do not qualify for the credit. Before the credit is increased again, the benefit of the incentive should be extended to all firms by making the credit refundable. There is no economic evidence that the increase to 10 percent was a significant incentive to capital investment.

On March 8, the House voted 341 to 74—almost a 5 to 1 margin—to substitute the jobs credit for the 12-percent investment credit.

Mr. President, I ask unanimous consent that a table comparing the distribution of the 12-percent credit and the refundable credit may be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Comparative benefit distribution: 2 percent increase in current investment credit versus Kennedy refundable investment credit—distribution by taxable income of corporation

Taxable income	Percent of corporations	Percent of benefit from 2 percent increase	Percent of benefit from refundable credit
Less than $50,000	78	4	36.5
$50,000 to $100,000	10	2	1.9
$100,000 to $500,000	10	5.7	3.8
$500,000 to $1,000,000	1	2.6	1.8
$1,000,000 to $10,000,000	1	12.3	12.0
Over $10,000,000	0.2	73.3	44.1
Total	100.0	100.0	100.0

Mr. KENNEDY. Mr. President, what we are attempting to do with the investment credit is to modernize our plants and factories in this country. We are attempting to provide a stimulus for that. It seems to me, Mr. President, that not many industries or businesses will be interested when we say, "We are going

to give you an investment credit, but you will not be able to take advantage of it until 5 or 7 years from now."

What is needed is modernization at the present time. What is needed is additional resources for new and expanding corporations at the present time, and not well down the road.

Finally, as I have mentioned, I think this amendment commends itself on the basic issue of equity. Without this proposal, with the expansion of the 10- to 12-percent credit, the more successful firms, those with sizable profits, will be able to purchase new equipment at a 12-percent discount, when their competition must pay the full amount. That is not fair. It violates the principles of fair competition and the Federal Government should not be a party to such tactics.

The PRESIDING OFFICER. The Senator's 15 minutes have expired.

Mr. KENNEDY. I yield myself 2 minutes more.

It does not make a great deal of sense, if our purpose is to modernize plants and increase productivity, to say we are going to give a tax benefit, but only to those companies which are the most successful and in the most favorable financial position.

Mr. President, I reserve the remainder of my time.

Mr. RIBICOFF. Mr. President, I suggest the absence of a quorum.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded, and seek recognition.

Mr. RIBICOFF. Mr. President, I withdraw the request for the quorum call and yield the Senator 3 minutes.

Mr. BENTSEN. Mr. President, the Members of the Senate Finance Committee discussed the issue of refundable investment tax credits during the markup of H.R. 3477. There was substantial sentiment for this concept. However, due to the complexity of this issue, we decided that further study was clearly needed. Thus, it would be more appropriate to handle a major tax revision issue such as this during deliberations on comprehensive tax reform later this year. In fact, earlier this month the distinguished chairman of the Senate Finance Committee introduced a bill, S. 1270, to provide a refundable investment tax credit.

There are several aspects of this approach which must be carefully considered before we take final action.

First, while a refundable credit may be equitable in a case where a firm is having a bad year or has very large investments relative to its profits because it is expanding rapidly, some would consider it overly generous to those firms whose tax liabilities are low because they are already making use of other preferences.

Second, under existing law, unutilized investment tax credits may be carried back 3 years and carried forward 7 years. Usually these generous carryback and carry-forward rules enable all but the most marginal and inefficient firms from benefiting from the investment tax credit. Consequently, some tax experts have raised questions as to whether very inefficient firms should be subsidized with a refundable investment tax credit.

In light of these considerations, final action on this important issue should be delayed until Congress begins work on comprehensive tax reform later this year.

Mr. President, in addition, I believe there are compelling reasons to adopt the 2-percent increase in the investment tax credit.

The temporary increase in the investment tax credit in H.R. 3477 is essential to encourage greater investment for the expansion and modernization of plant and equipment. This is needed to prevent inflationary bottlenecks and to insure that we can remain competitive in the world markets. We cannot have high employment and a balanced budget without high levels of business investment. The Nation needs increased investment to boost productivity and provide jobs.

The House version of the tax cut bill would provide no stimulus at all to capital investment. But this is precisely where the economy needs bolstering. Spending on new plant and equipment has lagged all through the recovery from the 1974 and 1975 recession. If it does not pick up distinctly within the next year, the upswing in business is likely to abort. And if it does not maintain a high level over the long run, the United States will be unable to provide jobs for its growing labor force.

In 1973, gross fixed investment—(expenditures for new housing, plant and equipment—measured in 1972 dollars, was $190.7 billion. In 1974, gross fixed investment fell to $173.5 billion, a 9-percent decline, and in 1975 it fell to $149.8 billion, a 21-percent decline from 1973 and a 14-percent decline from 1974. Fixed investment rose to $162.8 billion in 1976, an 8.7-percent increase over 1975; however, to date it is still below the 1974 level. In the last quarter of 1976, investment in equipment actually declined.

The weakness in new plant and equipment expenditures is highlighted by noting that at this point in previous recoveries, such investment has averaged 5.3 percent above the previous peak. In this recovery, investment remains 11.8 percent below the previous peak.

Today businesses lack confidence to invest in expansion and modernization. Real aftertax return on investment, adjusted for inflation, fell from 9.9 percent in 1965 to 2.4 percent in 1975, and in 1976 it rose to about 3 percent. Certainly this sort of return does not inspire management to take risks on new investment. The investment tax credit directly rewards investment, thus creating jobs to build the new plant and equipment, and at the same time, increasing industrial capacity which is a hedge against the inflationary pressure of shortages that are likely to appear in the future. Industrial capacity pressures may emerge in basic industries unless we promote new investment now.

Of the many factors that influence economic growth rates, none is more important than the level of capital investment. A strong rate of new capital investment is required to generate sustained economic growth. However, during the 1960's the United States had the worst record of capital investment among the major industrialized nations of the free world. A study prepared by the Department of the Treasury indicates that total U.S. fixed investment as a share of national output during the time period 1960 through 1973 was 17.5 percent. The U.S. figure ranks last among a group of 11 major industrial nations; our investment rate was 7.2 percentage points below the average commitment of the entire group.

Mr. President, I ask unanimous consent that a table illustrating these statistics be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

INVESTMENT AS PERCENT OF REAL NATIONAL OUTPUT 1960–73

	Total fixed [1]	*Nonresidential fixed*
Japan	35.0	29.0
West Germany	25.8	20.0
France	24.5	18.2
Canada	21.8	17.4
Italy	20.5	14.4
United Kingdom	18.5	15.2
United States	17.5	13.6
11 OECD Counties	24.7	19.4

[1] Including residential.

Source: U.S. Department of the Treasury.

Mr. BENTSEN. Mr. President, for these reasons I urge my colleagues to reject the pending amendment so that we can carefully review the important question of refundable investment tax credits when Congress begins action on comprehensive tax reform later this year.

Mr. President, I reserve the remainder of my time.

Mr. KENNEDY. Mr. President, I yield myself 3 minutes.

Mr. President, under the existing Finance Committee bill, there will be a number of firms which will not be eligible for either the job credit or the investment credit. With the increase in the investment credit, only 56 percent of the potential credits each year are actually going to be claimed on tax returns.

The modernization of plants and machinery was the basis for the investment credit initially, and is still its current justification. But under the Finance Committee bill, there will be many companies and corporations that will not benefit. The argument is made that they can carry the credit back 3 years or carry it forward 7 years. I think the question is how to provide the stimulus now, how to get the jobs now, how to reduce unemployment now.

The refundable credit is what can be most effective at the present time. How can we say to companies, "You might be able to receive this benefit in 7 years. So, therefore, you ought to invest." I think that argument is worth very little.

Beyond that, Mr. President, this is basically a temporary measure. The amendment only goes through 1980. On

the problems that concern the Senator from Texas about the application of this, we can and will take a look at the results.

It is a useful and important opportunity to move ahead with a program which we have debated and discussed, which is sound and substantive, and which is going to provide an important benefit to new companies, to small companies, and to companies hurt by the recession.

We are not writing it in as a permanent feature, which then we will have to alter or change. We are writing it in now through 1980. We can test it during this time and find out how it is working. I believe it will have a significant impact in focusing the benefit of the investment credit on new industries, expanding industries, and those which have been treated the most harshly by the recession.

We started off with an investment credit of 7 percent. It has gone to 10 percent. Before we go to 12 percent, we ought to look back, to see who is left behind.

For all of these reasons, Mr. President, I believe this amendment can be extremely important in reaching the objectives of those who voted in the Senate for a continuation of the business incentives. If we are going to maintain these incentives in this legislation, we ought to shape it in such a way that it can help do the job of modernizing plants and promote equity and fairness. The most effective and efficient way of doing this is through the refundable investment credit. I hope the Senate will act favorably upon it.

Mr. BENTSEN. Mr. President, how much time remains?

The PRESIDING OFFICER (Mr. ZORINSKY). Twenty-six minutes remain.

Mr. BENTSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I yield myself such time as I may require for a brief statement.

Mr. President, the Senate has opened discussion of a very significant proposal, which I believe is going to be a part of our permanent tax law before this Congres is over. I personally have been advocating that we have a refundable tax credit for the investment credit for several years. I have been explaining it to my colleagues so long that they are beginning to get the idea of what this is all about.

It has always seemed to me that if we wanted to have an investment tax credit, the purpose was to persuade somebody to buy some equipment and give him a tax advantage for doing it. He would get the credit at the time he bought the equipment. But while this would be an appropriate part of the tax reform bill, and I anticipate that I shall be working with the Senator from Massachusetts to put a refundable tax credit in the Tax Reform Act when we take that measure up, it would be a mistake for us to add it to this bill at this time.

I say that for this reason: We have in this bill something that would help to stimulate jobs by encouraging businessmen to place more orders for plant and equipment. Now, admittedly, that proposal does not reach those who are not showing a profit at this time. But it will cause a lot of companies to place additional orders or to move forward their plans for placing orders if they know that this is a 2-percent temporary investment tax credit and that it is going to expire in 4 years. Some of this equipment takes a while to build. The business people tell us that if they have this incentive, they are going to step up their activity and that that is going to mean more jobs.

The Senate is not very excited about that proposal, and I can understand why. But the President was much impressed by it, because the President recommended it. The only reason the President is not recommending it to us at this moment is that he thought if we were not going to have the $50 tax cut, it might be poorly received to have something for business in here if we did not have as much for rank and file taxpayers as he would like to see us have.

But, Mr. President, in my judgment, we still have a chance to persuade the President to go along on the investment tax credit which is in the bill which he recommended.

I am personally persuaded, beyond any peradventure of doubt, and I say that having talked to the Secretary of the Treasury no less than 20 minutes ago, that the Treasury will recommend voting against this investment tax credit at this time. I think they may go along with us when the tax reform bill comes along.

But we have something in the bill that would create jobs and would stimulate more employment and that has a chance to pass. It has a chance to become law. It has a chance to merit the President's signature. It will do some good if we do this.

But if we vote this relatively new and rather revolutionary proposal from the point of view of many people who do not understand it at this time, all we are really doing is seeing to it that nobody gets any additional investment tax credit, because the Treasury feels that this will cost a great deal of money if fully implemented, and it would if it were made to apply to all investments.

They feel at this time they simply cannot commit the Treasury to something that is going to lose that amount of money.

So I urge the Senate not to agree to the amendment at this time. I understand the Senator is committed to it. But if that were not the case, I would be urging him not to insist on it, although he is advocating something I would like to do, and something some others would like to do. But, we really ought to try to consider doing it right, and that would be to provide a fully refundable investment tax credit.

What the Senator is proposing here is only about one-third of the investment tax credit. He is doing that, of course, to try to keep the cost about the same as the additional 2-percent investment tax credit.

It would seem to me, Mr. President, we would be better off to wait until a time when we can approach this concept of a refundable tax credit, that is, a tax credit to a company that has not paid any taxes at all because it is a new company, or because it has not made a profit, when we are on a bill of sufficient dimensions that the Treasury could stand a loss because of the overall planning. This proposal would be better either on a bill which has something else that would raise more money in it or it would be better to adopt it when we have income that would make it possible for us to stand the revenue loss.

Therefore, Mr. President, I hope the Senate will not agree to this suggestion which I believe is rushing the season and is premature at this time. I assure Senators that when we have the tax reform bill before us, which, hopefully, will be here this fall, that I will undertake to see that we do consider making this investment tax credit a refundable tax credit.

So I hope it will not be agreed to at this time, Mr. President.

How much time does the Senator desire?

Mr. CURTIS. Five minutes.

Mr. LONG. Mr. President, I yield the Senator 5 minutes.

Mr. CURTIS. Mr. President, there may be some situations where we ought to make the investment tax credit refundable. There are companies that desperately need new equipment. Maybe they have no profit, none in sight for awhile.

But I am not too sure that there is a need to be met by making all investment credit refundable.

Probably, also, the investment credit is to be refundable to meet a specific need of an industry or a class of industries, maybe it ought to be fully refundable and not just a third.

Here is what we have done to alleviate it. If someone buys some equipment, sometimes it is very expensive equipment, perhaps a local weekly newspaper needs a new printing press—I do not know how much they cost, I do know it is a good many thousands of dollars—and it turns out that year they have no profit. Under existing law, it does not mean that they

lose their investment tax credit. They can go back for 3 years, and if they had a profit they can file an amended tax return and ask for that credit against profits they made 3 years before then.

Also, prudent businessmen buy equipment expecting that by use of that equipment they will make a profit. If they cannot have a carryback for 3 years, that would recoup their investment credit, they can carry the investment credit forward for 7 years.

In other words, they are not denied the investment credit. If they buy equipment and it happens in that particular year that they are unable to cash in on the credit, they do not lose it. It is there. It is a prepayment of their earlier tax.

So what a refundable credit really amounts to is an advance on the part of the Government. It is true they earned something, but they were not able to avail themselves of it and they have to wait.

I said a moment ago I thought perhaps refundability was justified in certain situations. The transportation industry comes to mind. Our railroads need rejuvenation. They have not been in a profitable position. It may take a long time for them to pull out. The cost of equipment to the airlines is terrific. Our airlines must compete with foreign airlines that are highly subsidized and practically all government-owned. The other airlines that carry the people around the world are government-owned, if they need the latest jet, they can get it.

Our transportation system is privately managed, but it must compete with all the subsidies that go with ownership.

I have figures showing special arrangements for the transportation industry, because of their unique situation. But in most instances there is going to be a profit or they will not buy the new equipment, and the opportunity to carry it back means they can get it right away. The opportunity to carry it forward, they have a prepayment on their next year's taxes and that has quite an appeal.

If we have ever had a sizable tax credit coming and work the next year with that joy, knowing they are not going to get much out of us, it is quite a thing. That is far better than a refund of only a third of it.

Mr. LONG. Mr. President, will the Senator yield for a question at that point?

Mr. CURTIS. I yield.

Mr. LONG. Is it not true that we are deciding between two groups, and we must decide which group we would like to help? If this amendment is adopted, it would benefit Pan American Airways and a certain number of other airlines that, at this moment, are not showing a profit and have not been showing a profit for the last few years. It would benefit certain railroads and certain utilities that either have offset all their taxable income with tax credits or, for the time being, are not making a profit. Those would be the big beneficiaries. Of course, there would also be some small companies.

Is it not true that, knowing what the problems of these industries have been, the Finance Committee has recommended, and the Senate has agreed, to extend the date of these credits forward? Is it not true that the Tax Reform Act of 1976 gave them what we call a first-in, first-out arrangement for using their investment credits? So we have put as much life as we can in their tax credits and keep those credits alive for a long period of time to the day when the companies will be able to use their carryover of credits or to the day when we find that we can afford the cost of making them refundable.

Mr. CURTIS. Yes; in other words, in carrying their credit forward and in a given year down the line if they have some income, they can take the credit, the 7 years of which are about to expire, and apply that one first and keep the others alive.

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired. The Senator from Massachusetts has 9 minutes remaining.

Mr. CURTIS. Mr. President, will the Senator yield 1 minute?

Mr. KENNEDY. I yield.

Mr. CURTIS. This proposal is of doubtful value, but it has a price tag. The price tag is to throw out the extra 2 percent that goes to everybody. It is sugar coated.

Mr. KENNEDY. Mr. President, I should like to cover a couple of points. One is as to the procedure.

A question has been raised about the procedure, as to whether the Treasury would be able to implement this particular program. The fact remains that the Treasury proposed a program similar to this in 1974. They have worked out the procedures. They have worked out the means by which this should be done. There should not be any misunderstanding that it can be done and done efficiently and effectively.

Second, that argument of the opponents is rather surprising, coming as it does from those who are imposing the extremely complex and burdensome jobs credit on the Treasury. That is straining at a gnat while swallowing a camel. If the Treasury can implement the jobs credit, they implement the refundable investment credit without even exerting themselves at all.

Third, Mr. President, it is interesting to hear the members of the Committee on Finance talk about this proposal as a new and radical proposal. The 1976 Tax Reform Act, as reported by the committee, provided, under section 802, refundability for all industries after the 7-year carry forward period. So they already understood the concept of refundability. But it made no sense to admit it at the end of the 7-year carry forward period. The stimulus is needed now. If it makes sense 7 years from now, as the committee said in 1976, it makes even more sense now.

The Treasury has worked this out. The Finance Committee, its members and staff, have reviewed this matter in considerable detail.

The record should also indicate that the amendment does not apply to charitable organizations. That is a separate issue. I believe it should, but that issue will have to wait for another day.

The final point is that we should call this investment credit for what it is. Basically, it is a Federal subsidy for investment. This is what the investment credit is. It is a Government subsidy for investment. We have made the judgment that such a subsidy is needed. We believe it is wise, in order to encourage investment. A case can be made in some areas as to why that is so. If so, how do we justify the fact that many firms do not receive the investment credit, simply because of their tax situation or because of their profit situation?

Why, in effect, should Pan Am pay more? If they wish to modernize their equipment, if we say that the Federal Government is subsidizing investment in order to modernize, why discriminate on the basis of the tax status of a particular company or corporation? Why should Pan Am pay 100 cents on the dollar for new planes, while other more profitable airlines pay only 90 cents?

Senator LONG, as one of the principal proponents of refundable credits in this body, has sponsored legislation to achieve it. He knows the problems of the airlines and railroads.

There are many others who will benefit—newer firms, younger companies and corporations, firms that are involved in rapid expansion, firms in older parts of the country, firms hurt by the recession and smaller businesses.

I hope that the Members, as they enter the Chamber, can review the figures on their desks, which indicates clearly who the real beneficiaries will be. Under the amendment, 78 percent of the corporations which have less than $50,000 of taxable income will receive 36 percent of the refundable credit. It seems to me to be the most effective and efficient way to help newer, younger, and smaller businesses, and to equalize competition among many firms.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. CURTIS. It does not matter.

Mr. BENTSEN. Mr. President, how much time does the manager of the bill have?

The PRESIDING OFFICER. The manager has no time.

Mr. KENNEDY. Has not the hour expired, Mr. President?

The PRESIDING OFFICER. Two minutes remain.

Mr. BENTSEN. The opposition to the amendment has no time?

The PRESIDING OFFICER. That is correct.

Mr. KENNEDY. Mr. President, I would be glad to yield my time for the purpose of a quorum call, for 2 minutes.

Mr. BENTSEN. I think the time virtually has expired.

The PRESIDING OFFICER. Under the precedents, that is not enough time for a quorum call. A Senator may yield back his time and then suggest the absence of a quorum.

Mr. KENNEDY. I yield back the re-

mainder of my time, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. CLARK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Massachusetts. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

(Mr. HARRY F. BYRD, JR., assumed the chair at this point.)

Mr. CRANSTON. I announce that the Senator from Idaho (Mr. CHURCH), the Senator from Michigan (Mr. RIEGLE), the Senator from South Dakota (Mr. ABOUREZK), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Alabama (Mr. SPARKMAN), and the Senator from New Hampshire (Mr. MCINTYRE) are necessarily absent.

I also announce that the Senator from Illinois (Mr. STEVENSON) is absent because of illness.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "nay."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Massachusetts (Mr. BROOKE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Connecticut (Mr. WEICKER) and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I further announce that the Senator from Oklahoma (Mr. BARTLETT) is absent due to illness.

The result was announced—yeas 31, nays 56, as follows:

[Rollcall Vote No. 110 Leg.]

YEAS—31

Allen	Durkin	Metcalf
Anderson	Eagleton	Metzenbaum
Bayh	Ford	Muskie
Bumpers	Hart	Pell
Burdick	Haskell	Percy
Byrd, Robert C.	Hathaway	Ribicoff
Case	Heinz	Sarbanes
Chiles	Humphrey	Sasser
Clark	Kennedy	Williams
Culver	Leahy	
DeConcini	Mathias	

NAYS—56

Bellmon	Hatfield	Nelson
Bentsen	Hayakawa	Nunn
Biden	Helms	Packwood
Byrd, Harry F., Jr.	Hollings	Pearson
	Huddleston	Pro^mire
Cannon	Inouye	Randolph
Chafee	Jackson	Roth
Cranston	Javits	Schmitt
Curtis	Johnston	Schweiker
Danforth	Laxalt	Scott
Dole	Long	Stafford
Domenici	Lugar	Stennis
Eastland	Magnuson	Stevens
Garn	Matsunaga	Stone
Glenn	McClellan	Talmadge
Goldwater	McClure	Thurmond
Gravel	Melcher	Tower
Hansen	Morgan	Wallop
Hatch	Moynihan	Zorinsky

NOT VOTING—13

Abourezk	Griffin	Stevenson
Baker	McGovern	Weicker
Bartlett	McIntyre	Young
Brooke	Riegle	
Church	Sparkman	

So Mr. KENNEDY's amendment was rejected.

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. HARRY F. BYRD, JR.). The amendment will be stated.

Mr. CURTIS. Mr. President, will the Senator yield for 1 minute for an inquiry of the leader?

Mr. KENNEDY. I yield without losing my right to the floor.

Mr. CURTIS. Mr. President, may I inquire of the majority leader what the plans are for the remainder of the evening?

The PRESIDING OFFICER. Before the majority leader replies, may we have order in the Senate? Will Senators take their seats?

Mr. ROBERT C. BYRD. Mr. President, I stated earlier today, and perhaps the distinguished Senator was not in the Chamber at that moment, that the Senate would be in late today; we would come in early tomorrow, be in late tomorrow, come in early Friday, be in late Friday, if necessary, to complete action on this bill.

The bill has been ready for action in the Senate now for about 3 weeks. We started on the 18th of April, the day following the close of the legislative holiday period. It has been before the Senate now for 8 days, and I express the hope that the Senate could work its will on the measure and if Senators call up amendments we could have votes thereon, which we have been doing, and we could hopefully conclude action on the measure Friday if not before. There are other Senators who I think are prepared now to call up amendments yet this evening. Senator KENNEDY has called up an amendment. There will be a vote on that amendment. Hopefully there will be votes on other amendments. Senators have been told that we are likely to be in until about 9 p.m. tonight if we can get amendments called up and votes thereon.

Mr. CURTIS. I thank the Senator.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

UP AMENDMENT NO. 163

Mr. KENNEDY. Mr. President, we have no time agreement. I would like the attention of the leader. I am prepared to get into a time agreement, hopefully a shorter one, so we can keep the membership here. I just have two amendments with which the chairman of the Finance Committee is familiar.

The PRESIDING OFFICER. Will the Senator from Massachusetts permit the amendment to be stated?

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes unprinted amendment numbered 163.

Beginning on page 103 line 3, strike all through line 22 on page 104.

Mr. LONG. Mr. President, if the Senator is so disposed, since we discussed this, I will ask unanimous consent that debate on this amendment be limited to 20 minutes, equally divided between the Senator from Massachusetts and the Senator from Louisiana.

The PRESIDING OFFICER. Is there objection?

The Chair hears none. Without objection, it is so ordered.

Mr. LONG. Does the Senator wish to have the yeas and nays?

Mr. KENNEDY. Yes.

Mr. LONG. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, if I may have the attention of the membership, the amendment which I offer would strike the 2 percent investment credit provisions of the bill which is before us. It would leave the jobs credit intact.

Similar action was taken by the House of Representatives. They voted 341 to 74 to strike the investment credit, and to substitute a jobs credit. I am hopeful that we can do likewise here in the Senate this evening.

Mr. President, after this last vote, if we are not going to make the investment credit readily available to newer firms, expanding firms, and smaller industries in this country, and recognize that they are also entitled to incentives for modernization and development, we ought not to expand the credit to 12 percent for the wealthy firms.

I think all of us understand the issue very well. In looking at the beneficiaries of this credit, we see that the top two-tenths of 1 percent of the corporations will receive 73 percent of the benefit of the credit in the committee bill—the add-on from 10 to 12 percent for the investment credit.

I believe those companies and corporations are already involved in the expansion activity that they would be undertaking anyway. The increase to 12 percent is a windfall, not an incentive for more expansion.

The investment credit has gone from 7 to 10 percent and now to 12 percent over recent years. I think it is important that we ask ourselves, of this $1.4 billion, where are the benefits going? If we pass this additional 2 percent, we will expand the inequities which exist at the present time, and which discriminate against many companies and corporations.

So, Mr. President, I would hope that the Senate would follow the action of the House of Representatives.

This amendment does not touch the job credit provisions; it leaves them intact. If there is a benefit from those provisions in terms of employment and expanding job opportunities, it will not be affected. But with regard to the additional increment of 2 percent on the investment credit, it is not justified either from an economic point of view or an equity point of view. I do not think the case can be made in terms of the economic benefit or the equity, and I feel that the Senate should take the action proposed in this amendment.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. BENTSEN. Mr. President, will the manager of the bill yield me 5 minutes?

Mr. LONG. Yes.

Mr. BENTSEN. I thank the distinguished chairman.

Mr. President, the Finance Committee reported a balanced package with about three-quarters going to individuals and the other quarter to business. Then we balanced the business portions between the labor-intensive companies, with the jobs credit, and the investment credit for capital-intensive companies.

Since 1960 this country has fallen far behind the other industrialized nations of the world in modernizing our manufacturing capacity. Today we hear about utilizing 82 percent of our capacity. A few weeks ago it was 78 percent. But that does not tell the rest of the story, the exetent to which our plant and equipment is out of date.

We ought to be increasing the investment credit, instead of reducing it. We had a visit here the other day from Denis Healey, the Chancellor of the Exchequer. He told us of the problems they have been having in Great Britain.

This business of moaning and wringing our hands, and saying how we want increased capital investment, and then opposing the investment credit, just will not get the job done. We have a serious trade imbalance in this country. The only way we can get competitive is by modernizing our machinery.

One of the regions which has been hit hardest in this respect is one of the most industrialized areas of the Nation, New England. Certainly capital investment ought to be encouraged there, if anywhere.

Let me give some of the figures as to what has happened to investment as a percent of real national output.

We have invested 17½ percent from 1960 to 1973, the Japanese 35 percent, the West Germans 26 percent, France 24 percent, Canada 22 percent, Italy 20 percent, England 18½ percent, with us behind England at 17½ percent. Mr. President, we have to turn that situation around. Here is an opportunity to begin to do so.

Look at the bill as it came over from the House of Representatives. There was nothing in it to encourage modernization of our manufacturing capacity.

In the fall of 1973 and 1974, we saw inflation begin to run rampant. Why? Because we had bottlenecks in a few industries, in connection with a few products. That, in turn, led to price increases in those industries, and as we got those price increases, they leapfrogged across to other products being produced in this country.

The same signs are building up throughout the industrial production in this country again. As we move on to the next few decimal points in inflation, we will see a repetition of that process. We will experience in this country a repetition of 1973 and 1974, unless manufacturers and businessmen will invest their money in modernization.

The increased investment tax credit will help them do it, will help them accomplish that important goal.

Mr. BENTSEN. Mr. President, for these reasons I urge my colleagues to reject the pending amendment.

I yield back the remainder of my time.

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 3 minutes.

Mr. KENNEDY. I yield myself 3 minutes.

Mr. President, in fact, in England they have more tax advantages than we are talking about here. They have 100 percent depreciation in the first year, not a 10- or 12-percent credit, but 100 percent depreciation. The countries are too different. These incentives do not represent the difference between the economic viability of the United States and that of Great Britain. They have very little to do with it.

What we ought to do is look at who is benefiting from this proposal. In 1975, four firms received almost 20 percent of the total investment credit: A.T. & T., $750 million; General Motors, $95 million; Exxon, $59 million; and United States Steel, $51 million. Two-tenths of the top 1 percent of the corporations are receiving 73 percent of the investment credit. That is the issue which is before the Senate this evening. The credit is often not available to small businesses, or rapidly growing firms, or firms hurt by the recession.

That is the reason, Mr. President, why in the House of Representatives they voted 341 to 74 to strike the 12-percent credit. No one is suggesting we eliminate the 10-percent credit. We are leaving the 10-percent credit intact. What we are reaching is the 2 percent additional credit, which is unjustified.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. LONG. Mr. President, I yield the Senator from Nebraska 2 minutes.

Mr. CURTIS. Mr. President, I commend the distinguished Senator from Texas for pointing out the connection between productivity and new plant and equipment. That, of course, is what is involved in this investment credit.

Here is another point: Increased productivity leads to increased hourly wages. Japan has increased its productivity by 8.6 percent. This has resulted in an hourly pay increase of 17.6 percent. West Germany has increased its productivity by 5.6 percent, and there followed an annual pay increase of 14.8 percent.

Here in the United States, our annual productivity has increased only by 2.5 percent, and the result is that our annual hourly pay increases have been only 5.8 percent, compared to Germany's 14 percent and Japan's 17 percent. Efficient industries can and do pay higher wages.

Industries which have the benefit of the investment credit invest in equipment and become more efficient.

This is a proposal which involves the welfare of the wage earners of the country. If this amendment prevails, it takes away some of their prospects for increased hourly wages.

Incidentally, when we can pay increased wages by reason of increased productivity, that is fine, everybody is for it and should be. It does not cause inflation. When without increased productivity we raised wages, it means adding to the cost of the product.

Mr. President, I hope this amendment will be rejected.

Mr. LONG. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Louisiana has 5 minutes and the Senator from Massachusetts has 4 minutes.

Mr. LONG. I yield myself such time as I may require.

Mr. President, the whole purpose of these provisions in the bill relating to business is to provide jobs for people. We have put a lid on the number of jobs, or the benefit that can go to any one company, under the jobs credit. That lid is about enough to cover 50 jobs. So the job credit means virtually nothing to a major corporation, even though we have provided something that costs about $1.6 billion.

If we take Fortune's 500, corporations which employ millions upon millions of workers, and look at what the jobs credit alone could do, we find that it would be meaningless to all those big companies. These companies provide the jobs the unions want, the good jobs that pay $7, $8, $10 an hour.

The whole bunch of them, all of Fortune's 500 put together, would be able to hire only about 25,000 people.

Of all the jobs we are trying to create, look what a pitiful number the 500 largest corporations could employ.

If they have an additional 2-percent investment tax credit, these companies are going to place orders for equipment, they are going to put people to work filling orders. When we talk about putting people to work, keep in mind this would be an unbalanced bill if we provided something for the small businesses in America, something very meaningful, which means a great deal to a filling station or a grocery store, and then proceeded to say that, as far as the big corporations of America are concerned, they are not expected to participate in any way in providing the kind of jobs which, from the labor point of view, are the most desirable of them all, because they have the best conditions and the best wages. What kind of imbalance would we want in a bill? Would we want to say that we will provide the little $5,000 a year jobs but are not interested in providing the $10,000 jobs, the $15,000 jobs, the $20,000 jobs? That does not make any sense.

When we talk about helping the corporations, Mr. President, keep in mind that corporations are owned by people. Corporations represent people.

The Senator said that A.T. & T. gets a $750 million benefit from the investment credit. Why do they have that? Because they order about $7.5 billion in equipment. All that creates jobs. But the Senator overlooks the fact that A.T. & T. has millions of shareholders. I want those shareholders to be treated fairly. Those are good people who invest in A.T. & T.; a lot are small, little people, who regard this as a good investment. It is the kind of investment in which lawyers advise widows to invest their money.

Do not condemn A.T. & T. In the last analysis, a company is its shareholders. They own it. A.T. & T. or General Motors? What is wrong with them? I wish they had more plants in Louisiana. They have one, I wish they had five.

The same is true of the other firms the Senator mentioned.

What is the matter with Fourtune's 500? They provide good jobs, good working conditions, and make possible the highest standard of living anyplace on earth. We want those people to participate with everybody else in a recovery effort. We do not want to limit ourselves to providing the delivery boy job or the curb service job or the job at the corner grocery store, but also to provide the jobs that provide the $10,000, the $15,000, the $20,000 salaries, the so-called good jobs that labor is telling us about all the time.

Why not provide both jobs, the marginal jobs for the people who have no skills and the good jobs for the people sitting on the bench waiting for a call, hopefully to go back to work?

The PRESIDING OFFICER. The time of the Senator has expired.

The Senator from Masachusetts has 4 minutes remaining.

Mr. KENNEDY. Mr. President, on the relationship between the jobs credit program and the creation of jobs, at least there is a tenuous relationship which can be seen. But it is not as clear with the investment credit that we are necessarily going to create jobs, I believe that is a serious question.

Hopefully, we will increase productivity and modernization. But it does not necessarily mean we will create more jobs. We should understand that distinction. That is part of the reason we have adopted the jobs credit program. The investment credit may have a different impact. A firm may buy equipment to replace workers. That has been the case in industry after industry. At best, the jobs creation argument for the investment credit relies on the trickle down economies theory—what is good for business is good for workers.

Beyond that, Mr. President, why, when we were considering the $50 rebate, did we put a ceiling on the rebate, so that those with the highest incomes would not be able to receive it? We did that out of a sense of equity and we did it out of a sense of fairness. We said, "All right, a $50 rebate will be given, but it will be phased out completely for those with incomes over $30,000 a year."

There is no such cap here. The major companies and corporations which are going to receive the 12 percent credit will be A.T. & T. and GM. We see crocodile tears on the Senate floor about feeling sorry for those stockholders if the company loses the 12 percent credit. The fact of the matter is that those stockholders represent the top income groups of the American people.

If we are going to give them a Federal subsidy, let us call it for what it really is, Mr. President.

Finally, let us take one industry, such as autos. General Motors gets over $50 million already from the investment credit. If we add on another 2 percent, which is an increase of 17 percent, they will get about $60 million. But what about American Motors and Chrysler, which also need the subsidy and are attempting to make a go of it? They receive nothing from the investment credit. We are producing serious disparities within industries with this program. We should treat all firms fairly and equitably. We should have made the credit available across the board to all firms. We should not increase the present discrimination by lifting the present unfair credit to 12 percent.

The House of Representatives understood that overwhelmingly and I am hopeful the Senate will understand this tonight as well.

How much time have I remaining, Mr. President?

The PRESIDING OFFICER. The Senator has 1 minute remaining.

Mr. KENNEDY. I yield back the 1 minute.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from Massachusetts. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Idaho (Mr. CHURCH), the Senator from Washington (Mr. MAGNUSON), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Ohio (Mr. METZENBAUM), the Senator from Michigan (Mr. RIEGLE), and the Senator from Alabama (Mr. SPARKMAN) are necessarily absent.

I also announce that the Senator from Illinois (Mr. STEVENSON) is absent because of illness.

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON) and the Senator from Michigan (Mr. RIEGLE) would vote "nay."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Massachusetts (Mr. BROOKE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Maryland (Mr. MATHIAS), the Senator from Oregon (Mr. PACKWOOD), the Senator from Connecticut (Mr. WEICKER), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I further announce that the Senator from Oklahoma (Mr. BARTLETT) is absent due to illness.

The result was announced—yeas 16, nays 66, as follows:

[Rollcall Vote No. 111 Leg.]

YEAS—16

So Mr. KENNEDY's amendment was rejected.

AMENDMENT NO. 188

Mr. DOMENICI. Mr. President, I call up my amendment No. 188 and ask that it be stated.

The PRESIDING OFFICER (Mr. BUMPERS). The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes an amendment numbered 188.

Mr. DOMENICI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

SEC. . TAX INCENTIVES FOR PROVIDING HOME FOR AGED DEPENDENT.

(a) ALLOWANCE OF CREDIT.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowed) is amended by inserting immediately before section 45 the following new section:

"SEC. 44C. ELDERLY DEPENDENTS.

"(a) GENERAL RULE.—In the case of an individual who maintains a household which includes as a member a dependent (as defined in section 152(a)) who is 65 years of age or older, there shall be allowed against the tax imposed by this chapter for the taxable year a credit of $250.

"(b) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the amount of the tax imposed by this chapter for the taxable year reduced by the sum of the credits allowable under—

"(1) section 33 (relating to foreign tax credit),

"(2) section 37 (relating to credit for the elderly),

"(3) section 38 (relating to investment and certain depreciable property),

"(4) section 40 (relating to expenses of work incentive programs),

"(5) section 41 (relating to contributions to candidates for public office),

"(6) section 42 (relating to general tax credit),

"(7) section 44 (relating to purchase of new principal residence), and

"(8) section 44A (relating to expenses for household and dependent care services necessary for gainful employment).

"(c) SPECIAL RULES.—The rules set forth in section 44A(f) apply to this section. For

the purpose of applying those rules to this section, the term 'qualifying individual' shall be considered to refer to a dependent of the taxpayer aged 65 or older.".

(b) ALLOWANCE OF DEDUCTION.—Part VII of subchapter B of chapter 1 (relating to additional itemized deductions for individuals) is amended by redesignating section 221 as 222 and by inserting after section 220 the following new section:

"SEC. 221. ELDERLY DEPENDENTS.

"(a) ALLOWANCE OF DEDUCTION.—In the case of an individual who maintains a household which includes as a member a dependent (as defined in section 152(a)), there shall be allowed a deduction of $1,000.

"(b) RULES.—The rules set forth in section 44A(f) apply to this section. For the purpose of applying those rules to this section, the term 'deduction' shall be substituted for the term 'credit' each place it appears, and the term 'qualifying individual' shall be considered to refer to a dependent of the taxpayer aged 65 or older.

"(c) ELECTION TO TAKE CREDIT IN LIEU OF DEDUCTION.—This section shall not apply in the case of any taxpayer who, for the taxable year, elects to take the credit against tax provided by section 44C (relating to elderly dependents). The election shall be made in such manner and at such time as the Secretary shall prescribe.".

(c) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Section 6096(b) of such Code (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44A" and inserting in lieu thereof "44A, and 44B".

(2) The table of sections for such subpart A is amended by inserting immediately before the item relating to section 45 the following new item:

"Sec. 44C. Elderly dependents.".

(3) The table of sections for such part VII is amended by striking out the last item and inserting in lieu thereof the following new items:

"Sec. 221. Elderly dependents.

"Sec. 222. Cross references.".

(d) EFFECTIVE DATE.—The amendments made by this section apply with respect to taxable years beginning after December 31, 1976.

Mr. DOMENICI. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI. Mr. President, I ask unanimous consent that I be granted permission to modify the amendment and I send the modified amendment to the desk.

The PRESIDING OFFICER. Is there objection?

Mr. LONG. Mr. President, reserving the right to object, will the Senator first explain what he is seeking to do because I am not familiar with it.

Mr. DOMENICI. Indeed.

My modified amendment would merely provide for the $250 tax credit to individuals who maintain in their homes a dependent aged 65 or over.

In the amendment which I submitted which was printed, we had an option of the $250 tax credit or $1,000. In consultation, we felt it was better to simplify it, delete the $1,000 deduction, which is very cumbersome, and provide only one way to get this help to our elderly, and that is a $250 tax credit.

Was there objection to my modification?

The PRESIDING OFFICER. Is there objection to the modification?

If not, so ordered.

The amendment, as modified, is as follows:

SEC. . TAX INCENTIVES FOR PROVIDING HOME FOR AGED DEPENDENT.

(a) ALLOWANCE OF CREDIT.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowed) is amended by inserting immediately before section 45 the following new section:

"SEC. 44C. ELDERLY DEPENDENTS.

"(a) GENERAL RULE.—In the case of an individual who maintains a household which includes as a member a dependent (as defined in section 152(a)) who is 65 years of age or older, there shall be allowed against the tax imposed by this chapter for the taxable year a credit of $250.

"(b) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the amount of the tax imposed by this chapter for the taxable year reduced by the sum of the credits allowable under—

"(1) section 33 (relating to foreign tax credit),

"(2) section 37 (relating to credit for the elderly),

"(3) section 38 (relating to investment and certain depreciable property),

"(4) section 40 (relating to expenses of work incentive programs),

"(5) section 41 (relating to contributions to candidates for public office),

"(6) section 42 (relating to general tax credit),

"(7) section 44 (relating to purchase of new principal residence), and

"(8) section 44A (relating to expenses for household and dependent care services necessary for gainful employment).

"(c) SPECIAL RULES.—The rules set forth in section 44A(f) apply to this section. For the purpose of applying those rules to this section, the term 'qualifying individual' shall be considered to refer to a dependent of the taxpayer aged 65 or older.".

(b) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Section 6096(b) of such Code (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44A" and inserting in lieu thereof "44A, and 44B".

(2) The table of sections for such subpart A is amended by inserting immediately before the item relating to section 45 the following new item:

"Sec. 44C. Elderly dependents.".

(c) EFFECTIVE DATE.—The amendments made by this section apply with respect to taxable years beginning after December 31, 1976.

Mr. DOMENICI. Mr. President, for the benefit of Senators, I do not believe I will take over 15 minutes. I am reluctant to agree to that because the distinguished junior Senator from Ohio indicated he would like to speak to the amendment and, if he does come, I would like to let him have some time.

Mr. LONG. If the Senator will yield, how much time does the Senator want, 30 minutes?

Mr. DOMENICI. Let us say 30 minutes and that will allow him some time, if he arrives.

Mr. LONG. One hour equally divided. I do not expect to use more than 15 minutes on this side, but the Senator may need it.

The PRESIDING OFFICER. Does the Chair understand the request, that there be an hour on the amendment, 30 minutes on either side?

Mr. LONG. That is right.

The PRESIDING OFFICER. Is there objection? If not, it is so ordered.

Mr. DOMENICI. Mr. President, may we have order, pleace?

The PRESIDING OFFICER. The Senator's request is well taken. Senators will please retire to the cloakroom or take their seats. The Senator is entitled to be heard.

Mr. DOMENICI. Mr. President, this is a rather simple amendment. I think its goals and objectives will very easily be understood.

Since the United States, as a government, has been interested in trying to help our older people in this country, I believe it is fair to say that we have principally moved in institutional ways. So that if we are willing to help care for them, we have moved in the direction of nursing homes if they are sick, we have moved in the direction of medicare and medicaid and will pay for them to be in hospitals.

As a general proposition, the entire American policy as far as helping senior citizens has been one of institutionalization or, on the other side, there has been little effort to deinstitutionalize our aid.

There has been a great history in the United States of families trying to take care of their older people. In fact, most families that came to America and most people that live here today come from ancestors and cultures where it was common and ordinary that someone in the family helped out when mother and dad, or granddad or grandmother, became ill.

What we have done over the last 20 years is move that natural tendency—the tendency which I think is a good one—away from that which was customary, by providing maximum assistance if you will rid yourself of the burdens. We have provided tax incentives, we have provided medicare and medicaid, and we have provided nursing homes and the like, to assume that responsibility for us.

Mr. President, I have no illusions: There will have to be a major change in American policy for us to get back to a better balance between institutionalization of our elderly and programs that tend to do that—and some change that will move us in the other direction, of providing the economic justification to those who have the natural tendency to want to help the members of their family who are old and need care or attention.

I cannot tell the Senate how much this provision will save; but I am convinced that if it is in effect, we will find that it will lessen the number of elderly people who now cost us money because we provide either medicare, medicaid, or nursing homes, which now cost us about $5.6 billion. Substantially more than half of that comes from the Federal Government. It will also result in a lesser number of people who might begin to need that kind of program.

So I do not think it is fair to say just how much this amendment will cost. We should ask how much it is likely to save. Second, does it have some kind of true

moral justification? Does it prompt a tendency on the part of our people that is good? Does it move that tendency in the right direction, rather than the disincentive that has been built into most of our programs to date? I think the answer to those questions would be in the affirmative.

In summary, my amendment—which I am pleased to have cosponsored by Senator STEVENS, Senator METZENBAUM, and Senator THURMOND, and I thank them for their cosponsorship—basically would provide a $250 tax credit to individuals who maintain within their homes a dependent, as defined elsewhere in the code, age 65 or older.

This amendment, if adopted, would help us to meet the growing shortage of decent housing for all older citizens. It would expand their options of where they would live. Some of them are forced into apartments; their apartments have ever-rising rents. Others are driven from their homes because of escalating taxes. Many of those who live alone dwell in fear of crime, which all too often victimizes the defenseless elderly.

To date, there has been an unfortunate tendency to deal with these problems by segregating the elderly into separate institutions. In many cases, when an individual needs special care, these residential facilities are necessary. In this regard, the homes for the aged and the nursing homes of this country have done outstanding work; and the abuses in a few should not diminish our appreciation for the great majority of them, which have given dignity and hope to many thousands of the elderly infirm.

But only a small percentage of the elderly belong in institutional settings. All too often, however, no alternatives are available to them or to their families. Financial pressures have combined with the extraordinary mobility of contemporary society to erode our traditional sense of family responsibility.

Let us begin to redress those mistakes. The amendment I am submitting would be particularily helpful to those who want to keep their elderly relatives with them in one household.

It would provide a significant financial incentive to bring older Americans into private homes. It would encourage children to invite their parents to live with them, as was once the custom in our Nation. Specifically, I am proposing to give a taxpayer a $250 tax credit for each senior citizen, related or not, for whom the taxpayer provides housing, free of charge, in his or her own residence. This would be above and beyond any exemption presently allowed in the case of dependents. I would note, Mr. President, that such a tax benefit would be especially helpful to the family, with limited means, who really wants to keep their older relatives with them. Thus it would significantly expand the options of both the family and the older person involved.

This approach to the housing problems of the elderly offers several major advantages. It would be far less costly to the taxpayer than would the construction, with Federal funds of specialized housing projects for senior citizens. And it would provide them with a more personal, homelike, and supportive atmosphere. As we seek realistic ways to strengthen our social fabric we must see to it that older Americans are not treated as second-class citizens.

We must encourage the exercise of our individual responsibility toward the elderly. We must allow Government to assist, but never to entirely supplant, the efforts of private citizens in caring for their families. And we must begin to examine all of the present programs of the Federal Government to see that our public policies strengthen, rather than weaken, the basic family structure which is so important to the overall health of our society. The rebuilding of a true multigenerational society would help to reverse the growing trend of isolating the aged.

Mr. President, the adoption of my amendment would result in a loss of tax revenue but I believe the cost of this "tax expenditure" would be more than offset by savings in a dozen or more major Federal programs. In the process, we would be improving the quality of life for millions of older Americans, strengthening the family unit, and contributing to the vigor and vitality of our society.

I have explained the institutional approaches. I am firmly convinced that eventually our Government will have to build in an incentive away from the institutional trend which is built into both our tax code and our social programs that attempt to aid our senior citizens.

From the standpoint of my own State, I might say, on a personal note, that a substantial number of the people in New Mexico are of Spanish-American extraction. There are tremendous family ties. They would like very much to try to help their mothers and fathers and grandparents by keeping those elderly persons with them; but even if the young folks are doing well, we have given them no real incentive. To the contrary, we have almost encouraged them to rid themselves of that good, healthy tendency that is part of their culture and their religion. We have said to them: "Let them go off and be in homes. Forget about them. The Government will take care of them."

If this incentive of a $250 tax credit for them to house and take care of their elderly parents and grandparents would have some substantial effect on moving away from that tremendous tendency which is separating these families, then it would be worthwhile.

I believe that from the monetary standpoint, in the long run, an American policy prompted by this will end up costing us less in medicare, and nursing homes.

So I think that on all scores—as a matter of policy, as a matter of decency, as a matter of ultimate tax savings—this amendment deserves the attention of the Members of the Senate, and I urge its adoption.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER (Mr. SASSER). The Senator has 22 minutes.

Mr. DOMENICI. I yield to the Senator from Wyoming.

Mr. HANSEN. Mr. President, I commend the distinguished Senator from New Mexico for proposing this amendment.

There can be no doubt that one of the results of modern society in the United States these days has been to forget, to ignore and to cast aside those persons who should be honored members of our society. There can be no question that people who are thus shunted aside have nothing but a dreary existence to look forward to. Their lives can be meaningful, and the contribution they can make to society, and particularly to young people, would be difficult to exaggerate.

I believe that the amendment proposed by the distinguished Senator from New Mexico redirects the concerns of American society in a commendable fashion. There can be no doubt we would strengthen the family, which is the basic building block of government, of all responsibilty, of all law and order, by taking this action. There can be do doubt at all that in the long run, this amendment, if adopted, will save America money.

I say that because I have had a little experience, as a former Governor of Wyoming, in knowing what it costs to try to provide even minimal care for older persons. The advantages for doing the job far better, for having happier people whose lives can be meaningful, in a fashion that accords completely with all the religious convictions and the ethic we have in this country, are on the side of the Senator from New Mexico.

I hope very much that as Senators vote on this amendment, they will not be unaware of the fact that, while it may cost us $430 million on an annual basis—that money will not be a cost at all, but that the adoption of this amendment will result in a reduction of other costs we have to bear in order to do a far poorer job for older people than could be done in this way. I believe that these factors will be sufficiently persuasive to result in the adoption of this amendment.

Mr. DOMENICI. Mr. President, the Senator indicated the enormous costs to society. I am not speaking now of the spiritual costs or the moral costs, because I agree with him on those.

However, I cite for the Senate that the average cost of housing an elderly person in a nursing home, nationwide, is $9,600 per year. In New York City, that cost is $15,000 per person per year. In Washington, D.C., the average cost per patient at St. Elizabeths is $24,000 a year.

Mr. HANSEN. Is this credit a $250 annual credit?

Mr. DOMENICI. Annual credit to the taxpayer who houses an elderly person in that taxpayer's place of abode.

Mr. HANSEN. Those are indeed dramatic illustrations of the economies that are inherent in this amendment. I think there is no need at all for anyone to dwell on the great advantages that would result from its adoption.

I thank the Senator for further elucidating the amendment.

Mr. DOMENICI. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. BENTSEN. I yield myself 7 minutes.

Mr. President, I can understand the Senator's concern for the aged citizens of this country, and I share that concern.

I think too many of them are being institutionalized, being put away in homes, with the idea that they are there to die. That is one of the reasons why I have strongly supported having more medical attention provided in the home. I think that means they live longer and they live happier around the things they love, the things with which they are familiar.

However, what about children? There are 74 million children in this country under 19 years of age. How about them? What about a consideration for a tax credit there? Why should we not be just as concerned about children as we are about elderly people?

If we follow that through, follow the logic through, then let us have a tax credit. You are talking about 74 million children; and you are talking about $18.5 billion. That is how much money is involved.

There are many meritorious proposals that have been proposed here tonight and will be proposed tomorrow. We had one on the refundable investment tax credit earlier, a proposal by Senator Kennedy. But we are going to have a major tax reform proposal this fall, and that is the time, during which we will have extended hearings to really work and find out what is the practical solution to the problem the Senator has posed, and what this country should do in honoring its senior citizens and in seeing that children carry out their responsibilities to their parents, and that you help them in the process.

So again, Mr. President, as we have seen so often through the last several days there have been compassionate ideas, ideas full of concern, ideas to hold together family units that ought to be given full consideration in a tax reform bill, but not something to be decided here on the floor of the Senate with about half a dozen Members present.

This is not the time to make that kind of decision. Let us wait until we have the appropriate hearings and have some of the senior citizens testify and have some of their children before us to tell us about their burdens and their problems, and what they think we ought to be doing.

I withhold the remainder of my time.

Mr. DOMENICI. How much time do I have, Mr. President?

The PRESIDING OFFICER. The Senator has 18 minutes.

Mr. DOMENICI. Mr. President, first of all, I want to say to the distinguished Senator from Texas that while I disagree with his observations in terms of whether we should or should not do this, I greatly appreciate the fact that he sees a genuine problem in the gradual institutionalization of the care and maintenance of the elderly in the United States of America, and I am pleased that, as a distinguished member of the Committee on Finance, he understands that ultimately that issue may have to be directed to, be attended to, through the tax code, not through the Committee on Aging and not through the Committee on Human Resources.

It could very well be an economic disincentive that is causing and promoting this lack of attention which used to be such a normal thing in families for decades in the past in this country and in most of Europe.

Having said that, I yield to the ranking Republican, Senator CURTIS, 4 minutes.

Mr. CURTIS. I thank my distinguished friend.

Mr. President, many of the amendments offered today would have cost revenue. This one surely will end up in a gain for the Treasury. If an elderly person who maintains his home reaches that point where he cannot, and he goes to some special community for older people, he shares in all of the housing subsidies, the social services, all of these very expensive things and, furthermore, he has been removed from the surroundings he loves; he has been removed from the human beings he holds most dear, here all this says is if someone provides a home for such a person that they will have a very modest tax credit, $250. Why, that would not pay a fraction of the subsidies on the housing alone that go into all these homes for the elderly.

Furthermore, it would reverse a trend, a trend in this country, for isolating the aging, putting them off in colonies where they never see a youngster on a bicycle or a youngster playing marbles or baseball, where they never see a young person or a middle-aged person, but are surrounded by old people some of whom are ill. He is removed from the mainstream of America at a very costly procedure in medicaid, medicare, visiting nurses, housing subsidies, social services, and on and on.

We can afford to pay the price if it is the right answer, but it is the wrong answer.

Individuals were created to live in families after all, and not every family can do it. But if some family opens up its home and takes care of an individual no longer able to maintain a home of his own, and if it saves the taxpayers all of that expense of more or less institutionalized care, certainly we ought to be willing to grant a modest tax credit for it. It is far, far cheaper.

I want to say to the distinguished Senator from New Mexico, "Do not be fooled by any estimate of cost. When the figures are all in your amendment is a plus for the Treasury of the United States and, as I say, it will help reverse a trend and will keep people of all ages in their homes."

The question has been raised here, "Well, if you do it for the older people why not the children?" Well, thank heaven in this country the children are not taken out of their homes and put in colonies away from their families. Here and there maybe there is one who ought to be because the family is a bad influence, but it is not happening. We do not have a trend of taking the children out of their homes. But there is a trend in every village, town, and city in the country of taking the older people away from the surroundings they know and with which they are familiar and the people they love, and putting them into an institution.

The distinguished Senator from New Mexico should be congratulated for offering an amendment that will save the taxpayers money and, at the same time, reverse a trend and bring happiness to a great many elderly people.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I truly thank the distinguished Senator from Nebraska for his kind words.

Let me continue responding a bit to the good Senator from Texas.

First, the Senator knows my deep respect for him and especially in this field that we are talking about, taxation. I really have a great deal of admiration for his understanding of the complex issues. He is not ashamed to speak in favor of business when he thinks he should and he is not ashamed to speak in favor of a charitable deduction when he thinks it is good.

But I really think it is a mistake to say that we should not seriously consider this amendment because there are only five or six Senators now here in this Chamber. I say that with all genuine sincerity.

We have voted, as the good Senator knows, on major issues of far more import which were far more questionable with reference to whether we should or not and with far less understanding, because they are very complex, many times in the short 4½ years that I have been here with only two or three Senators who listened to the words of explanation of sponsors.

So I do not really think that is very relevant to this issue. What is relevant to this issue is that I try to encourage those who are interested not to get lost in the shuffle that there are other needs in this country that we should attend to; therefore, we should forget about this one for a while and we should get some testimony on it from old people and from children who are in a bind because they cannot take care of their own children let alone their elderly parents. Let me tell the Senator that is preposterous, as much respect as I have for the Senator. It is patent in the United States of America that America's policy, fostered by this Government of what we should do to help our senior citizens, is a bankrupt policy of having programs and institutions that we pay for and we say, "We are going to give you that," and then a social security program that, though it was not intended, ends up being the sole source of money for most senior citizens in this country, and every one of those programs has mammoth shortcomings.

If the Senator has not seen the problem with social security yet, wait until the energy prices continue beyond where they are now and there is going to be the most major moral responsibility on our

shoulders that we have had with reference to any Americans. There is evidence that they are paying 45 percent of their social security check now for energy if they have their own home or they are renting.

It is said let us hear from the young people. We do not need to hear from the young people. We know that young people who are disposed to help their parents are doing so today at great sacrifice if they are doing it, and if they are not most of the time they are saying, "We just cannot afford to."

All I am saying in this amendment is fill that gap a little bit, and for those who are willing give them a little more opportunity to make the right decision and say, "Let me talk it over with my wife and see if this $250 tax credit will let me raise these children that I have in my house and take care of my daddy or his daddy."

And if we can help them make the answer yes, then we have done a great service to this country.

There is no higher responsibility for a civilization that claims to be moral and Christian than that it take care of its elderly people and if there are stigmas that will judge a society—we have spoken of discrimination as being a stigma that will bring the wrath down eventually—this is of equal importance. A society that ignores its senior citizens after they brought us on to this Earth and sacrificed for us is as assuredly going to incur the wrath as any other kind of social evil that is rampant.

And this one is rampant. America's policy toward its senior citizens is no good. It takes them away from natural habitats. It takes them away from normal family life and, if this costs a few million dollars, but prompts a move in the direction of meeting this moral responsibility and encouraging the natural inclination of families to take care of their senior citizens, then I submit there is no better money we could spend, and I urge that we adopt it and ask our conferees to try to convince the House of Representatives that this is one we should do and do forthwith.

Our senior citizens are going to be confronted with more problems rather than less, and there is nothing about the future that is going to move them back into homes. It is going to move them away from homes into states of absolute nothingness where they cannot pay their bills. So let us take a little risk and give the natural tendency of human beings a little shove in the right direction to take care of their own people.

I yield back the remainder of my time.

SEVERAL SENATORS. Vote!

Mr. BENTSEN. Did the Senator from New Mexico yield back the remainder of his time?

Mr. DOMENICI. I did.

Mr. BENTSEN. We are prepared to yield back the remainder of our time.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

ORDER FOR ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in adjournment until the hour of 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER THAT NO RESOLUTIONS COME OVER UNDER THE RULE TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that no resolutions come over under the rule at the close of morning business tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR BELLMON TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders or their designees have been recognized under the standing order on tomorrow, Mr. BELLMON be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL ORDERS FOR TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at the conclusion of Mr. BELLMON's remarks there be a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m. with statements therein limited to 5 minutes each and at the conclusion of morning business the Senate resume consideration of the tax bill at which time Mr. CHAFEE be recognized to call up an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977

The Senate continued the consideration of the bill (H.R. 3477) to provide for a refund of 1976 individual income taxes, and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

Mr. ROBERT C. BYRD. Mr. President this will be the last issue to be voted on tonight. There are occasions when there are motions to reconsider if a vote is close. So I will not say it is the last vote. I will simply say it is the last issue. Once this amendment is disposed of tonight then there will be no more rollcall votes tonight.

And I thank the Senator.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Idaho (Mr. CHURCH), the Senator from Washington (Mr. MAGNUSON), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Michigan (Mr. RIEGLE), the Senator from Alabama (Mr. SPARKMAN), the Senator from Mississippi (Mr. EASTLAND), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Montana (Mr. MELCHER), the Senator from Montana (Mr. METCALF), and the Senator from Ohio (Mr. METZENBAUM) are necessarily absent.

I also announce that the Senator from Illinois (Mr. STEVENSON) is absent because of illness.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "yea."

Mr. BAKER. I announce that the Senator from Massachusetts (Mr. BROOKE), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Maryland (Mr. MATHIAS), the Senator from Oregon (Mr. PACKWOOD), the Senator from Virginia (Mr. SCOTT), the Senator from Alaska (Mr. STEVENS), the Senator from Connecticut (Mr. WEICKER), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I further announce that the Senator from Oklahoma (Mr. BARTLETT) is absent due to illness.

I further announce that, if present and voting, the Senator from Alaska (Mr. STEVENS) would vote "yea."

The result was announced—yeas 44, nays 31, as follows:

[Rollcall Vote No. 112 Leg.]

YEAS—44

Allen	Ford	McClure
Anderson	Garn	Pearson
Baker	Hansen	Percy
Biden	Hart	Roth
Bumpers	Hatch	Sarbanes
Case	Hatfield	Sasser
Chafee	Hayakawa	Schmitt
Chiles	Heinz	Schweiker
Cranston	Helms	Stennis
Curtis	Huddleston	Stone
Danforth	Inouye	Thurmond
DeConcini	Jackson	Tower
Dole	Javits	Wallop
Domenici	Lavalt	Zorinsky
Durkin	Lugar	

NAYS—31

Bayh	Glenn	Muskie
Belmon	Gravel	Nelson
Bentsen	Haskell	Nunn
Burdick	Hathaway	Pell
Byrd, Harry F., Jr.	Humphrey	Proxmire
	Johnston	Randolph
Byrd, Robert C.	Leahy	Ribicoff
Cannon	Long	Stafford
Clark	Matsunaga	Talmadge
Culver	Morgan	Williams
Eagleton	Moynihan	

NOT VOTING—25

Abourezk	Magnuson	Riegle
Bartlett	Mathias	Scott
Brooke	McClellan	Sparkman
Church	McGovern	Stevens
Eastland	McIntyre	Stevenson
Goldwater	Melcher	Weicker
Griffin	Metcalf	Young
Hollings	Metzenbaum	
Kennedy	Packwood	

So Mr. DOMENICI's amendment was agreed to.

Mr. HANSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr. President, I indicated earlier there would be no more rollcall votes this evening.

ORDER TO RECOGNIZE SENATOR KENNEDY TO OFFER AN AMENDMENT ON TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the amendment by Mr. CHAFEE is disposed of on tomorrow, Mr. KENNEDY be recognized to call up an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONSIDERATION OF CERTAIN MEASURES ON THE UNANIMOUS-CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are two measures on the unanimous-consent calendar which have been cleared.

Mr. BAKER. Mr. President, I do not show any new item on the calendar which has been cleared on this side to be placed on the unanimous-consent calendar.

Mr. ROBERT C. BYRD. Mr. President, there are two measures on the unanimous-consent calendar which have been cleared for 2 days now. I ask unanimous consent that the Senate proceed to the consideration of calendar order Nos. 80 and 81.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, before we proceed, I have inadvertently misinformed the majority leader. I am now told that General Orders Calendar No. 83 is cleared on our side.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader.

CITIZENSHIP TO JEFFERSON F. DAVIS

The joint resolution (S.J. Res. 16) to restore posthumously full rights of citizenship to Jefferson F. Davis, was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

Whereas Jefferson Davis served honorably and well as an officer in the United States Army, and earned a hero's reputation for his part in the battle of Buena Vista in the Mexican War; and

Whereas Jefferson Davis was both a United States Representative and a United States Senator from Mississippi prior to the War Between the States, and was generally recognized as one of the outstanding men in Congress; and

Whereas Jefferson Davis served as Secretary of War in the administration of President Franklin Pierce; and

Whereas after his arrest in 1865 Jefferson Davis was imprisoned in Fort Monroe, Virginia, and held there without trial for two years under the most inhumane conditions; and

Whereas despite his never being convicted of any crime or even brought to trial for any crime Jefferson Davis was denied full citizenship rights as a United States citizen after his release from prison, and was specifically excluded from the general amnesty bill of 1876: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Mr. Jefferson Davis is posthumously restored to the full rights of citizenship, effective December 5, 1868.

The PRESIDING OFFICER. The Chair would indicate that Calendar No. 80 was passed by a two-thirds vote as the Constitution requires.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-100), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the joint resolution is to restore posthumously full rights of citizenship to Jefferson Davis.

STATEMENT

In introducing Senate Joint Resolution 16, Senator Mark Hatfield, on January 25, 1977, stated on the Senate floor:

Last year, Mr. President, this body and the House of Representatives passed a bill, sponsored by the senior Senator from Virginia, to restore the citizenship rights of that most able general, Robert E. Lee. That bill had its genesis in the discovery of a loyalty pledge signed by General Lee which entitled him to an amnesty and restoration of rights long overdue. This bill is based on no such claim. Mr. Davis, believing he had committed no crime, and he was never convicted of one, never asked for pardon, and he was specifically excluded from the general amnesty bill of 1876. Rather, this legislation seeks to right a glaring injustice in the history of the United States.

It is said that history is written by the victors. In this case, it could also be said that the history of this man was written by the vanquished, for Jefferson Davis, perhaps more than Abraham Lincoln, was beset by critics in the Confederacy jealous of his position or outraged at his politics. This criticism from within and without has relegated Davis to at best the misguided champion of a losing cause, and at worst the traitorous defender of an abominable institution.

But Davis was neither of these. He was instead an honorable public servant of principle the like of which is all too rare in these days when expedience is more ardently practiced than conviction defended.

Most of us remember Jefferson Davis as the President of the Confederacy, and I suspect his stature suffers by that association. Nonetheless, his election to the office met with acclaim both in the North and the South, and he acquitted himself well in a nearly impossible job. Woodrow Wilson, in the fourth volume of his "History of the American People," speaks of "the masterful characteristics of Mr. Jefferson Davis":

He had the pride, the spirit of initiative, the capacity in business, which qualify men for leadership, and lacked nothing of the indomitable will and impervious purpose to make his leadership effective. He moved, direct, undaunted by any peril, and heartened a whole people to hold steadfast to the end.

There is more, much more, to the distinguished career of Jefferson Davis than his leadership of a benighted cause. He was a graduate of the U.S. Military Academy at West Point, which he attended with Lee and Joseph Johnston. After accepting his commission as a second lieutenant, Davis went west for a tour of duty in Illinois and Wisconsin, and saw service in the Black Hawk War. He met and married the daughter of then Col. Zachary Taylor, resigned his commission, and retired to Mississippi to lead the life of a planter in 1835.

Ten years later, in 1845, Jefferson Davis entered the House of Representatives as a Congressman from Mississippi. The New York World declared that he was "the best-equipped man intellectually, perhaps, of his age, in the country." Before the force of that intellect could make its mark on the House, however, the United States was at war with Mexico, and Davis resigned his seat to accept a colonel's commission and lead a unit from Mississippi. He fought under Zachary Taylor, by then a general, and alongside a lieutenant named Ulysses S. Grant. He became known as the hero of Buena Vista for his actions in that battle, in which Taylor defeated Santa Anna despite being outnumbered 4 to 1.

In 1847, still suffering from a wound inflicted at Buena Vista, Davis returned to Washington, this time to take a seat in the Senate. Because of his demonstrated intellect and varied interests, he was made a regent of the Smithsonian and appointed to the Library committee. More important, he was made chairman of the Senate Military Affairs Committee, a singular honor for a freshman Senator.

Davis resigned his seat in 1851 to return to Mississippi and attend to local political matters as well as his plantation, Brierfield. In 1853, however, he was again called to serve, this time as Secretary of War in the administration of President Franklin Pierce. It is one of the many ironies in his life that as Secretary he helped build the arsenal that was later turned against the South, and pressed for the expansion of the railroads. In any event, he was in his element and did an outstanding job. When Buchanan took office in 1857, Mississippi was quick to return Davis to the Senate.

Again he achieved preeminence in a chamber where the presence of Calhoun, Clay, and Webster loomed large. Horace Greeley, the abolitionist editor of the New York Tribune, wrote:

"Mr. Davis is unquestionably the foremost man of the South today. Every Northern Senator will admit that from the Southern side of the floor the most formidable to meet in debate is the thin, polished, intellectual-looking Mississippian with the unimpassioned demeanour, the habitual courtesy and the occasional unintentional arrogance which reveals his consciousness of the great commanding power. He belongs to a higher grade of public men in whom formerly the slaveholding democracy was prolific."

Unfortunately, however, Davis' time in the Senate was cut short by events. Mississippi seceded shortly after South Carolina did, and in January of 1861 Davis bid farewell to the Senate and returned to his plantation, where on February 10 he was informed he had been declared President of the Confederacy by a convention of the seceding states.

All of this history is available to anyone willing to take the time to study it. It alone should rescue Davis from obscurity. But the purpose of this joint resolution I offer today is to correct a grave injustice inflicted upon Davis by a vindictive conqueror.

After Petersburg fell and Richmond was evacuated, Davis and his government fled

west. Upon learning of Lee's surrender at Appomattox, he turned south, and was eventually captured by Union forces in Georgia. Under military guard, he was taken to Fort Monroe at the mouth of the James River in Virginia. Even those grown accustomed to the modern-day horrors of political imprisonment and torture would be appalled at Davis' treatment there.

As he well knew from his tenure as Secretary of War, Fort Monroe was perhaps the most redoubtable fortress of the U.S. Army, with walls up to 5 feet thick, and surrounded by a moat of equally great proportions. Davis could not have escaped from such a prison. Nevertheless, his captors were not satisfied with merely keeping him within the fort, and instead locked him into an inner cell with only one stoutly barred window, with a lamp ordered to be kept burning day and night at his head, and with a guard detail of 70 soldiers, 2 of whom paced incessantly in the cell itself. He could receive or send no mail, and had only his Bible to read. And for the final insult, Secretary of War Stanton had Davis placed in irons. As the New York Herald put it, Davis had been—

"* * * committed to that living tomb prepared within the impregnable walls of Fortress Monroe. He is buried alive."

Though the conditions of his imprisonment gradually improved, thanks to the protests of military doctors who believed he would die unless given some relief, Davis was held in close custody in Fort Monroe for 2 years. An indictment was brought against him, but he was never tried, for the prosecutors never settled on the charges. As Chief Justice Salmon Chase said—

"If you bring these leaders to trial, it will condemn the North, for by the Constitution secession is not rebellion. . . . We cannot convict him of treason. Secession is settled. Let it stay settled."

Finally, Davis was released from Fort Monroe in May 1867. A bond of $100,000 pending trial was posted, with Horace Greeley and Cornelius Vanderbilt among those contributing.

Jefferson Davis had 22 years of life remaining. In 1868 the indictment against him was quashed, and through a general amnesty declared by President Johnson on Christmas Day, 1868, he was no longer a prisoner on bail. But he was still without his rights as a citizen, and they were never restored. He was specifically excepted from the general amnesty of 1876 by the demagoguery of James G. Blaine, who falsely alleged that Davis was "the author, knowingly, deliberately, guiltily, and willfully, of the gigantic murders and crimes at Andersonville.

Mr. President, Jefferson Davis died in 1889, much mourned in the North as well as the South, and still without the rights of a citizen in the Nation he had served so well.

In his memoirs, Davis declared it his purpose to "keep the memory of our heroes green. Yet they belong not to us alone; they belong to the whole country; they belong to America." So it is with Jefferson Davis, and with this joint resolution I seek to keep his memory green, and restore to him the rights due an outstanding American.

The Committee received numerous letters of support for passage of Senate Joint Resolution 16, an example of which is the following letter of Byrle A. Kynerd, former Director of the Mississippi State Historical Museum:

BRIARWOOD PRESBYTERIAN CHURCH,
Birmingham, Ala., April 6, 1977.

Senator JAMES O. EASTLAND,
U.S. Senate,
Washington, D.C.

DEAR SENATOR EASTLAND: I trust that you would consider my letter of support for S.J. Res. 16 appropriate. As a historian, citizen, and former director of the Mississippi State Historical Museum I am confident I can express an accurate assessment of the life and career of Jefferson Davis, a distinguished American patriot.

Every serious historical analysis of either the private life or public career of Jefferson Davis must conclude that he was distinguished by his purity, manliness, courage, and devotion to the Nation. A considered appraisal of Davis would not find him flawless, but it could not deny the noble contributions which he made by his leadership in the Mexican War, in Congress, as Secretary of War, and on the eve of the Civil War. His leadership as President of the Confederate States of America, rather than being an attack on the American system, may have advanced the spirit of American constitutionalism. A penetrating study of his public career would not produce any evidence of a lack of zeal or fidelity to the several causes for which he served. Jefferson Davis was an American patriot whose excellence as a national leader should not be forgotten or belittled because of his role as President of the Confederacy.

Enactment of Senate Joint Resolution 16 is both appropriate and desirable. I am grateful that the Senate of the United States would reaffirm its sense of history by approving this measure.

Cordially,

BYRLE KYNERD.

COST

The enactment of this legislation involves no direct additional expenditure to the Government.

The committee believes that the resolution is meritorious and recommends it favorably.

AMERICAN BUSINESS DAY

The resolution (S.J. Res. 40) to request the President to issue a proclamation designating May 13 of each year as "American Business Day," was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue annually a proclamation designating May 13 of each year as "American Business Day," and calling upon the people of the United States and interested groups and organizations to observe such day with appropriate ceremonies and activities.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–101), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the joint resolution is to authorize and request the President to issue a proclamation designating May 13 of each year as "American Business Day".

STATEMENT

The merits of the resolution are set out in a statement by Senator Scott, as follows:

Ours is a Nation with an economy that provides well for its 216 million citizens, and said to have assets of $6.2 trillion, or $28,000 for each citizen. It should be remembered that our country was, in the beginning, a colony sponsored by an English trading company, and that private initiative has produced a standard of living that is truly the envy of the world.

New ideas, inventions, machines, and technology—new ways of making more and better goods and services for our people—these are the bounty of our free enterprise system.

The committee believes that the resolution is meritorious and recommends it favorably.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the votes by which both joint resolutions were agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TRANSFER OF CALENDAR ORDER NO. 83 TO UNANIMOUS-CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, the distinguished minority leader has indicated that Calendar Order No. 83 (S. Res. 94) is cleared on his side for passage by unanimous consent. Therefore, I ask the clerk to transfer it to the Unanimous-Consent Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR SENATE TO CONVENE AT 4 P.M. ON MAY 3, MAY 5, MAY 10, AND MAY 12, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate convenes on the following days, the Senate convene at the hour of 4 p.m., which I do this at this time so that all committees may be well aware that the Senate will not be coming in before 4 p.m. on these days: Tuesday, May 3, next Tuesday, and next Thursday, May 5; the following Tuesday, May 10, and the following Thursday, May 12.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR BENTSEN ON MONDAY, MAY 2, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, on Monday of next week, after the two leaders have been recognized under the standing order, Mr. BENTSEN be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR DOLE ON FRIDAY, APRIL 29, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, on Friday of this week, after the two leaders or their designees have been recognized under the standing order, Mr. DOLE be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

AN EFFECTIVE NUCLEAR NONPROLIFERATION POLICY—MESSAGE FROM THE PRESIDENT—PM 74

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States:

To the Congress of the United States:

The need to halt nuclear proliferation is one of mankind's most pressing challenges. Members of my Administration are now engaged in international discussions to find ways of controlling the spread of nuclear explosive capability without depriving any nation of the means to satisfy its energy needs. The domestic nuclear policies which I have already put forward will place our nation in a leadership position, setting a positive example for other nuclear suppliers as well as demonstrating the strength of our concern here at home for the hazards of a plutonium economy. Today I am submitting to the Congress a bill which would establish for the United States a strong and effective non-proliferation policy.

This bill relies heavily upon work which the Congress has already done, and I commend the Congress for these valuable initiatives. I look forward to working with the Congress to establish a strong, responsible legislative framework from which we can continue strengthened efforts to halt the spread of nuclear weapons.

Among our shared goals are: an increase in the effectiveness of international safeguards and controls on peaceful nuclear activities to prevent further proliferation of nuclear explosive devices, the establishment of common international sanctions to prevent such proliferation, an effort to encourage nations which have not ratified the Non-Proliferation Treaty to do so at the earliest possible date, and adoption of programs to enhance the reliability of the United States as a supplier of nuclear fuel.

This bill differs from pending proposals, however, in several respects:

1. It defines the immediate nuclear export conditions which we can reasonably ask other nations to meet while we negotiate stricter arrangements. The proposals currently before Congress would impose criteria that could force an immediate moratorium on our nuclear exports, adversely affecting certain allies whose cooperation is needed if we are to achieve our ultimate objective of non-proliferation.

2. It defines additional nuclear export conditions which will be required in new agreements for civil nuclear cooperation. In particular, we will require as a continuing condition of U.S. supply that recipients have all their nuclear activities under IAEA safeguards. I view this as an interim measure and shall make it clear to all potential recipients and to other nuclear suppliers that our first preference, and continuing objective, is universal adherence to the Non-Proliferation Treaty.

3. For the near future, it attempts to tighten the conditions for U.S. nuclear cooperation through renegotiation of existing agreements to meet the same standards as those we will require in new agreements. I believe that this approach will better meet our non-proliferation objectives than will the unilateral imposition of new export licensing conditions.

4. It increases the flexibility we need to deal with an extremely complex subject. For example, instead of requiring countries that want our nuclear exports to foreswear fuel enrichment and reprocessing for all time, it allows us to draft new agreements using incentives to encourage countries not to acquire such facilities. It also permits me to grant exceptions when doing so would further our basic aim of non-proliferation. All new cooperation agreements would, of course, be subject to Congressional review.

This bill is intended to reassure other nations that the United States will be a reliable supplier of nuclear fuel and equipment for those who genuinely share our desire for non-proliferation. It will insure that when all statutory standards have been met, export licenses will be issued—or, if the judgment of the Executive Branch and the independent Nuclear Regulatory Commission should differ, that a workable mechanism exists for resolving the dispute.

Since I intend personally to oversee Executive Branch actions affecting non-proliferation, I do not think a substantial reorganization of the responsibility for nuclear exports within the Executive Branch is necessary. This conclusion is shared by the Nuclear Regulatory Commission.

The need for prompt action is great. Until domestic legislation is enacted, other countries will be reluctant to renegotiate their agreements with us, because they will fear that new legislation might suddenly change the terms of cooperation. If the incentives we offer them to renegotiate with us are not attractive enough, the United States could lose important existing safeguards and controls. And if our policy is too weak, we could find ourselves powerless to restrain a deadly world-wide expansion of nuclear explosive capability. I believe the legislation now submitted to you strikes the necessary balance.

JIMMY CARTER.

THE WHITE HOUSE, *April 27, 1977.*

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the message from the President of the United States submitting proposed legislation to establish a strong and effective nonproliferation policy, be held at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees may be authorized to meet during the session of the Senate tomorrow.

Mr. BAKER. Mr. President, reserving the right to object, I shall have to object to part of the request. I am perfectly willing to agree for committees to meet other than the Committee on Energy and Natural Resources. If the majority leader would reframe the request so that it excludes that committee, there will be no objection on this side.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees, with the exception of the Committee on Energy and Natural Resources, be authorized to meet during the session of the Senate tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, as to the fact that the Committee on Energy and Natural Resources was not included in the request, I think the record should show that the committee can meet tomorrow until the hour of 11:30 a.m. without consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I may renew the request in the morning, at which time the distinguished minority leader may be in a position to accede to the request or he may not be.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, the Executive Calendar, as I understand it, has been cleared on both sides. I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. BAKER. Mr. President, the majority leader is correct. The Executive Calendar, I am informed, is cleared on this side as to all of the items appearing on both pages 1 and 2.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished minority leader.

The assistant legislative clerk proceeded to read nominations on the Executive Calendar.

STATEMENT SUBMITTED BY REQUEST

(By request of Mr. ROBERT C. BYRD for Mr. STEVENSON, the following statement is printed in today's RECORD:)

STATEMENT OF SENATOR STEVENSON ON THE NOMINATION OF DR. JORDAN BARUCH

Today we consider the nomination of Dr. Jordan J. Baruch to be the Assistant Secretary of Commerce for Science and Technology. His nomination was forwarded to the Senate on April 4, and his confirmation hearing was held on April 22.

The Assistant Secretary exercises policy direction and general supervision over the National Bureau of Standards, the Patent and Trademark Office, the National Technical Information Service, the Office of Telecommunications, and direct supervision over the Office of Product Standards. He also provides advice to the Secretary of Commerce and other Commerce officials on scientific and technological issues.

In reviewing the information gathered by the Committee with respect to Dr. Baruch's background and accomplishments, I was pleased to note the breadth and diversity of his experience. Dr. Baruch has had a distinguished academic career, first as an Assistant Professor of Electrical Engineering at the Massachusetts Institute of Technology, then as a lecturer in Business Administration at the Harvard University Graduate School, and most recently as a professor of both business administration and engineering at Dartmouth College.

Dr. Baruch also has extensive business experience and has served as an advisor to various Federal departments and agencies, including the Department of Commerce. Dr. Baruch's nomination has also received a uniformly strong endorsement from a cross-section of the scientific and technological community who were interviewed with regard to Dr. Baruch's nomination.

Dr. Baruch has provided the Committee detailed biographical and financial informa-

tion as well as written responses to an extensive set of questions related to science and technology policy issues. In accordance with Committee procedures, Dr. Baruch's biographical information and his response to all written questions will be included in the printed hearing record, and a copy of his financial disclosure form will be available for public inspection in the Committee's main office.

A thorough Committee review of Dr. Baruch's qualifications has been conducted. This review indicates that Dr. Baruch should not be subject to any conflict of interest or appearance of conflict of interest with respect to financial interests of his wife and himself, if confirmed as Assistant Secretary. This conclusion is supported by letters from the legal counsel of the Department of Commerce and the Department of Justice. Both letters will be included in the hearing record.

Based on the information available to the Committee, and based on my own personal evaluation, I urge Senate confirmation of Dr. Baruch. The Office of Assistant Secretary of Commerce for Science and Technology is one of the most important technical management posts in the Federal government and Dr. Baruch is an excellent candidate for this post. I look forward to working closely with Dr. Baruch in areas such as technology innovation and utilization, as well as other important scientific and technological matters in the coming years.

THE NOMINATION OF DR. FRANK PRESS AS SCIENCE ADVISER TO THE PRESIDENT

Mr. KENNEDY. Mr. President, I take this opportunity to express my support for the nomination of Dr. Frank Press to serve as Director of the Office of Science and Technology Policy and as Science Adviser to the President. The President made a superb choice in naming Dr. Press to this position and the unanimous vote of the Committee on Commerce, Science, and Transportation reaffirms the confidence which exists in Dr. Press' ability to perform the critical functions of this new office with distinction.

Dr. Press has a distinguished record of accomplishment. Since 1965 he has served at MIT as professor of geophysics and chairman of the Department of Earth and Planetary Sciences. In this capacity he has built this into one of the most outstanding departments in the world. He recently completed a 6-year term as a member of the National Science Board where he exercised important leadership in furthering basic research and education in science and engineering. He has been a leader in the activities of the National Academy of Sciences and earlier served as a member of the President's Science Advisory Committee. He has made many first rank scientific contributions in his own field of seismology, with emphasis on earthquake mechanisms and elastic wave propagation.

However, he has not rested content with his contributions in basic science, but has aided in the application of this knowledge to early detection of earthquakes and to the detection of underground nuclear explosions. This has led him to play a significant role in the area of arms control; and he has participated generally in the international applications of science and technology, with emphasis on technical assistance to the less developed countries.

As Science Adviser to the President, Dr. Press will be involved in decisions which will have a profound impact. He will be asked by the President for help with decisions on whether to inoculate the population against potential epidemics; on automobile emission standards which are realistic and environmentally sound; on toxic substances in water and air; on food additives and drugs; on the risks and benefits of nuclear energy; on solar and fusion power; and on when to proceed with significant but hazardous research in fields like genetic research.

These examples can be multiplied many times over, for we live in an age of science. This is what dominates our national security, our international affairs, our domestic economy, and the quality of our environment.

No single scientist can provide advice on all these issues. But a first-rate science adviser with an outstanding staff, support from the scientific community, and a commitment to public participation can rapidly tap the best talent available to provide the President with the best advice possible.

Dr. Press has a broad and distinguished background which eminently qualifies him to serve in this capacity, and I am confident from my personal contact with him that he will discharge his responsibilities with excellence. I commend him to the Senate and urge his swift confirmation.

STATEMENT SUBMITTED BY REQUEST

(By request of Mr. ROBERT C. BYRD for Mr. STEVENSON, the following statement, together with the material attached thereto, is printed in today's RECORD:)

STATEMENT OF SENATOR STEVENSON

On March 21, the Senate received the nomination of Dr. Frank Press to be Director of the White House Office of Science and Technology Policy. The duties of this office are established under the National Science and Technology Policy, Organization and Priorities Act (P.L. 94-282) and include those of Science Adviser to the President. Dr. Press's nomination was referred to the Committee on Commerce, Science and Transportation, and his confirmation hearing was held on April 7th.

Prior to the April 7th hearing, the Committee requested, and Dr. Press provided, detailed biographical and financial information as well as written responses to 75 questions on a broad range of science and technology policy issues. In accordance with Committee procedures, Dr. Press's biographical information and his responses to all written questions will be included in the printed hearing record. A copy of his financial disclosure form is available for public inspection in the Committee's main office.

A thorough Committee review of Dr. Press's qualifications has been conducted. This review indicates that Dr. Press will not be subject to conflicts of interest if confirmed as Director of the Office of Science and Technology Policy. This conclusion is supported by letters from the Counsel to the President and the Office of the Legal Counsel of the Department of Justice. Both letters will be included in the confirmation hearing record.

On the basis of experience and background, Dr. Press appears to be eminently qualified for the position of OSTP Director. This conclusion is supported by comments received from more than two dozen members of the scientific, technical and public interest communities who were contacted by committee staff regarding Dr Press's nomination. It is clear from these comments that Dr. Press is held in extremely high regard by diverse elements of the scientific and technological communities, as well as by others. He has established a reputation for scientific excellence, and is given extremely high marks for good judgment, common sense, an ability to get things done, and for getting along well with people. In summary, Dr. Press's nomination seems to have been received with great enthusiasm by the scientific and technical community.

It is important to the Nation that the President have the best available advice on science and technology policy matters. Increasingly, national issues arise that involve important scientific and technological components. If we are to implement sound national policy in areas as diverse as agriculture. health, space, and many others, the position of Presidential Science Adviser is crucial. It must be filled by an individual with outstanding technical credentials, and one who is sensitive both to the need for cooperation between the President and the Congress, and the need for broad involvement of the state and other interested public and private groups, institutions, and individuals in the formulation of national science and technology policy.

Based on the information available to the Committee, and based on my personal evaluation of Dr. Press's abilities and experience, I feel that Dr. Press would meet these requirements, and I urge that his nomination be speedily approved by the Senate. The Committee on Commerce, Science and Transportation has unanimously voted to favorably report Dr. Press's nomination to the Senate floor. As Chairman of the Committee's Subcommittee on Science, Technology and Space, I look forward to working closely with Dr. Press and his Office as he struggles with the problems associated with strengthening the national effort in science, engineering and technology.

I urge the Senate to approve Dr. Press and I attach a brief biographical statement describing Dr. Press's career.

BIOGRAPHICAL DATA—FRANK PRESS

Frank Press was born in Brooklyn, New York, on December 4, 1924. His undergraduate work at the College of the City of New York was in physics and geology. He received a master of arts degree in 1947 and a doctor of philosophy in geophysics in 1949 from Columbia University. From 1948 to 1955, Dr. Press served on the faculty of Columbia University, first as an Instructor in Geology and then as an Assistant Professor and Associate Professor of Geology. From 1955 to 1965, he was a Professor of Geophysics at California Institute of Technology. During that time, from 1957, he also served as Director of the Institute's Seismological Laboratory. His most recent academic position was as Chairman of the Department of Earth and Planetary Sciences at the Massachusetts Institute of Technology. His publications include 160 scientific papers in the fields of oceanography, planetary physics, natural resource exploration, regional geophysics, structure of the earth's deep interior, and the mechanism and prediction of earthquakes. He is coauthor with R. Siever of the textbook "Earth," widely used in American universities.

Dr. Press was elected to membership in the National Academy of Sciences, and is also a member of the American Academy of Arts and Sciences. He was President of the American Geophysical Union, the Seismological Society of America, and is a member of the Geological Society of America, the Society of Exploration Geophysicists and the Royal Astronomical Society.

Dr. Press has been active in the affairs of the National Academy of Sciences, including membership on the Council, the Commission on Natural Resources, the Geophysical Research Board, and the International Geophysical Year Committee.

Dr. Press' government service includes membership on the President's Science Advisory Committee during the Administration of President Kennedy, membership on the Ramo and Baker Committees which were precursory to the Office of Science and Technology Policy during the Administration of President Ford, and membership on the NASA Lunar and Planetary Missions Board. He was appointed to The National Science Board for the term 1970–1976. He was a member of the Governor's Committee for Atomic Energy in the State of California, and served as consultant to the Department of Defense, the Department of the Interior, the National Aeronautics and Space Administration, the Arms Control and Disarmament Agency, and the Agency for International Development. He was one of the organizers of the International Geophysical Year and a prime mover of the research efforts at earthquake prediction in the United States. He served as a member of the U.S. delegation to the nuclear test ban negotiations in Geneva and Moscow.

Dr. Press has been active in international scientific cooperation as a consultant to UNESCO, as a member of the U.S. delegation to the United Nations Conference on Science and Technology for Underdeveloped Countries, as a participant in the bilateral science agreements with the Soviet Union and Japan, and as Chairman of the Committee on Scholarly Communication with the Peoples Republic of China.

Dr. Press' honors include the Columbia University Medal for Excellence (1959), the California Scientist of the Year Award (1960), Life Magazine—One of the Hundred Most Important Young People in the United States (1962), Distinguished Service Award, Department of the Interior (1971), Gold Medal of the Royal Astronomical Society (1971), Arthur L. Day Medal of The Geological Society of America (1972), and Honorary Doctoral degrees from the University of Notre Dame and the College of the City of New York.

On March 18, 1977, President Carter nominated Dr. Press to be Director of the Office of Science and Technology Policy in the Executive Office of the President and to serve as Science and Technology Adviser to the President.

Dr. Press is married to the former Billie Kallick of St. Louis, Missouri. They have two children, William Henry Press, who is a Professor of Astronomy at Harvard University, and Mrs. Paula Press Checkoway, a school teacher in Chapel Hill, North Carolina.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all of the nominations on the Executive Calendar be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, all nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

EXPORT-IMPORT BANK OF THE UNITED STATES

John Lovell Moore, Jr., of Georgia, to be President of the Export-Import Bank of the United States.

DEPARTMENT OF COMMERCE

Frank Alan Weil, of New York, to be an Assistant Secretary of Commerce.

Charles Linn Haslam, of North Carolina, to be General Counsel of the Department of Commerce.

Elsa Allgood Porter, of Virginia, to be an Assistant Secretary of Commerce.

Jordan J. Baruch, of New Hampshire, to be an Assistant Secretary of Commerce.

DEPARTMENT OF TRANSPORTATION

Langhorne McCook Bond, of Illinois, to be Administrator of the Federal Aviation Administration.

Quentin Saint Clair Taylor, of Maine, to be Deputy Administrator of the Federal Aviation Administration.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Frank Press, of Massachusetts, to be Director of the Office of Science and Technology Policy.

U.S. COAST GUARD

The following officers of the U.S. Coast Guard for promotion to the grade of rear admiral:

Thomas T. Wetmore III, to be rear admiral.

Benedict L. Stabile, to be rear admiral.

Raymond H. Wood, to be rear admiral.

The following-named captain of the Coast Guard Reserve to be a permanent commissioned officer in the Coast Guard Reserve in the grade of rear admiral:

Olin A. Lively, to be rear admiral.

FEDERAL MEDIATION AND CONCILIATION SERVICE

Wayne L. Horvitz, of the District of Columbia, to be Federal Mediation and Conciliation Director.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be immediately notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE EXPORT ADMINISTRATION ACT

Mr. HARRY F. BYRD, JR. Mr. President, will the majority leader yield?

Mr. ROBERT C. BYRD. Yes.

Mr. HARRY F. BYRD, JR. I note on the Calendar No. 84, S. 69, a bill to amend and extend the Export Administration Act. If the majority leader is planning to ask unanimous consent in that regard, would he consult with the Senator from Virginia?

Mr. ROBERT C. BYRD. The Senator is directing his remarks to Calendar Order No. 84, S. 69?

Mr. HARRY F. BYRD, JR. Yes.

Mr. ROBERT C. BYRD. Yes, indeed, I shall ask the policy committee staff not to let me forget that.

Mr. HARRY F. BYRD, JR. I thank the majority leader.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONGRESSIONAL PAY INCREASES—1789–1977

Mr. ROBERT C. BYRD. Mr. President, in the First Congress, the compensation bill was one of the measures which gave rise to most controversy. While the bill was in the House, several Members brought upon themselves charges of demagoguery because of their urging that the per diem compensation recommended by the committee be reduced. Representatives Madison and Page advocated that the compensation for Senators be higher because greater service was likely to be demanded of them.

In the Senate, the bill was referred to a committee which reported a recommendation that, while the pay of both Senators and Representatives should be $6 per day until March 4, 1795, the pay of Senators thereafter should be $8 per day. Before proceeding with the consideration of this report, the Senate voted, by more than 2 to 1, to adopt a resolution declaring that there ought to be a discrimination between the pay of Senators and Representatives. Of course, this gave rise to an acrimonious debate. Senator Maclay moved that the pay be reduced to $5 per day. Senator Carroll, the richest man in the Senate, supported Maclay. Vice President Adams became so excited that he could not keep his seat, and three times he interrupted Senator Ellsworth, asking him if the Congress of the Federation had not degenerated for want of adequate pay.

Naturally, the House refused to accept any discrimination in pay. The law which was finally enacted provided for a per diem payment of $6 to Senators and to Representatives until March 4, 1795. In 1795, the compensation for Senators went to $7 per diem during special sessions—such special sessions of the Senate being thought required for the purpose of considering nominations and treaties. In 1796, however, the $7 per diem for Senators attending special sessions was repealed, and the salary for special sessions was made the same as for regular sessions, to wit, $6 per diem, at which figure it remained for the next 20 years.

By 1816, in view of the increased cost of living, a bill was introduced in the House of Representatives which provided for an annual salary of $1,500. The argument was made that an annual salary, in place of the per diem of $6, would be beneficial because it would "shorten the session" and would save money to the Government in the cost of fuel and attendance for the shortened session. The measure was enacted into law and was made retroactive for more than a year.

However, the law provoked universal criticism and was speedily repealed in 1817, and the salary reverted to that of $6 per diem. In 1818, the per diem was raised from the 1789 figure of $6 to $8, and was made retroactive to March 3, 1817. It remained unchanged for close to 40 years. In 1856, the salary went from $8 per diem to an annual salary of $3,000, and the payment was made retroactive for the entire session. Ten years later, in 1866, during the days of "greenback inflation," the salary was advanced to $5,000 and was made retroactive to March 4, 1865.

Seven years later, on the day before final adjournment, March 3, 1873, the 42d Congress enacted an appropriation bill carrying a rider raising congressional

salary from $5,000 to $7,500 a year. This act made the new salary increase applicable to the entire 2 years of the expiring Congress, thus constituting a retroactive bonus of $5,000 each for the work done by Members during the preceding 2 years. This increase was labeled a "salary grab" and a "back-pay steal," and met with universal condemnation. Quite a number of Senators and Representatives paid back into the Treasury the "bonuses" which they had received under the act.

On the first day of the next session, in 1874, at least 25 bills were introduced in the House of Representatives in a scramble to repeal the salary increase, and the salary was speedily cut back to $5,000.

It was not until 1906 that the Congress again seriously considered an increase in congressional pay. For 40 years, the salary had remained at $5,000 annually, considering the fact that the 1873 pay increase had been repealed. In the House, an amendment was passed providing for an increase of salary from $5,000 to $7,500. Passage of the amendment was accomplished without a yea-and-nay vote. The Senate finally concurred in the House amendment, and the increase was made effective March 4, 1907.

In 1925, the Senate attached a rider to the legislative appropriation bill, which provided that, a month later, at the beginning of the 69th Congress, the pay for Members would be increased from $7,500 to $10,000. There was not a word of debate on the amendment, and the vote was taken unexpectedly at an evening session when several Senators who opposed the proposal were absent. Senator Norris tried, without success, to secure its recall from the House. The House passed the proposal by a majority of more than 2 to 1, after a half hour of debate, and without a record vote. President Coolidge was placed in an embarrassing dilemma, because the salary increase ran counter to the economy program which he had been urging. To have vetoed the bill, however, would have delayed or prevented other much needed appropriations, and, consequently, President Coolidge signed the bill.

In 1932, at the height of the Great Depression, the salary was temporarily reduced to $9,000 annually.

On March 20, 1933, Congress, in enacting the Emergency Act, further temporarily reduced the salary of Members of Congress to $8,500 annually.

In 1934, the salary went back to $9,500.

In 1935, the salary was restored to the 1925 level of $10,000.

In 1945, a nontaxable annual expense allowance of $2,500 was allowed each Member—which, essentially, amounted to a salary of $12,500.

In 1946, congressional pay was increased to $12,500, effective January 3, 1947, with a nontaxable expense allowance of $2,500 annually in addition thereto—thus, for all intents and purposes, making the salary $15,000 annually.

Subsequent pay increases were as follows:

In 1955 from $15,000, which included the $2,500 expense allowance, to $22,500 in total; 1964 from $22,500 to $30,000, effective Jan. 3, 1965; 1969 from $30,000 to $42,500; 1975 from $42,500 to $44,600; and 1977 from $44,600 to $57,500, effective March 1977.

Mr. President, I believe that the foregoing data will be helpful in illustrating the historical salary lag in congressional salaries from the very beginning. To sum it up, there have been 14 congressional salary increases since the first compensation bill was enacted in 1789, at which time the salary for Members of Congress was set at $6 per diem. Three of those 14 increases were subsequently repealed as I have pointed out, and one increase was temporarily reduced during the depression years of the early 1930's. In fine, then, there have only been 11 "permanent" congressional salary increases in 188 years. Perhaps this fact would qualify for "Guiness' Book of Records."

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene tomorrow at 9:30 a.m. After the two leaders or their designees have been recognized under the standing order, Mr. BELLMON will be recognized for not to exceed 15 minutes, after which there will be a period for the transaction of routine morning business not to go beyond the hour of 10 o'clock a.m., with statements limited therein to 5 minutes each.

At the hour of 10 a.m. tomorrow, the Senate will resume consideration of H.R. 3477 and at that time Mr. CHAFEE will be recognized to call up his amendment. Upon the disposition of the amendment by Mr. CHAFEE, Mr. KENNEDY will be recognized to call up an amendment.

There will be rollcall votes throughout the day tomorrow. It is possible that Senators would be willing in the morning, if yea and nay votes are ordered on their amendments, to delay the votes until 12 noon. I cannot speak, however, with definitude except to express the possibility.

This would allow committees to meet without interruption until noon. But whether or not that can be arranged will depend upon the circumstances and the attitudes of Senators on tomorrow.

It is my anticipation that the Senate will stay in late tomorrow evening again, in the effort to complete action on this bill by Friday. There is a possibility that action could be completed tomorrow, and I hope that will be the case; but if it turns out to be otherwise, the Senate will come in early on Friday.

ORDER FOR RECESS FROM TOMORROW UNTIL 9:30 A.M. FRIDAY NEXT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent at this time—and this order can be changed, of course—that when the Senate completes its business tomorrow, it stand in recess until 9:30 a.m. on Friday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONVENING OF THE SENATE AT 1 P.M. ON MONDAY NEXT

Mr. ROBERT C. BYRD. I will not get an order for Monday as yet, Mr. President. I think there is a very good likelihood that the Senate will complete action on the tax bill this week, which would allow the Senate to come in at 12 noon or later on Monday.

For the time being, however, I think I will get an order if I can.

I ask unanimous consent that when the Senate convenes on Monday, it convene at 10 a.m.

Mr. BAKER. Mr. President, reserving the right to object, I will not object. I share the hope of the majority leader that we could finish this bill even tomorrow, or certainly by Friday. If that is the case, I hope the majority leader would reconsider the 10 o'clock convening hour on Monday.

Mr. ROBERT C. BYRD. Mr. President, I knew there was something I had forgotten. The distinguished minority leader has reminded me of it by what he said.

I ask unanimous consent that when the Senate convenes on Monday, it convene at 1 p.m.

Mr. BAKER. Mr. President, that is an entirely satisfactory hour.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. There is going to be a meeting at the White House, and several Senators have been asked to attend some briefings. I had forgotten that.

Mr. BAKER. I must confess that I did not have that in mind when I made the suggestion. I am not at all sure that I have been invited.

Mr. ROBERT C. BYRD. I thank the Senator. I assure him that any time I can help to arrange an invitation for him, I want to do it.

Mr. BAKER. I believe the majority leader is sincere, and I appreciate it.

Mr. ROBERT C. BYRD. Mr. President, that about states the program for tomorrow.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move that the Senate adjourn until 9:30 a.m. tomorrow.

The motion was agreed to; and at 8:53 p.m. the Senate adjourned until tomorrow, Thusday, April 28, 1977, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate April 27, 1977:

U.S. INFORMATION AGENCY

Charles William Bray III, of Maryland, to be Deputy Director of the U.S. Information Agency, vice Eugene Paul Kopp, resigned.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Spurgeon M. Keeny, Jr., of the District of Columbia, to be Deputy Director of the U.S. Arms Control and Disarmament Agency, vice John F. Lehman, Jr., resigned.

DEPARTMENT OF STATE

Ulric St. Clair Haynes, Jr., of Indiana, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to

the Democratic and Popular Republic of Algeria.

DEPARTMENT OF DEFENSE

John Patrick White, of California, to be an Assistant Secretary of Defense, vice David P. Taylor, resigned.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 27, 1977:

EXPORT-IMPORT BANK OF THE UNITED STATES

John Lovell Moore, Jr., of Georgia, to be President of the Export-Import Bank of the United States.

DEPARTMENT OF COMMERCE

Frank Alan Weil, of New York, to be an Assistant Secretary of Commerce.

Charles Linn Haslam, of North Carolina, to be General Counsel of the Department of Commerce.

Elsa Allgood Porter, of Virginia, to be an Assistant Secretary of Commerce.

Jordan J. Baruch, of New Hampshire, to be an Assistant Secretary of Commerce.

DEPARTMENT OF TRANSPORTATION

Langhorne McCook Bond, of Illinois, to be Administrator of the Federal Aviation Administration.

Quentin Saint Clair Taylor, of Maine, to be Deputy Administrator of the Federal Aviation Administration.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Frank Press, of Massachusetts, to be Director of the Office of Science and Technology Policy.

U.S. COAST GUARD

The following officers of the United States Coast Guard for promotion to the grade of rear admiral:

Thomas T. Wetmore III
Benedict L. Stabile
Raymond H. Wood

The following-named captain of the Coast Guard Reserve to be a permanent commissioned officer in the Coast Guard Reserve in the grade of rear admiral:

Olin A. Lively

FEDERAL MEDIATION AND CONCILIATION SERVICE

Wayne L. Horvitz, of the District of Columbia, to be Federal Mediation and Conciliation Director.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

WITHDRAWAL

Executive nomination withdrawn from the Senate April 27, 1977:

John Patrick White, of the District of Columbia, to be an Assistant Secretary of Defense, vice David P. Taylor, resigned, which was sent to the Senate on April 21, 1977.

HOUSE OF REPRESENTATIVES—*Wednesday, April 27, 1977*

The House met at 3 o'clock p.m.

Rev. Theodore M. Hesburgh, C.S.C., president, University of Notre Dame, South Bend, Ind., offered the following prayer:

Almighty God and Father, we pray this day for our country and for those who formulate and enact its laws. We pray that You may always inspire them with a deep sense of justice, for without justice there are no good laws and no civic peace. We pray that You also give them the wisdom to know what can and should be legislated and what cannot. We pray that You give them insight to ask first and only what is right, not what is popular, and having seen the right, to follow its course courageously, whatever the cost. And finally, Lord, we pray that we others may follow where the Congress leads, support what they rightly enact, espouse the justice that good laws represent—and ultimately achieve for ourselves, our country, and our world that peace which is not just the absence of war, but more importantly, the tranquillity of order established by law and respect for law. We ask this in the name of the Father, the Son, and the Holy Spirit. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

REV. THEODORE M. HESBURGH, C.S.C.

(Mr. BRADEMAS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. BRADEMAS. Mr. Speaker, I am pleased and honored to have my distinguished constituent and friend, the Reverend Theodore M. Hesburgh, C.S.C., deliver the invocation here in the House of Representatives today.

Father Hesburgh is in his 25th year as president of the University of Notre Dame, one of the great leaders of American life and his career highlights the increasingly interrelated areas of education, government, and public affairs.

As president of a major American university, he has presided over major institutional growth at Notre Dame and made significant contributions to higher education nationally, particularly in his role as a member of the Carnegie Commission on the Future of Higher Education.

As a world citizen, his has been a strong voice for economic development in the Third World—as Chairman of the Overseas Development Council and as a trustee—now president—of the Rockefeller Foundation—and for peace and justice.

But, Mr. Speaker, Father Hesburgh's greatest contribution to America and the world has been, in my view, his outspoken advocacy of human rights. He was for many years a member, and for a time, chairman, of the U.S. Commission on Civil Rights, and he was a member also of the President's Clemency Board.

As an internationally respected clergyman, his stand against racism and political repression has been a beacon both at home and abroad.

Mr. Speaker, evidence of the great regard in which both Father Hesburgh and the University of Notre Dame are held by the highest official in our land is that the principal address at commencement exercises at the University of Notre Dame on May 22, 1977, will be delivered by President Jimmy Carter.

Still further indication of the widespread respect with which Father Hesburgh is regarded is the list of distinguished citizens from several different countries of the world who will receive honorary degrees at Notre Dame next month.

In addition to President Carter, who will deliver the commencement address, former Senator Mike Mansfield, recently retired from the U.S. Senate after serving longer there as leader than anyone in history, will be present to receive the Laetare Medal. The award is given annually by Notre Dame to honor an esteemed American Catholic. Senator Mansfield has just been confirmed as our new Ambassador to Japan.

Kurt Waldheim, Secretary General of the United Nations, will receive an honorary doctor of laws degree.

The distinguished Speaker of the House of Representatives, the Honorable THOMAS P. O'NEILL, JR., will receive an honorary doctor of laws degree.

Another honorary doctor of laws degree will be bestowed on Arthur F. Burns, the Chairman of the Federal Reserve Board.

Archbishop Jean Jadot, the apostolic delegate in the United States, has been the Vatican's principal representative since 1973 to American Catholics. He will receive an honorary doctor of laws degree.

Three outspoken critics of human rights violations who will receive honorary degrees are Bishop Donal Lamont of Umtali, Rhodesia; Paul Cardinal Arns of Sao Paulo, Brazil; and Stephen Cardinal Kim of Seoul, Korea.

Bishop Lamont is the clergyman who was deported from Rhodesia in March after being sentenced for failure to report the presence of African nationalist guerrillas in his diocese. Cardinal Arns became the archbishop in 1970 and has fought for social, economic, and political rights of the urban poor while Cardinal Kim has been protesting the curtailment of civil liberties in Korea following the adoption of martial law there in 1972.

Mr. Speaker, among the other persons to receive honorary degrees at Notre Dame next month are:

Reginald H. Jones, chairman of the board and chief executive officer of the General Electric Co., a doctor of engineering degree.

Dr. Percy A. Pierre, dean of engineering at Howard University, doctor of engineering degree.

Catherine B. Cleary, chairman of the board and chief executive officer of the First Wisconsin Trust Co., a doctor of laws degree.

Prof. Philip B. Kurland, professor of law at the University of Chicago, a doctor of laws degree.

Mr. Speaker, Father Hesburgh's words, spoken at a Bicentennial celebration last year, are ones that I believe should guide us in our work here:

I, for one, do not believe that America is a thwarted experiment, a burned-out case, a fading hope. Despite the negativism of the day, we are becoming "twice born," coming of age and it is not the decrepitude of old age . . . The world may or may not follow, but we must lead because our tradition says we must: liberty is worth the effort, and the creation of justice and peace abroad will in large measure depend on the measure of justice and peace that we create here at home, increasingly in our America. Whatever its faults, America is still the most exciting human experiment in all the world.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Chirdon, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3843) entitled "An act to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, and for other purposes."

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 955. An act to amend the Federal Crop Insurance Act; and

S. 1240. An act to extend the time for conducting the referendum with respect to the national marketing quota for wheat for the marketing year beginning June 1, 1978.

PERSONAL EXPLANATION

(Mr. ALLEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALLEN. Mr. Speaker, I regret very much that I was not present on the floor of the House late yesterday afternoon at the time several amendments to the first concurrent resolution on the budget, House Concurrent Resolution 195, were being considered.

With 10 hours of general debate having been provided for the budget resolution, it was my impression that no amendments to the resolution would be taken up until today.

On yesterday, the Middle Tennessee Director, Federal Housing Administration, U.S. Department of Housing and Urban Development, accompanied me to an appointment with Mr. Larry Simons, Assistant Secretary, Housing and Urban Development, at the conclusion of the markup session of the House Banking Committee, at which both Mr. Simons and I had to be present until after 4 p.m. Our meeting at HUD did not conclude until after 6 p.m., and my presence at that meeting was the reason for my absence from the floor. Had I been present, I would have voted for the Pike amendment. I ask that the House accept this explanation and my apology for this absence.

REVEREND THEODORE M. HESBURGH, CSC

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, I would just like to echo the words spoken by my colleague, the gentleman from Indiana (Mr. BRADEMAS), in testimony to the person who addressed our House and opened it with a prayer today, Father Theodore M. Hesburgh, CSC, the president of the University of Notre Dame.

Mr. Speaker, it was my privilege to be a student at Notre Dame at the very time that Father Hesburgh became president. That was 25 years ago, and in that 25 years Father Hesburgh has not only led the university to its greatest milestones in achievement, both educationally and from a religious standpoint, but Father Hesburgh has distinguished himself in many, many ways as a person of the church and as a champion of human rights.

I would like to thank the Speaker for having, during his busy schedule, attended the luncheon given by the gentleman from Indiana (Mr. BRADEMAS) for Father Hesburgh. I think it is a fitting tribute to a person like Father Hesburgh who has done so much during these past 25 years.

FIRST CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1978

Mr. GIAIMO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the concurrent resolution (H. Con. Res. 195) setting forth the congressional budget for the U.S. Government for the fiscal year 1978.

The SPEAKER. The question is on the motion offered by the gentleman from Connecticut (Mr. GIAIMO).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 409, nays 0, not voting 24, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the concurrent resolution (H. Con. Res. 195) setting forth the congressional budget for the U.S. Government for the fiscal year 1978, with Mr. NATCHER in the chair.

The CHAIRMAN. When the Committee rose on Tuesday, April 26, 1977, the concurrent resolution had been considered as having been read and open to amendment at any point.

Are there further amendments?

AMENDMENT OFFERED BY MR. PIKE

Mr. PIKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PIKE: In the matter relating to the appropriate level of total new budget authority strike out "$580,757,000,000" and insert in lieu thereof "$500,627,000,000";

In the matter relating to the appropriate level of total budget outlays strike out "$463,857,000,000" and insert in lieu thereof "$463,727,000,000";

In the matter relating to the amount of the deficit strike out "$65,763,000,000" and insert in lieu thereof "$65,633,000,000";

In the matter relating to the appropriate level of the public debt strike out "$792,093,000,000" and insert in lieu thereof "$791,963,000,000";

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, strike out "$92,093,000,000" and insert in lieu thereof "$91,963,000,000";

In the matter relating to national defense, strike out "$115,986,000,000" in budget authority and insert in lieu thereof "$115,968,000,000"; and strike out "$109,647,000,000" in outlays and insert in lieu thereof "$109,629,000,000";

In the matter relating to allowances, strike out "$1,069,000,000" in budget authority and insert in lieu thereof "$957,000,000"; and strike out "$1,021,000,000" in outlays and insert in lieu thereof "$909,000,000."

Mr. PIKE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. PIKE. Mr. Chairman, this is the other amendment which I advised the Members that I would offer if the first amendment which I offered yesterday were passed. The amendment which I offered yesterday cut $7 million from the general government function of the bill This amendment cuts $130 million, largely from the function of the budget called allowances; but a small amount from the Defense function of the budget for civilian employees.

The figures which were given to the House yesterday on what other people got as far as raises were concerned were, I regret to say, inaccurate, in that they represented what the Commission had recommended and not what the people got; however, what the people got, and we are talking now about some 22,000 people in the Federal Government who got pay raises averaging about 28 percent in March, some of them got more than 28 percent, some of them got less than 28 percent, but it averaged 28 percent in pay raises.

Members will recall that our own congressional pay raise was 28.9 percent, and it took us from $44,600 to $57,500. Exactly the same raise went to the judges of the Circuit Court of Appeals, the judges of the Court of Claims, the judges of the Court of Military Appeals, the judges of the Court of Customs and Patent Appeals. They went from $44,600 to $57,500. The judges of the U.S. district courts went from $42,000 to $54,500. As a percentage, that was larger than our pay raise. Instead of being 28.9 percent, that was 29.8 percent.

The other people who got 29.8 percent pay raises are the judges of the Customs Court, and the judges of the Tax Court. The people in executive level II got the same 28.9 percent that we did. And so it goes, right on down the line, for $130 million worth of pay raises averaging 28 percent.

Now, there is no sense in spending a great deal of time on this particular amendment. I happen to think that a 28- or 29-percent pay raise for Members of Congress was too high. I happen to think that a 28- or 29-percent pay raise for these other people is too high. My amendment will put them back as they were before the 28- or 29-percent pay raise, just as my amendment yesterday put us back where we were before the 28- or 29-percent pay raise.

Mr. CHARLES H. WILSON of California. Mr. Chairman, will the gentleman yield?

Mr. PIKE. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. Does the gentleman's amendment include officers of the House of Representatives and committee staff members who had pay raises based upon the pay raise of Congress?

Mr. PIKE. Well, if they got those raises under that process, the answer would be yes. If they got those raises under the process whereby we got our pay raises, the answer would be yes.

The CHAIRMAN. The time of the gentleman from New York has expired.

(On request of Mr. BUTLER and by unanimous consent Mr. PIKE was allowed to proceed for 1 additional minute.)

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. PIKE. I yield to the gentleman from Virginia.

Mr. BUTLER. Does this amendment contemplate that the recent increases for judges will be turned back?

Mr. PIKE. Yes, it does.

Mr. BUTLER. How does that square with the provision of article III, section 1 of the Constitution?

Mr. PIKE. I am aware of what the gentleman is going to read, and if it is possible that we cannot reduce their salaries while they are in office, then we cannot do it. But, I am going to try.

Very frankly, we heard an awful lot of complaints from judges about how they were being underpaid and how they were forced to leave the bench, but every time there is a vacancy for a district court judge where I live, there is no shortage of applications to fill the vacancy. I have yet to hear of a Federal judgeship going begging anywhere.

Mr. BUTLER. Will the gentleman yield further?

Mr. PIKE. Certainly.

Mr. BUTLER. I have a further question, if I may. Is it the gentleman's opinion that we can constitutionally reduce the salaries of these judges?

Mr. PIKE. I think the question depends on when they took office. I think that if they took office earlier, and this pay raise does not reduce what they were getting when they took office, then the answer constitutionally is yes, we can do it. I think if they took office after the pay raise, we could not.

The CHAIRMAN. The time of the gentleman from New York has again expired.

(On request of Mr. HARRIS and by unanimous consent Mr. PIKE was allowed to proceed for 2 additional minutes.)

Mr. DAN DANIEL. Mr. Chairman, will the gentleman yield?

Mr. PIKE. I yield to the gentleman from Virginia.

Mr. DAN DANIEL. Will the gentleman tell us whether or not his amendment would affect the White House staff?

Mr. PIKE. The answer is, "Yes." There are 2,500 people in the so-called executive positions, in the executive and judicial branches of Government, who would

be affected by this amendment. Below that, there are some 18,000 people in the so-called supergrades who would be affected.

Mr. THOMPSON. In response to the gentleman's answer to the gentleman from California (Mr. CHARLES H. WILSON), he addressed the question of pay raises for the officers of the House. I would like to point out that this would not affect them, since they were done by separate resolution.

Mr. PIKE. Then the officers of the House are safe, and we can safely vote for this amendment and cut out $130 million worth of 28 or 29 percent raises.

Mr. THOMPSON. If the gentleman will yield further, I am not so sure about the safety factor.

Mr. SAWYER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I sat through the discussion and debate yesterday. I was as impressed with the argument and persuasiveness of the gentleman from New York (Mr. PIKE) as I was several weeks before, when I heard him argue exactly the opposite, that without his outside income he could not keep his job in the House. I took a position on that matter. I took a position against the Democratic incumbent in the last election. I stated that my opponent cast a deciding vote in the cost-of-living increase, and I certainly would have voted against the pay increase had it come up. But now we are talking about something quite different, and I think it is irresponsible. We are talking about having given 22,000 employees of the U.S. Government a pay increase. We are now talking about rescinding it, or taking it back as of October 1. What employer in his right mind in these times ever did such a thing to his employees? They undoubtedly incurred obligations, may have bought automobiles on time, and may have done other things in reliance on the raises we gave them by our failure to act.

If we, as a result of the Pike amendment yesterday—which, incidentally, I voted for, not because I was persuaded the second time, but because I saw a chance to save $7 million in the budget—we put ourselves in the ridiculous position, which, I am told, we are not, by people who know a good sight more about this procedure than I do yet, of being paid less than all of these other people, we did it to ourselves.

But that is no excuse, in my opinion, to embark on such a reckless and irresponsible course of conduct after 6 months of raises to employees, to tell them, "Now we rescind it, and it is just too bad you are taking a 28-percent pay reduction at this time."

I cannot go along with that kind of thinking. I think we have crossed the Rubicon on this entire pay raise matter by not voting on the salaries. I think we are now up against two intolerable choices, either reducing 6 months from now the pay of 22,000 Federal employees, and/or putting ourselves in a position where we are paid totally out of scale.

I am now prepared, notwithstanding a totally different opinion before, to vote not only against this amendment, but for an appropriation for a pay increase when it comes up for a vote.

Mr. HARRIS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would like to point out that we are also talking about the pay of people in grades 15 and 16, who will be affected here and will be cut back. We are talking about all of those pay scales which were formerly tied to executive level 4 which were unfrozen somewhat by this pay increase. We are not just talking about supergrades in this amendment. We are talking about civil service people under the merit system, whose pay will be reduced if we in fact adopt this amendment.

Mr. DICKINSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, if I might have the attention of the gentleman from New York (Mr. PIKE), who offered the amendment, I would like to propound a couple of questions to him.

Of course, as the gentleman knows, I served a number of years with him on the Committee on Armed Services in the past. Then we had the misfortune of losing him to a higher calling. I have certainly been aware of the gentleman's interest in the Armed Services and those in uniform.

I would like to ask the gentleman this question: Would his amendment cut out the pay raises of any of our military people who are in uniform?

Mr. PIKE. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON. I yield to the gentleman from New York.

Mr. PIKE. Mr. Chairman, the answer is: No.

Mr. DICKINSON. Would that refer only to civilian personnel? Would that include only civilians with the Department of Defense? Do I understand that only civilians would be affected, but no one in uniform?

Mr. PIKE. The gentleman is correct.

Mr. DICKINSON. Mr. Chairman, I thank the gentleman.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I would like to ask the author of this amendment, the gentleman from New York (Mr. PIKE) a follow-up question to the question that was just addressed to him as to whether or not this would affect the pay of anyone in the military.

Would this amendment affect the pay of anyone?

Mr. PIKE. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from New York.

Mr. PIKE. Mr. Chairman, at the moment I would say to the gentleman that that is more up to him than it is up to me.

Mr. GIAIMO. No; I am asking the gentleman a question, Mr. Chairman.

If this amendment carries, will it in fact terminate the pay increases of any of the people who are designated in it, anybody at the executive levels, the supergrades, or the people in the Federal court system?

Mr. PIKE. At the moment it will reduce the budget by a certain amount of money.

Mr. GIAIMO. It will reduce the amount in the allowance function of the budget by the amount of $130 million. Is that not all it would do?

Mr. PIKE. In the allowance and in the defense function. The gentleman is correct.

Mr. GIAIMO. It will not do anything else; it will not cut anyone's salary or affect anyone's salary?

Mr. PIKE. Not per se, but once again, as I said yesterday, it is going to take a little effort by the gentleman from Connecticut with his cohorts in the Senate, and then it is going to take a little effort by the gentleman from Connecticut with his cohorts on the Committee on Appropriations in order to accomplish that.

Mr. GIAIMO. Mr. Chairman, I would remind the gentleman that this is my time. I have received his answer that this amendment per se—by itself—under our actions here today would have nothing to do with reducing or increasing or affecting anyone's pay.

In fact, all this amendment does is two things: One is very real, and one is what I might call very ephemeral. The real thing it does is it reduces the total budget by $130 million. What it portends to do is to give an impression to the American people that Congress has acted on its own pay raise as of last night and now on the pay raises of people in the judicial branch and at the executive levels of Government.

That is something this amendment does not do. It has no business in this budget resolution.

However, since this House in its wisdom last night saw fit to remove the moneys from this function to the tune of $7 million, hoping that in some way it could conceivably affect congressional salaries—which I submit it will not—I think we should be consistent. Therefore, let us include our conferees and our colleagues in the judicial branch and at the executive levels of Government, and let us put this word out to them: "Don't get too upset, because this amendment does not and cannot legally affect your salary increases."

Therefore, Mr. Chairman, since I think we should all be treated equally and fairly, I believe we should accept the gentleman's amendment.

PARLIAMENTARY INQUIRY

Mr. ICHORD. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. ICHORD. Mr. Chairman, as I state my parliamentary inquiry, I would appreciate it if I could have the attention of the gentleman from New York (Mr. PIKE), who offered the amendment.

I understand that the amendment offered by the gentleman from New York (Mr. PIKE) does touch upon the national defense category.

I am very deeply concerned, Mr. Chairman, because the gentleman from Texas (Mr. BURLESON) has an amendment which also touches upon the defense category and would restore the Presi-

dent's budget on national defense to $120.1 billion, as requested by President Carter.

My question is, Mr. Chairman, if this amendment is adopted, would the amendment of the gentleman from Texas (Mr. BURLESON) be in order?

The CHAIRMAN. The Chair would like to advise the gentleman from Missouri (Mr. ICHORD) that if the amendment offered by the gentleman from New York (Mr. PIKE) changes the figure in the category which the gentleman has suggested, then an amendment merely seeking to further change that figure in the same category would not be in order.

For the benefit of the gentleman from Missouri (Mr. ICHORD), the Chair would like to cite from page 721 of our new manual which provides as follows:

Where there is pending in the Committee of the Whole a perfecting amendment to a concurrent resolution on the budget changing several figures therein, the Chair indicated that adoption of that amendment would preclude further amendments merely changing those amended figures.

That is in answer to the gentleman's inquiry. Therefore, such an amendment as the gentleman has in mind would not be in order at that time.

However, if the amendment to be proposed and to be offered by the gentleman from Texas should be more inclusive in nature, changing other unamended portions of the resolution, then such an amendment might be in order.

Mr. ICHORD. Then, Mr. Chairman, I will ask the gentleman from Texas (Mr. BURLESON) to offer his amendment to the amendment offered by the gentleman from New York (Mr. PIKE).

AMENDMENT OFFERED BY MR. BURLESON OF TEXAS AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. PIKE

Mr. BURLESON of Texas. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. BURLESON of Texas as a substitute for the amendment offered by Mr. PIKE: On page 1, strike out "$500,757,000,000 and insert in lieu thereof "$504,907,000,000";

On page 2, line 2, strike out "$463,857,000,000" and insert in lieu thereof "$466,157,000,000";

On page 2, in line 5, strike out "$65,763,000,000" and insert in lieu thereof "$68,063,000,000";

On page 2, line 7, strike out "$792,093,000,000" and insert in lieu thereof "$794,393,000,000";

On page 2, line 9, strike out "$92,093,000,000" and insert in lieu thereof "$94,393,000,000";

On page 2, line 20, strike out "$115,986,000,000" and insert in lieu thereof "$120,136,000,000";

On page 2, line 21, strike out "$109,647,000,000" and insert in lieu thereof "$111,947,000,000".

Mr. BURLESON of Texas (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BURLESON of Texas. Mr. Chairman, for the benefit of those who may have a copy of the amendment which I am offering, the meaningful part is the last four lines. The other parts are with respect to the total adjusted figures, in case the amendment is accepted.

Mr. Chairman, no one should have any difficulty in understanding this amendment. It simply restores to the budget the President's recommendation for national defense. It would add $4.1 billion in budget authority and $2.3 billion in outlays to the amount recommended by our Committee on the Budget.

That figure, I hasten to point out, is $2.8 billion below the recommendation of the previous administration.

Opponents of this amendment will argue that the recommendation of the Committee on the Budget should be adopted since it represents a balanced response to overall national priority that was arrived at by the committee only after a comprehensive analysis of the requirements of each functional component of the budget. However, as members of the committee well know, in the area of national defense, no such analysis was ever conducted.

The Defense Task Force of the Committee on the Budget, on which I serve, held only three formal hearings of about 6 hours in all. It made no recommendation to the chairman nor to the Committee on the Budget. It had absolutely no input, and there was no discussion with respect to this matter.

On the basis of the chairman's recommendation, and only his recommendation, really, the level of $116 billion is included in this resolution for national defense and a narrow majority of the committee supported an additional reduction of $300 million. You will search in vain for any valid rationale for this action because there is none. The recommendation of the Committee on the Budget is totally inconsistent with recommendations of the congressional committees of the Congress which bear the primary responsibility for national defense. Without exception the House and the Senate Committees on Appropriations and the Committees on Armed Services of both Houses, recommended increases, not decreases in the defense budget, after extensive hearings. These conclusions were reached, covering days of study, line by line items. There was no such action in the Committee on the Budget. If we are compelled to completely ignore the recommendations of the responsible committees of this Congress and establish an arbitrary budget on defense, I fear for the integrity of this committee.

This resolution completely ignores the best advices, the most knowledgeable witnesses to come before the various committees on this vast and enormously important subject.

The simple truth of the matter is the proposed reductions in the defense budget have nothing to do with defense. They were manufactured because the committee wanted to find $4 billion somewhere in the budget to offset programs it wished to add.

The defense categories must be restored to what is actually required for national defense.

Mr. Chairman, the restoration of these funds in the resolution does not reflect any expertise on the part of OMAR BURLESON, but it does reflect the judgment of the President of the United States and the opinion of the Department of Defense, and the OMB.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. ICHORD, and by unanimous consent, Mr. BURLESON of Texas was allowed to proceed for 5 additional minutes.)

Mr. BURLESON of Texas. Mr. Chairman, let me call the attention of the committee to these figures:

President Carter recommended a budget for national defense of $120.1 billion. The House Committee on Armed Services recommends $120.9 billion. The Senate Committee on Armed Services recommends $121.3 billion; the House Committee on Appropriations, the same as that of the President; the Senate Committee on Appropriations recommends $121.7 billion; and the Senate Budget Committee, $120.6 billion. The Budget Committee comes up with $116 billion, an arbitrary figure simply plucked out of midair.

Mr. Chairman, with all due respect to my chairman of the Budget Committee, I simply am more willing to rely on the judgment of the expert witnesses before these many committees. To put it bluntly, Mr. Chairman, I am more willing to do that than I am to rely on his opinion and recommendations—solely his and really not too much of that of the committee, because, I repeat, the Task Force on the National Defense had no input into this resolution whatever.

Mr. Chairman, as some of the expertise, let me read to the Members a letter that I received yesterday from the Secretary of Defense addressed to me, dated April 26. I requested the letter from the Secretary, I might add. He did not do it on his own initiative, but he was aware that the amendment would be offered:

DEAR MR. BURLESON: I understand that you plan to propose an amendment to the First Concurrent Resolution on the FY 1978 Budget which would restore the Defense spending target to the level recommended by the President. This action coupled with your efforts in Committee to maintain this budget is appreciated.

As you are aware, the President's budget has had a thorough review which resulted in a reduction of $2.8B from the total obligational authority for FY 1978 proposed by the previous Administration. The resulting budget, submitted by the President in February of this year, was designed to insure required force modernization and to improve overall readiness and combat capability. In my view, the further Budget Committee reductions in the Defense function of $4.1B in Budget Authority and $2.3B in Outlays, would adversely affect our Defense posture. It would reverse our objective of a modest real growth in the Defense budget and instead produce a decline in the resources devoted to our security needs, at a time when I think this would be most unwise.

I consider the restoration of the Budget Resolution to the level proposed by the President to be necessary to our national security.

Sincerely,

HAROLD BROWN.

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. BURLESON of Texas. I yield to the gentleman from Missouri.

Mr. ICHORD. I thank the gentleman for yielding.

My understanding is that all the gentleman is seeking to do by this amendment is to restore the national defense level of spending to that requested by President Carter; is that correct?

Mr. BURLESON of Texas. That is correct.

Mr. ICHORD. It is my further understanding that President Carter has called the Speaker of this House and asked for a restoration. Is that the understanding also of the gentleman from Texas?

Mr. BURLESON of Texas. I understand that the President called the Speaker this morning—I was not privy to that conversation—recommending that the full amount recommended for national defense be restored to this resolution.

Mr. ICHORD. I commend the gentleman from Texas for offering this amendment.

Mr. BOB WILSON. Mr. Chairman, will the gentleman yield?

Mr. BURLESON of Texas. I yield to the gentleman from California.

Mr. BOB WILSON. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman from Texas is making a very important and commendable statement. I associate myself with his remarks. It is inconceivable to me that this House would adopt a budget resolution $4 billion below what the Senate Budget Committee, what the Senate Armed Services Committee, what the Senate Appropriations Committee, what the House Appropriations Committee, and what the House Armed Services Committee recommended. I fully support this substitute amendment.

I hope that our vote this week on the Department of Defense authorization bill for fiscal year 1978 is a bellwether of things to come. I am optimistic that Congress will continue to show concern for our status of forces and other defense issues. For the past decade there has been a steady decline in the purchasing power of the defense dollar; a more pronounced effect in purchasing power than in most other sectors of the economy. The situation has been aggravated by the tendency of the Congress to treat defense dollars as though they flowed from a bottomless well.

The stark reality is that the well began to dry up a number of years ago, as inflation and the rising costs of manpower and commodities drove the costs of weapons systems out of sight.

That is what we are faced with today. It is a costly proposition for the Congress to provide for the common defense of these United States. Nonetheless, the Congress is tasked with that responsibility. Something has to give. The time has come to reevaluate budget priorities and, to look at defense expenditures in their proper prospective. It will be a painful process, but we cannot afford to ever again, shortchange our military preparedness as we have tended to do in the past decade.

The national defense function of the first concurrent resolution on the budget contains two proposals which, if enacted, could have a devastating effect on large industrial type defense programs, particularly the shipbuilding program. The largest chunk of the approximately $4 billion cut in defense, which the House Budget Committee recommended, contains the following proposals.

The Budget Committee wants to take $1.3 billion out of "unexpended balances" and $1 billion out of "modernization and readiness". These proposals tear at the very guts of some of our most important programs. The effects of the proposals would counteract what the Congress adopted yesterday as the fiscal year 1978 defense bill.

"Unexpended balances" run high in the shipbuilding programs because of the very nature of that industrial operation. Warships are very expensive. When the Congress fully funds a ship, there is a lot of money obligated to pay for that ship. The Congress adopted the full-funding principle a number of years ago to lend a measure of stability to the industrial process. Otherwise, the entrepreneurs such as shipbuilders, aircraft and tank manufacturers, would not choose to invest the huge amounts of capital required to carry out such operations.

The Navy shipbuilding account is a full funded appropriation. Funds are appropriated for the full estimated cost of a ship in the year it is authorized. In building a ship, a great many things must be procurred from a large number of suppliers. Typically, ship-construction obligations run about 7 years. These obligations are earmarked for things such as the detail design contract, construction contract escalation payments, construction contract change orders, government furnished equipment and material, and a small project-manager's reserve to allow for unforeseen contingencies. A typical scale of expenditures would show about 58 percent of the funds obligated during the first year of the contract, followed by 11 percent the next 2 years, 9 percent the fourth year, 5 percent the fifth year and 3 percent the sixth and seventh years.

A ship's project manager must estimate fund requirements based upon projected contract award dates. To assure himself that funds are released and available to cover any contract awards which should occur, his plan must be adequately conservative. Hence, the "unexpended balances" might appear to be money just laying around doing nothing. I think you can readily surmize what havoc would occur to the naval shipbuilding program if these unobligated balances were suddenly jerked out from under the project managers control. Yet this could be the practical effect of the Budget Committee proposal, to take $1.3 billion out of "unexpended balances" in the defense function.

The first budget resolution also calls for a slowdown in "modernization and readiness" expenditures. That is exactly what we cannot afford to do in the shipbuilding program. The Budget Committee would reduce funding for modernization and readiness by $1 billion in budget authority. Such action, if implemented, would severely impact on fleet readiness.

An important part of the overall naval shipbuilding program includes modernization and improved readiness for older naval vessels. Our new shipbuilding program, as you well know from the Armed Services Committee Report to the Congress, is far below what this country ought to have in order to attain the naval forces structure the Joint Chiefs of Staff and the Chief of Naval Operations estimates we should have in the 1980's. We are going to have to rely on some of our older ships to fill the gaps in naval force structure.

This year, the Armed Services Committee recommended authorization of $94.5 million for advanced procurement funds for modernization of the Charles F. Adams—DDG–2—class, guided missile destroyers. These funds will be used to upgrade the first 6 of 23 ships in this class with the Standard ARM, surface-to-air missile, and Harpoon, a long-range surface-to-surface, antiship missile. This is a very important program designed to balance fleet weapons capability.

One of the most vital modernization and readiness programs is coming up. This involves a service life extension program, the so-called SLEP, for our aging aircraft carriers. Any move to divert modernization and readiness away from that program would be disastrous. This is particularly true since the Congress recently denied funds for the Navy's replacement carrier program. This Nation cannot afford a $1 billion cut in modernization and readiness funds for the Armed Forces.

As I said earlier, I think it's high time that the Congress looked toward other, and in my estimation, more lucrative areas to capture dollars for needy programs. We throw a lot of money down the drain on programs which have long ago gotten out of hand and over which there is not anywhere near the oversight we give to defense expenditures. How much time do we spend on the Floor of Congress in debate over HEW or Agriculture expenditures, the food stamps program, and revenue sharing? When was the last time we spent 2 or 3 days going over those programs as we do defense programs?

I firmly believe that the budget recommendations for a $4 billion cut in the national defense function of the first budget resolution for fiscal year 1978 is out-of-step with the realities of defense expenditures. Apparently the majority of the Congress agrees with me. So does public opinion. The public opinion polls of recent years have consistently shown that Americans are willing to spend more dollars for strong and effective Armed Forces. I urge my colleagues to support amendments to House Concurrent Resolution 195 to restore to the budget for fiscal year 1978 the funds truly required for national defense.

Mr. BURLESON of Texas. I thank my colleague from California for his contribution and support for my amendment.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. BURLESON of Texas. I yield to the gentleman from Ohio.

Mr. LATTA. I thank the gentleman for yielding.

I asked the gentleman to yield to clarify one thing and to ask him a question.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. BURLESON of Texas was allowed to proceed for 2 additional minutes.)

Mr. LATTA. If the gentleman would yield, I should like to ask the question whether or not this puts all the money back as requested by President Carter. I think the gentleman answered in the affirmative. The figure I have on the Carter budget as of the OMB April 22 update was a figure higher than this—$112.8 billion in outlays. The figure the Pentagon and the Secretary of Defense have agreed upon is a figure almost $1 billion less than that estimated by OMB for President Carter on the 22d of April.

I am pointing this out only to clarify the record. I fully intend to support the gentleman's amendment. As a matter of fact, when I propose the Republican substitute later in the day, we will use the exact figure the gentleman in the well is proposing to the House.

Mr. BURLESON of Texas. I thank the gentleman. The recommendation of the Carter administration is $20.1 billion. This sum is requested by the Defense Department as a level necessary for the security of our Nation. I ask your support of my amendment.

AMENDMENT OFFERED BY MR. JOHN L. BURTON TO THE AMENDMENT OFFERED BY MR. PIKE

Mr. JOHN L. BURTON. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. JOHN L. BURTON to the amendment offered by Mr. PIKE: On page 1, line 11, strike out "$500,757,000,000" and insert in lieu thereof "$492,807,000,000";

On page 2, line 2, strike out "$463,857,000,000" and insert in lieu thereof "$463,807,000,000";

On page 2, line 5, strike out "65,763,000,000" and insert in lieu thereof "$65,713,000,000";

On page 2, line 7, strike out "$792,093,000,000" and insert in lieu thereof "$792,043,000,000";

On page 2, line 9, strike out "$92,093,000,000" and insert in lieu thereof "$92,043,000,000";

On page 2, line 20, strike out "$115,986,000,000" and insert in lieu thereof "$108,036,000,000";

On page 2, line 21, strike out "$109,647,000,000" and insert in lieu thereof "$101,697,000,000."

Mr. JOHN L. BURTON (during the reading). Mr. Chairman, I ask unanimous consent that the reading of the amendment be dispensed with and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. ICHORD. Mr. Chairman, I reserve the right to object.

Mr. JOHN L. BURTON. I will explain it.

Mr. ICHORD. Mr. Chairman, reserving the right to object, I would like to ask the gentleman, what does this amendment do?

Mr. JOHN L. BURTON. I will explain it.

Mr. ICHORD. How long is it?

Mr. JOHN L. BURTON. The amendment would transfer $7.95 billion from the military budget and use it to retire the national debt, and rather than have the Clerk read the amendment and go through the whole series, I ask unanimous consent to have it considered as read.

Mr. ICHORD. Mr. Chairman, I withdraw my reservation of objection, and I reserve a point of order on the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The gentleman from Missouri (Mr. ICHORD) reserves a point of order on the amendment.

Mr. JOHN L. BURTON. Mr. Chairman, the amendment provides for a reduction of the military debt by $7.95 billion and transfers that to the national debt. I have spent some time looking at the national debt and some time looking at the words of our first great Secretary of Treasury, Alexander Hamilton, and it is enough to curl one's hair. The Secretary of the Treasury Alexander Hamilton in reporting to the Congress said:

> And as the vicissitudes of nations beget a perpetual tendency to the accumulation of debt, there ought to be in every government a perpetual, anxious, and unceasing effort to reduce that which at any time exists, as fast as shall be practicable, consistently with integrity and good faith.

And as Secretary Hamilton further states:

> Nothing can more interest the national credit and prosperity than a constant and systematic attention to husband all the means previously possessed for extinguishing the present debt, and to avoid, as much as possible, the incurring any new debt.

But at the time Secretary Hamilton made this speech, he found that because of the war with the Indians it was such a drain on the budget that we did not have sufficient revenues to retire the debt.

Now when we go home we can talk about this and we can talk about that and we can talk about fiscal integrity. Although this is not an election year, it still may be a very difficult vote because the people might remember it. They might remember that we voted to reduce the national debt. But I say we are here as servants of the people and there comes a time when we have to take the heat, and I am willing to go back to my constituents and stand before them and say we are right.

I offer an amendment for the first time in I do not know how many years to reduce the national debt. My colleagues on this side of the aisle always talk about it. I am giving them a chance now, 19 other people willing, to vote on it. There is enough money in the military budget left over and in the pipeline to absorb this without in any way detracting from our defense capability. I believe we should remember the admonition of Alexander Hamilton when we vote.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, do I understand that the gentleman's proposal is to take all of the money which will be utilized to reduce the debt, which I certainly favor, from the national defense function category?

Mr. JOHN L. BURTON. That is the only one we found out will not have an adverse effect on local property taxpayers throughout the Nation.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield further, I really do not know how it is decided that the national defense expenditure is the only one that relates to property taxes. I would be glad to see that advocated.

Mr. JOHN L. BURTON. Mr. Chairman, I do not have enough time to yield further.

Mr. ROUSSELOT. I would be glad to get the gentleman extra time if the gentleman will explain how the expenditures at the Federal level for national defense are the only expenditures that relate to property taxes at the local level and that the fraud in medicare, the fraud in the food stamp program and many other areas now being brought out, does not also relate to property taxes.

Mr. JOHN L. BURTON. Mr. Chairman, I agree with the gentleman and I hope the gentleman is so concerned in this area that the gentleman might support the Renegotiations Board. If we reduce the contribution to the States for medicare, we increase the burden to the States for medicare.

If we reduce aid to education, it places the burden on the homeowner and the ad valorem taxpayer.

As I understand it, $7.95 billion would not adversely affect the defense of this great Nation. We have an overkill capacity of some 125 in nuclear weapons and I think would be a sufficient deterrent from attack by a foreign power.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield further?

Mr. JOHN L. BURTON. I yield to the gentleman.

Mr. ROUSSELOT. The gentleman can find no other areas in the functional categories where there is excessive spending? He can only find excessive outlays in national defense? I favor the reduction of the debt and I rise to tell my colleague from California that I support that concept and I hope the gentleman will continue to insist on the idea that we utilize part of our revenues to reduce the debt, whether it is $7 billion or $5 billion.

The CHAIRMAN. The time of the gentleman from California (Mr. JOHN L. BURTON) has expired.

(At the request of Mr. ROUSSELOT, and by unanimous consent, Mr. JOHN L. BURTON was allowed to proceed for an additional 2 minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield further?

Mr. JOHN L. BURTON. I yield to the gentleman.

Mr. ROUSSELOT. But I cannot believe the gentleman was not able to find waste in other functional categories like he suggests he has found in the defense

function. How about foreign aid? Can we not reduce it in foreign aid?

Mr. JOHN L. BURTON. That is a point when I discussed the issue earlier. I wish the gentleman would have made that suggestion. Seventy-five percent of the national debt is war related.

I just would like to state, this is back on December 3, 1792:

The estimates which accompany the report of the Secretary, of the 14th ins., will show that, during the continuance of the present Indian War, the appropriations for interest and the demands for current services are likely to exhaust the production of existing revenue.

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, I hope we pay close attention to the words of wisdom of the gentleman from California (Mr. BURTON). If we had listened to the gentleman about the march of retrieving American's gold bars from our Indochinese allies at the end of the war, we would perhaps not need this amendment today.

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from Missouri.

Mr. ICHORD. Mr. Chairman, with great respect and confidence for the gentleman from California, but not for the gentleman's amendment, I withdraw my point of order.

The CHAIRMAN. The point of order is withdrawn.

Mr. JOHN L. BURTON. Mr. Chairman, in closing, I would say this is a vote to reduce the national debt, but I am willing to stand up and be counted and ask for a "aye" vote.

AMENDMENT OFFERED BY MR. WRIGHT TO THE AMENDMENT OFFERED BY MR. BURLESON OF TEXAS AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. PIKE

Mr. WRIGHT. Mr. Chairman, I offer an amendment to the amendment offered as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. WRIGHT to the amendment offered by Mr. BURLESON of Texas as a substitute for the amendment offered by Mr. PIKE: On page 1, line 11, strike out "$504,907,000,000" and insert in lieu thereof "$501,757,000,000";

On page 2, line 2, strike out "$466,157,000,000" and insert in lieu thereof "$464,057,000,000";

On page 2, line 5, strike out "$68,063,000,000" and insert in lieu thereof "$65,963,000,000";

On page 2, line 7, strike out "$794,393,000,000" and insert in lieu thereof "$792,293,000,000."

On page 2, line 9, strike out "$94,393,000,000" and insert in lieu thereof "$92,293,000,000."

On page 2, line 20, strike out "$120,136,000,000" and insert in lieu thereof "$116,986,000,000";

On page 2, line 21, strike out "$111,947,000,000" and insert in lieu thereof "$109,847,000,000."

Mr. WRIGHT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WRIGHT. Mr. Chairman, here is the parliamentary situation. The gentleman from New York (Mr. PIKE) has offered an amendment to reduce expenditures by some $130 million, having to do with pay in the executive and judicial branches of Government.

There is an amendment to that pending. That amendment offered by the gentleman from California (Mr. JOHN L. BURTON), which would reduce expenditures by some $7.9 billion, almost $8 billion, to our military expenditures.

There is a further amendment pending that would increase military expenditures by approximately $4 billion, to bring it back to the President's total budget request. The President requested approximately $120 billion to be spent on the military. The Budget Committee reduced that to approximately $116 billion. The Budget Committee cut some $4 billion below the President's budget request. I am advised that in the Senate the Budget Committe has reported a bill which is approximately the same as the President's request of $120 billion.

Now, it seems to me that we need to find reasonable ground on which reasonable people can agree. Perhaps we have cut a little too much, considering the situation in the world today. I do not see any reason, however, why the House must of necessity accept the figure of $120 billion just because the President has sent it up here. Otherwise, why should we have a Budget Committee?

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. Well, if the gentleman will give me some time, when I get through I will yield to the gentleman for colloquy, and I will be delighted to talk with him about it, because my judgment is not infallible in this area, certainly.

Here is where the Budget Committee can establish a national defense spending target, recommending reductions in three broad areas.

First, the Budget Committee recommends financial adjustments which do not have any direct impact on defense programs. Second, it recommends reductions in personnel and compensation policy. Third, it recommends reductions in the level of defense purchases to operate and modernize our forces.

Now, my amendment would restore $1 billion, which would bring only that section, the procurement section, the weaponry section, the sinew section, to what the President has requested. It would allow to stand some $3 billion in cuts which have been recommended by the Budget Committee in the areas of financial adjustments and personnel and compensation policy reforms.

It does seem to me, however, having talked with Secretary Brown and with President Carter as recently as today, that it is extremely important for us not to cut the sinew, not to cut the weaponry, not to cut the muscle of our Defense Establishment at a time when the Soviet Union is increasing its defense capabilities.

I believe I can say that the President and the Secretary of Defense are concerned that if the House takes the position of reducing actual weaponry procurement at this particular time, it weakens us in our attempts to achieve a meaningful arms reduction and arms limitation agreement through the procedure of the SALT talks.

Therefore, it seems plausible to me that the House would perform a service, and at the same time retain its credibility and its independence of judgment, by accepting the cuts which the Budget Committee has recommended in these somewhat more esoteric areas, but in restoring the amounts which the President of the United States has requested in purchases and equipment.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(On request of Mr. ICHORD and by unanimous consent Mr. WRIGHT was allowed to proceed for 5 additional minutes.)

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. Yes, of course I do yield to my friend, for whose judgment I have great respect, and in whose friendship I revel.

Mr. ICHORD. I thank my distinguished majority floor leader for yielding to me. I do not have the eloquence or the effectiveness of our distinguished majority floor leader, but he asked the rhetorical question in his presentation, "Why have the Budget Committee?"

I could ask the same rhetorical question, "Why have a House Armed Services Committee?"

I would point out to the gentleman that in the Committee on the Budget we had amendments offered, even, for example, cutting out the B–1 bomber.

But if the gentleman may reply to this, is not the amount requested by Mr. BURLESON reasonable? The House Armed Services Committee recommended $120.9 billion. President Carter only requested $120.1 billion.

Let me give the figures. President Ford requested $122 billion. President Carter, in the campaign, said he wanted to reduce military expenditures $5 billion. He could not do it, I am sure, out of good conscience, because of what is going on in the SALT talks at the present time. He only reduced the defense budget to $120.1 billion.

The House Armed Services Committee, $120.9 billion; the Senate Armed Services Committee, $121.3 billion; the Senate Appropriations Committee, $121.7 billion; the House budget, a measly $116 billion; and Senate budget, $120.6 billion.

Why have the House Armed Services Committee? Let us abolish it. Let the Budget Committee do everything.

Mr. WRIGHT. Mr. Chairman, I appreciate the comments the gentleman has made. Let me respond to the question, if a question there was, posed in the nature of a commentary by the gentleman from Missouri (Mr. ICHORD).

Certainly, I have great respect for the House Armed Services Committee. I think in it reposes the responsibility of questions of military policy. I do think

the House budget process is a very important process.

If we are to have a House budget process, then I think we must make some judgments of our own rather than simply adopting figures submitted by the administrative branch of Government.

There is nothing magic about the figure I have offered. It is simply an effort to achieve some modicum of understanding among us. All of us want an adequate defense. Perhaps, as we go to conference with the other body, it will move upward toward our figure.

But at the same time, I think all of us want a vehicle that the majority of us can support when we come to passage of a final resolution on the budget. That is why I have offered this particular amendment, so that we can add back $1 billion for weapons and for procurement, for sinew, for muscle to strengthen ourselves.

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. Mr. Chairman, I will first yield to the gentlewoman from Maryland (Mrs. HOLT), and then I will yield to the gentleman from California Mr. DELLUMS).

Mrs. HOLT. I thank the gentleman for yielding.

Mr. Chairman, I would like to ask a question of the very distinguished majority leader and member of our Budget Committee. The gentleman sat through all of our hearings and all of our deliberations. The gentleman says that we took out three areas. Is it not true that it would be absolutely impossible to effect any personnel saving, which is one of those categories the gentleman mentioned, in fiscal year 1978, without drastically reducing civilian Government jobs? And is it also true that we would have to pass legislation, such as wage board reform, to effect that?

And let me ask one further part of that three-part section that the gentleman divided the budget into. As far as the financial transaction, the unexpended balances, the unobligated balances, did we not go over that in both years that we have served on that Budget Committee and discovered that that is long lead-time funding, that it is absolutely necessary if we are going to have full funding on our weapons systems, that we cannot play with that figure completely, it cannot be deducted?

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(By unanimous consent, Mr. WRIGHT was allowed to proceed for 1 additional minute.)

Mr. WRIGHT. Mr. Chairman, I appreciate the question asked by the gentlewoman from Maryland (Mrs. HOLT), and as the gentlewoman knows, I have worked with her on several occasions in respect to these matters.

At the risk of oversimplification, let me simply say to the gentlewoman that I think we do have too many generals and too many admirals, but I do not think we have too many airplanes and too many battleships. That is about where I stand generally on that issue.

Mrs. HOLT. As to the matter of civilian personnel, I wonder if the gentleman would respond to that part of the question?

Mr. WRIGHT. Mr. Chairman, my time is growing short, and I have promised to yield to the gentleman from California (Mr. DELLUMS).

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has again expired.

(On request of Mr. DELLUMS and by unanimous consent, Mr. WRIGHT was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield to me?

Mr. WRIGHT. Of course, I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I thank the distinguished majority leader for yielding.

In the gentleman's opening statement, both explaining and justifying his amendment, he indicated that the Soviet Union is increasing its defensive capabilty. That is one of the important points that the gentleman mentioned to justify support for the amendment.

I would like to offer a comment to the gentleman, and I hope he will respond in terms of whether this might change his thinking.

Several Members over the last few days have raised that same issue, that the Soviet Union is increasing its defensive capability, as if the only two nations in the world are the Soviet Union and the United States. I would submit that the Soviet Union has one other potential enemy that the United States at this moment does not have. The Sino-Soviet conflict has been going on for years. Many experts have indicated that if the Soviets went to war, the probability, as between their going to war against the United States or China, in their estimation, would be that they would more than likely go to war with China.

So if the Soviet Union is indeed increasing its defensive capability, that does not have to be totally a defensive move against the United States, but it may be a defensive move as it relates to mainland China, a nation that the Soviets have been in conflict with for a long time.

The point I am trying to make is simply that I think we have become overly fearful and overly paranoid about every move the Soviet Union makes when it is clear that the Soviet Union has an enemy on its border that it has struggled with and been in conflict with for many years. If they are increasing their defensive capability, it may be because their defensive problems are more immediate than the defensive problems of the United States.

Mr. Chairman, would the gentleman respond to that in terms of whether that would be a justification for not supporting the gentleman's amendment?

Mr. WRIGHT. Mr. Chairman, I will try to respond in the remaining time that the gentleman so graciously secured for me.

I would just have to say that attempting to fathom the intentions of the Soviet Union or the Sino bloc is a bit beyond me at this time. Both of them would have to be described, I think, in the terms in which Winston Churchill once described Russia when he said that Russia was "a riddle wrapped in a mystery buried in an enigma."

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has again expired.

(On request of Mr. DAN DANIEL and by unanimous consent, Mr. WRIGHT was allowed to proceed for 2 additional minutes.)

Mr. WRIGHT. Mr. Chairman, if I may proceed, I would simply like to suggest to my friend, the gentleman from California (Mr. DELLUMS), that I want very much for the arms reduction and limitation talks to succeed. I believe that President Carter and his negotiators are dedicated to a successful conclusion of those talks. Ultimately they should bring about a reduction in forces across the board and a reduction in the mutual balance of terror that exists in the world.

However, I do believe—and I think the President is concerned about this, and perhaps rightly so—that at this time we dare not unilaterally reduce our actual weaponry procurement for fear that in so doing it would weaken us in our attempts to achieve a meaningful, balanced mutual reduction in arms.

Mr. Chairman, that is about the best answer I can give.

Mr. DAN DANIEL. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. Of course, I yield to the gentleman from Virginia.

Mr. DAN DANIEL. Mr. Chairman, the gentleman in the well made a very profound wish, a moment ago when he said that he hoped that SALT would be successful. I think all of us do.

But the only way that those talks can be successful is if we negotiate from a position of strength.

What I rose to say at the beginning was that the gentleman from Missouri (Mr. ICHORD) enumerated the ceilings which various standing committees had established for national defense, in addition I am informed now that the Senate Committee on Armed Services has today added A-7's and also the nonnuclear lance. I do not know what the cost is, but the result is more money. This also must be taken into account.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, because of a very peculiar parliamentary situation in which the Burleson amendment was tacked onto the Pike amendment, I find myself in a very threatened position because some votes will occur prior to my having an opporutnity to present a transfer amendment, with which I think most Members of the House are familiar.

Mr. Chairman, I want to oppose, with reluctance, the distinguished majority leader.

Let me first deal with the argument

about defense spending and the SALT talks.

First, I would point out that on April 20 of this year, I inserted into the CONGRESSIONAL RECORD a point-by-point rebuttal of the argument that we have to increase our defense spending because of the alleged breakdown of the SALT talks. If the Members of this House have read the newspapers, they know that the SALT negotiations have not broken down and that, indeed, the President is, as of this day, preparing to resume those talks.

The argument is made that a larger military budget will signal the Soviet Union that it either must accept the proposals that we offer or face an enlarged military threat.

Mr. Chairman, that just does not make sense. If anybody has followed the negotiations between the United States and the Soviet Union, he will know that neither the Soviet Union nor any other major power that has existed since the birth of America can be coerced in that way.

Mr. Chairman, no enlarged defense spending is going to coerce any nation to back down. That has just never happened in history. To rebut that argument advanced by the distinguished majority leader, I refer the Members to the CONGRESSIONAL RECORD of April 20 where we make a specific rebuttal.

Mr. Chairman, let me deal with the amendment of the majority leader in terms of a compromise and what it seeks to compromise. It seeks to compromise the difference between the President's request, the requests of some committees of the House, and what the Committee on the Budget has proposed.

Those experts, Mr. Chairman, those experts on whom the House committees depend are the members of the Department of Defense establishment. They are always going to come in asking for more and bigger sums, on and on and on. It just does not make sense from their point of view for them to do otherwise.

However, Mr. Chairman, for some of us who have looked at the Defense Department spending and who have examined present policies, there are some things we ought examine. In my own transfer amendment I simply made some suggestions as to where reductions could be made. These are merely suggestions.

Mr. Chairman, we cannot mandate a line-by-line budget cut. Let me just briefly, in the time that I have, discuss where we suggest some of those cuts can be made.

For example, it is simply logical and sensible to look at the cancellation of the F–18 program because the Department of Defense itself considers this to be a very, very controversial effort.

As of this moment it is undergoing extensive reevaluation, and it may well be that this is going to be scrapped anyway. Why not, as of this time, while we are undergoing this further reevaluation by the Department of Defense, cancel it at least on a temporary basis?

Mr. Chairman, I would also suggest that we slow down production of the F–18. That could be accomplished by slowing it down from 105 to 60.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. MITCHELL of Maryland was allowed to proceed for 5 additional minutes.)

Mr. MITCHELL of Maryland. Mr. Chairman, the reason I would recommend slowing down the production of the F–18 is again based on actions being taken by the Department of Defense right now and the pattern it has followed in terms of procurement. On this particular weapons system the Department of Defense has come in at an extremely high initial buy rate. Historically it has come in at a buy rate of somewhere between 3 to 5 weapons in a month, but on this one they have come in with a buy rate which is almost 5 times as great as the normal average buy rate. This is an area where cuts can be made.

There was a great deal of discussion about reducing the level of troops. I included that as one of my recommendations in the transfer amendment. The Department of Defense is looking at this itself. If the Members will read the material that comes across their desks it would indicate to them that the DOD is now in the process of examining bases and the utilization of bases, with the end object of reducing the number of bases. That means a reduction in personnel and that means a subsequent reduction across the board. It is obvious that here is an area where we could consider some cuts.

I thank the chairman of the committee for attempting to obtain order in the committee but I think the lack of order reflects the feeling on the part of a large number of the Members that what the military wants it is going to get anyway whether it needs it or not, so that they do not even have to listen to anyone who is discussing any other approaches. So, Mr. Chairman, do not try too hard to obtain order because you are just bucking the power of the military, as it wields its might in this House.

I would repeat: Do not try too hard, nobody truly bucks the military or talks back to it in its wants and thus we have difficulty in getting the House to listen to somebody who wants to try to talk back to the military for a change.

Mr. Chairman, the amendment that I would have proposed, would phase out the air defense aircraft, that is the AF–106. If the Members would read the material coming from the Department of Defense, they would see that there are plans now to phase out the old AF–106 because it does not do the job.

We would recommend that the proposed Trident submarine, the procurement of that submarine, be reduced. We do that for a very simple reason. That is that in the shipyards where the Trident is to be constructed, there is a 7-year backlog—7 years. So if we cut down there just a little bit we will not be hurting our national posture at all.

In conclusion, in explaining my proposed cuts, let me point out that the annual sum of unobligated funds—and that is $72 billion—is too big for us to spend in the next 20 years. But if we proceed as the distinguished majority leader has suggested, or even if we proceed in voting or recommending what the Committee on the Budget suggests, what we are going to do is just pour some more money into those unobligated funds, and we will have once again increased that amount and increased the number of years before we can spend it.

The most demonstrable piece of evidence that I think of it is the fact that last year we overloaded the military. We overloaded the DOD based upon the request of the experts; and there was a $15-billion shortfall in spending. Again this year—again this year—there are predictions that the shortfall in spending will be just as great, if not greater than it was last year. In the name of God, what kind of sense does it make to accept either the Burleson amendment or the amendment offered by the distinguished majority leader, when the facts and logic make it clear that these are not needed amendments?

Mr. Chairman, I would urge that we oppose the majority leader's amendment.

Mr. LEGGETT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, we have indicated a number of times that the first budget resolution at this point prior to the time that we are moving on the authorization bills and the appropriation bills is merely a target resolution. There is no point of order that lies for violation of these targets, and so we are not in conflict with the Committee on Armed Services. The Committee on Armed Services, of which I am a member, brought the bill to the floor the other day, resisted all amendments effectively, and effectively passed with strong support a $35-billion authorization bill for procurement of miscellaneous items and R.D.T. & E. They did cut research by three-quarters of $1 billion, which essentially was at the discretion of the chairman of the Research Subcommittee. Everybody has some input on overall national defense. We all start from a different framework.

My colleague, the gentleman from Maryland (Mr. MITCHELL,) would like to cut defense $12 billion in his transfer amendment and transfer that into miscellaneous domestic programs. We have the minitransfer amendment of my colleague, the gentleman from California (Mr. JOHN L. BURTON), to transfer $8 billion out of defense and put that into reduction of the national debt. We have got the majority leader, who would add $200 million to the outlay figure suggested by the Budget Committee, and add a billion dollars to the budget authority amount. We have the President of the United States, who has acted on the prior Ford budget, who reduced the budget authority by $2.8 billion and outlays by $400 million. The chairman of our committee has started from the $120 billion program. The chairman of the full committee, the Budget Committee, has taken a look at President Carter's budget, and as Carter did not rubberstamp Ford, so Chairman GIAIMO did not rubberstamp Carter, and then the committee worked its will on these estimates.

I am the chairman of the defense task

force. We did not have enough time to work on these estimates as diligently as we would have liked this year, but we have looked at these concepts in past years, and we know that there is nothing magic in a particular number. It is all in what we want to relate to.

If we want to take the target of the committee which was $116 billion, that is $4 billion below the President's budget authority number, but it is $7.1 billion above last year's program, or an increase of almost 7 percent. As far as the outlay number of $109.6 billion, which is the target number we are talking about, that is $2.3 billion below the President's number of $111.9 billion.

But the number is $9.5 billion over the $100 billion we had for outlays in national defense last year. Our figures do not affect the B–1 bomber; they do not affect the MX program; they do not affect the carriers; they do not affect the F–14; they do not affect the F–15, F–16, or F–18; they do not affect the SALT talks; they do not relate to line items.

All we say is that we have got 52 percent, some $61 billions in the budget related to personnel. Everybody is concerned that we are spending too much on personnel, so we reduced that estimate by 1½ percent, and it comes out to a reduction of about $600 million in outlays. That is not mandatory. That is a target.

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent, Mr. LEGGETT was allowed to proceed for 5 additional minutes.)

Mr. LEGGETT. Mr. Chairman, we have looked at overall purchases in the Department of Defense, and these are purchases that occur in research and development, in procurement, and in operations and maintenance accounts. We thought that a rate of escalation of around 7 percent ought to be enough to maintain purchasing power. This resulted in a rate of real growth of 6 percent or $3.5 million. We have recommended a reduction there of $1 billion, leaving a growth rate of almost 5 percent. That is a $1 billion reduction in general purchases, but we allowed for a further $500 million increase in the area of purchases for major weapon systems.

We also looked at the overall spending program of unobligated and unexpended balances. As I indicated in general debate this number has increased dramatically. These are now estimated to reach over $72 billion by 1978. For the fiscal year 1976 we had a $4.4 billion shortfall in outlays. The projections are we will have a shortfall again for next year.

As a result, in this area, the chairman suggested $1 billion be proposed for transfer from prior year balances to fiscal year 1978. By a majority vote in the committee this was raised to $1.3 billion.

So these numbers are a little bit tangential to the numbers that the Armed Services Committee is used to considering. I would point out the Armed Services Committee view of the budget as presented to our committee related to several parts of the budget over which they have no direct responsibility.

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. LEGGETT. I yield to the gentlewoman from Maryland.

Mrs. HOLT. Mr. Chairman, I thank the chairman of our Task Force on National Security for yielding to me.

I just want to make the point perfectly clear about the purpose of the task force. As I understood it last year, I served on the Budget Committee, and the Task Force on National Security, and the gentleman from Connecticut (Mr. GIAIMO) was chairman of our subcommittee at that time. We had extensive hearings and discussed all the testimony we heard and we made recommendations to the chairman of the full committee.

Those recommendations were considered in the chairman's mark. Was any such procedure following this year?

Mr. LEGGETT. The gentlewoman knows exactly the procedure that was followed this year. As everyone knows, we were confronted, not by a transition quarter, but by the third budget resolution.

Mrs. HOLT. There was no recommendation?

Mr. LEGGETT. The procedures required us to act on the new President's recommendation on rescission bills to cut the fourth nuclear carrier and conversion of the U.S.S. *Long Beach*. This, along with our work on the third budget resolution for fiscal year 1977. This limited the time available for work on the fiscal year 1978 budget.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. LEGGETT. I yield to the gentleman from Connecticut.

Mr. GIAIMO. Mr. Chairman, I think we ought to make this point clear, because there is a great deal of talk in the Chamber about what task forces do and do not do. I think we should make it eminently clear that we do not have subcommittees on the Budget Committee. Our task forces do not act as subcommittees. Task forces apply themselves to studying long-range trends and problems, so that the members of the task force can have a more meaningful participation in the full committee where everything is done. Things are not done in the Budget Committee in subcommittees, as they are in the other committees of this House. In the Budget Committee, all matters are debated and discussed and decisions made in the full committee.

Our task forces are assigned particular jobs. For example, to study long-range problems in defense; or to study the projections of our budget over a 5-year period. But substantive issues are decided in the full committee.

Now, how do we start? It is not the chairman's decision that controls the committee's budgetary decisions. But we have to have a starting point.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. GIAIMO, and by unanimous consent, Mr. LEGGETT was allowed to proceed for an additional 5 minutes.)

Mr. GIAIMO. Mr. Chairman, will the gentleman yield further?

Mr. LEGGETT. Certainly, I yield to the gentleman.

Mr. GIAIMO. Mr. Chairman, what happens is that we start with a benchmark, or a chairman's mark that is a recommended figure in each function. In the national defense function, this is developed by the chairman in constant work with the staff experts in the defense function area. As the gentlewoman from Maryland knows, we study the recommendations which are made to us and also call upon our past year's experience with the task force. We then come up with a recommendation or a benchmark figure to start with. That is then discussed and marked up in the committee. We have a full discussion, not of line items, but of budget priorities involved, how much of our total dollar budget should be allocated to defense and to other budget categories. That is how we proceed.

So let us understand clearly, this fictitious argument that the task forces did not have time to make recommendations to the committee. That is not so and that is not the function of the task forces. The function of task forces is to give Members of the committee greater expertise, so that they can participate more meaningfully in the full committee deliberations.

Mr. LEGGETT. Mr. Chairman, I would state that I do intend that our task forces be more than a conversation piece. I do intend that it will have some muscle, that we look into some major expenditure issues and come up with some conclusions and make recommendations to the full committee.

Obviously, we did not have a chance to do this this year.

The question was asked, "Is there any weakness in our estimates relating to personnel and will it result in personnel cuts?" The answer is "No," because, after we submitted these numbers, OMB came in and reestimated what we would be spending for personnel in fiscal year 1978. The revised estimate reduces the current estimate by $500 million in outlays, which is more than 80 percent of our target of $600 million. So these numbers do fluctuate and there will be changes between now and the second budget resolution.

There has been some thought that we have cut too deeply into the inflation requested for operating accounts, because we only allowed $500 million instead of $1.1 billion estimated by the Department of Defense. We cannot control those numbers exactly. But if our assumptions are accurate, we think it will be down near $500 million in fiscal year 1978.

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. LEGGETT. I yield to the gentlewoman from Maryland.

Mrs. HOLT. The gentleman is saying, then, that it would require drastic reductions in civilian jobs if we stuck to this figure.

Mr. LEGGETT. What I am saying is that it would not, because OMB itself has estimated that the current operating budget of the Department of Defense will not use $500 million of the projected

funds they thought they would need in fiscal year 1978.

I would go back again and reiterate the bottom line number: The outlays, which are the dollars expended in fiscal year 1978, are 9½ percent higher, $9.5 billion higher than the amounts that we are spending this year. This is an increase, not a decrease.

I think we ought to defeat all amendments and we ought to stay with the committee recommendation. I think we have done a good job, and we will see on the second budget resolution how far we have missed the target.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. LEGGETT. I yield to the gentleman from Illinois.

Mr. SIMON. If I may just add one point: the gentleman's point that we have, in fact, increased expenditures 6.6 percent should be backed up by two other figures. I have just roughly calculated them. People are pointing out that the House Armed Services Committee has been cut back from its estimate. In fact, the estimates from the House Armed Services Committee have been cut back 15.6 percent, while the average committee estimate has been cut back 25.1 percent. The Budget Committee has been responsible and the House should back our cuts.

Mr. OBEY. Mr. Chairman, I move to strike the last word, and I rise to oppose the amendment.

Mr. Chairman, before I proceed, I would like to ask the chairman of the Budget Committee a question. It has been alleged at least twice on the floor that the action of the Budget Committee has, in fact, accomplished reductions in weapons purchases. I would like to ask the chairman whether, in fact, there is any significant reduction in weapons purchases in the cut made by the Budget Committee.

Mr. GIAIMO. If the gentleman will yield, he will recall now that we are setting the total, overall dollar figure for the defense budget, so that we do not say where these moneys go. But, we suggest, in justifying our cuts, we suggest where they could find moneys in other areas and other parts of the budget to accomplish the job.

For example, we said that they could find moneys in purchases, in foreign military sales, and in unobligated balances. We felt very strongly, and it is our belief that we do not, as a result of our cuts, compel DOD to cut major weapons systems purchases at all, or purchases of any weapons of war. As a matter of fact, we added $500 million to the President's February 22 amendments which he sent up to restore moneys for additional procurements of major weapons systems.

So, it is our belief that our cuts will not affect the Defense Department in its efforts to continue purchases of munitions or weapons systems. Nor will it affect them in their personnel end-strength and the number of personnel.

Mr. OBEY. I thank my chairman. I would like to make several points, in light of the chairman's response.

Mr. Chairman, I think we ought to understand all of these amendments in terms of where we stand on the overall budget resolution which is before the House this afternoon. We had Mr. BURLESON of Texas, who is asking that we add several billion dollars in outlay and over $4 billion in budget authority. We had Mr. MITCHELL of Maryland, who indicated a little earlier in the debate that what he would like to do is cut, I think, a little over $3½ billion in actual outlay for defense and transfer that money to other portions of the budget to enable us to fund items such as EDA budgets, rural development, housing, and mentally retarded programs.

Mr. Chairman, given by bias on these things, I would love to support most of the programs recommended by the gentleman from Maryland. But what we are trying to do in this committee is to exercise some degree of fiscal restraint, and that means, occasionally, that we have to oppose additional spending, not only for programs that we do not like, but even for programs that we do like. That is the consistent position which the Budget Committee is trying to take here today.

That is why I would urge the Members of this House to oppose the amendment offered by the gentleman from Texas (Mr. WRIGHT), the amendment offered by the gentleman from Texas (Mr. BURLESON), and the amendment of the gentleman from Maryland (Mr. MITCHELL), if in fact it is offered.

I think we have to be disciplined in all areas. I hope I do not offend anybody here—I am just trying to speak very frankly—but we all know that it is very difficult for the Armed Services Committee to say no to its constituency. We all know that is very difficult for the Education and Labor Committee to say no to its constituency. The job of the Budget Committee is to help each of those committees and to help the Appropriations Committee to say no occasionally to all of those constituencies, all of whom may have valuable programs and defensible programs but who do not, unfortunately, all have affordable programs. I urge you to support the committee in its effort to achieve balanced restraint.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. OBEY) has expired.

Mr. OBEY. Mr. Chairman, I ask unanimous consent that I may be allowed to proceed for 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin (Mr. OBEY)?

Mr. STRATTON. Mr. Chairman, I reserve the right to object.

The CHAIRMAN. The gentleman from New York (Mr. STRATTON) reserves the right to object.

Mr. STRATTON. Mr. Chairman, we have been on this amendment, I think, for nearly an hour.

Mr. OBEY. Mr. Chairman, I will withdraw my request.

Mr. STRATTON. Mr. Chairman, we have been on this for nearly 2 hours.

The CHAIRMAN. The gentleman from Wisconsin (Mr. OBEY) has withdrawn his request.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, we have to really recognize what we are doing here today, and that is to adopt a congressional budget resolution. The Defense Department wants $120 billion in appropriations and $112 billion in estimated outlay. The Committee on the Budget has reduced them by $4.1 billion in budget authority and $2.3 billion in outlay. For this we are being challenged that we are not following our President.

I will say to the Members that our function here in the Congress is to establish budget priorities. Our function here is to determine how the totality of Federal spending will be apportioned.

Yesterday we discussed the elimination of the $50 rebate for many of the little people who live back home in our districts. When I was back home last week, they asked me, "When am I going to get my $50 so that I can help pay some of my bills?" The $50 rebate has been withdrawn, but we left in funds for the business tax credit.

Where do we set priorities here? Do we ask the little people to tighten their belts? Do we ask the 7½ million or 8 million people who are unemployed to tighten their belts? Do we ask the farmers of America to tighten their belts?

Lord knows that in the Budget Committee we asked the urban people to tighten their belts and to reduce their requests and their demands, as my friend, the gentleman from Maryland (Mr. MITCHELL) will affirm, because of the economic necessities of the dollar.

"But now," they say, "in the area of national defense, don't you dare touch one single dollar of that budget." They say that even though the defense budget can claim the unique distinction in this overall fiscal year 1978 budget of having grown from last year's budget by $9½ billion over last year. "But don't touch one penny of it. We need it all," they say.

And then they told us in their estimates and in their reestimates which they sent up to us this April, "Gentlemen of the Congress and ladies of the Congress, we are sorry, but we didn't estimate properly on our expenditures last year, and even though we resisted you in Congress when you tried to take $2 billion off the defense bill last year, we had a shortfall in defense spending of at least $4½ billion." That is their estimate, not ours.

I think that we all ought to tighten our belts and share the burden of keeping this budget deficit down. It is already too big. I think that when the President asks us to tighten our belts in energy and tighten our belts in our expenses and our demands for Federal goods and services, the Defense Department can do so also, and I also think that they can do it without jeopardizing national security in any way.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I will when I have finished, if the gentleman can help me get some more time.

Mr. ROUSSELOT. Mr. Chairman, I will be delighted to do that.

Mr. GIAIMO. Mr. Chairman, we said that we could cut the personnel budget. We said we could cut $600 million spending off the personnel budget, and this is a total budget of $52 billion. We said, "You can find a 1½-percent reduction in that budget, and we can take out $600 million."

Do the Members know what has just happened with their April reestimates? In their April reestimates they reestimated their military pay item, and they said there is $450 million there that they do not need. They reestimated their retired pay, and they found another $50 million there that they do not need.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. GIAIMO) has expired.

Mr. GIAIMO. Mr. Chairman, I ask unanimous consent that I may be permitted to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

Mr. STRATTON. Mr. Chairman, reserving the right to object, we have now been on this resolution for 2 hours. We have had before us the major defense amendment, which is the Burleson of Texas amendment, for over an hour, and every speaker who has been recognized since the gentleman from Texas (Mr. BURLESON) offered his amendment has been against the Burleson amendment.

I am going to begin objecting unless some Member can be recognized to present the other side.

The CHAIRMAN. Does the gentleman from New York (Mr. STRATTON) object?

Mr. STRATTON. Mr. Chairman, I will withdraw my reservation of objection on this request, but I am going to object to any other requests for extension of time. We have a Budget Committee made up of Members who are overwhelmingly against the defense budget, and we have just three or four Members who are on the other side.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. GIAIMO. Mr. Chairman, I would like to say to my friend, the gentleman from New York (Mr. STRATTON), that I believe he knows I am not against the defense budget. I have voted for defense budgets here for the last 19 years.

However, I do think that they can help share the burden of bringing the deficit down. I think they can make a modest cut in what they are asking for in their inflated requests, especially since their record of spending and obligation indicates they are not spending the moneys that we have already voted them.

As I was saying, Mr. Chairman, in the area of personnel, just as an example, just this week their budget re-estimates from OMB show reductions in military pay of $450 million and a reduction in retired pay of $50 million, along with the usual pay absorption in DOD, which averages out to be 14 percent of absorption per year, which they do every year, and that will come to $230 million. That is a net spending reduction of $730 million in personnel.

Our Committee on the Budget only took out $700 million. I will say to my colleagues that we should have taken out $30 million more, according to their figures.

This is the kind of thing we are up against. We are saying that we should take out the fat. That is an example of fat, the figure relating to personnel in this budget of $52 billion. We are saying that in these unobligated balances of billions and billions of dollars that we should take a billion from this and use it.

We are saying that in foreign military sales, where the President himself has indicated that he is going to fight to reduce the military sales of weaponry by the United States which are proliferating the world and doing no good in many areas of the world, we can find another $500 million. Moreover, we can find other places, such as ERDA, stockpile sales, and a reduction of modest amounts for military assistance.

In those areas, Mr. Chairman, we are saying that we can find $4.1 billion in appropriations and $2.3 billion in outlays this year. We will not affect troop levels; we will not affect purchases of major weapons systems; and we will not affect all of the necessary things that we need in order to properly defend ourselves against the Russians or against anyone else.

We will do one other thing. Let us remember that this is a transition budget in the sense that we have a new President and a new administration. President Carter came into office in January with the Ford budget presented to him. He then had to make some quick adjustments to it in the area of defense, and he did so in his February 22 message.

We know that the new administration is looking at the whole defense establishment and at the $120 billion that they have in mind to modernize it, modify it, change it.

Mr. Chairman, let us give our President and our new administration that flexibility to do so this year. Let us not lock him in by decisions on major expenditures which will take away his flexibility.

It has also been said previously, "What right has the Committee on the Budget to make these changes when the other committees of this House which are so expert and so proficient in matters of the Defense Department have ruled otherwise?"

Mr. Chairman, let me say that the job of the Committee on the Budget is to set priorities and to establish a budget for the Congress. The Committee on the Budget is not to be just a bookkeeping committee.

If the requests and recommendations to the Committee on the Budget by all of the committees of this House recommended additions to the President's budget of somewhere in the neighborhood of $23 billion, obviously, we cannot just take these recommendations and add them to the budget. We have to exercise judgments, and in exercising those judgments I feel a very strong responsibility as one who has defended the Defense Department and supported it since my days in service in the Army and during my days in service here in Congress. I feel a responsibility to allocate available dollars in our budget more equitably so that we can take care of the unmet needs of those unemployed, and those unskilled and those untrained, the sick, and the old.

Mr. Chairman, we are asking everyone to share that burden just to a little degree and that includes the Department of Defense.

Mrs. HOLT. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Wright amendment.

Mr. Chairman, I certainly appreciate the sincere job that the chairman of our Committee on the Budget does. I know that it is a very difficult task to take all of the requests that come to the Committee on the Budget and try to be equitable about them and try to stay within our revenues and yet meet all of the requirements of this great Nation of ours.

However, Mr. Chairman, I cannot understand why in the defense area we completely overlook the recommendation of the President of the United States, a new President who deserves our support in order to try to cope with all of the problems that he has.

Mr. Chairman, the House Committee on Armed Services and the Committee on Armed Services of the other body, the Appropriations Committees, have gone over this defense budget very, very carefully.

I think we should reject the Wright amendment. I strongly believe that we should support the amendment of the gentleman from Texas (Mr. BURLESON) to restore the budget authority and outlays for this function to levels approximating those recommended by President Carter.

Mr. Chairman, I am for fiscal integrity and a balanced budget; but I am for a strong and viable national defense. I think we have to provide for it. It is my belief that those two are not mutually incompatible. We can do it.

In my own experience here, during the few short years that I have been in Congress, that experience has fully demonstrated to me that of all of the budget requests, none has the scrutiny that the Department of Defense has in our House Committee on Armed Services. We go over it minutely. This is the way it should be because defense does not come cheap. Yet, most Americans will agree that this sustained, strong defense posture is of the utmost importance to our Nation.

That is the point that I am trying to make when I say that our task force did not really make recommendations. I feel that all of these bodies in the House have gone over this rationally and carefully. They have listened to the voice of the American people and these are the recommendations that we come up with. And then this committee, made up of a

few, can completely gut the defense budget.

It is a proven fact, Mr. Chairman, that while the Soviet Union has maintained its momentum and its acceleration in a defense buildup—and we see it everywhere—that our own defense outlays since 1964 have been on a steady decline in terms of current dollars. I heard Admiral Moorer say just recently that the defense budget has dropped by $10 billion in real dollars from the 1964 level. This is really very dangerous. I think we have really got to pay more attention to it.

Last year we saw responsible Members of the Congress representing a coalition on both sides of the aisle, who took positive action to stop this decline and provide for some fiscally sound and feasibly sensible means to bolster our national defense.

The Carter revision of the Ford budget was, as I say, reviewed by the Committee on Armed Services and also by the Committee on Appropriations. I was not totally happy with the recommendations that President Carter made. I think we absolutely should not do anything that would further erode our military posture.

Mr. ROUSSELOT. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague, the gentlewoman from Maryland, yielding to me. The gentlewoman from Maryland (Mrs. HOLT) I know is an active and responsible member of not only the Committee on the Budget, but the Committee on Armed Services as well.

Let me inquire of the gentlewoman from Maryland if the effect of what she is saying in support of the substitute offered by the gentleman from Texas (Mr. BURLESON) and in disapproval of the Wright amendment is that the House would thus have an opportunity to support President Carter's original recommendations in both outlays and authorizations as they relate to the national defense of our country?

Mrs. HOLT. That is my understanding.

Mr. ROUSSELOT. And further the Wright amendment would take us below those levels in both of those national defense functions and so would not provide Secretary Brown and President Carter with what they feel the country genuinely needs in this important area of defense?

Mrs. HOLT. That is absolutely right.

Mr. ROUSSELOT. I appreciate the gentlewoman yielding and explaining that important point.

Mrs. HOLT. We heard from the Secretary today, through the gentleman from Texas (Mr. BURLESON) that it is absolutely essential that we go back to that level. The House passed the defense authorization bill, with an overwhelming majority.

The CHAIRMAN. The time of the gentlewoman has expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mrs. HOLT, was allowed to proceed for 3 additional minutes.)

Mrs. HOLT. As I say, Mr. Chairman, we passed that defense authorization bill by a vote of 347 to 43. That is the voice of the American people. I think it is clear that that is what they want us to do here.

In the light of that I just cannot really see how we can go along with the cuts that the Committee on the Budget has recommended.

Mr. ROUSSELOT. Mr. Chairman, if the gentlewoman will yield further, in other words, those people who the other day supported the defense authorization bill that we had on the floor of the House, as a followup and as a parallel with that action those Members again ought to support the Burleson-Ichord-Holt position?

Mrs. HOLT. That is absolutely right. I strongly urge it.

Mr. Chairman, I believe there are just a few further points that we ought to think about.

Africa today is a powder keg. We are getting all kinds of surprises there on a daily basis.

Then look at the Soviet expansion in the Middle East.

Some of my colleagues say that they cannot believe we need to fear this defensive posture that the Soviet Union is taking. I just cannot understand how they can take that attitude when we see the tanks pouring into the Fulda Gap there in Germany.

Mr. ROBERT W. DANIEL, JR. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from Virginia.

Mr. ROBERT W. DANIEL, JR. Mr. Chairman, I cannot help but feel that the Budget Committee has overreached its prerogatives when the House and Senate Appropriations Committees and Armed Services Committees have all recommended increases instead of cuts in the defense budget. The recommended increases by these other four committees came after intensive investigations into our defense needs. In contrast, the Budget Committee's national defense task force apparently held only a handful of meetings and was not asked to make any recommendations to the full Budget Committee.

Although the Budget Committee is charged with the responsibility of balancing national needs against national resources, it would appear that it failed in its responsibility to adequately consider our national defense needs. The House Armed Services Committee has spent weeks of deliberations on our defense needs, yet after little consideration the Budget Committee is attempting to negate that work in favor of those who have a deep and often irrational distaste for anything associated with national defense.

The Budget Committee would have us slash the defense budget while the Soviet Union is engaged in the greatest arms buildup in history. We hope President Carter's negotiations with the Soviets will reduce the level of international weaponry and tensions, but we may have little left to bargain with if the Budget Committee cuts are left intact. At the very least, we should give President Carter the budget authority he requested to deal with the Soviets from a position of strength.

I might note that even President Carter's request, which the Budget Committee felt compelled to slash, was some $2.8 million below the amount recommended by former President Ford as the minimum needed to protect peace and our national security.

As my colleagues Mr. BURLESON and Mrs. HOLT noted:

> The Budget Committee recommendation eliminates all real growth in the defense budget at a time when Soviet forces are in the midst of an unprecendented buildup and the SALT negotiations are floundering.

I urge my colleagues to restore an adequate level of budget authority for national defense.

Mr. WHITEHURST. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from Virginia.

Mr. WHITEHURST. I thank the gentlewoman for yielding. I rise in strong support of the sentiments expressed by the gentlewoman.

Mr. WHITEHURST. Mr. Chairman, I rise in support of the Burleson amendment to restore the Defense function budget to the level requested by President Carter.

During the campaign last fall, Candidate Carter pledged to cut Defense spending by $5 billion. But once he took office and accepted responsibility, President Carter found that cuts of that magnitude would be inconsistent with the defense of this country, and he acted responsibly. The Budget Committee has ignored the President's present recommendations in response to some invisible mandate to reorder our national priorities. I submit that that reordering has already taken place. Since 1964, Defense spending has increased 90 percent. At the same time, spending by other Federal agencies has gone up by 372 percent. These trends clearly illustrate why there has been such an alarming shift in the balance of power. And yet, Defense is singled out as the bogeyman in our battle against rising costs.

Let me cite a few examples of how the Budget Committee justifies cuts in the defense budget.

The committee recommends a reduction of $1 billion in budget authority for procurement which it terms a modest slowdown in a transition budget. Of course, they are silent as to where this slowdown should occur.

The fact is that a slowdown or stretchout in the procurement of weapons systems is not going to save money. In the long run it is going to cost the taxpayers untold million of dollars because we will be forcing the Department of Defense to buy inefficiently.

They also suggest that slowing down procurement will strike a better balance between modernization and readiness. How they expect to accomplish this gets a little fuzzy since they also slashed $600 million out of operations and maintenance funds which were earmarked to enhance readiness.

Their basic logic seems to be: The way to strike a better balance between modernization and readiness is to cut the funding for both. Presumably if that does not strike the proper balance, you just keep cutting defense to make it stronger. Apparently, Joseph Heller's "Catch 22" has been adopted by the Budget Committee as a guiding principle.

In my judgment, the goals are confused. Instead of trying to strike a better balance between modernization and readiness, this Congress should concern itself with trying to strike a better balance between the United States and the Soviet Union.

The Budget Committee recommended a reduction of $300 million in military assistance and energy research or ERDA projects which should serve as a classic illustration of the kind of games they are playing with the Defense budget. These two programs are about as similar as elephants and potato chips and yet they have been lumped together as a single cut.

When the State Department people tried to find out how much of that $300 million reduction applied to military assistance they were told: "Oh, that all comes out of ERDA."

Now, what do you suppose the ERDA people were told when they called? You guessed it—"Oh, that all comes out of military assistance."

The truth of the matter is that the Budget Committee has no idea where any of these cuts some from because they just grabbed them out of thin air.

I submit that that is a rather haphazard way to guarantee the security of the United States.

Mr. MITCHELL of New York. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from New York.

Mr. MITCHELL of New York. I thank the gentlewoman for yielding, and I rise in support of the Burleson amendment.

Mr. Chairman. We cannot allow the proposed $4 billion cut in defense spending to remain. If we do, we will be partners to an effort which will seriously compromise our nation's defense capability.

To gouge our defense spending, and in the process reduce our preparedness at a time in history when the Soviets are increasing their defense effort in an unprecedented manner, seems suicidal.

Others will address the arbitrary and capricious method used by the Budget Committee to slash the vital $4 billion; I will concentrate my remarks on the area I feel will be most severely and adversely impacted by what certainly appears to be a thoughtless, dangerous move.

Since we are falling behind the Soviet Union in both conventional and strategic weaponry, I doubt we will take very severe cuts here. Our civil defense program is in disarray; theirs is excellent. No room to cut here, we are already far behind.

Our active duty military personnel are at the lowest point in many years, less than one-half of the Russian strength. In 1964, the Soviets had an active military force of 3.4 million; we had 2.7 million in uniform. Now 13 years later, the Soviets have added another million to bring their total to 4.4 million; we have reduced our active military strength during that period by 600,000. Right now, the Soviets have more than two military personnel for every one of ours. Surely, we cannot cut deeply here.

Within the past 48 hours, the House, during deliberation on the Department of Defense authorization for fiscal year 1978 voted overwhelmingly, 301 to 88, to reject an amendment that sought to reduce the end-strength troop level by 50,000. Clearly and emphatically we have gone on record in opposition to further widening the gap between Soviet military personnel strength and ours.

When then, would the cuts likely be made? About the only remaining area for deep budget cutting would involve the closing and consolidating of military installations, creating further disruptions in the already distressed and depressed economies of so many areas of our country, with civilian employees of the Department of Defense losing their jobs at worst, or being forced to uproot and move at best.

Many of us in this Chamber have experienced firsthand what a base closure or major reduction does to people. For openers, it puts many of them out of a job.

It is almost a weird irony that we would be talking about a $4 billion cut in defense spending that would place in immediate jeopardy thousands of jobs in the civilian workforce and further exacerbate the problems of so many areas of the country with high unemployment within hours after the Senate-House conferees have come to agreement on a $4 billion public works jobs bill designed to do exactly the opposite, that is create more jobs in the civilian workforce and stimulate depressed local economies.

Where is the sense to it all?

I know, as many of you here know, unwarranted base closings and major realinements forced by well-intentioned if ill-advised budget slashers is seriously disruptive to critical missions and to people.

I must admit, the people aspect of the problem is one I just cannot come to grips with, one that I cannot walk away from. I have seen it first hand. I know what these arbitrary actions do to their lives in terms of human misery brought about by family separations, financial losses due to the devastating impact on property values and the economy in general when closure/realinement announcements are made public. Children are torn from their happy and familiar environment.

And it is not just those directly involved who suffer. Businesses fail, entire economies collapse.

While all this is occurring, the critical missions these people are assigned to perform fall by the wayside. Decisions are not made, valuable personnel are lost, everything is chaotic not just for weeks or even months. It has been proven time and again, the disruption often stretches into years before a return to normalcy in operations is close to possible. Many questions whether it is ever possible.

I submit it is pennywise and pound foolish to proceed on a course when we know such a course to be reckless and fraught with danger. I urge my colleagues to resoundingly beat back this ill-timed, unprecedented, unthinking reduction in DOD spending.

Mrs. HOLT. Mr. Chairman, in the Washington Post on April 25 Evans and Novak wrote about the Russian adventures in Turkey. I certainly recommend that reading to all of my colleagues. Look at what is happening in Ethiopia. We are being asked to leave there. I think that we can only helplessly watch what is happening in Zaire. And at a time when our President is trying to renew the SALT negotiations. I think that it would be inexcusable if we do not give him the strength that he needs to go into those negotiations.

Mr. WHITE. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from Texas.

Mr. WHITE. I thank the gentlewoman for yielding.

The gentlewoman mentioned a gap on the East German border. Is it not true that the East Germans and the Soviet Union are spending almost three-quarters of a million dollars per mile along the border for defenses, plus stationing rear area troops, plus tanks and artillery that would roll over our people if we do not support them?

Mrs. HOLT. The gentleman is absolutely right.

The CHAIRMAN. The time of the gentlewoman has expired.

(At the request of Mr. ROUSSELOT, and by unanimous consent, Mrs. HOLT was allowed to proceed for 1 additional minute.)

Mr. WHITE. If the gentlewoman will yield further, is it not true that during the Israeli War, had we not positioned in Europe supplies and tanks, we would not have been able to give the support that we gave to Israel, and we would not have been able to strengthen these forces, which supplies and equipment still at this time have not been brought back to par?

Mrs. HOLT. I think that is absolutely true. I just cannot understand how anybody can lose sight of the fact that if we did not have the strength we had at the time of the Middle Eastern situation, where we were able to back the Soviet Union off and through that promote the fragile peace which exists in the Middle East.

Mr. WHITE. If anyone here is supportive of Israel, then they should support a stronger defense posture than either the Wright posture or the committee resolution as presented to this Congress, because in fact we are trying to replace and bolster our defenses.

Mrs. HOLT. That is correct.

Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment offered by the distinguished gentleman from Texas (Mr. BURLESON) a member of the committee.

As a member of the Budget Committee, I am concerned that there are some misconceptions as to what the committee target for defense spending does, and I would just like to point out in very clear terms what our recommendation actually means; $116 billion in budget authority and $110 billion in outlays, the target suggested by the committee, amounts to an increase in defense spending over 1977 of almost 10 percent. Of the 16 functional categories in the budget, that is the single largest increase, and I honestly cannot see how a 10-percent increase can be portrayed as a drastic reduction.

My own feeling is that a somewhat lower rate of increase could be achieved without jeopardizing any of our legitimate defense needs. Perhaps the sentiment for an actual reduction in defense spending is not shared by many of our colleagues, but I trust that if we take the time to look at how we on the Budget Committee arrived at our recommendation, a majority will agree that our actions are reasonable. We have taken a look at three areas in the defense function: One, personnel and compensation; two, inflation estimates; and, three, unexpended balances.

First, in the area of personnel and compensation we are recommending $750 million less in budget authority and $600 million less in outlays than President Carter.

Many in this body are no doubt aware of the numerous studies which have been conducted in recent years in this area. Reports such as the President's Panel on Federal Compensation, the Defense Manpower Commission, the Third Quadrennial Review of Military Compensation, and many others have all concluded that drastic changes must be made in the management of defense manpower. While President Carter has decided he needs to establish another Presidential Commission to restudy the previous studies, the Budget Committee felt that enough studying had been done to warrant a decrease of what amounts of less than 1½ percent. I hope my colleagues can agree that a modest reduction such as this in personnel and compensation does not endanger our national security.

The second area in which the committee is recommending a decrease in the President's budget request is relating to inflation estimates in operation and maintenance accounts.

As we are all well aware, the Defense Department Appropriation Authorization Act of 1977 established a special procedure for the Pentagon to include estimates for inflation in operation and maintenance accounts and no other Government agency is allowed such an index for inflation. The argument is made that this is necessary because of the large industrial type programs that go on for several years. Obviously, there are activities in the operation and maintenance account over at the Pentagon that are peculiar to that agency—but not all of them should necessarily be given a special inflationary cushion. Of the $1.1 billion inflation adjustment requested by President Carter, only $500 million is for special activities such as ship overhauls, aircraft and mobile equipment repair. The other $600 million is for expenses similar to those occurring in any other Government agency. It was that inflation adjustment of $600 million for ordinary Government expenses which was eliminated and I hope you will agree that that cut will not get into the real substance of the defense budget.

The third area is the reduction from the Presidential budget request in transferring some of the unobligated and unexpended balances to finance 1978 requirements.

Again, if my colleagues will look at what the committee is recommending in this area, I am convinced you will agree that a decrease of $1.3 billion in budget authority and $300 million in outlays is not only judicious but also necessary.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. MINETA. Mr. Chairman, I ask unanimous consent that I be allowed to proceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There being no objection, the gentleman is recognized for 3 additional minutes.

Mr. STRATTON. Mr. Chairman, I object.

The CHAIRMAN. The gentleman's objection comes too late. The Chair had already ruled the gentleman from California is recognized for 3 additional minutes.

Mr. MINETA. I thank the Chairman.

The Congress in the last several years has sought to fully fund Defense building projects. However, over the past few years these unexpended and unobligated balances have increased even more than the Defense Department had expected, and in 1976 the unexpended balances were $2.5 billion higher than anticipated. In June 1976, the actual unexpended balance was $54.1 billion and their estimate was $52.6 billion. In 1977 the actual unexpended balance is $62.4 billion. Again it is $1.3 billion higher than the Department of Defense estimate of $61.1 billion. It seems reasonable to me that if the Department of Defense has over a billion dollars more in unexpended balances than even they expected, it is our responsibility in Congress to tell them to put that money into use next year. Again, this cut in no way impinges on our defense effort.

As with the recommendations for savings in those three areas of: First, personnel and compensation; second, inflation estimates; and third, unexpended balances that I have described here, these recommendations are realistic, and the result of a hard look at the President's budget revisions. In my estimation they leave us with a better, more effective, defense budget.

Mr. Chairman, I urge all my colleagues to vote "no" on the Burleson substitute amendment which seeks to reverse the Budget Committee's recommendation for a more efficient defense budget. I hope we can see past the singleminded logic that says anything but a huge increase in defense spending is a signal to our adversaries of our lack of resolve.

Nothing could be further from the truth. The 10-percent increase provided in the committee recommendation is more than adequate. One of our greatest responsibilities here in the Congress, which I stated in additional views of the budget report, as well as reiterated from the well yesterday, is one which all of us have committed ourselves to, and that is to decrease wasteful Government spending. There is nothing sacrosanct about wasteful spending in the Pentagon. My hope is that we will say no to the substitute amendment of the gentleman from Texas (Mr. BURLESON).

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. ROUSSELOT, and by unanimous consent, Mr. MINETA was allowed to proceed for 1 additional minute.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. MINETA. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank my colleague for yielding. Mr. Chairman, could my colleague, the gentleman from California, tell me how he suggests we vote on the Burton amendment, which was attached to the original Pike amendment relating to reduction of the debt. I know the gentleman is interested in reducing debt as I am.

Mr. MINETA. Which amendment?

Mr. ROUSSELOT. How would the gentleman suggest we vote on the Burton amendment?

Mr. MINETA. On the Burton amendment?

Mr. ROUSSELOT. Yes.

Mr. MINETA. I will be voting no on all the amendments and substitutes.

Mr. ROUSSELOT. So the gentleman suggests that we vote no on the Burton amendment?

Mr. MINETA. I will be voting no on the Burton amendment.

Mr. ROUSSELOT. I thank my colleague.

Mr. BURGENER. Mr. Chairman, I move to strike the requisite number of words. I rise in strong support of the substitute amendment offered by the gentleman from Texas (Mr. BURLESON).

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. BURGENER. Yes, I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, I appreciate my friend, the gentleman from California, yielding to me so that at least a few of us that are in support of the Burleson substitute amendment and against the Wright amendment would have the opportunity to state our case.

Very simply, what we are asked to do in the Burleson amendment is, as already has been said, to support the President of the United States. He cut the defense budget originally by $2.8 billion, but he strongly wants the figure he came up with after that cut maintained. Six congressional committees, as has already been indicated, have either supported the President's recommendation or have recommended a figure higher than that. Only the House Budget Committee has cut the President's figure and cut it by a whopping $4 billion. The President feels

very strongly about that cut. He called the Speaker this afternoon to get the money restored.

The Secretary of Defense has also called the Speaker and various Members of the House. Yet this afternoon we are being asked to take the recommendations of the Budget Committee, those of the gentleman from Connecticut (Mr. GIAIMO) and the gentleman's associates, in preference to the recommendations of all of the committees who are knowledgeable on Defense in the Congress, the Secretary of Defense and the President of the United States.

Well, now, if the Budget Committee had really made a careful analysis of Defense matters, had covered them carefully, then perhaps one might be inclined to go along with the recommendation of my friend, the gentleman from Connecticut (Mr. GIAIMO); but we have it on the authority of the chairman of the defense panel, the gentleman from California (Mr. LEGGETT), that they did not look as "diligently" at these figures as they would like. The gentleman also referred to the figures which the gentleman's committee has recommended as being "tangential", whatever exactly that means. But at least it means that they really do not know what they are talking about. They simply pulled a few figures out of the air and those are the figures we are now supposed to take on faith, and in preference to the recommendations of the Secretary of Defense, the President of the United States, and the people in Congress on both sides of the Capitol who have spent not only all of the last 3 months, but a good many years in the Capitol studying Defense matters.

Now, the gentleman from Texas (Mr. WRIGHT), my good friend—and I hesitate to oppose the gentleman's amendment—but I do not think the gentleman really understands, because he has a lot of other responsibilities as majority leader, precisely what his amendment would do. The gentleman says his amendment puts $1 billion back into the procurement side of defense, but he also says that the Wright amendment does not add anything back in what he calls these other "esoteric areas."

Well, do you realize what these so-called esoteric areas are? The committee, for example, recommended a reduction of $750 million in personnel compensation. The gentleman from California (Mr. LEGGETT) says, "Why, that is only a little, tiny cut." The fact is that if we cut personnel funds by $750 million that represents 200,000 jobs knocked out of the Defense Establishment, either in uniform or civilian.

That means 200,000 more people who are going to be out on the street, unemployed, looking for unemployment insurance or welfare. Is that the kind of thing we really want?

I have joined with colleagues in this House in the last several months in the "Great Northeast Coalition." The purpose of the Great Northeast Coalition, including our State Governors, is to come down here to Washington and pound on the desk of the Secretary of Defense and say, "Don't close down our military installations. Don't close down our facilities at Fort Devens. Don't close down these other installations. We want you to send more defense business into New England and the Northeast."

The gentleman from Massachusetts (Mr. HARRINGTON) has even bigger ideas. He is head of the "Great Northeast-Midwest Coalition." That takes in about half the country. They have recently sent a letter to the Secretary of Defense, and I joined in signing it. They said I had some clout with the Defense Department, although I have not seen that clout. But I signed the letter and its purpose was to prevent them from phasing out operations at Fort Monmouth, in New Jersey and transferring them to the Sun Belt.

Well, if Members want to close down Fort Devens and close down Fort Monmouth, put thousands of people out of work and close down many more bases, I will tell them how to do it. They should just go along with the committee's $4 billion cut. And they should go along with the Wright compromise, because it adds not a penny to those so-called esoteric areas where the money for personnel and operating expenses is contained. Unless we restore those funds, as the Burleson amendment will do, we can expect to see devastating cuts in both bases and jobs.

Mr. GIAIMO. Mr. Chairman, I wonder if we could get an idea of how many more Members wish to debate this question.

Mr. Chairman, I ask unanimous consent that all debate on the Pike amendment and all amendments thereto conclude in 15 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

Mr. ROUSSELOT. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. REGULA. Mr. Chairman, I move to strike the last word, and I rise in support of the Burleson of Texas amendment.

Mr. Chairman, I serve on the national security task force of the Budget Committee. I would point out that what we are talking about here are the recommendations of the administration brought to the task force by the Secretary of Defense, speaking on behalf of the President. It seems to me that they are in a unique position to point out the needs of this Nation in the field of national defense.

Obviously, if we remember the campaign rhetoric, we will realize that the President, since taking office, has been educated to these needs. I would suggest that the recommendations of the President as embodied in the Burleson amendment represent a minimum amount needed for our national security.

Mr. Chairman, at this point I would like to yield to the distinguished gentleman from Florida (Mr. BENNETT).

Mr. ICHORD. Mr. Chairman, I look around, and I see about 79 Members as I counted. This is the most important aspect of the budgetary process.

Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Eighty-six Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN pro tempore (Mr. ALLEN). One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The Chair recognizes the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Chairman, I had intended to talk about what the recommendation of the Committee on the Budget would do in the field of procurement in the Navy. But so much has been said that also needs attention that I have decided to address myself primarily to other matters. I have a chart on the Navy procurement needs here and I will discuss them at the conclusion of my remarks.

Mr. Chairman, I rise in strong support of the Burleson amendment and in opposition to the Wright amendment.

It has been said that there is waste in the military. There probably is. We do the best we can to try to find it and eliminate it. There is waste also in food stamps, there is waste in welfare, and there is waste in medicare. There are actually programs which should be ended, programs like foreign aid and revenue sharing which our country can no longer afford at least in their present extravagant form. These are things we cannot now afford when the country is almost bankrupt. Those are things we ought to address if we are to get the money we need to have an adequate defense.

All of the objective experts who speak out on the subject of the national defense of our country are unanimous in saying that our country is not adequately defended. There is not a dissent I know of in this field. Even foreign observers have looked at us and said that. This gives us great concern that this is so.

Let us think for a moment about what has been said concerning the position of the Committee on the Budget concerning this. They say, "OK, but it has nothing to do with procurement."

There is no way we can do that. When we cut this money out of this resolution, it is going to affect procurement, just like it affects everything else. They say we can take it from personnel. That is a nice thing to say, but a week or so ago we were being criticized for not having enough patriotic young men willing to join the services. The Armed Forces were being criticized for not having enough men to fill the quotas which Congress thinks are necessary for national defense and which Congress has specifically sanctioned and directed.

We have criticized the Armed Forces for not building themselves up, and then we in the Budget Committee would say we are going to cut their pay or cut the personnel numbers. That seems ridiculous to me.

Some remarks have been made today to the effect that we can cut down on the numbers of generals and admirals. They say if we can abolish some of them, that would help. I myself think there could be a reduction in that area, but we will not see substantial cuts resulting from anything like that. If all admirals and generals were fired that would be but a small portion of the amounts of money involved here.

The next thing that was mentioned was inflation on the OM accounts. That is the maintenance accounts for ships and things like that. Of course, we could take the inflation out of the OM accounts, but let me ask this: Who imposes that requirement? Congress imposes that requirement and it does so to get a handle on real costs and to reduce them.

Congress has by law said: "We don't want you to have any phonies. We don't want you to come in here and say there is not going to be any inflation in OM accounts."

So we could, as I said, stop that, but we would have to appropriate for how much the inflation goes up in OM accounts. This is not a place where we are going to save money; it is one way in which we could waste money by not knowing and planning for real inflation. That requirement of reporting inflation in OM accounts was imposed by Congress; it was not requested by the Department of Defense.

They say also that we are going to do this on unobligated balances. What are the unobligated balances? Who imposed that obligation on the Defense Department? The unobligated balances are very largely the billions of dollars in materiel which we decided we were going to fund. In case the ships take more than 1 year to build we provided that fund to them fully, rather than so much a year. We can fight about that one all we want to, but Congress said by law, "We want you to fully fund this." This came from the Congress; it did not come from the executive branch and Congress did this to gain control of the financing.

We required full funding so they could not say to us that the ship costs more in later years than we expected. That could easily slide up the cost of the ship. It was required that the ship be funded in that way. So Congress imposed that requirement.

Therefore, the only real savings that have been suggested by this position of the Committee on the Budget, are ephemeral things. They are esoteric. They are not real. They are just powder dust; there is nothing to them. They have no significance or reality whatsoever except to cut personnel, and Congress has said that we cannot do that.

Now I would like to address this chart about the Navy. In order to emphasize the need for a Navy, I have had this map prepared. First of all, it shows our general imports, 60 percent of which come from Latin America, 10 percent from Asia, 5 percent from Africa, and 1 percent from Australia. Second, it shows our oil imports, 45 percent of it comes from Persian Gulf, 20 percent from Africa, 9 percent from South America, and 9 percent from Indonesia. Last, it shows our main exports, 30 percent to Europe, 40 percent to Asia, 2 percent to the Indian Ocean, and 1 percent to Africa. As you can see, the sea lanes on which we rely are spread all over the globe. Look especially at those two lanes, the one from the Persian Gulf carrying 45 percent of our oil and the one from Indonesia carrying 9 percent.

Our Navy has to insure that we are able to use those sea lanes from the United States to the terminal in the other countries as we need them. That is what sea control is all about. However, the Soviets only have to cut those lanes and make the cuts wherever they choose. That is a far different, far easier task.

Now I would like to show you in 1968, how our Navy and the Soviet's Navy operated around the world. In the far Pacific we had a good number of operating days because we were involved in the Vietnam war. We had more days in the Atlantic than the Soviets and roughly the same number of days in the Mediterranean. In 1968, we had a Navy of almost 560 principal combatants, 417 on the surface and 142 attack submarines. In that year the Soviets had 200 surface combatants and 230 submarines.

Now let us look at last year. Our operations in the Pacific dropped considerably—by one-third. The Soviets surpassed us by 36 percent in the Atlantic, in the Mediterranean their operations increased 50 percent and they outstripped us by 20 percent. In the Indian Ocean where we get half of our oil, the Soviets operations have increased six times. Their total principal combatants increased in 1976. Our surface combatants dropped to nearly one-fourth of what they were in 1968. Our attack submarines have dropped by 50 percent and the Soviets submarines have decreased by 23 percent. We have only 240 principal combatants compared to the Soviets 485—50 percent—and we used to have a two ocean Navy. No wonder Admiral Holloway testified last year that the "U.S. Navy will be able to control any ocean or major connecting sea unless directly opposed by the Soviet Navy." This is what has concerned the Seapower Subcommittee and the Armed Services Committee. This is why there can be no further cuts in money for the Navy at this time.

Mr. ADDABBO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Wright amendment to the Burleson amendment.

As has been said here earlier, we are not cutting the defense budget. We are increasing the defense budget over last year's budget by over $6 billion. We have heard here this afternoon about what we did last year. Last year we cut the defense budget by $4 billion.

We—this Congress cut it by $4 billion. What did that mean in real growth? Over $5.8 billion in real growth.

Mr. Chairman, today I hear the same story that we heard in 1975. We hear that a $4 billion reduction is going to destroy our national security. De we remember that in 1975 what we heard about the $7 billion cut that the Congress made? The Defense Department said that this was a deep arbitrary cut and would destroy our natonal security.

What happened in 1975? We had a real growth of $4 billion.

Let us look at the unobligated and unexpended funds. We heard my colleague, the gentleman from Florida (Mr. BENNETT), speak about these unobligated funds. Unobligated funds are unearmarked funds that are there for the Defense Department to change around. Unexpended funds mean things like fully funding a ship, which are under contract. Those are unexpended funds.

Let us look at those amounts in the unexpended balances. We start out in 1972 with $42 billion in unexpended funds, and in 1978 the Defense Department estimates $80 billion in unexpended funds—unexpended, $80 billion; unobligated funds are funds which are not earmarked as yet.

What do we have there? In 1972 it was $37 billion. How much will we have at the end of 1978? It will be $74 billion.

Just between the years of the 1977 to 1978 budget, that unobligated balance will increase, according to the Defense Department's own statement, by $2 billion. We are going to give them another $2 billion and they do not know yet what to do with it.

Mr. Chairman, back in 1955, after the Korean war—and the Korean war budget was $67 billion—the peacetime budget was $32 billion. During the Vietnam war, when we were spending $10 billion in Vietnam, the budget was only $79 billion. The American people were told that they would receive a peace dividend after that war.

Mr. Chairman, where is that peace dividend? Here we are in peacetime, fighting no war in 1977, and looking for a $121 billion budget, a budget 50 percent greater than the wartime budget during the Vietnam war.

Mr. Chairman, when are the American people going to receive that peace dividend? Do we not care about their needs?

We have a budget here, Mr. Chairman, that is $6 billion over last year's.

I say, Mr. Chairman, that the American people should be given a chance. The Committee on Appropriations will be looking at the entire spending, but let us also today, as we set priorities within this budget figure, tell the American people that we are going to start giving them consideration.

Mr. Chairman, we hear about these great war threats. It always surprises me—and it is almost miraculous—that every time we are about to debate defense spending, suddenly the Defense Department comes up with some great threat.

Just 2 days ago, out of a clear blue sky, a Russian bomber was 60 miles off our coast. We know the Russian bombers have been flying to Cuba, 90 miles off our coast.

Suddenly the Defense Department releases that information when it appears so opportune to them.

Ms. HOLTZMAN. Mr. Chairman, I move to strike the requisite number of

words, and I rise in opposition to the Wright amendment and to the Burleson amendment.

Mr. Chairman, I want to compliment my colleague, the gentleman from New York (Mr. ADDABBO), for the thoughtful statement he has made here. The point that he has driven home—and I hope that my colleagues will understand it—is that it is about time that we take a look at this total budget and looked at the role that defense spending plays in it. And it is also time that we tried to give the American people some relief from this extraordinary level of spending which is not really directed at meeting military needs, yet which at the same time deprives us of the opportunity to meet this country's human needs.

Mr. Chairman, it is interesting that the Secretary of Defense has been deeply concerned about the problem of illiteracy in the Armed Forces and of recruiting into the services persons who can actually read and write.

Yet nobody understands that by increasing this military budget unnecessarily and wastefully we remove our ability to deal with the problem of illiteracy in this country and we increase the problem of illiteracy in the Armed Forces. We are 12th in the world in literacy. We cannot even find enough people for our Armed Forces who can read. But we still continue to subsidize military waste while starving our schools.

That is why this budget resolution is before us today: To try to put in focus at one time all of the needs of our country so that we can make decisions about priorities. I think the resolution is trying to do a good job on priorities. I believe, however, that it has not met enough of our needs. It still permits too much wasteful spending in the military budget, despite the fact that it still will contain over $70 billion of unexpended funds at the end of this year, 1978, and $18 billion in unobligated balances. The money that is in the pipeline—$18 billion—that the military cannot even spend we so desperately need to improve our schools in the country, to try to rebuild our cities, to deal with health care, to make sure that all Americans are getting adequate shelter and food to eat.

The defense spending in this budget accounts for over 50 percent of the controllable outlays. The more we increase defense spending, my colleagues, the less we will have for other programs.

This is the tradeoff.

If we endorse the Wright amendment and if we endorse the Burleson of Texas amendment, we reduce, very simply, our ability to deal with the pressing human needs of this country. And these needs are real. All one has to do is walk outside on the streets of this Capital City and see that we are confronted with the problems of crime, bad housing, the lack of adequate schooling.

I believe it is about time that we started recognizing the importance of the budget, the importance of rectifying our priorities, and the importance of the tradeoffs that are made. The more we meet the human needs of our people then the greater will be the strength of this country.

Mr. DAN DANIEL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, on April 25, the House passed the defense authorization bill by the largest yea-to-nay ratio in recent years. Today I find myself defending that portion of the Federal budget which provides this Nation with its nuclear deterrent—our weapons of peace—the Energy Research and Development Administration national security programs. This includes programs for nuclear weapons, naval propulsion, as well as inertial confinement fusion, popularly known as laser fusion.

The ERDA fiscal year 1978 budget proposed by the new administration is a tight budget. To arbitrarily recommend a 14-percent cut, as the Budget Committee has done, appears to be playing games with our national security, and will seriously compromise our position in SALT negotiations.

The modernization of the U.S. nuclear deterrent forces is a cyclical phenomenon. Fiscal year 1978 is a year when many of our weapon systems, which will enter our inventory over the next decade, go into the engineering development phase. Slippage or deferment of research and development on nuclear components now would mean that U.S. delivery systems in the future would not have the associated nuclear warhead ready on time.

Nuclear weapons testing is an integral part of the weapons program of research and development, fabrication, testing, and stockpiling. Twice a year the President approves the testing plans. Should the United States produce weapons whose characteristics are unknown because they were not tested? I hope not.

Nuclear weapons require special nuclear materials. It takes 3 to 5 years to produce the required plutonium, tritium, and other substances necessary to fabricate nuclear arms. The fiscal year 1978 special nuclear material budget also provides for the management of the nuclear waste associated with weapons production and for research and development on better and less expensive methods of producing material in a time of rapidly rising costs.

The naval reactor development program for fiscal year 1978 will require $243 million in new budget authority. What will this buy for the United States? It buys a big measure of peace for the world because there is no way, today, for potential adversaries to know where our SSN's and SSBN's are. If ever there was an appropriate slogan, "Run Silent, Run Deep"— it applies to that part of our deterrent triad which is on station, undetected. And it is from this $243 million that updated propulsion systems will allow our submarine forces to continue to survive by being silent, thereby providing for our survival as a nation.

Surface ships with nuclear propulsion run for 10 or more years at flank speed without having to sit dead in the water waiting for an oiler. The surface ship propulsion reactor research program is deeply involved in providing higher shaft horsepower systems of longer life to keep whatever fleet we have a modern fleet.

Finally, there is the laser fusion program. The $94 million requested in the Carter budget for laser fusion operating expenses provides for developing programs with high-level potential payoffs; for example, relatively inexpensive means to simulate within the laboratory certain nuclear effects. We need to learn how our weapons would react, and if they even survive, in a hostile environment—that is, under attack. This is important to insuring the survivability of our deterrent forces.

For a Budget Committee, after a few hours of meetings, to unilaterally and arbitrarily cut the funding for deterrent weapons by $300 million is not a responsible approach to national defense or to budgeting.

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. DAN DANIEL. I am happy to yield to the gentleman from Missouri.

Mr. ICHORD. Mr. Chairman, I thank the gentleman from Virginia for yielding to me and I rise in opposition to the Wright amendment and in favor of the Burleson of Texas substitute, and definitely in support of the level of defense spending recommended—and I speak to my Democratic colleagues on this side of the aisle—by our Democratic President, President Carter.

I say to my Democratic colleagues that this is the only issue involved in this amendment—whether or not we are going to support President Carter, because this is an issue which President Carter has probably agonized over more than any Member of this House, more than any member of the Committee on Armed Services, more than the Chairman of the Budget Committee, and more than any member on the Budget Committee.

Mr. Chairman, my colleagues will remember that during the campaign President Carter said, "I want to cut defense spending $5 billion." What did he do? He only ended up cutting it about $2 billion from the Ford budget. Let me read the figures to the Members as to just what we are doing today: Ford, $122 billion; Carter, $120.1 billion; the House Committee on Armed Services—and we are compromising with the Burleson Committee, and we are the committee that is supposed to know about the defense needs of this country—whether we do or not is a judgment for the Members to make—$120.9 billion that we brought in to the Members. The House Committee on Appropriations brought in to the Members a recommendation of $121.1 billion. What did the budget committee do? It ignored the House Committee on Appropriations, which even came in above the House authorization committee. The Senate Armed Services Committee, $121.3 billion. The Senate Appropriations Committee, $121.7 billion. The Senate Budget Committee, $120.6 billion. And we are asked to buy $115.9 billion, and now as a compromise we are asked to buy the Wright Amendment providing only $116.9 billion, $3.2 billion under President Carter's budget.

Mr. Chairman, as chairman of the R. & D. subcommittee, I can assure the Members that the members of my subcommittee scrutinized our defense pos-

ture in detail as a part of our deliberations. I speak to my Democratic colleagues. We did not approve everything the President and the Pentagon asked for. In fact, we cut their request.

Listen to this, Mr. Chairman. We cut their request by $776 billion, almost three-quarters of a billion dollars, and our actions were dictated by a concern for current deficiencies in our defense posture, and those programs which did not contribute to the near term correction of those deficiencies, or which were poorly justified, or inefficiently managed, did not survive.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ICHORD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, if the budget figure stands, I state to my distinguished chairman and the members of the Budget Committee, you have defeated everything we have done in the R. & D. committee, everything we have done, and you have cut the legs out from under the President of the United States. Why do I say this? We cut with the intention of putting the money back into hardware, which we did in the full committee.

Mr. Chairman, I would hope that some day I will be able to live in a world where the United States of America does not have to spend a dime for defense. I hope and I pray that my children and my grandchildren will be able to live in that kind of world in the future.

Mr. LEGGETT. Mr. Chairman, will the gentleman yield?

Mr. ICHORD. Not at this time. I will yield to the gentleman if he will get me additional time later on

Mr. Chairman, I hope and I pray that my children have that kind of world, but we cannot stick our heads in the sand like the ostrich and think in terms of how we would like the world to be rather than what it is.

The Budget Committee in its recommendation for defense is asking this House to accept a $1 billion reduction justified on the basis of level of purchases. The proposal, Mr. Chairman, is made right in the face of a rpeort on NATO by Senators NUNN and BARTLETT, reaffirmed by the staff of the House Armed Services Committee, that the shortfalls in reserves and preposition stocks are of such magnitude that deployed combat units might not be able to sustain themselves for more than a few days of high intensity combat.

Mr. Chairman, I do not share all of the views of General Keegan but I do share the views of Senator NUNN and Senator BARTLETT. I am frightened by the deteriorating capability of U.S. military strength vis-a-vis the Warsaw Pact nations and most particularly the Soviet Union.

To permit, I would state to my good friend, the chairman of the Budget Committee, such a situation to continue unabated is absolutely suicidal. To defer needed purchases, which the gentleman is doing, is absolutely absurd, penny wise and pound foolish, false economics, and destined to cost the American taxpayers more for the same equipment. He is asking Congress to acquire weapons systems at an uneconomical rate. This basic premise of economics was obviously overlooked by the Budget Committee. To correct this oversight I urge Members to support the Burleson amendment.

And to my friends who do not see the need for as strong a defense as I, and particularly those who would vote dry and drink wet, and I am talking about those who supported the Cohen amendment only Monday on the House floor, I say they cannot expect to have a $116.9 billion level and keep our bases open. They cannot vote dry and drink wet. Bases will have to be closed if the Burleson amendment is not adopted.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

(By unanimous consent, Mr. ICHORD was allowed to proceed for 3 additional minutes.)

Mr. ICHORD. Mr. Chairman, I state to my friends on my side of the aisle who supported so overwhelmingly the amendment that was adopted to increase civilian workers in the Department of Defense, you cannot vote dry and drink wet. The increase in civilian workers will have to be eliminated.

I state to my friends over on the Senate side who added on the nonnuclear Lance and the A–7 airplanes, and I state to the gentleman from Texas (Mr. WRIGHT) that he cannot vote dry and drink wet. All of those add-on's are going to have to go if the Budget Committee is sustained.

Let us restore, Mr. Chairman, President Carter's budget. Let us permit him to deal with the Soviet Union from a position of strength in the SALT talks, not from a position of weakness, which situation he will be in if we do not vote for the chance to have the world in the future that we all want to live in. I urge a vote for the amendment offered by the gentleman from Texas (Mr. BURLESON). Vote for our Democratic President, President Carter.

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. ICHORD. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, I thank my distinguished colleague for yielding.

I just want to point out for him that if the Burleson amendment were adopted the Armed Services Committee would be the only committee in the House to have its recommendations virtually fully funded in the budget. The other committees are not in that position.

Mr. ICHORD. I will say to the distinguished gentlewoman, I am sorry but her statement is inaccurate, and the reason why it is inaccurate is that the House Armed Services Committee asked the Budget Committee to give us a level of spending at $120.9 billion. The Burleson of Texas amendment is a compromise. It is between your figure and the figure recommended by the Budget Committee. The House Armed Services Committee recommended $120.9 billion. The Burleson amendment only calls for $120.1 billion for defense.

Mr. Chairman, it is only $120.1 billion. I see that the gentleman from Texas (Mr. BURLESON) is nodding his head.

I would like to have the time, Mr. Chairman, to read from a speech made by a Member who knows more about the defense needs of this country, who unfortunately is now in the hospital, than any Member in this House. I am talking about our distinguished friend and our colleague, and I hope that the gentleman will speedily recover from the minor operation he is about to undergo and return to us soon. I do want the Members of the House, and particularly my good friend, the gentleman from Connecticut (Mr. GIAIMO) to hear portions of a speech recently made by the honorable gentleman from Illinois (Mr. MEL PRICE).

The CHAIRMAN. The time of the gentleman from Missouri (Mr. ICHORD) has expired.

Mr. ICHORD. Mr. Chairman, I ask unanimous consent to proceed for an additional 3 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

Mr. MITCHELL of Maryland. Mr. Chairman, I regretfully object.

The CHAIRMAN. Objection is heard.

The question is on the amendment offered by the gentleman from California (Mr. JOHN L. BURTON) to the amendment offered by the gentleman from New York (Mr. PIKE).

PARLIAMENTARY INQUIRY

Mr. JOHN L. BURTON. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. JOHN L. BURTON. Mr. Chairman, it has been some time since I offered the amendment. I wonder if the Members might be aware of what the amendment does.

The CHAIRMAN. The gentleman does not state a parliamentary inquiry.

The question is on the amendment offered by the gentleman from California (Mr. JOHN L. BURTON) to the amendment offered by the gentleman from New York (Mr. PIKE).

The question was taken; and on a division (demanded by Mr. JOHN L. BURTON), there were—ayes 27, noes 66.

RECORDED VOTE

Mr. JOHN L. BURTON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 64, noes 344, not voting 25, as follows:

[Roll No. 156]

NOT VOTING—25

Boggs	Fraser	Roe
Derrick	Harkin	Rostenkowski
Dodd	Jones, N.C.	Russo
Dornan	Koch	Staggers
Fish	LaFalce	Teague
Fithian	Le Fante	Walgren
Florio	Milford	Young, Alaska
Foley	Myers, Ind.	
Forsythe	Price	

Mr. PANETTA and Mr. RUPPE changed their vote from "aye" to "no."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. ROUSSELOT. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Texas (Mr. BURLESON) as a substitute for the amendment offered by the gentleman from New York (Mr. PIKE).

Mr. Chairman, I will be brief.

Mr. Chairman, as some time has expired since the original discussion on the Burleson amendment, I believe much of the debate that has preceded this point in consideration of this budget resolution has been more than adequate. However, I thought that since the chairman of the Committee on Armed Services (Mr. PRICE) felt very strongly on this issue, I would like to yield to my colleague, the gentleman from Missouri (Mr. ICHORD), from the Committee on Armed Services, to relate the message of our distinguished chairman of the Committee on Armed Services.

Mr. Chairman, I yield to my colleague, the gentleman from Missouri (Mr. ICHORD), a member of the Committee on Armed Services, to relate that message from the chairman of the Committee on Armed Services.

Mr. ICHORD. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, regrettably, a Member objected to my reading portions of a speech by the gentleman from Illinois (Mr. MELVIN PRICE).

Mr. RONCALIO. Mr. Chairman, will the gentleman from California (Mr. ROUSSELOT) yield a half minute to me, in the interest of order?

Mr. ROUSSELOT. Mr. Chairman, I would be glad to do that, but I promised my colleague, the gentleman from Missouri (Mr. ICHORD), that I would yield to him for what I think is a significant statement by the chairman of the Committee on Armed Services.

If there is any time left after that, I will be glad to yield to my colleague, the gentleman from Wyoming (Mr. RONCALIO).

Mr. ICHORD. I realize, Mr. Chairman, that we are pressed for time; but regrettably, a Member did object to hearing this message from our good friend, the gentleman from Illinois (Mr. PRICE), now in the hospital, who, I state unequivocally, knows more about defense than any Member in this House.

The speech was made on March 29, 1977, and it was precisely on the subject we are now considering as we are about ready to vote on the Wright amendment.

Mr. Chairman, the Wright amendment would cut President Ford's defense budget by $3.2 billion. The Burleson amendment will restore President Carter's budget of $120.1 billion.

This is what the chairman of the Committee on Armed Services, the gentleman from Illinois (Mr. PRICE), has to say:

There are real problems in Defense procurement that I would have liked to review with you: There are shortages in our ground forces, where twenty-year-old artillery and vehicles are being used. There is deep division on what the size and shape of our future Navy should be.

Mr. Chairman, I hope that I do have the attention of my good friend, the distinguished gentleman from Connecticut (Mr. GIAIMO) as I read this.

The gentleman from Illinois (Mr. PRICE) goes on to say:

I supported the Congressional Budget Act. I hope it is going to work.

But it is not going to work if it is going to be based on arbitrary limits that disregard real problems and actual policies in the real world.

It is not going to work if national defense is going to be made the whipping boy for those who want to spend money in other areas or try out favorite theories on economic stimulation.

Proposals are now being advanced for massive reductions in the President's defense request.

These are being brought to us, requests for $4.1 billion under our President Carter's proposal, I would state to my Democratic colleagues by our Budget Committee.

I return to the text of Chairman PRICE's speech:

Proposals are now being advanced for massive reductions in the President's defense request. These reductions are justified by generalized statements based on untested—and unexamined—presumptions. They have not had the benefit of detailed analysis or of hearings——

Which the gentleman from Connecticut (Mr. GIAIMO) admits:

Or of hearings to test the validity of the presumptions.

Listen to what our chairman, the gentleman from Illinois, MEL PRICE says, listen to this, and I quote precisely:

I applaud the President for being unwilling to make greater cuts—regardless of campaign statements—because he could not be assured that greater cuts could be made without hurting capability.

In our committee we disagreed with some of the President's proposals. We recommended that almost $1 billion of his proposed reductions be restored.

We also carefully considered each of the programs involved and attempted to determine the actual effect on military preparedness.

I think it is instructive to note that the Armed Services Committee in the Senate estimated a requirement of $1.2 billion above the President's proposed figure. Thus our

committees were within half a billion dollars of each other.

I think there are three verities we in the Congress have to remember in ordering national priorities:

First, our priorities are sometimes dictated by developments beyond our control.

Second, the American people recognize what is needed.

Third, we cannot determine defense requirements by how much we think we need for housing programs, or medical research, or urban renewal, or pollution control, or domestic programs.

I happen to be a Democrat. I consider myself a pretty good one. I have supported all of the major social programs advanced by my party for the past 30 years. I never felt it was necessary to cut national defense to do so.

National defense is not in competition with social programs.

There is no and/or conjunction in the United States Constitution.

The Constitution says we shall "promote the general welfare and provide for the common defense." It does not say we should do one or the other.

I do not think the Congress as a whole will support a $4 billion reduction in President Carter's defense budget.

We have to have a rational system for determining our national priorities.

Our new procedures are not going to work if they are used as a vehicle to attack the defense budget—before the hard, detailed work of congressional study is even completed.

It is time for those of us in Congress to reexamine the intent of the congressional budget reforms and how we intend to use them.

Mr. ROUSSELOT. So the gentleman's point is that the chairman of the House Committee on Armed Services (Mr. PRICE) is suggesting to vote down the Wright amendment and vote for the Burleson of Texas amendment?

Mr. ICHORD. That is correct, and to support the President of the United States.

Mr. ROUSSELOT. I appreciate my colleague's statement.

Mr. GIAIMO. Mr. Chairman, I ask unanimous consent that all debate on the Pike amendment and all amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous-consent request was made will be recognized for one-half minute each.

(By unanimous consent, Mr. STRATTON yielded his time to Mr. BURLESON of Texas.)

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. BURLESON).

Mr. BURLESON of Texas. Mr. Chairman, one brief point: My dear friend, neighbor and colleague, the gentleman from Texas, (Mr. WRIGHT) our majority leader, in suggesting approximately $1 billion restoration to category 050 of this resolution, by implication suggested that this sum would protect military procurement of hardware, to put it another way, there will be a $3-billion reduction, and that this would not touch procurement. Let it be understood we are not dealing with line items in this resolution. So, any reference to procurement is meaningless. The $3-billion reduction could apply to the procurement of planes, ships, guns, ammunition—everything. I may have misunderstood the gentleman, but that was the impression I got. I ask the Members to vote down the Wright amendment in order that there be opportunity to vote on the amendment I have proposed.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Chairman, earlier in the debate we discussed the things that the Budget Committee addressed itself to, like estimates of how many people are going to be in the military, and these other various things. None of them really add up to any real savings. The objection to estimates of escalation could not really save money. The only thing that was real at the end of the discussion of the budget proposals was that there will be a cut in procurement of weapons under the Wright amendment, despite what he says, because the overall amount of money cut is there. It is not his intention to cut it, but we would be bound to cut it if Wright prevailed. The national defense of our country is at a level where we should increase it, not decrease it.

(By unanimous consent, Mr. MITCHELL of Maryland yielded his time to Mr. GIAIMO).

The CHAIRMAN. The Chair recognizes the gentleman from Wisconsin (Mr. ASPIN).

Mr. ASPIN. Mr. Chairman, I rise to make an appeal to the liberal Members of the Democratic side to vote in favor of the Wright amendment. I think what we are talking about here is two alternatives: A $4 billion add-on and a $1 billion add-on. I think a $1 billion add-on is justifiable on the basis that some increase is justified in real growth. I think liberals can defend it on the ground that what we are talking about at this point is the better of two alternatives.

The Chair recognizes the gentleman from California (Mr. LEGGETT).

Mr. LEGGETT. Mr. Chairman, I want to reinforce the gentleman from Wisconsin (Mr. ASPIN). I think we ought to support the Wright amendment and then maybe consider later on whether or not we want to defeat it as a substitute. I think the Committee on Armed Services is unduly alarmed about this bill. Normally there is a $2 billion shortfall between what the Armed Services Committee passes and what the Appropriations Committee enacts every year. There is today a $4.4 billion shortfall between what the Appropriations Committee has passed and what the Department of Defense has spent. The committee targets should be supported in the defense function and the amendments defeated.

(By unanimous consent, Ms. HOLTZMAN yielded her time to Mr. GIAIMO.)

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Chairman, the amendment I offered is an attempt to preserve most of the economies that have been made wisely by the committee, but still to give to the President that which he says he needs, namely, enough leverage in procurement to strengthen our hand in the SALT limitation talks. It would increase by $1 billion the amount in the committee resolution, rather than $4 billion as proposed by the administration.

The Chair recognizes the gentleman from Ohio (Mr. LATTA).

Mr. LATTA. Mr. Chairman, I rise in support of the President and of the amendment offered by the gentleman from Texas (Mr. OMAR BURLESON) and against the amendment offered by the gentleman from Texas (Mr. WRIGHT).

I realize that the gentleman from Texas (Mr. WRIGHT) is a great compromiser but in this instance I think he is absolutely wrong, the President is right, and the gentleman from Texas (Mr. BURLESON) is right.

I do not think we should be picking figures out of the air that we cannot substantiate and compromising our defense posture. We should not compromise when we have six committees of the Congress saying this is where we should be and we should go no lower. We should stick with the people who know whereof they speak.

The CHAIRMAN. The Chair recognizes the gentleman from Connecticut (Mr. GIAIMO) to conclude the debate.

Mr. GIAIMO. Mr. Chairman, we are trying to put together a budget resolution for fiscal year 1977 and we are trying to treat every segment of our national interest fairly and provide for the necessary and available funds. We believe in the area of national defense, the only area of the budget where there was a massive increase this year over last year—$9.5 billion, that we are not treating them poorly.

Certainly my friend, the gentleman from Missouri (Mr. ICHORD) and others object to the fact that we cut them even $1, but the fact is that they have a $9.5-billion increase over last year.

Another fact is that even though these same objections to our suggested cuts were heard last year, the Department of Defense did not even spend all the money or obligate all the money we gave them last year. There is a spending shortfall in defense of some $4.5 to $5 billion in the present year's budget.

As we try to arrive at an equitable budget for the Nation, everyone has to absorb a little bit of the reduction; that is what we are asking Defense to do. It is reasonable. It will not affect our national security in any way. It will not jeopardize our defense effort. It will give our President some greater flexibility to address himself to the real defense needs of this Nation.

I urge the Members to vote down the Burleson amendment.

PARLIAMENTARY INQUIRY

Mr. STRATTON. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. STRATTON. Mr. Chairman, would it not be in order for me to ad-

vise my colleagues at this time that the President called the Speaker this afternoon to ask him to stay with the President?

The CHAIRMAN. The Chair would like to advise the gentleman that is not a parliamentary inquiry.

Mr. STRATTON. I thank the Chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. WRIGHT) to the amendment offered by the gentleman from Texas (Mr. BURLESON) as a substitute for the amendment offered by the gentleman from New York (Mr. PIKE).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. ASPIN. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment to the amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. BURLESON) as a substitute for the amendment offered by the gentleman from New York (Mr. PIKE).

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ICHORD. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 225, noes 184, not voting 24, as follows:

[Roll No. 157]

NOT VOTING—24

Boggs	Derrick	Dodd
Burton, Phillip	Diggs	Evans, Del.
Fish	Koch	Rostenkowski
Fiorio	LaFalce	Russo
Forsythe	Milford	Staggers
Fraser	Myers, Ind.	Teague
Harkin	Price	Walgren
Jones, N.C.	Roe	Young, Alaska

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Walgren against.
Mr. Milford for, with Mr. Staggers against.
Mr. Price for, with Mrs. Boggs against.
Mr. Evans of Delaware for, with Mr. Phillip Burton against.
Mr. Fish for, with Mr. Koch against.

Messrs. ABDNOR, NEAL, COHEN, and SARASIN changed their vote from "no" to "aye."

So the amendment offered as a substitute for the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. PIKE), as amended.

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. MITCHELL of Maryland. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 218, noes 185, not voting 30, as follows:

[Roll No. 158]

Evans, Ga.	Milford	Young, Alaska

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mrs. Boggs against.

Mr. Milford for, with Mr. Staggers against.

Mr. Mathis for, with Mr. Walgren against.

Mr. Evans of Delaware for, with Mr. Phillip Burton against.

Mr. Fish for, with Mr. Koch against.

Mr. John T. Myers for, with Mr. Diggs against.

Mr. Young of Alaska for, with Mr. Drinan against.

Mr. AKAKA changed his vote from "no" to "aye."

So the amendment, as amended, was agreed to.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. MITCHELL OF MARYLAND

Mr. MITCHELL of Maryland. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. MITCHELL of Maryland: Strike all after the resolving clause and insert in lieu thereof the following:

That the Congress hereby determines and declares pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1977—

(1) the recommended level of Federal revenues is $398,094,000,000;

(2) the appropriate level of total new budget authority is $500,642,000,000;

(3) the appropriate level of total budget outlays is $462,332,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $64,239,000,000; and

(5) the appropriate level of the public debt is $801,084,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $101,084,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1977, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):

(A) New budget authority, $109,477,000,000.

(B) Outlays, $106,074,000,000.

(2) International Affairs (150):

(A) New budget authority, $9,543,000,000.

(B) Outlays, $7,397,000,000.

(3) General Science, Space, and Technology (250):

(A) New budget authority, $4,930,000,000.

(B) Outlays, $4,737,000,000.

(4) Natural Resources, Environment, and Energy (300):

(A) New budget authority, $20,950,000,000.

(B) Outlays, $20,677,000,000.

(5) Agriculture (350):

(A) New budget authority $2,153,000,000.

(B) Outlays, $2,880,000,000.

(6) Commerce and Transportation (400):

(A) New budget authority, $22,169,000,000.

(B) Outlays, $20,377,000,000.

(7) Community and Regional Development (450):

(A) New budget authority $10,092,000,000.

(B) Outlays, $11,086,000,000.

(8) Education, Training, Employment, and Social Services (500):

(A) New budget authority, $25,621,000,000.

(B) Outlays, $30,293,000,000.

(9) Health (550):

(A) New budget authority, $47,710,000,000.

(B) Outlays, $44,258,000,000.

(10) Income Security (600):

(A) New budget authority, $182,993,000,000.

(B) Outlays, $148,589,000,000.

(11) Veterans Benefits and Services (700):

(A) New budget authority, $19,935,000,000.

(B) Outlays, $19,903,000,000.

(12) Law Enforcement and Justice (750):

(A) New budget authority, $3,560,000,000.

(B) Outlays, $3,800,000,000.

(13) General Government (800):

(A) New budget authority, $3,898,000,000.

(B) Outlays, $3,998,000,000.

(14) Revenue Sharing and General Purpose Fiscal Assistance (850):

(A) New budget authority, $9,847,000,000.

(B) Outlays, $9,803,000,000.

(15) Interest (900):

(A) New budget authority, $43,000,000,000.

(B) Outlays, $43,000,000,000.

(16) Allowances:

(A) New budget authority, $1,069,000,000.

(B) Outlays, $1,021,000,000.

(17) Undistributed Offsetting Receipts (950):

(A) New budget authority, $16,000,000,000.

(B) Outlays, $16,000,000,000.

SEC. 3. In the third budget resolution for fiscal year 1977, the Congress provided for revenue and spending proposals designed to stimulate the Nation's economy in order to reduce unemployment. These proposals, together with recent indications of more vigorous economic growth in the private sector, provide evidence that the Nation's economy may be returning to the levels needed to provide jobs to millions of our unemployed.

The Congress recognizes, however, that unusual uncertainties surround the current economic outlook for 1977 and 1978—primarily, the economic impact of the stimulus proposals and the likelihood of continued economic growth in the private sector—and that additional time and information are needed to make final determinations with respect to fiscal policy for fiscal year 1978; and declares that, if economic recovery does not proceed satisfactorily during the months immediately following adoption of the first budget resolution for fiscal year 1978, it will be necessary to provide additional stimulus to the economy in appropriate amounts to be determined in the second budget resolution for fiscal year 1978. On the other hand, if the recovery continues to show signs of long-term renewed growth, it may be desirable to reduce some of the economic stimulus provided for fiscal year 1978 in order to make more rapid progress toward a balanced budget.

SEC. 4. Pursuant to section 304 of the Congressional Budget Act of 1974

(1) Section 1 of S. Con. Res. 10 is amended to read as follows:

"That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

(1) The recommended level of Federal revenues is $355,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $3,300,000,000;

(2) The appropriate level of total new budget authority is $469,700,000,000;

(3) the appropriate level of total budget outlays is $414,250,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $59,250, 000,000; and

(5) the appropriate level of the public debt is $707,970,000,000."

(2) Section 2, paragraph (10) of S. Con. Res. 10 is amended to read as follows:

"(10) Income Security (600):

(A) New budget authority, $167,700,000,000;

(B) Outlays, $138,100,000,000."

Mr. MITCHELL of Maryland (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

Mr. ICHORD. Reserving the right to object, the gentleman is offering this as a substitute. Is he affecting defense levels which have already been set?

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. ICHORD. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. I am offering it as a substitute, and that will affect the defense levels that have been set, but there is a procedure by which technical changes can be made to adjust the figures.

Mr. ICHORD. Mr. Chairman, I withdraw my reservation of objection, but I reserve a point of order on the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. MITCHELL of Maryland. Mr. Chairman, what this amendment will attempt to do is to take $6.5 billion from the military function 050 and transfer it into the domestic programs which need it. As many Members know, I was originally proposing a $12.3 billion cut with those funds to be transferred to domestic programs. In the light of the action which has taken place on the floor today, I do not think I should offer that original amendment. Instead, I offer the amendment for transferring $6.5 billion from function 050 into the various categories of domestic programs which have need.

I want to thank the gentleman from California for securing time to allow the reading of the correspondence from the chairman of the Armed Services Committee. I had originally objected, and in retrospect that was wrong, because now I am glad that correspondence was read. The gentleman provided the opportunity for the gentleman from Missouri (Mr. ICHORD) to read the correspondence. I am glad the correspondence was read, because in the reading of it we had a chance to place emphasis once again on the double responsibility, the dual responsibility that this House has, this Congress has, as given to us by the Constitution.

We are supposed to provide for the national defense. That is one part of our dual responsibility; but we are also supposed to promote the general welfare. In all the debate that has gone on up to this point, what we have done in all the discussion up to this point, what we have done is to address only one part of that responsibility. That is all that we have done. We have completely ignored the other part of our constitutional mandate, and that is to promote the general welfare of the people.

I hope that my amendment will give the Members the opportunity to address the other part of our constitutional responsibility, and God knows it needs to be addressed. Despite the best efforts of the chairman of the Budget Committee and the members of the Budget Committee, what we have done, what we have really done is almost ignore the fact that we have not promoted the general welfare in this country.

It is true, it is true that we have a whole host of programs designed to help people, designed for the survival of people, designed for their general welfare. But what we do is to fund those programs in such a niggardly fashion that we provide for only the general welfare of a small percentage of our people.

Every man and woman who serves in this House ought simply raise the question in his own heart, soul, and mind: Are we meeting the needs of all our senior citizens? And if we raise the question, the answer is going to come back loud and clear: No, we are not. We are meeting the needs of about 10 per cent of them.

Every man and woman who serves in this House ought raise the question: Are we meeting the educational needs of children? Sure, we have a day care or early education program or Headstart, and everybody in this Chamber supports them and says they are good programs. But we fund them at a level where only 15 percent of the kids who need the programs, get them.

Is that promoting the general welfare? All we need do is ask ourselves the question.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

(By unanimous consent, Mr. MITCHELL of Maryland was allowed to proceed for 3 additional minutes.)

Mr. MITCHELL of Maryland. Mr. Chairman, all we have to do as honorable Members of this House is to ask ourselves the question: Is it not wise to promote the general welfare by putting people back to work? Is that not what we are talking about? And if that is true, then we have got to raise the subsequent question: How many people are out of work? And the answer comes back: 8 million known are out of work.

If we dig a little more deeply, we come up with the other part of the answer, add 5 million on to that and we are talking about 13 million Americans out of work. We are talking about making a mockery of the ethic of work upon which this kind of democracy is supposed to function.

Mr. Chairman, I do not intend to belabor the Members with any long argument. In my own mind the issue is very clear. We spent 3 hours debating and arguing over one part of our constitutional responsibility. I am asking this House in a few short minutes to look at the other part of that responsibility and that is to promote the general welfare.

Mr. CARR. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the distinguished gentleman from Michigan.

Mr. CARR. Mr. Chairman, I thank the gentleman for yielding. I would like to associate myself with the gentleman's remarks. I think the gentleman has made a lot of thoughtful and worthwhile comments about our budget resolution. This is supposed to be about national priorities. Instead, it has turned into a debate on vested interests. I think the gentleman has put his finger on it when the gentleman says we have not addressed our constitutional responsibilities for the health, safety, and welfare of the people we represent.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I thank the gentleman for yielding. This resolution is very much like the effort which the gentlewoman from New York (Ms. HOLTZMAN) and I tried to put through last year. It does raise the critical question of the reordering of priorities and getting our people back to work in accordance with the commitment we made in our platform and most of us made in our speeches.

Mr. Chairman, I congratulate the gentleman for his efforts. His amendment has been very carefully and thoroughly researched. I would like to associate myself with his remarks.

Mr. Chairman, the most important function of the congressional budget process is to permit Congress to set priorities for Government revenues and expenditures. The "transfer resolution" presented by the gentleman from Maryland (Mr. MITCHELL), admirably exercises this function, shifting extravagant and wasteful defense expenditures to underfunded job-creating programs. Unfortunately, the Budget Committee made only minor revisions to the existing budget, albeit in the right direction, and failed to endorse programs that would make a really substantial inroad into the huge unemployment burdens on our society.

Mr. Chairman, I think the President, the Budget Committee, and Mr. MITCHELL all share a common objective—to restore the health of our economy while maintaining an adequate defense, and to that end work toward a balanced budget. The difference is as to the means to achieve those ends. It is my firm conviction that only the Mitchell approach will do what is needed. The only time we have had a balanced budget in recent history is when we had full production and full employment. We actually had a surplus. Given the Congressional Budget Office's figures that for every 1 percent increase in unemployment we add $16 billion to the national deficit—$14 billion in lost taxes and $2 billion in unemployment and welfare benefits—it seems so clear to me that the only way to balance the budget is to get our people back to work.

Furthermore, the social costs of millions of unemployed Americans are horrendous. The soaring crime, delinquency, and drug-use rates in our country are unquestionably tied to our high

unemployment rate, particularly as it is broken down to show highest unemployment—as high as 50 percent—among minority youth in our cities. A continuation of this situation invites a social—and economic—disaster.

From an economic standpoint, it has always seemed clear to me that the underpinning of our prosperity is the high standard of living achieved by our working people, enabling them to buy the goods and services which our industry produces. When 7 million Americans are officially out of work—and 6 million more are unemployed but unlisted—the markets of our economy are seriously undermined.

Congressman MITCHELL has offered an alternative, a "Transfer Resolution," that responds to some of the most serious problems that confront this Nation. It is an opportunity to fulfill all of the promise inherent in the budget process by seriously considering the priorities we set and by changing them for the benefit of the American people. A transfer of funds from the defense function to job-creating programs is imperative; we cannot accept the present budget target of a 6.3-percent unemployment rate, or 6 million unemployed, at the end of 1978.

To its credit the Budget Committee significantly reduced the budget authority and the budget outlays proposed by the President for the defense function, an action unfortunately reversed by the action just taken by this committee; it increased funds for commerce and transportation and for education, training, employment, and social services. I might add, though, that I am somewhat mystified as to why the committee failed to take more assertive action with regard to the Defense Department's failure to meet its estimated outlays by a whopping $5 billion over the last 19 months.

Overall the committee resolution reluctantly accepts the existence of a class of chronically unemployed of substantial dimension. I cannot accept this.

Passage of the "Transfer Resolution" would confront the problem of unemployment and all of the social ills which it engenders. It would provide the basis for over 800,000 new jobs to combat youth unemployment, to construct necessary public facilities, to begin thousands of new housing units, and to support small businessmen in their efforts to maintain their livelihoods.

The decision which we make on this amendment is one of the most important and far reaching to be made during this Congress. The choice is clear and we must have the courage to choose the correct path. I most strongly urge my colleagues to support the bold initiative of Congressman MITCHELL and pass this amendment.

Mr. BADILLO. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from New York.

Mr. BADILLO. Mr. Chairman, a careful perusal of the items contained in House Concurrent Resolution 195, the First Concurrent Resolution on the budget, led me to the regrettable conclusion that the only proposal outlined in the committee report to which I can give my unqualified support is the Mitchell amendment which seeks to divert billions of dollars from defense spending and transfer the moneys thus saved to public employment, energy conservation, and other social programs.

Since the inception of the congressional budget process, I have urged time and again that we in Congress would finally seize the opportunity presented to us by this new planning tool to establish sound national priorities and set realistic funding levels for badly needed domestic programs. Unfortunately, this did not come to pass. As the gentleman from Maryland (Mr. MITCHELL) so eloquently points out in his supplemental views accompanying this resolution, 23.2 percent of the budget authority is still dedicated to defense programs, while only 4.5 percent is allocated to health, and 9.5 percent is earmarked for a combination of education, training, employment, and social service programs.

Additionally, although this was not emphasized by Mr. MITCHELL, only 2 percent of the total outlay recommendations are reserved for the community development block grants, rural water and waste disposal, community services, economic development assistance, accelerated public works, Appalachian regional, Indian, disaster relief, and flood insurance programs. Translated, this means that our major domestic programs together account for only 16 percent of the budget, or little more than two-thirds of the amount dedicated to military spending alone.

I find this, coming from a Democratic-controlled Congress and under a Democratic administration, discouraging and disgraceful. Once again, as in the Nixon years, I find myself obliged to express my strong opposition to such policies by supporting only the perfecting amendments, such as the one before us now, and rejecting the budget resolution as a whole.

Incidentally, my concerns in this respect are shared by a large number of people in my district and throughout the country. As an example of this shared concern, I would like to insert here, for the information of my colleagues, an editorial which appeared in the New York Times today:

THE FIRST QUARTER OF MR. CARTER

When Jimmy Carter became President 98 days ago he had little to fear except fear itself. His remarkable campaign for the White House showed him to be shrewd and intelligent, dedicated and poised, efficient and humane. He was a man of obvious self-confidence, but also one who sometimes scared easily; when the race grew tense he not only trimmed but cut and ran from apparent commitments to full employment and social spending toward a balanced budget and increased defense spending. Fear rather than conviction seemed to move him from side to side. It was a fair preview of the leader we have seen so far.

Since first-quarter stocktaking seems to be desired in the Oval Office this week, we would reiterate: Mr. Carter need fear only fear itself. Taken individually, his retreats from the tax rebate, from defense cutbacks, from cancellation of costly water projects and from the human-rights test in foreign affairs can be seen as prudent accommodations with the business community or powerful forces in Congress or simply reality. But cumulatively, the compromising suggests an excessive haste either in the embrace of policy or withdrawal from it. These were probably habits carried into office from the campaign, into the second campaign, so to speak, by which the new President wished to make his mark abroad and at home. This running for President from the office of the President should be ended now, the accumulated popularity and confidence invested where it counts.

What counts? The President's choices of priority for real and not just rhetorical commitment have been excellent. He has shown himself eager to promote the recovery of the domestic economy, to adopt a wise and far-reaching energy policy and to build upon past negotiations with the Soviet Union toward a genuine reduction in nuclear arms. Difficult though they will be to achieve, these goals are not enough.

Like arms control and energy management, the American economy needs to be redirected. As Mr. Carter recognized, more forcefully before his election than since, unemployment is a cruel waste of present resources and future strength. The traditional responses of more inflation or more protectionism or both will only compound the problem. Huge investments in the training, education and relocation of people and in the structure of our urban communities are no less essential than investments in new sources of energy, and no less a task for Presidential leadership. It was probably sound to deal first with energy, to assure continued growth. It would be assuring now to sense a comparable commitment "to put Americans back to work," as Jimmy Carter used to say.

As with energy, an imaginative and far-reaching program for full employment is also an international imperative. The American people cannot be persuaded to endure truly free trade and investments in economic development elsewhere if their own needs are not boldly addressed. Unless they are, the country will keep sliding back from involvement in the world, unable to influence the economic and political environment upon which real security depends. Mr. Carter's championship of human rights has restored a necessary measure of idealism to our reputation abroad, but like the other useful gestures of the first quarter it is prelude to policy, not a substitute for it. Both the industrial and developing nations seek American leadership in new trade and investment policies. New generations that have never known the inspirational qualities of America need to be addressed with a diplomacy finally liberated from Vietnam.

The accounts of the President as he concluded his first hundred days in office stress his increased efficiency, and the compartmentalizing of his life into periods of study, action and public relations. In settling in, he has clearly been adept and impressive. But on the most important questions Mr. Carter must now become obsessive, unafraid to proclaim some vision, unafraid to persist as his popularity and constituency diminish, unafraid to lose some campaigns that need to be fought.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I thank the gentleman for yielding. I think the gentleman has courage in offering this amendment at this particular point in time. I am extremely saddened that the parliamentary situation arose that the gentleman was put in the situation of offering an amendment for the good of the country after we have dabbled around with the issue of a pay

raise when the sky is really falling and we should be dwelling on the issues of our time.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

(At the request of Mr. DELLUMS, and by unanimous consent, Mr. MITCHELL of Maryland was allowed to proceed for 1 additional minute.)

Mr. DELLUMS. Mr Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, we spent 3 hours dealing with "The Russians are coming."

I daresay we probably will spend less than 30 minutes dealing with the reordering of the priorities of this country. I think that is very tragic. We should have dealt with this pay raise issue yesterday and got it out of the way.

I know the gentleman from Maryland has worked for several months and placed an extraordinary amount of information in the CONGRESSIONAL RECORD trying to educate all the Members of Congress with respect to this amendment to help our national constituency of people.

Now, we find ourselves after 3 hours in the parliamentary situation dealing with the military budget, precipitated by a discussion of the pay raise, which is an issue which should have been dealt with yesterday.

I am extremely saddened that with all the hard work the gentleman put in the gentleman's amendment that now the gentleman is placed in the parliamentary situation where we are looking at well over 230 Members of this congressional body who have already voted to extend the military budget, thereby giving the gentleman from Maryland no time to argue for the amendment.

The CHAIRMAN. The time of the gentleman from Maryland has again expired.

(At the request of Mr. ROUSSELOT, and by unanimous consent, Mr. MITCHELL of Maryland was allowed to proceed for 3 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank my colleague for yielding. Mr. Chairman, I agree with the point my colleague has made. I disagree with specifics of his amendment, but I think it is important that we consider all aspects of the budget in total.

Could the gentleman tell me again, because I have had some correspondence from individuals that support the gentleman's position of reordering priorities; approximately how much does this substitute reduce the functional category of agriculture?

Mr. MITCHELL of Maryland. Mr. Chairman, I cannot answer that. The general premise that I worked on was as follows: All I could do was to suggest areas of reduction, because I am limited by the budget process. All I could do was suggest the areas where it can be done and that is all the amendment was intended to do. It did not try to cover every category. The wisdom of the Budget Committee and the various committees would still prevail over my amendment.

Mr. ROUSSELOT. If the gentleman will yield further, the reason I asked that question is that I feel that we should have some restraint on the increase that has been suggested in the field of agriculture. The present agriculture category is rather substantially over what we really voted on originally in committee, as the gentleman well knows. I just regret that my colleague made his individual decision to reduce as much as the gentleman did in the defense area.

But, my reading of the gentleman's amendment, as presented, is that he is cutting from the chairman's recommendation—and I realize it is only a recommendation, that it is roughly a reduction of $1.5 billion in the category of agriculture. I agree with my colleague that in too many of the areas in this budget resolution we are not talking about cuts. We are talking about merely trying to restrain increases which are too large.

Mr. MITCHELL of Maryland. I appreciate the gentleman's comments. Let me point out the implication of the passage of this amendment. In the event that it should be passed, then the whole budget process goes back to the Budget Committee, where the gentleman will be given an opportunity to suggest cuts in other areas.

Mr. ROUSSELOT. Restraints in increases. I think we are increasing in every functional category in this resolution.

Mr. MITCHELL of Maryland. This amendment gives the gentleman that opportunity, and I hope he will vote for it.

The CHAIRMAN. The time of the gentleman from Maryland has again expired.

(On request of Mr. BURGENER and by unanimous consent Mr. MITCHELL of Maryland was allowed to proceed for 1 additional minute.)

Mr. BURGENER. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from California.

Mr. BURGENER. Does the gentleman, in his amendment, address himself to additional public service jobs?

Mr. MITCHELL of Maryland. Yes, I do.

Mr. BURGENER. To what degree, roughly?

Mr. MITCHELL of Maryland. What we are talking about, I think, is the creation of another million public service jobs, as I recall the figure.

Mr. BURGENER. The gentleman will recall, in our discussions in the Budget Committee, that the Under Secretary of Labor testified that under no condition could they handle more than 725,000 public service jobs. They just plain could not do it.

Mr. MITCHELL of Maryland. I recall that very well, and I also recall that some gentlemen representing the administration appeared before us, individually and collectively, just a few short weeks ago, and said that a tax rebate was essential for the country, for the little people. A week or so later, they changed their minds. They are neither omniscient nor omnipotent, and I will not be bound by their decisions.

The CHAIRMAN. The time of the gentleman from Maryland has again expired.

(On request of Mr. OTTINGER and by unanimous consent Mr. MITCHELL of Maryland was allowed to proceed for 1 additional minute.)

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I would just like to say that I was derelict, when speaking before, in not giving credit to the gentleman from Michigan (Mr. CONYERS). He played perhaps the key role in putting together this effort last year. I am sure he joins me in saluting the gentleman from Maryland in his effort.

Mr. MITCHELL of Maryland. I thank the gentlemen.

Mr. BENNETT. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I do not think I have ever come to the well of the House before to oppose an amendment without having read it, but I went to the Budget Committee desk on the Democratic side. They were unable to provide it for me, and told me to find it someplace else. I cannot walk fast enough to get it elsewhere so I have to discuss an amendment which I have not read.

Mr. Chairman, I want to say that I do not know something about the gentleman who introduces this amendment. There is not a finer man in this House than he. His humanitarian aspects have touched my heart, and I feel that he would want to do what is best for the country.

But, the remaining part of my remarks really are addressed to the fact that I do not think this Congress is, and I do not think our country is, facing up to the very substantive places where we can save money and cut money in a politically realistic manner and have it available for human needs. Foreign aid is one thing we could end, at least in its present mammoth size. There is no reason why we should continue our present multibillion-dollar foreign aid program. If there is a famine or something of that nature, we should help, but to have the present program, which is just an inducement to ask for more and to be on the string, as these countries are today, is something that has long outrun its course.

If Congress is so mossbacked, so old fashioned, that it thinks that just because we have had that or anything else in the past makes it automatically all right for today, that would be a criticism of us. Another serious criticism of us is the passage and retention of a program which we just undertook, the billions of dollars Federal revenue-sharing program. There is no rhyme or reason to that program. The power to tax and the power to expend should be in the same hands. That is fundamental to good government.

If we had substituted something in that program for what was already done

it would be another matter; if we had taken education or something like that and given the same amount of money, it would have made some sense; but the revenue-sharing program we have today has no constituency at all.

It used to be that people who were at City Hall often pulled the strings and Congressmen were elected. When I came to Congress there were a lot of people here like that. A lot of people were sent here by labor organizations. This is not true today. Today Congressmen are independent-minded individuals and are capable of voting for all their constituents, not just apparent power groups. The leaders of those groups no longer speak for block votes of any substantial size in most districts.

These massive programs of foreign aid and revenue sharing should be ended.

There are also programs which represent an absolutely colossal waste and the waste in them should be ended. A man came to me and talked to me about the food stamp program. He said that at expensive colleges, there are children of wealthy men who are obtaining food stamps simply because they are eighteen and without earned income. By cutting out waste and in other programs we could take care of all of these other really humanitarian things in the Mitchell amendment if we really wanted to do so.

So I rise in opposition to this amendment, not having had an opportunity to read it, having tried to get the opportunity to read it and not finding it at the desk where it ought to be. I am not blaming anybody about it.

At this time, when our country really should do the things that need to be done, and this country is almost faced with bankruptcy, there ought to be more people who voted like I did on the last two tax cuts. I did not vote for the tax cuts.

We ought to come face to face with reality in this matter, turn down this amendment and go forward. I know what my good friend, the gentleman from Maryland (Mr. MITCHELL) has in his heart and his mind. It is well-motivated, but I oppose his amendment.

Mr. Chairman, I urge the Members to vote down the amendment.

The CHAIRMAN. Does the gentleman from Missouri (Mr. ICHORD) withdraw his point of order?

Mr. ICHORD. Mr. Chairman, I withdraw my point of order.

Ms. HOLTZMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman and members of the committee, I want to compliment my colleague (Mr. MITCHELL) for raising the question of human needs and national priorities for the consideration of members of this committee. My colleague has offered all of the Members of the House the opportunity to remove the waste from the military budget and at the same time end the waste of human resources in this country: The waste of the productivity of those who are unemployed, the waste of talents of those who are uneducated, the waste of the potential of our cities.

There is no question, when we have a military budget which will have over $18 billion of unobligated and unexpended moneys by the end of this fiscal year, that there is room to address the human needs.

How can we justify spending millions of dollars on civil defense shelters when our central cities are bombed out and our people do not have adequate housing? How can we justify spending millions of dollars on educating our top-heavy officer corps in the War College and sending them to Harvard, Yale, and Dartmouth for endless graduate degrees when we have thousands of Americans who are illiterate and millions of children in overcrowded classrooms and the quality of our public schools is not getting better? How can we justify adding to the over 7,000 missiles that we have and worrying only about the Russians when our cities are on the brink of decay and collapse? How can we justify spending millions of dollars for the Defense Department's medical school when so many medical students in this country have to go out of the country to get educated and when people do not have adequate health care in our United States at this time?

We have not done anything about increasing our programs for mass transit although we are in the midst of an energy crisis.

We talk about national security, and yet this country's security is in the hands of the OPEC countries. If they were to raise the price of oil they could plunge us into economic chaos—yet we spend four times as much money on weapons research as we do on research for energy.

I think the gentleman from Maryland does this country a public service by trying to point out where we are going wrong and offering this "transfer amendment."

Sure, we need a strong defense. But we do not need waste, and we cannot afford the waste of our human resources.

Mr. Chairman, I urge the Members to adopt the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Chairman, I ask unanimous consent that all debate on the amendment in the nature of a substitute end in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

Mr. ROUSSELOT. Mr. Chairman, reserving the right to object, I wonder if the gentleman could make his request read "10 minutes"?

Mr. GIAIMO. Mr. Chairman, I will amend my unanimous consent request.

Mr. Chairman, I ask unanimous consent that all debate on the amendment in the nature of a substitute end in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous-consent request was made will be recognized for one and three-quarters minutes each.

(By unanimous consent, Mr. ROUSSELOT yielded his time to Mr. DORNAN.)

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. DORNAN).

Mr. DORNAN. Mr. Chairman, some of us who are new Members of this 95th Congress were elected in very hard-fought races by voters who asked us to come here and speak out for the middle-class taxpayers, who have reached the breaking point. They demand tax relief. But we were told that the last thing we should touch is national defense, given the malignant growth of Soviet power.

I survived what I believe was the most expensive congressional race in the history of the United States, costing over a million and a half dollars spent by 14 candidates: 8 Democrats, 6 Republicans. I know that sounds more like a New York or a California Senate race, but the B–1 is built in my district which is the Nation's most important aerospace area.

My opponent spent over $640,000, while walking both sides of the street on national defense.

The B–1 "Guardian of Liberty" was a major issue in the primaries. My opponent was adamantly against it. He switched his position on defense after he had purchased his primary election for over $220,000. Then he started echoing me on defense all during general election. The voters reject duplicity and most voting Americans want a strong national defense shield.

Mr. Chairman, the gentleman from Maryland (Mr. MITCHELL) recommends the B–1 bomber be cut out completely in his amendment. The MX is cut out completely. The gentleman has even gone so far as to recommend cutting out some of the "older B–52's and C–135's." I oppose this absurd budget charade.

Mr. MITCHELL of Maryland. Mr. Chairman, if the gentleman will yield, my amendment does not cut anything. We cannot cut anything under this budget resolution. I wish the gentleman would clarify that.

Mr. DORNAN. Mr. Chairman, if the gentleman will allow me to continue, I do not have his final version but only his amended version No. 3, the one circulated throughout the country. I have two versions of the gentleman's amendment here. In both there are recommendations for massive cuts in the national defense area.

I believe that the average American feels that under our constitutional duty to "promote the general welfare" we have about promoted welfare long enough. We are going broke. We have had a complete reversal in the percentages as to what we allocate to national defense and what we allocate to social programs. But now we are endangering our existence as a free nation.

I know that our country is now so

gerrymandered and chopped up that many Members of this body come from as peculiar a looking geographical district as mine in Los Angeles County. And I know that after the 1980 census, because of the Watergate disgrace and its effect upon our two-party system, with the lopsided control by the majority party of most State legislatures that our Nation is going to be dissected again like a carved-up Christmas goose. And because of this artificial gerrymandering we will see even more duplicity. I think what we see here in doubletalk is also due to the power of incumbency—and I learn each day just how powerful incumbency is—what we see are Members who sing one song in their districts about being tigers for national defense, as the gentlewoman from Colorado (Mrs. SCHROEDER) has just indicated, but when they come to this House they attempt, through obfuscation and through deliberate fork-tongued dialog, to talk defense but vote disarmament. For example they pretend to prefer and work for the Cruise missile so that they can kill the B–1 or cut the MX, but then when the Cruise missile comes up the next year or the following year, they will emerge as Mr. Hyde to kill, as fast as they can, their decoy, their recently praised defense shield substitute. It is a betrayal of our constitutional duty to "provide for the common defense."

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, at the very outset, I want to extend my highest regards to the gentleman from Maryland (Mr. MITCHELL), not only for the eloquent manner in which he made his presentation, but for the very necessary task that he has performed.

Until he got up to speak, perhaps most of us in this House forgot why it was that we are here.

This being my first term, this week has been for me a sort of nightmarish kind of experience. Mr. Chairman, if someone had told me before I came here that we would be debating how much we should add to an already bloated and extravagant military budget, and not only would we be debating but would be adding billions of dollars to what has already been reported out of the Committee on the Budget, I would have thought that that could not be true—especially not when, as the gentlewoman from New York has said, our cities are falling down around our people's ears.

With all the deprivation, all the need, all the poverty we do not know from 1 day to the next or from 1 year to the next, whether, this society we are so proud of will survive. Yet, we persist in believing that we can add, add, add to the military budget and subtract, subtract, subtract from the real day-to-day needs of our people. And we think we are doing our job.

Mr. Chairman, the people are not going to be fooled. They will know what we have done and what we have not done.

Mr. Chairman, on April 5 I appeared at a press conference with the distinguished gentleman from Maryland, Mr. PARREN MITCHELL, and Congressmen JOHN BURTON, NOLAN, and DELLUMS to announce my support for the "transfer amendment"—an amendment to revise the Nation's budget for 1978 by selectively eliminating excessive expenditures for military programs and reusing these funds for domestic programs for education, employment, health, and other purposes.

I am delighted to be able to reaffirm my support for the transfer amendment today and urge my colleagues to join me in voting in favor of this very important improvement in our national spending patterns and redirecting our national budget priorities.

The reasons for supporting this amendment, in my view, are along two lines: the immediate benefits of increasing and expanding our domestic programs and the long-term effects of taking steps now toward reducing our accent on national defense spending and reviving our commitment to pressing domestic needs.

Under the transfer amendment, if it is passed, $4.96 billion would be authorized for new Federal spending commitments in 1978 and $2.023 billion in immediate outlays on domestic programs beyond those funds authorized under present budget proposals. In specific the authorization of these sums would be utilized in expanding the comprehensive employment and training program—our Nation's major employment program—and other domestic programs so that 252,300 new jobs would be created. This number of new jobs would supplement the amount provided under the present budget proposals being considered. Another 22,500 jobs would be provided by expanding the public works program administered by the Economic Development Administration. Other programs would also receive increased emphasis under the transfer amendment including programs for older Americans, the Urban Development Bank, day care and small business. All of these increments in domestic programs would result in a net total gain of 274,800 jobs.

We cannot afford to pass up this vast job-creating opportunity and providing this kind of a boost to people-oriented programs. This valuable revamping of the budget, under the transfer amendment, would be accomplished without any increase to the overall budget; rather it would be accomplished within the boundaries of present budget proposals.

These important increments in domestic programs would be made possible by cutting military programs. These cuts would be made through efficiency steps and elimination of unnecessary or wasteful military projects. In my belief no cuts would be made that would reduce our combat readiness or endanger national security; rather it maintains our high military preparedness capability while making much needed funds available. For example, a huge saving would be realized by declaring a moratorium on shipbuilding for 1 year. A 2-year backlog already exists in the shipbuilding industry and a moratorium would allow the industry to catch up. In the meantime, the funds normally committed for this area of concern could be utilized for the kinds of domestic programs I described above.

The cancellation of the B–1 bomber program is an excellent example of how the transfer amendment would eliminate an excessive and wasteful military project. As I said earlier this week in regard to a defense authorization bill—see page 12076 of the CONGRESSIONAL RECORD—which included funds for the B–1 bomber: The Federal Government, including Congress, must learn to be less obsessed with programs like the B–1 bomber—programs which never seem to take off the ground while extracting terrible financial costs to us all without reaping any constructive returns. The termination of the B–1 bomber program under the transfer amendment would result in freeing up over $1.5 billion for use in constructive domestic programs.

Finally, Mr. Chairman, I would like to point out that a major part of the congressional budget process involves setting national priorities. In the "declaration of purposes" section of the Congressional Budget Act it says:

> The Congress declares that it is essential . . . to establish national budget priorities . . .

The transfer amendment represents a rare opportunity for Congress to fulfill this part of the Budget Act by enacting the amendment today. Together we can take a first step in redirecting our country's budget toward a renewed and expanded commitment to our domestic needs and trimming the waste from our excessive military undertaking by enacting the transfer amendment—let us put our domestic needs first rather than subordinating them to a bloated military budget.

I hope that the House will realize this tremendous opportunity to set our country's sails on a new course; I strongly urge my colleagues to vote in favor of the transfer amendment.

(By unanimous consent, Mr. OTTINGER and Mr. GIAIMO yielded their time to Mr. NOLAN.)

The CHAIRMAN. The Chair now recognizes the gentleman from Minnesota (Mr. NOLAN).

Mr. NOLAN. Mr. Chairman, I thank the chairman of the Committee on the Budget, the gentleman from Connecticut (Mr. GIAIMO), as well as the gentleman from New York (Mr. OTTINGER) for yielding me their time.

I particularly want to thank the gentleman from Maryland (Mr. MITCHELL) his staff and the people who have worked with him to put together this most important transfer amendment.

I know a lot of us have some different views on what the budget process is all about. Some people view it as an instrument to stop or cut Federal spending. Others view it as an instrument for establishing national priorities. However, I think regardless of what our view of the budget process is, the fact remains that by our action or by our inaction on the budget, what we do essentially is dis-

tribute America's wealth. We distribute America's resources. We distribute America's opportunities.

Mr. Chairman, that is not so much a matter of philosophy as it is a matter of fact; and that is what our responsibility is here as the elected Representatives of this country.

I know that we hear a lot of talk about not putting some moneys into the budget. Some people say, "Let us let free enterprise take care of it."

Mr. Chairman, I remind everybody here that the free enterprise system did not decide to build any free public schools for the children of this country. The free enterprise system did not decide to build a national transportation system. It did not decide to build housing for the poor and for the elderly in this country. It did not decide to set up social security or medicare or welfare or set up any of the general welfare benefits for people in America. It was the people's elected Representatives who made those decisions.

I realize, Mr. Chairman, that private entrepreneurs were there to bid on the contracts and do the building and make the profits which accrued from it; but it was the people's elected Representatives who made those decisions.

Now, Mr. Chairman, we are faced with a budget that relegates over 6 million people in our society to a position of nonproductive unemployment. It accepts a continued inflation rate in the neighborhood of 6 percent. It continues the deficits that we have been plagued with for 8 years, and it does not fulfill the unmet human needs of people in our country.

Mr. Chairman, we have a priority list that provides 4.5 percent for the health of our people; 9 percent total for education, for jobs, for training, and for social services; 1 percent for agriculture, for feeding our people and feeding the world; and 24 percent for defense, in spite of the fact that our President was elected promising to cut defense spending by an amount almost equal to the proposed transfer.

Mr. Chairman, there are those including President Carter who argue that America's strength is also dependent upon the internal strength and the confidence of our people and the ability of America to deal with its own internal domestic and human problems.

I submit that the defense authorization level here means more inflation, it means fewer jobs and the end product is not something that will improve the quality of life for the American people.

I submit that many of the items included are unneeded. They contribute to a conventional arms race that threatens world peace. They contribute to a nuclear arms race that threatens the survival of the world.

I submit we have an opportunity here through this amendment to redirect those misguided priorities, to provide greater help for the health, education, and social service needs of our people, so that our people may have jobs, so that our people may have training for jobs.

I hope that the committee has the good commonsense to adopt the amendment so as to improve the quality of life for some of the unfortunate and the dispossessed people of America, so as to give them some hope, to give them more opportunity, to give them confidence in our system and strengthen America in the process.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Maryland (Mr. MITCHELL).

The question was taken; and the Chairman announced that the ayes appear to have it.

RECORDED VOTE

Mr. ICHORD. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 102, noes 306, not voting 25, as follows:

[Roll No. 159]

AYES—102

NOT VOTING—25

Ashley	Harkin	Roe
Boggs	Holland	Rostenkowski
Derrick	Jenkins	Russo
Dodd	Jones, N.C.	Staggers
Evans, Del.	Koch	Stark
Fish	LaFalce	Teague
Forsythe	Milford	Walgren
Fraser	Myers, Ind.	
Gradison	Price	

The Clerk announced the following pairs:

On this vote:

Mr. Fraser for, with Mr. Teague against.
Mr. Walgren for, with Mrs. Boggs against.
Mr. Stark for, with Mr. Derrick against.
Mr. Koch for, with Mr. Staggers against.

Messrs. RINALDO and WHITTEN changed their vote from "aye" to "no."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MS. HOLTZMAN

Ms. HOLTZMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Ms. HOLTZMAN:
Page 1, line 11, increase total new budget authority by $249 million.

Page 2, line 2, increase total budget outlays by $75 million.

Page 2, line 5, increase the amount of the deficit by $75 million.

Page 2, lines 7 and 9, calculate appropriate adjustments in the public debt and the statutory limit on such debt.

Page 4, line 5, strike out "3,560,000,000" and insert in lieu thereof "3,809,000,000".

Page 4, line 6, strike out "3,800,000,000" and insert in lieu thereof "3,875,000,000".

Ms. HOLTZMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Ms. HOLTZMAN. Mr. Chairman, this is an amendment that deals with the Law Enforcement Assistance Administration. The purpose of my amendment is to restore the very substantial cuts that were made by the Budget Committee in this item. My amendment actually is very modest in total amount. It adds $249 million in budget authority and $75 million in actual outlays to the only program that the Federal Government has to help State and local governments fight crime.

Mr. Chairman, the Budget Committee cut one-third from the 1977 funding of the LEAA program. The actual cut may be even more devastating than that. Of the total amount that goes to State and local governments to fight crime in the block grant programs, as much as 50 percent could be cut under this amendment.

Mr. Chairman, let me say to my colleagues that I know very well that there has been substantial criticism of LEAA programs. Some of it is justified. I do want to point out to my colleagues, however, that last year we passed a new bill which should eliminate many of the problems of the program, and should improve its effectiveness so that it really does help control crime.

Let me also point out to the members of this committee that there have been criticisms that too much money has been spent on hardware. Actual figures show, however, that the amount of moneys spent on hardware was only 6.1 percent of the total in 1975.

LEAA, under the new legislation, is going to have to focus on speeding trials, ending revolving door justice, fighting juvenile crime, crimes against the elderly, and drug addiction. For the first time, all programs are going to have to be evaluated, to see which have worked and which have not. The LEAA is going to have to tell States and local governments about successful programs and about failures.

Community anticrime programs can be funded for the first time, and there is an antidiscrimination provision in the law.

LEAA has funded programs that have worked and that have helped to reduce crime. For example, in Sting-type fence operations—there have been eight operations made public so far—$32 million was recovered in stolen goods, and there has been a 98-percent conviction rate. There are projects operating in eight cities to help crime victims and witnesses. The purpose is to avoid trial delays, and assure that witnesses and victims will appear in court to testify. There are important juvenile diversion programs in States and cities. Their purpose is to help those juvenile offenders who can be trained and rehabilitated by providing counseling and job training. In some of these programs, the recidivism rate is reduced by 60 percent or more.

Seven hundred police departments have been trained in disposal of bombs. Four hundred and fifty police officers have been trained in dealing with hostage situations. Security has been improved at 28 airports with LEAA funds. Criminal code reform has been financed by LEAA.

There have been 460 projects for the renovation of correctional facilities, 422 projects for new construction and a variety of programs to reduce prisoner illiteracy and cut recidivism.

The amendment which I propose would not in any way increase funding over past years' levels, but will just keep it at the 1977 level. It has been endorsed by the League of Cities, the Conference of Mayors, the Governors Conference, the Conference of State Chief Justices, and many State law enforcement officers.

Reducing crime is a high priority to Americans everywhere. This is the only program we have to fight crime. Let us give this program a chance by preventing devastating cuts that may eliminate the good programs along with the bad. Let us work to have an effective Federal anti-crime program.

The CHAIRMAN. The time of the gentlewoman from New York (Mrs. HOLTZMAN) has expired.

(On request of Mr. RODINO and by unanimous consent, Ms. HOLTZMAN was allowed to proceed for 2 additional minutes.)

Mr. RODINO. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentleman from New Jersey, my distinguished chairman.

Mr. RODINO. Mr. Chairman, I rise in support of the amendment offered by the gentlelady from New York.

As she expressly noted, this amendment does not constitute an endorsement of LEAA's past performance. Rather, it is part of an effort to improve the agency so that it becomes a more effective instrument for the betterment of the criminal justice system. In the last Congress, as part of that effort, amendments to allow us to measure LEAA's performance were passed. Now, in order to permit that work to go forward, it is consistent and proper for us to approve the necessary funds.

The Budget Committee has proposed a $200 million reduction for the Department of Justice in fiscal 1978. Not only is this below the President's recommendation for the Department, but all of this money would come from the budget of LEAA. This action would result in a 33-percent cut in the agency's programs, including funds that go to the States.

That reduction could have immediate and serious affects on the programs in many States and cities. This morning I received a telegram from Mayor Kenneth Gibson of my home city of Newark urging that the House restore the $200 million to LEAA's budget.

Mayor Gibson pointed out that, thanks in large part to LEAA programs, major crime in Newark has declined by 16 percent in the past 6 years. Not long ago Newark's crime rate was the highest in the Nation—today it has dropped to 23d.

Here is what Mayor Gibson had to say about that change:

> I am of the firm opinion that the massive infusion of LEAA resources into the city of Newark served as the catalyst for this significant reduction in crime.

And the mayor added:

> The effect of reducing LEAA's funding would be disastrous for Newark as well as the Nation's largest cities.

Mayor Gibson knows these problems well. Not only has he with great competence led the city of Newark, but he also is president of the United States League of Mayors. In that capacity, Mayor Gibson warns that "a reduction in the national LEAA appropriation can only be counter-productive to local government's attempts to combat crime."

I also have received a telegram from Chief Justice C. William O'Neill, of the Ohio Supreme Court, the chairman of the National Conference of Chief Justices, and Chief Justice Robert J. Sheran of the Minnesota Supreme Court, who chairs the conference's committee on Federal-State relations.

These two fine judges, long involved in efforts to improve our courts, had this to say about the proposed LEAA reduction:

> Our present concern is that the cut of $200 million recommended by the Budget Committee not only would prevent the hoped-for growth in court programs but would almost certainly curtail current efforts to reform and modernize the courts in many States.

Mr. Chairman, if LEAA has not been successful as we had hoped, it is our responsibility to seek out the problems and solve them instead of cutting essential funds. For all its faults, LEAA has made important contributions that might not have been realized in any other way. Under congressional direction, it has improved the relationship and communications between the police, the courts and the correctional agencies. It has funneled money and new ideas to each of those institutions.

Undoubtedly LEAA can do better. And it is up to us to insure that it does just that. All of us know that our policies in the criminal justice system need great improvement. LEAA is the agency at the Federal level that can help us make those improvements—and then to implement those policies across the Nation.

Mr. Chairman, we have learned the hard way that neither LEAA—nor any other agency—can single handedly reduce crime in America. But LEAA can make a major contribution to the establishment of a criminal justice system that works fairly, effectively, and justly to protect both the property and the rights of the people.

This amendment, to increase the funding of LEAA to the authorized 1977 level, is a step in that direction. I urge the adoption of the amendment.

Mr. GIAIMO. Mr. Chairman, I rise in opposition to the amendment.
amended version No. 3, the one circu-

Mr. Chairman, it is with the greatest of reluctance that I rise in opposition to this amendment. It pains me that whenever we have efforts here to add funds for social programs, we are required to restrain ourselves and tighten our belts. But let it be a business tax credit or additional funds for the Department of Defense, which they do not need, then we fall over ourselves in order to hand the funds to them even though they do not need it.

Nevertheless, I oppose this amendment. We do have a responsibility to try to keep this budget deficit at a reasonable level. With the adoption of the Burleson amendment we are now up to a $68 billion deficit for fiscal 1977.

Let us defeat this amendment at this time. Remember that this is a target resolution. This is the first budget resolution. We will be finalizing our budget actions in September; at that time we can make a final decision on LEAA budget levels. There is widespread discontent among the Members with LEAA programs. There have been serious questions raised about continuing this program at high levels within the administrations of both President Ford and President Carter. The new Attorney General has significant reservations about the whole LEAA program. The House Budget Committee recommended the funds provided for law enforcement, of which LEAA comprises about 20 percent, be reduced about $200 million in budget authority and $62 million in outlays. And we took that action, recognizing that this is a target resolution and that there would be another chance to address this matter in September. This will give the committees time to consider our action. It will certainly give the Committee on Appropriations an opportunity to scrutinize the LEAA program very carefully and to decide what it feels the correct funding recommendation should be. Then we can finalize our judgment and decision in the second budget resolution in September.

Again, I think we have to be careful how we add additional expenditures. I wish we could be consistent in all parts of the budget. I am a little disheartened by some of the work we have done here today in the area of defense, but nevertheless we have the responsibility to hold the line on expenditures wherever possible. I think this is one area where we can hold that line.

Mrs. CHISHOLM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment before us to restore LEAA's budget to its 1977 level. I believe that it is of critical importance that Congress not sustain the 33 percent cut for LEAA which the Budget Committee has recommended for this first budget resolution for fiscal year 1978. Such a reduction would all but nullify our Federal effort to reduce crime. Furthermore, it would render meaningless all of our efforts at reforming LEAA through Congress 3-year reauthorization which was overwhelmingly passed last session.

LEAA still represents our Government's only major effort to provide financial and technical assistance at the State and local levels to improve criminal justice and to reduce and prevent crime and juvenile delinquency. Before LEAA's development, police training was a luxury in all but the largest departments, and few departments could show citizen advisory boards, good community relations programs, or even adequate citizen grievance procedures. Since its inception, LEAA has been the sole financial means whereby these jurisdictions have brought about innovation in their criminal justice planning.

One of LEAA's major strengths is the new legislation which we enacted last October. This law will prevent any of the excessive expenditures on equipment and weaponry which justifiably drew such heavy congressional criticism. In addition, we have now identified specific priorities and program thrusts which we expect LEAA to respond to. In particular, areas such as juvenile justice, combating crime against the elderly, improving the courts, and reducing drug abuse and drug-related crimes are mandated for a primary focus of LEAA's attention. If we allow this additional $200 million cut, we will in effect be demanding significant achievements in these areas without providing LEAA sufficient resources to accomplish them.

I believe that it is imperative that my colleagues consider the devastating impact this cut would have, not only on continuing programs, but also on LEAA's new ventures. Recently, I had the opportunity to review the first edition of LEAA's programs results inventory for 1976. I was greatly impressed by the scope and creativity of these efforts. One such program begun last year in eight cities, provided victim and witness assistance. Faced with a lack of knowledge about our court system, and overcrowded court dockets, many witnesses have felt alienated by what they view as the court's indifference to them. This alienation is reinforced through their frequent court appearances for continued cases and the difficulties often experienced in getting property returned. Some of the services provided for victims and witnesses include: A general orientation to courtroom procedures, notifications to appear in court, call-off services—if the case is continued or postponed, social service referral, child care, property return, notification of case disposition, and transportation. The impact of this program is noteworthy—in 1976 over 44,000 people were notified of court appearances, 15,000 received escort services, over 26,000 people received case dispositions, and almost 1,000 had property returned. This service avoided over 19,000 unnecessary witness appearances, saving witnesses over $90,000 in lost wages. When combined with other court savings, this resulted in savings totaling over $400,000, with a potential for considerably more in the future.

Another vital area of LEAA's achievement has been in the diversion of youth from juvenile delinquency. Within the past year, the Office of Juvenile Justice and Delinquency Prevention has made remarkable progress in the dissemination of research and information, as well as the initiation of programs. Just this past month, LEAA released a major study of the link between learning disabilities and juvenile delinquency. It is clear that we will have to focus on the amelioration of these learning problems as an integral part of reducing delinquency. My constituency has been extremely enthusiastic about the prospect LEAA's youth development programs have to provide as a remedy for the youth-crime epidemic our country has suffered. Will my community still have this optimism and hope for our efforts if we now cut them back by one-third? I hardly think so. It has taken a long time to gain the active interest and cooperation of communities in our crime prevention efforts. It will be tragic for this progress to be stopped, because of Congress unwillingless to make a true commitment to this partnership.

In areas where young people are involved in LEAA-developed youth service programs, the rate for recidivism of previously delinquent youths range from 16 percent to 30 percent. This compares to 45 percent to 80 percent reported in other areas with delinquent youth populations that do not have such programs. I repeat, areas served by LEAA youth programs have recidivism rates for previously delinquent youths that are some two-thirds less than for other areas.

For all of these reasons, I ask my colleagues that we pass this amendment to restore LEAA's budget to its 1977 level. If we are truly serious about preventing crime and delinquency, we must continue our full commitment to the success of LEAA. I hope that we will respond favorably to this challenge by passing this amendment.

Mr. ZEFERETTI. Mr. Chairman, will the gentlewoman yield?

Mrs. CHISHOLM. I yield to the gentleman from New York.

Mr. ZEFERETTI. Mr. Chairman, I thank the gentlewoman for yielding.

I would like to associate myself with the gentlewoman's remarks and give my support to the amendment.

Along with that, let me say this: As one who came out of law enforcement prior to coming to Congress and as one who sat on one of the State boards that gave credence to the type of funding that was necessary for law enforcement, let me say that this is an essential piece of legislation that we are taking up today. Beyond that, it is the only vehicle we have today in law enforcement to take care of the needs.

Mr. Chairman, I strongly support this amendment.

Mr. MATTOX. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I am very slow to rise, but I feel compelled to for the simple reason that LEAA is a prime example of how we can create a Federal program and, despite the fact that it has failed, continue to vote money and waste the taxpayers' dollars for a wasteful program.

It seems next to impossible for us ever to put a program into action and then to kill it when it does not succeed. That impossibility is exactly what has happened with regard to LEAA. I notice that the other speakers before me have not said in any way that LEAA is really a success.

Mr. Chairman, let me read from a letter of the gentlewoman from New York (Ms. HOLTZMAN). She says:

LEAA's operation in its last years has been subjected to substantial justified criticism.

She goes on to say:

This new bill that we passed in 1976 should correct many of the serious problems of the past.

What she is saying, Mr. Chairman, is, yes, this has been a failure, an admitted failure, but let us continue it anyway.

Mr. Chairman, there has been substantial criticism also by other agencies. Let me just read some of the words of some of the others. Here is a report of the Committee on Appropriations here in the House of Representatives. This is our committee, our staff. What did they say about the matter? They said that testing whether LEAA has succeeded in reducing crime is no longer debatable. They said that the consensus is that it has not.

Mr. Chairman, this is the report of our staff committee.

Let us go on a little bit further. What does GAO say about the program? It says:

. . . we believe the more appropriate way to assess the worth of the program is to ask: Are we any closer now, after 8 years of the LEAA program, to knowing why the crime rate increases, and what to do to reduce it? We believe the answer is no.

Let us go one step further. What does OMB say about it? They say:

Funds are so widely dispersed that their potential impact is reduced. The absence of program evaluation severely limits the agency's ability to identify useful projects . . .

What does the present Attorney General say about LEAA? He has appointed a task force to study it and to try to make a determination whether this program should continue to exist. As a matter of fact, he made a recent statement, on March 15, 1977, in front of the National District Attorneys Association. He said:

But you know, we are all grown-up people, and I don't have to tell you that there's a lot of waste in the LEAA and there's too much money spent on overhead. Yes, there is about 14 percent spent on overhead.

He went on to say, in another speech dated April 6, 1977—and I am summarizing, just to give some of his criticism—as follows:

And I know that we're having conventions all over the country financed by LEAA. That must be one of the greatest boons that ever hit the tourist travel industry.

What we are saying, Mr. Chairman, is, yes, the program has failed, but give it some more money so it will fail further.

Mr. Chairman, when we look at the criticism that has been made of this program, we see that it has not succeeded.

As a matter of fact, Mr. Chairman, just to give one further example, Senator PROXMIRE recently awarded LEAA his Golden Fleece Award. The award was given, because they spent nearly $27,000 to determine why inmates want to escape from prison.

Just think of it: $27,000 to try to determine why inmates want to escape from prison. I think we all know the answer to that question, and we do not need LEAA wasting money to hunt for another answer.

The CHAIRMAN. The time of the gentleman from Texas (Mr. MATTOX) has expired.

(On request of Ms. HOLTZMAN and by unanimous consent, Mr. MATTOX was allowed to proceed for 2 additional minutes.)

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. MATTOX. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. Is the gentleman aware that the GAO report that he cites made recommendations and that those recommendations were virtually entirely incorporated into legislation passed by the Congress last year? Is the gentleman aware of that fact?

Mr. MATTOX. The gentlewoman from New York (Ms. HOLTZMAN) should know that the recommendations that have been put in the law are simply directive in nature and that they will have no significant impact in the administration of this program.

Ms. HOLTZMAN. Mr. Chairman, will the gentleman from Texas (Mr. MATTOX) acknowledge that the criticisms made by the GAO were addressed and taken care of in the legislation that was passed last year?

Mr. MATTOX. No, they were not addressed, and they were not taken care of in the legislation. The legislation has not cured the problem.

Mr. GIAIMO. Mr. Chairman, I wonder if we can get some idea on how many Members wish to debate this matter?

Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto end in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The CHAIRMAN. Members who were standing at the time the unanimous-consent request was granted will be recognized for 2 minutes each.

The Chair now recognizes the gentleman from Michigan (Mr. BLANCHARD).

Mr. BLANCHARD. Mr. Chairman and my colleagues, I will try to be very brief. We have just heard a litany of the sins of the LEAA, implying that the LEAA has not worked, because the crime rate has not dwindled down to zero, thus, it is said, LEAA is a failure.

I would suggest that you could say almost every program in the Federal budget has not worked under that criteria when we start looking at the billions of dollars we have expended.

Mr. Chairman, I believe it is important that we realize that our budget is not only a statement of realities but a statement of priorities. Right now less than 1 percent of the Federal budget is devoted toward crime control. I repeat, less than 1 percent. We have a little program that is struggling to develop. It has been improved. Then the Committee on the Budget knocks off $200 million. That is a lot of money, but earlier we have been throwing around figures like $1, $4, $6, or $9 billion all day today, and in fact all week.

It would seem to me, Mr. Chairman, that perhaps in the Members' districts, and certainly throughout most of urban America, that the major concern of people is crime. Our Congress and our Government ought to at least make some sort of commitment toward helping the local communities fight crime.

Recently in a survey in my district I asked the people whether they would rather spend more, less, or the same amount of money on the following subjects, and then we listed everything one can imagine from energy, environment to highways, crime control and defense. Seventy-eight percent recommended spending more money on crime control. We ought to begin to reflect that priority in our budget and this amendment is only a beginning, but a necessary step tonight.

The CHAIRMAN. The Chair recognizes the delegate from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in support of the amendment offered by the Congresswoman from New York (Ms. HOLTZMAN) to restore funding for the Law Enforcement Assistance Administration to its fiscal year 1977 level. As we consider House Concurrent Resolution 195, I believe it is important to keep in mind that law enforcement is one of our national priorities that should not go away. Any reductions in the Federal budget seems contrary to this thesis.

Law enforcement is also one of the most important of our priorities for a better society in Puerto Rico and one of the most difficult to solve.

Since 1968, the combined efforts of the Federal and the Puerto Rican Government, through the availability of Law Enforcement Assistance Administration funds, have made possible the establishment of solid grounds from which to launch an effective campaign against crime on our beautiful island. The present administration in Puerto Rico is deeply committed in its efforts to reduce crime as well as to enhance our local criminal justice system. To win the war against crime we will need the continuous assistance of the Federal Government. For that reason, I am deeply concerned about any congressional action that might lead to a reduction in the Law Enforcement Assistance Administration program funds. We have to avoid any further reduction in funds if we want to continue the fight against crime as well as to enhance the criminal justice system in the United States.

While we should be diligent in assuring that LEAA funds are spent wisely, we should give the Law Enforcement Assistance Administration a chance to prove they can administer a national program under a new administration and a new team. Cutting their appropriations would be counterproductive.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. Mr. Chairman, I rise in strong support of the amendment. First, let me emphasize that the amendment does not increase the funds in the budget for LEAA but does restore the funds to the LEAA program. The LEAA program was debated at length here just a few months ago, and at that time we extended the program for 3 years. We were very frugal with the amount of funds that we authorized, and the amendment before us is really a minimum amount which is required in order to support the program.

May I say that the overhead for administering this program is extremely low. Most of the funds are distributed as directed by local, regional, and State planning agencies and the decisionmaking is right there at the State and local levels. If the decisions are wrong, they are wrong decisions that are made at the local level, and that is where the decisions—good and bad—should be made.

Let me just say that LEAA provides funds for a great many programs including police and sheriffs' departments, courts, juvenile delinquency, and many others. As I say, it is the only Federal program which supports law enforcement at the local and State levels where law enforcement has to be carried out. It is the only program providing any opportunity for innovation in the effort to fight crime. It provides support for neighborhood programs, one of which we have over here in my neighborhood just a few blocks from this Chamber. I would say that is the level where crime is going to be conquered, if we are going to conquer it at all—in the neighborhoods, in the blocks, and in the precincts. This is the only Federal program which provides support for that kind of anticrime activity.

I cannot see any reason why in this single effort of the Federal Government we want to deny funds to this program. May I say that the sheriffs of my area—Sheriff Klusak of Kane County, Sheriff Tyrrell of McHenry County, and Sheriff La Magdaleine of Lake County—are relying on this, as are the police departments, and I am sure that the other law enforcement people throughout the entire Nation are looking to us for support of this program. I hope the committee will restore the funds eliminated from the budget resolution, and that the amendment offered by the gentlewoman from New York (Ms. HOLTZMAN) will be adopted.

You will recall, Mr. Chairman, that we spent nearly 3 days last fall debating the pros and cons of LEAA. The Senate spent a similar amount of its time on the issue. What evolved was the Crime Control Act of 1976, a new authorization for LEAA, lasting 3 years with an annual funding of roughly $800 million. It also contains new uses for LEAA funds. For example, under the act signed by the President just 6 months ago, a community anticrime program has been developed for the purpose of involving the public in the fight against crime. Numerous amendments were included to increase the participation of the State judiciary within those States participating in the LEAA program. Chairman RODINO sponsored portions of the act which permit LEAA to assist in the development of programs to identify "the special needs of drug-dependent offenders—including alcoholics, alcohol abusers, drug addicts, and drug abusers." Similarly, authorization was given to fund efforts designed specifically to reduce and prevent crime against elderly persons.

Just last week, I joined Chairman RODINO in submitting a statement in support of LEAA to the Appropriations Committee. In it I recited the contents of the 1976 act. But, more than that, I feel I should note with concern the continuing role in which the Congress has sought to cast LEAA. Time and time again we have attempted to pin the blame for the increase in crime on a Federal block-grant program designed simply to assist the States in stemming the tide. And now, after substantial evaluation procedures have just been integrated into the new act, a cut in LEAA's budget is being proposed before it even gets started. How can we expect LEAA to accomplish its worthwhile purposes, much less even pursue that course, when we attack its budget and its functional existence as is attempted in the Budget Committee's resolution? The reauthorization we passed in October was for 3 years, not 6 months. Now is not the time to curtail or frustrate LEAA's laudable aims and purposes.

The CHAIRMAN. The Chair recognizes the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Chairman, I rise in support of the amendment. I am sorry I do not have the time to list all of the functional programs of LEAA that exist in the largest county in Ohio. I do not think this program should be evaluated on the basis of isolated examples that my good friend and colleague, the gentleman from Texas, has listed. Frankly, a lot of people in the neighborhoods do not always agree with the Attorney General. They are the ones who are the victims of crime. They are the ones who see at a local level what the problems of crime are. People are saying crime exists. However, we know that in recent years, according to recent FBI statistics, that crime has been reduced. It is interesting that it was reduced at about the same time, in terms of the duration of these statistics, that LEAA has existed.

I really believe that it would be ironic, when we see crime reduced at ever so minimal a level, that we in fact take out crime-reducing programs. The minimum that the American people expect is to be safe, and they expect to be safe in their neighborhoods—senior citizens, men and women. I think it is just unbelievable that people could oppose a crime-reducing program when we have no other alternative. This is the only opportunity, Mr. Chairman, to have a creative approach to reducing crime. So I want to urge my colleagues to have courage in voting for internal matters important to this country—crime-reducing programs.

The CHAIRMAN. The Chair recognizes the gentlewoman from New York (Ms. HOLTZMAN).

Ms. HOLTZMAN. Mr. Chairman, let me point out very briefly that my amendment is minimal in amount. It affects the deficit by only $75 million.

Contrary to misstatements made on the floor, I have not said that this program has been a failure. To the contrary, many important programs, including speeding up the trial of felony cases, dealing with juvenile crimes, and enabling criminal code reform have been financed by LEAA. Contrary to statements made, the GAO's criticisms of the program were addressed in legislation passed last year and many of its recommendations incorporated. Contrary to statements made, the Committee on Appropriations' recommendation to the Budget Committee this year was to keep the program at the President's level and not to cut it by one-third, as is done here.

I would urge the Members to give the only Federal crime-fighting program a chance to try to deal with the very serious problems of crime that plague our cities and plague our country.

The CHAIRMAN. The Chair recognizes the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Chairman, I yield back my time.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from New York (Ms. HOLTZMAN).

The question was taken; and on a division (demanded by Ms. HOLTZMAN) there were—ayes 52, noes 56.

RECORDED VOTE

Ms. HOLTZMAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 224, noes 179, not voting 30, as follows:

[Roll No. 160]

The Clerk announced the following pairs:

On this vote:

Mr. Fraser for, with Mr. Teague against.
Mr. Derrick for, with Mr. Staggers against.
Mr. Koch for, with Mrs. Boggs against.
Mr. Walgren for, with Mr. Price against.

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. ANDERSON OF CALIFORNIA

Mr. ANDERSON of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDERSON of California: Page 4, line 2, strike out "$19,935,000,000" and insert in lieu thereof "$20,435,000,000".

Page 4, line 3, strike out "$19,903,000,000" and insert in lieu thereof "$20,403,000,000".

Page 1, line 11, strike out the dollar figure and insert in lieu thereof "$501,264,000,000".

Page 2, line 2, strike out the dollar figure and insert in lieu thereof "$462,849,000,000".

Page 2, line 5, strike out the dollar figure and insert in lieu thereof "$64,755,000,000".

Mr. ANDERSON of California. Mr. Chairman, I am introducing an amendment to the veterans section of this budget resolution which provides for an increased budget authority outlay of $500 million. It is my hope that this increase in budget authority will allow the Veterans Affairs Committee to consider authorizing funds for a pension for veterans of World War I.

Over 160 Members of this House and six Members of the other body have joined in cosponsoring a bill to provide this much needed pension.

When I discuss this proposed pension with members of the Committee on Veterans' Affairs, I am often told that any veterans pension would take away from other veterans' programs—programs presently in effect, and, I might add that these are programs that I support.

I want to say right here that I commend the Committee on Veterans' Affairs, particularly the chairman of that committee, the gentleman from Texas, RAY ROBERTS, because I think the committee is doing an outstanding job. I have supported practically everything they have recommended. However, the one area where I feel they have fallen short is in the area of helping the World War I veterans.

This amendment I am proposing would give us breathing room; it would give us a hearing.

We may be told that the World War I veterans are already receiving enough money. I talked with Representatives of the Veterans' Administration this afternoon, and I talked with the national commander of the World War I veterans. I find that there are about 400,000 of these World War I veterans who are getting help.

If a veteran is a single person, and if his income is way below the poverty level, he can get $185 a month. Under these conditions, the Veterans' Administration brings his income up to the poverty level, up to the figure of $3,540 a year. If the recipient is married, then the VA brings that couple's income up to the poverty level of $4,760. This would maintain them at what I think most of us know is not adequate for a family—particularly during these days of inflation. These are the current veterans pensions that we are providing.

All pensions are based on need, and those with the least income get the most.

Mr. Chairman, when the veterans of World War I were discharged almost 60 years ago, there was no GI bill, there were no educational benefits, and there was no job training. Social security had not started yet. There was not any social security until 1935. These veterans of World War I are really the forgotten people of this country of ours. My feeling is that these are the people that we should recognize for what they have done for our country—for all of us.

During the last year, 94,000 World War I veterans have died. It is my hope that we can demonstrate our support to the remaining 800,000 by agreeing to this amendment to the budget ceiling, which would be a major step. Then we must pass H.R. 55, the World War I Pension Act of 1977. I think it is long overdue.

By doing this we are not giving these World War I veterans a lot of money; we are just giving them a little bit—they deserve much more.

I want to make this clear. I am only asking for $500 million; $500 million would really only mean a pension of about $50 a month, but if we add $50 a month to the present $3,540 that most of them are getting, it would help. It is not very much money.

Mr. Chairman, I ask for an aye vote on this amendment.

Mr. QUILLEN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from Tennessee.

Mr. QUILLEN. Mr. Chairman, I thank the gentleman for yielding, and I rise in support of the amendment.

I feel that the 15,000 world war veterans in Tennessee are entitled to this increase; $52 a month more is not enough. We should provide food for these veterans instead of letting them eat what is commonly known as "dog food."

I am in strong support of the amendment. Let us do what we can for these World War I veterans.

Mr. RYAN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from California.

Mr. RYAN. Mr. Chairman, I commend the gentleman from California (Mr. ANDERSON) for offering his amendment, and I want to go on record as being in support of it.

If we would stop and think about it, the fact is that World War I for these Americans began in 1917. That is 60 years ago. Those who are still alive today are now in their late 70's and going into their 80's. Statistically, they will not be around much longer.

These veterans have never received the benefits that other veterans who are presently alive have received, and that is true of any war the United States has ever fought. They are old men, they are

sick men in many cases, and they deserve our help.

The CHAIRMAN. The time of the gentleman from California (Mr. ANDERSON) has expired.

(On request of Mr. QUILLEN and by unanimous consent, Mr. ANDERSON of California was allowed to proceed for 5 additional minutes.)

Mr. EMERY. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from Maine.

Mr. EMERY. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I also rise in support of the pending amendment. I wish to congratulate the gentleman from California (Mr. ANDERSON) for offering this most constructive proposal.

As the gentleman knows, I am cosponsor of the original bill that he introduced to provide veterans' benefits for World War I veterans. In too many cases they have been ignored, and I think it is altogether proper that we go on record in support of helping these people who are in very dire economic straits. In many cases they are the most needy of all veterans, and they are certainly worth of our consideration.

Mr. DON H. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from California.

Mr. DON H. CLAUSEN. Mr. Chairman, I want to associate myself with the gentleman from California (Mr. ANDERSON) and rise in support of the amendment. As a cosponsor of the legislation to provide badly needed benefits for World War I veterans, I have consistently supported their efforts to attain a realistic commitment from the Federal Government in the form of a payment at a time in their lives when it is very meaningful and important to them. The money authorized would immediately find its way back into the economy in the form of purchasing power.

There are some 800,000 World War I vets and each year approximately 10 percent of them pass away. This will no doubt increase with each passing year. I hope we can fulfill this commitment before it is too late for these deserving vets of yesteryear who served their country at a very critical time in our Nation's history.

Mr. EDWARDS of Oklahoma. Mr. chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I just want to commend the gentleman from California (Mr. ANDERSON) for his amendment. I support it and appreciate very much his offering it.

Mr. SLACK. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from West Virginia.

Mr. SLACK. Mr. Chairman, on behalf of the 9,000 veterans of World War I living in my State of West Virginia, I too rise in support of the amendment offered by my friend and colleague from California (Mr. ANDERSON).

This amendment seeks to add $500 million to the veterans section of this resolution on the budget. This money could provide these men and women who served during the First World War with a $50 monthly pension.

This amendment does not "earmark" funds, it does not "circumnavigate the legislative process." All it does is provide the Veterans' Committee with some financial "room" to consider the World War I Pension Act of 1977, H.R. 55.

This bill is currently cosponsored by 160 Members. I urge my colleagues to support this amendment to the budget and give the committee a chance to seriously consider this needed legislation.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I thank the gentleman for yielding and I do want to commend the gentleman from California (Mr. ANDERSON) for bringing to the attention of this body this very worthy bill for veterans of World War I who are so deserving of our attention and concern at this time.

Mr. Chairman, I hope that in the weeks ahead we will work together to make certain that this World War I veterans bonus proposition which we are discussing tonight will soon become a reality during this session of Congress.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, on behalf of the 21,000 veterans of World War I living in the State of Wisconsin, I rise in support of the amendment offered by my friend and colleague from California (Mr. ANDERSON).

The $500 million that this amendment provides will go far to provide the necessary funds for our Veterans' Affairs Committee, and hopefully for H.R. 55, a bill to provide a $150 monthly pension to these needy senior veteran citizens.

Last session, 94,000 of these men and women who served our Nation in its time of need died. How many more must leave us before we hear their pleas for help?

I urge my colleagues to join with me and the 160 cosponsors of H.R. 55 in support of the amendment of the gentleman from California (Mr. ANDERSON).

Mr. ROYBAL. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from California.

Mr. ROYBAL. Mr. Chairman, I rise in support of the amendment of the gentleman from California (Mr. ANDERSON) and compliment him for bringing it before the House.

As a member of the Committee on Aging, I have had the experience of holding hearings throughout the country. I can attest to the fact that the statement made by one of my esteemed colleagues that there are senior citizens, particularly veterans of World War I, who because of lack of money find it necessary to eat dog food is documented in the hearings that we have held.

Mr. Chairman, as again I commend the gentleman from California (Mr. ANDERSON), and I urge that his amendment be adopted.

Mr. ALLEN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from Tennessee.

Mr. ALLEN. Mr. Chairman, I want to commend the gentleman from California (Mr. ANDERSON) for his amendment, and I want to associate myself with the remarks of the dean of our Tennessee delegation on the other side of the aisle. He has hit the nail right on the head, and I am going to vote in support of this amendment.

Mr. SCHULZE. Mr. Chairman, I rise in support of the amendment offered by the gentleman from California (Mr. ANDERSON) to increase both the total budget authority and total outlays by $500 million in order to provide for the enactment by this Congress of a pension system for veterans of World War I.

As a cosponsor of legislation that would establish a $150 pension to veterans of World War I or their surviving spouses, I know that such legislation addresses the needs of the over 50,000 World War I veterans in the Commonwealth of Pennslyvania.

Mr. Chairman, it is no less true today than it was over 100 years ago when President Lincoln charged this Nation to remember the debt that it owed to those who had answered their Nation's call, that we have a moral obligation to remember those who rallied to their Nation's banner in time of national danger.

President Lincoln sounded the clarion call of a Nation at peace which dared not forget the debt it owed to: " * * * care for him who shall have borne the battle and for his widow and his orphan * * *"

Mr. Chairman it is time that this Congress belatedly accepted that responsibility to the Nation's 867,000 veterans of World War I.

I urge the adoption of the amendment offered by the gentleman from California.

Mr. OBEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will not take the entire 5 minutes.

I simply want to say that I had planned to oppose all amendments to this concurrent resolution, and I asked earlier that the House do the same. However, in all honesty, I have no sense of guilt in supporting this amendment, after I see that we have added $200 million to one of the most miserable programs I have had the experience to watch over the last 10 years and after I see that we have added about $4 billion in additional appropriations for the Pentagon.

Mr. Chairman, if we are going to provide $4 billion to the Pentagon which it probably will not even be able to spend, then I am not the least bit embarrassed in supporting an amendment of this nature for World War I pensioners who will be able to spend every dime that we appropriate.

AMENDMENT OFFERED BY MR. WOLFF AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. ANDERSON OF CALIFORNIA

Mr. WOLFF. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. WOLFF as a substitute for the amendment offered by Mr. ANDERSON of California: Page 1, line 11, strike out "$500,764,000,000" and insert in lieu thereof "$501,593,000,000".

Page 2, line 2, strike out "$462,349,000,000" and insert in lieu thereof "$463,178,000,000".

Page 2, line 5, strike out "$64,255,000,000" and insert in lieu thereof "$65,084,000,000".

Page 4, line 2, strike out "$19,935,000,000" and insert in lieu thereof "$20,764,000,000".

Page 4, line 3, strike out "$19,903,000,000" and insert in lieu thereof "$20,732,000,000".

Mr. WOLFF. Mr. Chairman and Members of the House, I know that the time is late. However, I should just like to make note of the fact that this year the request for veterans' readjustment benefits was some $2 billion less than the 1976 request.

Mr. Chairman, I rise to offer an amendment as a substitute for the Anderson amendment to the budget resolution now before us. This amendment would increase the veterans benefits and services function by $829 million in toto. This year there was a request for $2 billion less than 1976 for Vietnam veterans readjustment.

Although I am a strong supporter of the amendment that has just been offered by the gentleman from California (Mr. ANDERSON) I must say that I feel that it is important that we do justice as well to the Vietnam veterans who up to this time have not had the opportunity to take advantage of the educational benefits that are due them.

This body has time and time again acknowledged its special obligation to those men and women who so honorably served their country during the Vietnam war. There presently exists a severe problem, of which perhaps some of my colleagues are not aware, concerning the underutilization of educational benefits by Vietnam veterans. If we are to provide these people with meaningful career opportunities we must first provide them with access to educational training. I think that we sometimes tend to view our Vietnam veterans as statistics rather than as people. Today, the average Vietnam veteran is just over 30 years of age, is married, and has more than one child. About 20 percent of them have had less than 12 years of education prior to their separation from the service; countless others have a high school education which was not college preparatory.

While we have enacted programs designed to provide these veterans with educational opportunities the fact is that hundreds of thousands of Vietnam veterans in this Nation simply cannot afford to make use of their educational benefits because they are unable to support themselves and their family at the same time. I think this situation is amply demonstrated by the fact that for fiscal year 1977, authorized expenditures for veterans' educational purposes exceeded actual expenditures by approximately $829 million.

This is not my figure, but one supplied by the Veterans' Administration in response to my questioning at a committee hearing last month.

If we fail to address this problem—if we fail to improve the access of Vietnam veterans to educational training—we then say to these men and women that our promise to them as contained in the GI bill is an empty one.

My amendment would simply restore, in fiscal year 1978, those funds which were authorized, but not spent for veterans educational purposes in fiscal year 1977. I think we must recognize that this whole question is a complex one which should—indeed must—be considered by the Committee on Veterans Affairs. Now pending before that committee is specific legislation which addresses this issue. Without these additional funds neither the committee nor the House can even consider these legislative initiatives.

Educational training is an investment in the future of these men and women and an investment in the future of our country. I believe it is far wiser and far more socially desirable to provide them with educational opportunities than it is to limit their alternatives to unemployment compensation, dead-end public service jobs, or demeaning and degrading welfare.

We as a body acquiesced when decisions were being made that sent these Veterans to combat; it is our duty to respond when they need our help to open educational opportunities that are now closed to them.

All that is being requested is authority to put back into their budget funds not used last year—restoring unexpended funds. Remember this is not an appropriation—but unless we get this allocation back it will be impossible for the Veterans' Affair Committee and this Congress to even address the serious problem faced by our young people who risked their lives. We should be able to take the risk of helping them to a better education.

This is not an appropriation, all this amendment provides is for the House to be able to work its will.

We just voted some $4 billion additional for defense, for equipment and the like. How about voting some $800 million for those veterans who were out defending this country and who today are getting less than what their full share should be?

Mr. ROBERTS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the statement that the structure of the GI bill has denied millions of Vietnam veterans access to educational opportunities just does not stand up under close scrutiny. The present GI bill was authorized in 1966 to provide financial assistance to veterans for tuition and general living expenses while in training. It was never the intent of the Congress that the educational program would be sufficient to pay all of a veteran's expenses while in full-time training.

By the end of fiscal year 1976, in just 10 years, more than 6.5 million veterans and service personnel had trained under the current GI bill. This is about 84 percent as many as the total who trained under the original World War II GI bill. It is almost three times as many as the number who trained under the Korean GI bill at the college level.

At the college level, nearly 3.7 million Vietnam veterans have trained under the GI bill surpassing the 2.2 million who trained under the World War II GI bill and the 1.2 million trained in college under the Korean conflict GI bill.

In 1966, less than 500,000 veterans took advantage of the GI bill at a cost of about $305 million. In 1976, over $6 billion was authorized for veterans' readjustment benefits for over 2 million eligible persons. Today, a single veteran in full-time training is entitled to receive $292 a month, or over $2,600 for the ordinary school year of 9 months. The Veterans' Administration tells me that $2,600 is more than sufficient to pay the costs of education including tuition, fees, books, and board and room for the great majority of colleges and universities. A veteran with one dependent is entitled to $347 a month; with two dependents, $396 a month; and $24 for each additional dependent. Since the great majority of veterans are entitled to a maximum of 45 months of educational training, translated into dollars, a Vietnam veteran without dependents is eligible for over $13,000 of educational assistance under the GI bill. With this kind of assistance, I wonder what kind of educational opportunity Vietnam war veterans are being denied.

Last, the cumulative participation rate by the end of 1976 was over 63 percent for Vietnam veterans. This compares favorably with 50 percent participation for World War II veterans and 43 percent for Korean conflict veterans. The 10-year total of educational assistance payments authorized by Congress as of June 1976, was $20 billion for the Vietnam veteran. This exceeds the combined total of the two previous GI bills by more than $1.2 billion. For fiscal year 1976, 25 percent of all expenditures for the Veterans' Administration was veterans' education and training.

Mr. WOLFF. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I will be happy to yield to my colleague, the gentleman from New York.

Mr. WOLFF. I thank the gentleman for yielding.

The question of Vietnam veteran unemployment today is such that it is about double the unemployment that exists for the rest of the Nation. In other words, we have an 8 percent unemployment figure on an overall basis. For the Vietnam veteran that figure is about 15 percent.

I ask the Chairman—and I have great respect for the Chairman—which would it be better to do: to keep this young veteran on unemployment insurance and on welfare, or to permit him to enter an educational institution? Every one of the veterans who have been in an educational program has provided extra income to the United States in the way of taxes. Veteran education has been the best investment this Nation has ever made.

Mr. ROBERTS. That is true, and I certainly agree with the gentleman. But yesterday, as a member of the conference on the President's job bill. I signed a conference report that will be before the House tomorrow or early next week that would provide $9 billion, and with specific emphasis for the Vietnam veteran.

Mr. WOLFF. Will the gentleman yield further on that?

Mr. ROBERTS. I yield to the gentleman.

Mr. WOLFF. We had hearings today, only today in the committee, on the amount of CETA jobs that were available to veterans, and only 3 percent of those CETA jobs are going to veterans.

Mr. HAMMERSCHMIDT. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Chairman, I rise in opposition to the Wolff amendment. There is no one in this body more concerned than I am with the special needs of our veterans. If we consider this measure without having to worry about the ever-increasing Federal budget and deficit, I would probably support it—but we cannot do that.

The Veterans' Affairs Committee is working toward making VA benefits more responsive to our veterans' educational needs. It is anticipated that the committee will report a measure to increase educational allowances by 5 percent later this year. The Subcommittee on Education and Training has held several oversight hearings, and more are scheduled in order to insure that every reasonable educational need of the Nation's veterans is met.

It is true that the fiscal year 1977 budget overestimated the number of veterans who would be taking advantage of their educational benefits. However, the $829 million which was originally appropriated for this use has either been transferred, or is in the process of being transferred, to cover the cost-of-living increases in pension and compensation rates granted in the 94th Congress. It must be made clear that this $829 million has already been earmarked for other purposes. It is not available for use in educational benefits.

With the Federal deficit estimated at nearly $65 billion for fiscal year 1978, it would be fiscally irresponsible for the Congress to adopt this amendment.

Mr. Chairman, I also rise in opposition to the amendment of the gentleman from California, as well as the Wolff substitute.

The funds sought by the gentleman's amendment would underwrite the costs of an additional pension program exclusively for veterans of World War I. I use the word "additional" because that is precisely what the gentleman's bill would accomplish. Veterans of World War I, along with veterans of other wars, and their dependents, already have an ongoing pension program for which they may qualify with payments ranging from $209 monthly to a minimum of $5 monthly, depending upon the number of dependents and the amount of income received from other sources.

Thus, it would be possible for a World War I veteran to receive $209 monthly pension under existing law plus an additional $150 monthly under the gentleman's bill for a total monthly pension of $359. This, Mr. Chairman, would be payable to veterans who were fortunate enough to have been separated from military service with no disability.

On the other hand, Mr. Chairman, we pay to the veteran who is 80-percent disabled from wounds received in action in Vietnam or any other war, the magnificent sum of $350 monthly.

Mr. Chairman, the increased funds sought by the gentleman's amendment would fund a measure that could only disturb the traditional relationship between service-connected disability compensation and non-service-connected pension.

The major veterans organizations have not sought this legislation and it is unlikely that the Committee on Veterans' Affairs would approve such a measure.

Let me hasten to add that I do believe the non-service-connected pension program is in need of revision. For this reason, the 94th Congress authorized the Administrator of Veterans' Affairs to conduct a comprehensive study of the pension program and submit the results of the study together with his recommendations for revision of the program not later than October 1 of this year. I am hopeful that this study and its associated recommendations will permit us to consider and act upon constructive alternatives that will be equitable for veterans of all wars who are entitled to pension.

It would be premature for the Congress to enact pension legislation other than the cost-of-living increase already proposed and included in the budget resolution until we receive the results of this study.

I shall, therefore, oppose the amendment.

Mr. Chairman, the recommended level of $19.9 billion in budget authority for veterans' benefits and services represents a fair and adequate estimate of the Veterans' Administration's fiscal needs for fiscal year 1978.

As ranking member of the Veterans' Affairs Committee, I reviewed the Veterans' Administration's budget requirements with great interest. As a member of the VA Committee, I am well aware of the special needs of our veterans and their dependents. As the Representative of the people in the Third Congressional District of Arkansas, I am well aware of the need to keep Federal spending to a minimum.

The aggregate budget figures contained in the measure before us are staggering. That is the only word which can be used to describe a $500 billion budget. Yet, this figure is a reduction of $31 billion from the aggregate views and estimates of the committees of the House made earlier this year. This reduction is due to a large degree to the forceful efforts of the chairman of the Budget Committee, Mr. GIAIMO. His efforts to keep Federal spending to a minimum should be applauded by all of us.

The bipartisan leadership of the Veterans' Affairs Committee and the leadership of the Budget Committee worked together in reaching the $19.9 billion figure for veterans' benefits and services. I am disappointed that many of the VA Committee's recommendations to increase and improve medical facilities within the Veterans' Administration could not be included in the fiscal year 1978 budget. However, the $19.9 billion figure represents a fair compromise between fiscal priorities and the needs of our veterans.

I am, therefore, opposed to this amendment or any other which will increase the VA's fiscal year 1978 budget. I believe this position will be shared by anyone who has studied this matter and is dedicated to fiscal responsibility.

Mr. MONTGOMERY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the substitute amendment.

Mr. Chairman, I certainly understand the mood of the House, and it is getting late. I will try to be as brief as possible. I do have the privilege of being chairman of the Subcommittee on Compensation, Pension, and Insurance of the Committee on Veterans' Affairs, and I have been this chairman for the last 3 years. We handle all veterans compensation and pensions, and I think that the House is entitled to know what we have done. Of course, then the Members can make up their minds.

In speaking against the Wolff amendment, let me just throw out this one fact, that a Vietnam veteran without dependents is now eligible to receive over $13,000 of educational assistance under the GI bill, and this is a lot of help. I see no reason to say that the veteran is not receiving enough educational benefits, and I think that the Wolff substitute should be voted down.

As to the gentleman from California, he has been very conscientious in his bill. In fact, the 160 persons who signed his bill, H.R. 55, have come to our subcommittee. The cost of this bill to give $150 to every veteran whether the veteran needs it or not, whether he is the richest man in America or not—we would give him $150 under the gentleman's bill—would be $2.4 billion for this year. He has asked for $500 million, and I do not know how we could divide the $500 million or how our subcommittee could act on it.

We do have some problems in our compensation and pension programs, but by law, which we passed last year, the Veterans' Administration has to report to the Congress in October of this year and make recommendations how we can improve the compensation and pension programs. I think it would make more sense—and the American Legion and the VFW agree with this statement—that no additional programs be added to compensation and pension programs until we get this report in October. We have problems pertaining to the veteran who receives a pension and also a social security check is affected by social security raises. We hope this study by the VA will solve part of this problem.

We are doing something for the World War I veterans; I would be the first to admit maybe we are not doing enough. We are not doing enough for a lot of veterans, but we do try to stay within the restraints of the funds we do have. Since we started veterans' programs many years ago, through 1976, the World War I veteran has gotten one-quarter of these funds. The World War I veteran received a World War I bonus. This cost $4.9 billion. It was given to all World War I veterans in 1939 and it was given in Depression dollars which was most helpful to the veterans.

We have done something in this Congress last year. We passed unanimously a provision that a World War I veteran who was 78 years old and was drawing a non-service-connected pension would receive an add-on of 25 percent. And everyone in this House voted for this and it passed and became law. In other words, we increased the World War I benefit for the needy guy, who really needed it, by 32 percent last year.

In the next few weeks we will present a bill to the Members that will take care of the widows of World War I veterans who are drawing these pensions. We will suggest to the House, and it will pass the Congress, an increase in the benefits, an add-on to this widows' pension by 25 percent plus 6-percent cost-of-living increase.

We have also on the aid-and-attendants for these World War I veterans increased that every year to take care of these aged veterans.

Next Tuesday we will vote on a bill and I think it will pass by unanimous consent to provide that all World War I veterans that are 100-percent disabled would be entitled to an automobile with an adapter on the automobile.

We are doing our best. I do hope the Members will give us a chance to get this report in October from the VA and analyze our pension and compensation programs. This amendment will only slow our committee down on trying to do the best we can for not only the World War I veterans but for all veterans. I hope the Wolff substitute will be defeated as well as the Anderson amendment.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

(On request of Mr. BROWN of Ohio, and by unanimous consent, Mr. MONTGOMERY was allowed to proceed for 1 additional minute.)

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, if we pass this legislation, would it be appropriate at this point for an amendment to the budget resolution to be drafted that would also do something for the veterans of World War II and the Korean conflict veterans?

Mr. MONTGOMERY. As I said, those veterans also need help. Our veterans' programs, I admit, barely meet the needs of the veterans or their widows or their dependents, but we are doing the best we can, and I would hope this amendment would be defeated. Those other veterans have their problems too.

Mr. EDGAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, there are three basic issues before the Veterans Affairs Committee which are of concern to me as a member of that committee. For a number of years these three issues have come back to haunt us over and over again as we receive mail from constituents. The three issues are these:

Issue No. 1. We receive mail from many of the veterans of the Vietnam era and those veterans whose GI education has been delimited so that they are unable to use their GI educational benefits.

Issue No. 2. This is the large number of letters we receive from widows and pensioners who say that every time their social security increment goes up their veteran pension goes down. The question is why?

Issue No. 3. We receive letters, and I have several here that I will show Members if they would like to read them, from World War I veterans who are in dire need. These are World War I veterans who if they make $3,500 of maximum income may receive no more than $5 of veteran's pension.

You will recall a year ago I offered on this House floor an amendment to add $610 million to extend the GI education delimiting date, because I felt very seriously and strongly that we needed to do something in the area of education, with high levels of unemployment, with a number of our Vietnam-era veterans out of work. I felt that it was important that we should provide educational benefits. We have learned that for every dollar we spend on education we receive $3 or $4 back in increased taxes and these men and women pay because of better qualified jobs and better education.

Today I stand in the well, not to support the amendment of the gentleman from New York (Mr. WOLFF) for education, while I believe that is a worthy cause and important. I stand in the well, not to support the issue of trying to make an accurate adjustment in legislation so that when a pensioner or widower receives an increase in social security, their veteran's benefit is not reduced. I stand in the well today to support the gentleman from California, to support the amendment the gentleman offered to provide some $500 million that would provide a partial pension, not $150 for each veteran, but $500 million to be used by the Committee on Veterans' Affairs under the leadership of the gentleman from Texas (Mr. ROBERTS), and the subcommittee chairmanship of the gentleman from Mississippi (Mr. MONTGOMERY). We must respond to the neediest veterans in this country who happened to have served our country well in World War I. So I urge that we defeat the Wolff amendment, not because it lacks merit, but because I believe there is a higher priority today. That priority is to be concerned and focused on those World War I veterans who are in the deepest need.

Mr. WOLFF. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from New York.

Mr. WOLFF. Mr. Chairman, the gentleman has indicated that my amendment would be limited to the idea of help to the Vietnam veterans. There is no such thing in the amendment that I offered. What I did was raise the amount of money that would permit the Committee on Veterans' Affairs to work their will. Unfortunately, we cannot here, on a budget resolution, make a determination as to how that money should be spent. The idea that I had set forth was to permit the members of the Committee on Veterans' Affairs to work their will, whether it be on veterans-of-Vietnam education, or pension funds for World War I veterans, or a combination of both.

Mr. EDGAR. Mr. Chairman, I appreciate the gentleman's explanation of what the gentleman's amendment will do. I still stand by my earlier comments. I feel that the $500 million amendment offered by the gentleman from California is much more realistic at this time in our history and at this point in the budget resolution.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. We have two amendments here; one would add $500 million to the budget; the other would add still another $829 million to the budget. Now, that is $1.3 billion more.

Mr. WOLFF. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from New York.

Mr. WOLFF. Mr. Chairman. What we have before us is a substitute amendment and adds only $800 million. It does not add to the amendment of the gentleman from California. It is a total of $800 million.

Mr. GIAIMO. Yes; but the gentleman's amendment for $500 million would still be in order.

Mr. WOLFF. Mr. Chairman, if the gentleman will yield further, my amendment is a substitute amendment.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, as I understand the parliamentary situation, it is that if the amendment of the gentleman from New York were to fail, the amendment of the gentleman from California would still be before us for a vote. If the amendment of the gentleman from New York would succeed, that would supersede the amendment of the gentleman from California.

Mr. WOLFF. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from New York.

Mr. WOLFF. Mr. Chairman, the amendment that I offered adds a total of $800 million.

Mr. GIAIMO. Is it delimiting?

Mr. WOLFF. For any purpose, including that of World War I veterans pensions. The only reason this is a substitute amendment is because it was the only parliamentary device possible.

Mr. GIAIMO. For anything?

Mr. WOLFF. For anything. This is only a budget request so that the Committee on Veterans' Affairs has the opportunity of working its will.

Mr. GIAIMO. One is for delimiting. The other involves $500 million for World War I veterans. The Committee on Veterans' Affairs has indicated that it would like to have time to study the $500 million amendment, where a report is to be made, as I understand it, by October 1.

In the case of the substitute amendment of the gentleman from New York, the committee has not made a determination in this matter.

We in the Budget Committee are criticized at different hours in the day

for anticipating what other committees might do; in the case of defense, for superseding the Armed Services Committee. But here, in the case of the Veterans' Committee, we are getting encouraged to add money before the Veterans' Committee has had an opportunity to work its will.

Let me say this: we did meet with the Veterans' Committee, and we added $1.2 billion in new entitlements for veterans. That is in excess of what President Carter added. Now, Members can vote for this legislation—I know it is difficult to vote against veterans' legislation—but let me tell them something. We came in here today with a budget deficit of $64.2 billion, and we are near $70 billion with these add-ons.

I hope all who are speaking and voting in favor of these add-ons are going to vote in favor of this budget resolution when we get to final passage. I say that particularly to my friends on the Republican side of the aisle and to my friends on the Armed Services Committee. I hope that we get their votes to support this budget resolution of almost $70 billion in deficit when we get to final passage. It is all well and good to vote for these very worthwhile programs, but Members should not ask other people to save their bacon. We need those votes in order to pass the resolution.

Mr. WYLIE. Mr. Chairman, I move to strike the last word.

I rise in opposition to the Wolff amendment as the ranking Republican on the Pension and Compensation Subcommittee. The fiscal year 1977 expenditures for veterans educational programs were around $829 million less than the amount which was authorized last year, so that means $829 million is still available for the GI educational benefits program.

If the amendment of the gentleman from New York is adopted, that will increase the amount which must be funded by an additional $823 million. I think the gentleman from Connecticut put his finger on the situation that we have before us; that is, if we want a budget, we ought not keep voting add-ons to it, however laudable they may seem at the time. The gentleman from New York (Mr. WOLFF) has presented his case before the Compensation and Pension Subcommittee, and his suggestion was rejected. The gentleman argues that $823 million is needed to extend the GI educational benefits delimiting date. I submit that the GI educational benefits program has always had a delimiting date since its inception. It was never intended that the GI educational benefits program would be a general maintenance and support program for the veterans and for their families. It is a rehabilitation program to assist the veteran in making the adjustment back to civilian life.

Mr. Chairman, I suggest that the argument of the gentleman from Connecticut ought to be supported.

Mr. WOLFF. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from New York.

Mr. WOLFF. Mr. Chairman, I would like to correct the gentleman on one point. We did not discuss this in the Compensation and Insurance Subcommittee. The bill for extending these payments was discussed in the Education Committee.

Mr. WYLIE. I am also a ranking minority member on the Education Committee. Two subcommittees are involved here, but I remember that we discussed the gentleman's amendment very carefully.

Mr. WOLFF. The vote at that time was 14 to 12. What I am saying is that I think it is no more than right that we let the House work its will on whether or not it wants this type of program, which it cannot do unless it is included in the budget. We are not appropriating any money here.

Mr. WYLIE. May I respectfully suggest to my colleagues in the House that the Veterans' Affairs Committee, which is the authorizing committee, should have the first say on this $823 million additional funding level to be established for pensions and for the GI educational benefits delimiting date.

Mr. Chairman, I therefore urge that the amendment offered by the gentleman from New York be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. WOLFF) as a substitute for the amendment offered by the gentleman from California (Mr. ANDERSON).

The amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ANDERSON).

The question was taken; and on a division (demanded by Mr. ANDERSON of California) there were—ayes 52, noes 69.

RECORDED VOTE

Mr. ANDERSON of California. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 329, noes 73, not voting 31, as follows:

[Roll No. 161]

Messrs. PATTEN, RHODES and SIMON changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. PIKE

Mr. PIKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PIKE: On page 1, line 11, strike out "$505,656,000,000" and insert in lieu thereof "$505,526,000,000";

On page 2, line 2, strike out "$466,732,000,000" and insert in lieu thereof "$466,602,000,000";

On page 2, line 5, strike out "$68,638,000,000" and insert in lieu thereof "$68,508,000,000";

On page 2, line 7, strike out "$794,968,000,000" and insert in lieu thereof "$794,838,000,000."

On page 2, line 9, strike out "$94,968,000,000" and insert in lieu thereof "$94,838,000,000."

On page 2, line 20, strike out "$120,136,000,000" and insert in lieu thereof "$120,118,000,000";

On page 2, line 21, strike out "$111,947,000,000" and insert in lieu thereof "$111,929,000,000."

On page 4, line 18, strike out "$1,069,000,000" and insert in lieu thereof "$957,000,000";

On page 4, line 19, strike out "$1,021,000,000" and insert in lieu thereof "$909,000,000."

Mr. PIKE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. PIKE. Mr. Chairman, when we entered the Chamber yesterday, the Budget Committee had a budget resolution which called for a deficit of $64.3 billion. At the moment we have a resolution which calls for a deficit of $68.6 billion. In 2 days we have added $4.3 billion to the deficit. Mr. Chairman, everybody talks about national priorities, and obviously we have different views of what our national priorities are. It is obvious that things for defense and for veterans are high on our list of national priorities, and things for the benefit of social welfare programs are low on our list of national priorities, because that is the way we voted here. Frankly, I have voted against all of the amendments which increased the budget and increased the budget deficit, and I am a little embarrassed that I am again offering an amendment which reduces the budget and reduces the budget deficit. This is the same amendment which I offered earlier. It reduces spending in two categories—allowances and defense—a total of $130 million, which is the amount of the 29 percent or 28 percent pay raise which people in those categories outside of the Congress got. We have discussed it already. The committee accepted it once. It got wiped out by the Burleson amendment.

Mr. Chairman, I yield back the remainder of my time.

Mr. ECKHARDT. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I oppose this amendment particularly with respect to the item on page 4, line 18, where it is provided to strike out $1,069,000,000 and insert in lieu thereof $957 million. That is the provision that has to do with what is called allowances, and of that amount there is approximately $112 million total that has to do with pay increases of relatively high paid executive employees, and about $10 million which has to do with Federal judges.

I know that when I enter the well I am always subject to somebody saying, "You are bringing up the darned Constitution again." Of course, I know that is a very unpopular thing to do here, and I shall probably be referred to as a constitutional authority and thus attacked for presenting a somewhat pedantic proposition here. I am not a distinguished constitutional authority; I only come here as a person who can read the English language.

The Constitution is of course written in plain English. We take only one oath when we enter this body, and that is to abide by the Constitution. The Constitution says in article 3 that the judges of both the Supreme Court and the inferior courts shall hold their offices during good behavior and shall at stated times receive for their services a compensation—now listen to this—which shall not be diminished during their continuance in office. The Constitution says that the salary shall not be diminished. That does not mean if they got less money when they first came here 40 years ago we can cut them back to the figure they had 40 years ago. It means once their salary goes up we cannot diminish it.

Why did the framers provide that way? Because they wanted the three divisions of the Government to be independent of each other, and if we had the power to tell John Jones who went on a bench of the Federal court in 1945 that we were going to cut his salary back to what he got in 1945 because he decided a case in a way we did not like, we would be in control of the judiciary branch of the Government.

The framers of the Constitution did not want to do that, did not want to let one branch of our Government to determine the salaries of the judiciary. This is because, if we should do so, we would put an enormous pressure on the judiciary to respond to every breeze that blows and affects our Government at any particular time.

I am not saying that the amendment offered by the gentleman from New York (Mr. PIKE) is unconstitutional. Indeed it is not, because that $10 million that he purports to take away from the judges to reduce their salaries to what they were before they were increased cannot be taken away from the judges. And if they go to the courts on this particular proposition, they will win. They are not unlearned in the law.

Now, where will the $10 million come from? It will come out of other parts of that budget. And in order to make up that $10 million we have got to take it either from some supporting budget items or from the pay of the other executive officers. We have already taken away their increase and in order to reduce this item by an additional $10 million we have got to take 2.6 percent from them and reduce their pay by 2.6 percent below what it was before they got their increase. Do we want to do that? Is that fair? Is it fair to reduce the salaries of these persons below that which existed before their increase? We cannot take it away from the judges.

Mr. GIAIMO. Mr. Chairman, I think we have all discussed this amendment enough today. It was up earlier. We all know what it is. I think everybody is ready to decide on it.

Mr. Chairman, I ask unanimous consent that all debate on the amendment offered by the gentleman from New York (Mr. PIKE) and all amendments thereto end in 2 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Tennessee (Mr. ALLEN).

Mr. ALLEN. Mr. Chairman, as much voter appeal as Mr. PIKE's amendment has, and as justified and as much voter appeal as his amendment which passed yesterday, affecting our own salaries, may have had, I must oppose this clearly unconstitutional amendment.

Mr. Chairman, I have taken a solemn oath to support and uphold the Constitution of the United States, and God being my witness, I intend to do just that.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio (Mr. LATTA).

Mr. LATTA. Mr. Chairman, I have been here a few years. During those few years I have not agreed with the gentleman from Texas too many times; but today I agree with the gentleman completely. This move, is against the Constitution. We took an oath, as the gentleman from Tennessee indicated, to support the Constitution of the United States. We do not have to be lawyers to read the Constitution, and it says exactly what the gentleman from Texas indicated. I intend to support the Constitution. Some people will say we can get judges for any amount. Sure, we can get "two-bit" lawyers any place, at any time and put them on the bench, but we do not want judges of this kind on the Federal bench.

Mr. Chairman, our judges deserve the salary they are getting.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. PIKE).

The amendment was rejected.

AMENDMENT OFFERED BY MR. EMERY

Mr. EMERY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EMERY: In the matter relating to Natural Resources, Environment, and Energy (300) strike out $20,950,000,000 in budget authority and insert in lieu thereof $20,850,000,000; and strike out $20,677,00,000 in outlays and insert in lieu thereof $20,577,000,000.

Mr. EMERY. Mr. Chairman, my colleague from California, GEORGE MILLER, and I are proposing this amendment to House Concurrent Resolution 195, which provides a $100,000,000 cut of funding for water projects funded under function 300, for projects under the category of natural resource, energy, and environment. Although some of these projects may be worthwhile, much greater congressional review is needed to weed out those which are environmentally unsound and economically questionable. I am in agreement with President Carter's call for more oversight responsibility by the Executive and the Congress in the budget process. The TVA, the Army Corps of Engineers, and the Bureau of Reclamation have proposed and constructed some water projects which are technically deficient, environmentally damaging, and economically wasteful. Close congressional review is very necessary to insure that we find useful projects that are not merely traditional pork barrel programs.

On April 18, President Carter presented the Congress with a detailed and comprehensive position. I quote from that message:

I am recommending the development of major policy reforms in the following areas:

1. more realistic project evaluation criteria;
2. dam safety;
3. cost sharing for federal projects;
4. water conservation; and
5. redirected public works programs.

In balancing the budget, cutting back on inflation and making the federal government more responsive to the needs of the people, difficult choices have to be made. Activities which are wasteful, unsafe or economically or environmentally unsound simply cannot be pursued. Water resource development programs of the Corps of Engineers, the Bureau of Reclamation and the Tennessee Valley Authority are a case in point.

In my budget recommendations to the Congress last February I initiated a major review of ongoing water resource projects. The review is now complete and I have specific recommendations for the Congress on the 32 projects which were subject to public hearings. They are based on reviews by the Interior Department, the Corps of Engineers and the Tennessee Valley Authority, with assistance from the Office of Management and Budget and the Council on Environmental Quality.

My decision on individual projects was a difficult one. I have tried to be fair and to give the benefit of the doubt on some projects which would certainly not be justified if they were proposed today. However, I have not hesitated to recommend termination or modification of projects which appeared justified when they were originally authorized.

In consultation with the Congress, state and local governments and the public, I intend to develop detailed policy recommendations to insure that our water-related needs are met in the best manner, and to use realistic criteria for water project evaluation. The review process I started during the first days of my Administration is not going to stop here; further work needs to be done and fundamental improvements need to be made in our water polices and programs.

The drought in the West and recent severe flooding in the East have shown us that despite the massive numbers of federally-funded water projects in existence, we are still as susceptible as ever to the ravages of the weather. Instead of proceeding down the same road of more and bigger structural projects, we need to rethink our policies.

The President then went on with more specifics. The Emery-Miller amendment does not specify which projects should be cut. Although we are not here to argue the individual pros and cons of dozens of water projects, sufficient facts have been presented in the President's factsheets by environmental groups and State associations on these projects for reasonable people to determine their worthiness. Some are particularly questionable. In one project, the review showed the investment for irrigation was over $4,000 per acre of which only $208 will be repaid. The benefit cost ratio on this project is below unity, even at the authorized interest rate.

In another case, the President's review found that about a third of the benefits resulted from recreation benefits, but that these benefits depended on the reservoir getting almost as many visitors per year as Yellowstone National Park. The project would inundate 10,000 acres of prime farmland as well as destroying wildlife habitat. The benefit cost ratio on these projects is also below unity.

In another of the projects reviewed, the local sponsoring entity has requested that there should be no funding for fiscal year 1978. This project, at a cost of more than one-half billion dollars, would damage water quality for others who depend on the water.

One project would destroy so much critical wildlife habitat that a number of nearby States, as well as the State's house of representatives where the project is situated, have opposed it.

Let the Subcommittee on Public Works of the Appropriations Committee choose among those that are most justifiable from all the water projects.

In line with the President's energy goals, it is desirable to construct projects which provide energy benefits greater than energy costs. Specifically relating to water energy sources the President talks about small-site hydro in his energy program. Development of already existing dams to provide needed energy supplies is much less costly per kilowatt-hour than many of the proposed new dams. Existing dams do not damage the environment and provide electricity with no high priced foreign fuel costs.

The amendment I am proposing is relatively modest. I have not prejudged the merits of the specific projects. I have asked that we reduce the ceiling by considerably less than would be the cost of cutting or modifying all the projects which the President recommended. However, the primary focus of this amendment—to demonstrate our seriousness about fiscal responsibility—and our interest in greater oversight of water projects—will be met.

Mr. MILLER of California. Mr. Chairman, will the gentleman yield?

Mr. EMERY. I yield to the gentleman from California.

Mr. MILLER of California. Mr. Chairman, I want to say that since the President made those remarks, he also delivered a letter to the gentleman in the well and myself today thanking us for our support of his recommendations. The letter is as follows:

THE WHITE HOUSE,
Washington, D.C., April 27, 1977.

The Hon. GEORGE MILLER,
The Hon. DAVID EMERY,
U.S. House of Representatives,
Washington, D.C.

TO GEORGE MILLER AND DAVID EMERY: Thank you for your support of my recommendations to the Congress on curbing unnecessary spending on federal water projects.

By cutting back and eliminating some projects, we have an opportunity to save the taxpayers billions of dollars, preserve irreplaceable natural resources and still meet our Nation's water-related needs in an equitable fashion.

Thank you again for your support.

Sincerely,

JIMMY CARTER.

Mr. Chairman, I think the gentleman's amendment is well thought out, and provides the kind of scrutiny and direction to the Appropriations Committee to make sure that these projects come under the scrutiny which they have escaped for decades.

The CHAIRMAN. The time of the gentleman from Maine has expired.

(On request of Mr. OTTINGER and by unanimous consent Mr. EMERY was allowed to proceed for 2 additional minutes.)

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. EMERY. I yield to the gentleman from New York.

Mr. OTTINGER. I would like to congratulate the gentleman on his amendment. If we are serious about cutting out the fat in the budget, we have to bite some hard bullets. I know this is hard for some of our colleagues, but this is a good place to start—with an evaluation of these very controversial and questionable projects.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. EMERY. I yield to the gentleman from Kentucky.

Mr. PERKINS. I would like to ask the distinguished gentleman from Maine whether he supports the Dickey-Lincoln project.

Mr. EMERY. The answer to the gentleman is no, I do not.

Mr. PERKINS. And the President has already restored the funds in his budget for Dickey-Lincoln, am I correct?

Mr. EMERY. Unfortunately, the gentleman is correct, but if I can prevail upon the President to change his mind, with the eloquence of the senior Senator from Maine, I would have him object to the project. It is not included in this amendment. I am opposed to Dickey-Lincoln, and I think it is a case in point. It cannot possibly meet the standards the President himself has set down in his message.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to the amendment.

It is always easy to suggest as some have done tonight that we must start someplace to bite the hard bullet of economy. And how very much easier when

that someplace involves somebody else's project or program.

There are none of these presently endangered water projects that lie within or adjacent to my district, but I think I know a little bit about water resource programs and their value to the Nation. I believe it can be demonstrated that, by and large, the water resources development program of the United States has paid for itself many times over.

It seems quite ironic to me that, almost alone among all the things the Government does, the development of the waters that fall on our Earth is required to meet benefits-cost criteria. It seems even more ironic that the advisors to the President, newly installed in their advisory capacities, presume that within 6 short weeks of study they can reach finite judgments better than the judgments which have been reached deliberately and carefully by the Congress and its committees over the periods of 6, 8, 12, sometimes 20 years of continuous study on these various projects.

One would gain the impression from some of the rhetoric here tonight that Congress has no concern for economic feasibility or no established mechanism for determining it.

The gentleman's amendment would deny to the Committees on Appropriations of this Congress the right to review those projects by the existing criteria of law and it would deny to this House the right to make judgments on those projects in the appropriations process.

You say water projects do not pay for themselves? Let me review just a few brief statistics. During the period in which this Government has been spending money to control floods, we have spent some $7 billion on flood control. Some 235 projects already have saved us $53 billion in calculable damages that otherwise would have been inflicted upon the American people. They have paid for themselves seven times over.

You say that irrigation projects do not pay? Anybody who does not live in the West cannot know that water is more important than oil or coal or uranium or any other resource of the Earth. In the West, water is life. We have expanded some $8 billion on irrigation projects to make the deserts bloom, to bring foodstuffs out of the dry and unremitting Earth. And do you know how much the foodstuffs we have produced through the reclamation program have added to the wealth of this Nation? Some $60 billion worth of food stuffs have been added, to help feed the growing population of this hungry world and to help lower the cost of food in the marketplaces of America.

You say navigation does not pay? Let us stop here and think about the savings in energy. A few years ago, calculations revealed that $1 worth of gasoline or its equivalent will move 1 ton of freight 5 miles by air, 16 miles by truck, about 65 miles by rail, or 333 miles by barge. Can that kind of saving to the Nation be called a boondoggle?

Yes, we do need to reexamine the methods by which we determine the value of water projects, but we need to reexamine and upgrade not only the costs but the values we attribute to them. Some people seem to know the cost of everything and the value of nothing.

It is suggested that the Corps of Engineers are too optimistic in their benefits analyses. In most cases, the actual results have proven that they were quite conservative. When Congress authorized the Gulf Intracoastal Canal, the corps predicted ultimately it ought to be able to carry some 7 million tons of freight. Do the Members know what it carried last year? More than 100 million tons of freight.

Nobody who has ever seen the ravaging floodwaters sweep away the lifetime dreams of families can call flood control "pork-barrel."

Nobody who has ever seen the industry that can come and thrive in an otherwise undeveloped area where water navigation is made possible so that people can have jobs in the smaller towns along the rivers can call navigation "pork-barrel."

Nobody who has ever seen the parched and thirsty earth drying up from drought and swept by duststorms can call sound Western reclamation "pork-barrel." And nobody who has ever really evaluated our Nation's water resource development program carefully can say that it has not paid for itself. Water is more important than any other resource we have.

This glass contains——

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(On request of Mr. EVANS of Colorado and by unanimous consent, Mr. WRIGHT was allowed to proceed for 2 additional minutes.)

Mr. WRIGHT. Mr. Chairman, there is exactly the same amount of water in the world that there was in the beginning—no more, and no less. Science tells us that this glass of water contains some tiny molecules that fell in the flood of Noah, some that parted in the Red Sea, some that floated fishing craft on the Sea of Gallilee, and some that washed blood off the beaches of Normandy in World War II.

The manner by which this fixed supply completes its never-ending rotation, moving by surface and subterranean streams to be gathered up into the great ocean reservoirs, is a mystery. From there it is drawn skyward again by the magnet of the sun to be purified anew, then returned by wind and cloud to refresh the parched and thirsty Earth. This process goes on ad infinitum. It is a marvelous process of a miraculous universe. Man can comprehend it, but he can never duplicate it.

The best we can do is to use it well, to husband it, to keep it pure and take care of it, and conserve it.

Mr. Chairman, that is what the Nation's water program is all about, and I urge the Members to vote "no" on this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Chairman, I ask unanimous consent that all debate on this amendment end in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous consent request was agreed to will each be recognized for 20 seconds.

(By unanimous consent, Mr. PERKINS and Mr. JOHNSON of Colorado yielded their time to Mr. EVANS of Colorado.)

The CHAIRMAN. The Chair recognizes the gentleman from Colorado (Mr. EVANS).

Mr. EVANS of Colorado. Mr. Chairman, there are just two items that I would like to add to the eloquent statement made in opposition to this amendment by our majority leader.

Number one, 85 percent of the costs of these programs are repaid to the Treasury of the United States.

Number two, going back 20, 30, and 40 years, States located in the Rocky Mountain area and in the West have gone through battle after battle to solve the question of property rights as it relates to the flow of water in natural streams. Agreements have been reached, and they have been reduced to interstate compacts approved by the Congress of the United States.

Then after that happened, the States within themselves have had battles over the division of water, and there have been battles as well between States. There have been battles featuring Arizona versus California, Arizona and California versus Colorado, Nebraska, Wyoming, Utah, et cetera.

Mr. Chairman, I hope that we will not destroy this delicate balance by supporting this amendment, and I hope that the Members vote against the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Chairman, I rise in opposition to this amendment.

I would like to point out that the subcommittee of the Committee on Appropriations is doing exactly what the President has asked. We are reviewing these matters and holding hearings. The Secretary of the Interior testified Friday, the Corps of Engineers testified Thursday, and we are going into this. Certainly we want the opportunity to handle this in the normal procedure as we have in the past.

Mr. Chairman, I urge the Members to vote for this procedure and against the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. MILLER).

Mr. MILLER of California. Mr. Chairman, there is nothing in this amendment that would prevent any justified water projects from being completed. Let me tell the Members that we have looked into this, and we find that it would cost $20 an acre-foot to get this water, and yet the richest corporations and families in America pay only $7.50 an acre-foot.

How is this money going to be repaid? It is going to take 492 years to repay the costs of these projects. We have now decided that it is too expensive, and so we are going to give it to the taxpayers because the price has gone up too far.

Mr. Chairman, this data is indexed,

and the price of bringing water to this property is prohibitive.

The CHAIRMAN. The Chair recognizes the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Chairman, to have 20 seconds to defend an $80 million reclamation project in Wyoming, after 7 hours of debate in this body, at the end of a 16-hour workday, this constitutes the height of some type of inanity that I am incapable of describing.

Mr. Chairman, I think this is an insult to our lawmaking process.

(By unanimous consent, Mr. MOORE yielded his time to Mr. EMERY.)

The CHAIRMAN. The Chair recognizes the gentleman from Maine (Mr. EMERY.)

Mr. EMERY. Mr. Chairman, I must say I hope that after I have been in the House of Representatives for as long as the gentleman from Texas (Mr. WRIGHT) has, I will be able to assemble some of the eloquence that he has displayed. It was a masterful speech, and I understand the position he has taken. I can understand the differences that he has with the administration's policy concerning water projects, and I respect that.

The difference, of course, between a glass of water on the rostrum and a dam or water project is the fact that a glass of water does not cost $100 million.

Mr. Chairman, I ask the Members to support the amendment because I believe it will provide us with some measure of review, badly needed review, in the construction of water projects.

The CHAIRMAN. The Chair recognizes the gentleman from Utah (Mr. MARRIOTT).

Mr. MARRIOTT. Mr. Chairman, I rise in opposition to the Emery amendment, which would have the effect of cutting the water projects. This amendment, as well as the entire proposition, is ill advised, ill conceived, illogical, insensitive, and based on faulty premises.

This amendment would cut funding for the Bonneville unit of the central Utah project, along with many other projects in your States.

The Carter administration and other proponents of these cuts base their conclusions on faulty reasoning.

I use my State of Utah as an example:

First. They say we should cut the Bonneville project because it would save $659.8 million in Utah. That is erroneous. We have spent $154 million to date. Court suits alone because of breach of contract could amount to the $659 million. The fact of the matter is that 92 percent of this money will be paid directly back to the Government, and the overall economic benefit to the State of Utah would be nearly $2 billion.

When this project was started, the act of April 11, 1956, 70 Stat. 105, authorizing the central Utah project, did not even place a specific cost limitation. That is how convinced they were that the project was essential.

Second. They say the need is questionable. The fact is that Utah is the second driest State in the Nation. The people of Utah ought to determine the need. The 62 percent of the citizens of Utah affected by the project are so committed to it that they are paying an ad valorum tax to support it.

Third. They say the cost of the investment per acre for irrigation is too high. They say it is $4,295 an acre. That is true if you assume that all the water delivered is to new land only. The facts are that new land will account for only 29,370 acres. This project also sends supplemental water to 213,170 acres; that is, land presently irrigated but with an inadequate water supply. Therefore, the actual cost per acre is only $1,434.

Fourth. They say the economic value is marginal, that it only has a 1 to 1 ratio. But in fact, if you use the current rate of interest—6⅝ percent—to compute cost-benefit ratios, as they have done, then the current rate should also be used in estimating benefits. Looking at the entire picture, the true ratio is 1.5 to 1.1, which is very good. Even if it were only 1 to 1, the administration h..s already approved projects with less than a 1 to 1 ratio.

Fifth. They say that the beneficiaries would not pay enough of the share of the capital investment and the operating costs.

The truth is that the Federal investment in Bureau of Reclamation completed facilities since 1902 nationwide is $6 billion; 84 percent of the investment is reimbursable, a record no other Federal program can equal. The cumulative gross crop value during the same period is $50 billion, 8 times the investment cost.

In Utah the cumulative gross crop value for reclamation projects is $1 billion as of 1975. The total cost of all projects in Utah is only $176 million.

The current estimated Bonneville unit cost is $862 million, of which $175 million has been expended. The reimbursable cost will be $739 million, or 86 percent of the total cost, with 14 percent allocated to public uses such as flood control, fish and wildlife, recreation, and highway improvement.

Repayment of reimbursable costs to the Federal Treasury as required by law will come from water sales, electrical power sales, and ad valorum tax revenues.

In other words, the reimbursable cost of the Bonneville unit will be paid 100 percent by the people living in the projected area. The total operation and maintenance cost will be paid for by the water users of the unit.

Sixth. The opponents of these water projects say that we have alternative water supplies. I would ask them to visit the West, Utah specifically, and point them out to us.

In a recent study by the Pacific Southwest Interagency Committee Water Resources Council, appendix 11, page 10, it states:

> In the Great Salt Lake subregion, where the greatest M. & I. water requirement is projected, local sources will not be sufficient to meet the needs.

That condition is exactly what the central Utah project and the Bonneville unit are intended to correct. This project is the lifeblood of Utah. Without it we will be in a serious condition. Our population and economic growth will be stifled.

In light of these facts and the drought conditions we are in today, with water supplies in Utah at 35 percent of normal, and like situations in other States, and in order to minimize future drought conditions, with their costly emergency funding requirements, I urge my colleagues to vote down this amendment and in so doing to commit to fully restore funding of these vital and necessary water projects.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania (Mr. KOSTMAYER).

Mr. KOSTMAYER. Mr. Chairman, I rise today to support this amendment which will reduce expenditures in the Federal budget by $100 million.

This savings will allow the termination of wasteful water and dam projects. The President seeks deletion of funds for 18 such projects and significant reductions for 5 more. Originally 32 costing $230 million, even the administration says $177.4 could be saved by cutting these projects, we are asking only $100 million.

This proposal is based on a careful and scrupulous analysis and review which was undertaken bf the administration. The analysis was based on three criteria:

First, a project must have no significant negative environmental impact;

Second, no major safety actions must be involved;

Third, the ratio of remaining costs to remaining benefits must exceed 1:1 when computed at the current discount rate of 6⅜ percent.

Mr. Chairman, some of the projects on the President's original "hit list" passed muster and construction of these projects can proceed. These projects have worthwhile goals—flood control and water supply—which justify their construction.

But what of the projects which failed the review? These are the ones which are the very worst offenders from the standpoint of environment, safety, and costs, and it is these projects which this amendment seeks to stop.

Mr. Chairman, the Congress must respond favorably to the efforts of the administration to cut this money from the budget. We must reject "pork barrel" politics and the philosophy that a wasteful and needless project is never one located in a Member's home district.

The fact that Congress has already approved some of the projects this amendment would eliminate or alter is no excuse for inaction today. We must challenge the wisdom of past Congresses and of this Congress. This is what the President is doing, and if he does not, who will?

Mr. Chairman, the problem is that the Federal budget is a political document. Too often it grows in direct proportion to the wishes of the Members of Congress to locate projects such as these in their districts. Congressmen bear no individual responsibility, but only a collective one for the increasing size of the Federal budget.

It is the President who in this instance

bears the burden. The Congress in its collective greed does not.

I support the President, Mr. Chairman. I believe the American people support him, too.

During his campaign for the Presidency, Jimmy Carter promised to do exactly what he is doing now. Who among us can be surprised? He promised a balanced budget in 4 years; perhaps he will not succeed, but he is trying to fulfill that commitment and that promise to the American people.

Instead of opposing the President we should be defending him. My mail indicates my constituents do.

This amendment, a deletion of $100 million is a start. Let us listen to the people and to the President. Let us call an end to "pork barrel" politics. Let us stop the unnecessary damming, ditching, and dredging and start the saving.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Maine, to strike $100 million in budget authority and outlays from function 300. This amount is intended to come out of funding for the disputed water resource projects which have been so widely discussed of late.

Out of hundreds of ongoing water projects throughout the Nation, only a handful were ever mentioned for review or reconsideration. And the evidence is compelling that at least some of the projects mentioned are deficient by one measure or more—safety, environmental, impact, economic benefit, et cetera.

It is almost beyond belief that projects intended to protect the safety and welfare of people and property could be questioned on the basis of safety considerations. Nevertheless, at least two of the review projects may pose dangers through their siting and construction design.

Some of the projects also raise serious questions of land use priorities. Completion of these projects would inundate several hundred thousand acres of productive forest and agricultural land. It is curious that in some cases the amount of land—productive farmland or forest—to be flooded exceeds the amount expected to benefit from the flood control or irrigation provided by the project. This seems a bit absurd, when food supplies and prices are of such concern to our citizens, and when our need for forest products continues to grow.

Several hundred miles of free-flowing rivers and streams, and many acres of wetlands and marches, some of which provide natural flood control and water purification at no cost to the taxpayer, would be destroyed. So would prime wildlife habitat and many important geological, archaeological, and historic sites. In addition, some of the projects would have adverse affects on Indian lands and water quality even beyond our own borders.

There is also reason to question the use of recreation as a justification for dam and reservoir projects. Many rivers and streams are already enjoyed by canoeists and anglers, but the lakes which would replace them are likely to be fluctuating reservoirs, often surrounded by extensive "bathtub rings" of mudflats. And unreasonable expectations of the numbers of visitors have inflated the importance of the recreation justification.

On some of the projects, the assumptions on which authorizations were based have ceased to apply over time. Local needs may have changed, and local commitments are uncertain. Without local support, of course, the Federal Government will have to abandon the projects or provide full funding.

There are also several projects which would benefit only very narrow interests. Five of the projects count as their beneficiaries only 1 company, 2 companies, 60 landowners, 69 landowners, and 106 landowners, respectively.

There is also evidence that benefit/cost ratios were based on unsound economic methods or have changed enough since authorization that they are now marginal at best. At least eight are now marginal or below unity. This hardly provides any justification for the massive investment needed to complete the projects, especially since spending on water projects creates significantly fewer jobs and uses considerably more energy per dollar than a host of other Federal programs. Mr. Chairman, I would like to insert the following which illustrate this contention at this point in the RECORD:

Federal Program and employment demand (resulting from $1.13 billion investment shift from Corps of Engineers construction):

Corps Construction: 73,380 jobs.

Waste Treatment Construction: 95,609 jobs up plus 30.3 percent.

Mass Transit Construction: 78,443 jobs up plus 6.9 percent.

Social Security Benefits: 95,968 jobs up plus 30.5 percent.

National Health Insurance: 115,419 jobs up plus 57.3 percent.

Tax Relief: 81,192 jobs up plus 10.6 percent.

Source: "Job Impact of Alternatives to Corps of Engineers Projects", Bruce Hannon and Roger Bezdek, *Engineering Issues—Journal of Professional Activities*, ASCE, vol 99, October, 1973, pp. 521–531.

Federal Program and Energy Consumption (BTU per 1963 dollar of program):

National Health Insurance: 40,000.

Railroad and Mass Transit Construction: 43,100.

Water and Waste Treatment Facilities Construction: 65,400.

Educational Facilities Construction: 70,600.

Personal Consumption Expenditures (Tax Relief): 86,000.

Corps Projects: from 92,000 up to 146,000.

Source: "Energy, Manpower, and the Highway Trust Fund", Roger Bezdek and Bruce Hannon, *Science*, August 23, 1974, vol 185, pp. 669–675.

A further issue which, to my knowledge, has not been addressed is the impact on these water resources projects of the administration's energy proposals. As in most areas of our economy, both the short and long term effects of these proposals are impossible to predict. It may be that hydroelectric power generation will play a part in our energy program, but if energy conservation efforts succeed, the energy and other resources needed to construct and maintain hydropower facilities may not be justified by new demands for power. Only a very small number of the projects under discussion will produce hydroelectric power, but the investment in all the projects is great, and most will result in a net energy loss.

It should also be noted that many of the projects which are planned to provide substantial recreational benefits assume that visitors will drive to them; however, as gasoline prices rise, recreation behavior may very well change. There may be other effects as well, but I know of no effort to recompute benefit/cost ratios to allow for the impact of the new energy scenario.

Clearly, there are a great many arguments for the exercise of prudence in making specific funding decisions on the individual projects. I believe this amendment will demonstrate the intent of this House to take care that our limited fiscal resources are not wasted or used for providing limited benefit or even potential harm at excessive cost. It is only with the application of improved economic data, and with careful consideration of these programs and all others mandated by Congress, that we will be able to provide the best possible services to our constituents, at the most reasonable cost, and, eventually, balance our budget.

I urge all my colleagues to join me in supporting this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Chairman, I rise in opposition to the amendment.

Some projects are good, some are bad, some are horrible, like Dickey-Lincoln in Maine; but I think that we ought to leave it to the Committee on Appropriations to determine which are the good ones and which are the bad ones. We should not prejudge the situation and try to determine it here in the budget resolution.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maine (Mr. EMERY).

The question was taken; and on a division (demanded by Mr. EMERY) there were—ayes 42, noes 137.

RECORDED VOTE

Mr. EMERY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 143, noes 252, not voting 38, as follows:

[Roll No. 162]

Forsythe	Milford	Teague
Fraser	Mollohan	Walgren
Frenzel	Moss	Wilson, Bob
Gradison	Myers, Ind.	Young, Alaska
Harkin	O'Brien	

The Clerk announced the following pairs:

On this vote:

Mr. Russo for, with Mr. Staggers against.
Mr. Walgren for, with Mrs. Boggs against.
Mr. Fraser for, with Mr. Teague against.
Mr. Koch for, with Mr. Price against.

Mr. LEDERER changed his vote from "aye" to "no."

Mr. BAUCUS and Mr. WAXMAN changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. LATTA

Mr. LATTA. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. LATTA: Strike all after the resolving clause and substitute in lieu thereof the following:

That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1977—

(1) the recommended level of Federal revenues is $392,900,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $13,873,000,000;

(2) the appropriate level of total new budget authority is $481,500,000,000;

(3) the appropriate level of total budget outlays is $440,600,000,000;

(4) the amount of the deficit in the budget which is appropriate in light of economic conditions and all other relevant factors is $47,700,000,000; and

(5) the appropriate level of the public debt is $777,000,000,000 and the amount by which the statutory limit on such debt should accordingly be decreased is $24,100,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1977, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):

(A) New budget authority, $120,100,000,000;

(B) Outlays, $111,900,000,000.

(2) International Affairs (150):

(A) New budget authority, $8,800,000,000;

(B) Outlays, $7,000,000,000.

(3) General Science, Space, and Technology (250):

(A) New budget authority, $4,900,000,000;

(B) Outlays, $4,500,000,000.

(4) Natural Resources, Environment, and Energy (300):

(A) New budget authority, $19,100,000,000;

(B) Outlays, $19,500,000,000.

(5) Agriculture (350):

(A) New budget authority, $4,700,000,000;

(B) Outlays, $4,300,000,000.

(6) Commerce and Transportation (400):

(A) New budget authority, $18,200,000,000;

(B) Outlays, $18,700,000,000.

(7) Community and Regional Development (450):

(A) New budget authority, $6,400,000,000;

(B) Outlays, $7,800,000,000.

(8) Education, Training, Employment, and Social Services (500):

(A) New budget authority, $18,300,000,000;

(B) Outlays, $19,600,000,000.

(9) Health (550):

(A) New budget authority, $48,300,000,000;

(B) Outlays, $44,000,000,000.

(10) Income Security (600):

(A) New budget authority, $172,000,000,000;

(B) Outlays, $143,600,000,000.

(11) Veterans Benefits and Services (700):

(A) New budget authority, $18,200,000,000;

(B) Outlays, $18,300,000,000.

(12) Law Enforcement and Justice (750):

(A) New budget authority, $3,700,000,000;

(B) Outlays, $3,800,000,000.

(13) General Government (800):

(A) New budget authority, $3,900,000,000;

(B) Outlays, $3,900,000,000.

(14) Revenue Sharing and General Purpose Fiscal Assistance (850):

(A) New budget authority, $9,100,000,000;

(B) Outlays, $8,100,000,000.

(15) Interest (900):

(A) New budget authority, $40,600,000,000;

(B) Outlays, $40,400,000,000.

(16) Allowances:

(A) New budget authority, $1,200,000,000;

(B) Outlays, $1,200,000,000.

(17) Undistributed Offsetting Receipts (950):

(A) New budget authority, —$16,000,000,000;

(B) Outlays, —$16,000,000,000.

SEC. 3. In the third budget resolution for fiscal year 1977, the Congress provided for revenue and spending proposals designed to stimulate the Nation's economy in order to reduce unemployment. These proposals, together with recent indications of more vigorous economic growth in the private sector, provide evidence that the Nation's economy may be returning to the levels needed to provide jobs to millions of our unemployed.

The Congress recognizes, however, that unusual uncertainties surround the current economic outlook for 1977 and 1978—primarily, the economic impact of the stimulus proposals and the likelihood of continued economic growth in the private sector—and that additional time and information are needed to make final determinations with respect to fiscal policy for fiscal year 1978; and declares that, if economic recovery does not proceed satisfactorily during the months immediately following adoption of the first budget resolution for fiscal year 1978, it will be necessary to provide additional stimulus to the economy in appropriate amounts to be determined in the second budget resolution for fiscal year 1978. On the other hand, if the recovery continues to show signs of long-term renewed growth, it may be desirable to reduce some of the economic stimulus provided for fiscal year 1978 in order to make more rapid progress toward a balanced budget.

SEC. 4. Pursuant to section 304 of the Congressional Budget Act of 1974:

(1) Section 1 of S. Con. Res. 10 is amended to read as follows:

"That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

(1) the recommended level of Federal revenues is $355,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $3,300,000,000;

(2) the appropriate level of total new budget authority is $469,700,000,000;

(3) the appropriate level of total budget outlays is $414,250,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $59,250,000,000; and

(5) the appropriate level of the public debt is $707,970,000,000."

(2) Section 2, paragraph (10) of S. Con. Res. 10 is amended to read as follows:

"(10) Income Security (600):

(A) New budget authority, $167,700,000,000;

(B) Outlays, $138,100,000,000."

Mr. LATTA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. LATTA. Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. LATTA. Mr. Chairman, I realize the hour is late—10 minutes until 11. We have had 2 long days of vigorous, refreshing, stimulating debate, and I think that it has been better for the House to have had that debate. We have won some; we have lost some. Let me say that during this time I believe that the Committee on the Budget has shown that it has done its homework. I want to commend our chairman for the excellent job he has done in presenting this resolution, not only on the floor, but presenting it in the committee. It is a tremendous job.

Let me say that when we consider a budget of this size, within the few short weeks that we had to consider it, one realizes what kind of job it is. We do have differences of opinion, but they are philosophical, I might say. Certainly, in deference to the committee, if we did not have some differences, I do not think we would have a very good Committee on the Budget. I think dissent is good. We mold our legislation that way.

I sat here for 2 days and listened to these amendments and the arguments presented. Now I take this opportunity to present a substitute to this package which encompasses the philosophy on our side that we attempted to enunciate and pass in the committee. It will take a little time, which is the reason I asked for the Members' indulgence for an additional 5 minutes.

Mr. Chairman, in my remarks at the beginning of the general debate, I attempted to avoid political rhetoric and sweeping generalizations, and instead focused on facts and realities.

I said that the general state of the American economy was good, and that the prospects for a continued strong and healthy recovery were equally as good. I not only said it, the facts document it.

This week's report includes new GNP, personal income and consumer price figures, as well as other recent economic indicators. The following comparisons show changes from preceding week, month, or quarter in seasonably adjusted annual rates unless otherwise stated. Price indicators show the all-items index in annual rates, and special categories adjusted weekly dollar figures. Highlights of latest changes in economic indicators follow:

First. The U.S. economy made a strong first quarter advance, according to new GNP figures released Wednesday. Despite cold weather setbacks in January and February, the upturn in national output was the best in a year, paced by a strong upturn in auto production. Factory operating rates, industrial production and employment rose while unemployment fell. Consumer prices rose at a double digit rate in the first quarter, but slowed their advance in March. Housing starts were at the highest rate in 4 years, personal income made the second highest monthly gain ever, and Government economists project a strong economic growth rate this year. Private economists stress inflation dangers.

Second. Latest GNP figures show year's best gain in Nation's overall production of goods and services—gross national product. The market value of national output—GNP—rose 11.3 percent or $47.6 billion to reach a $1,792.5 billion annual rate, in current dollars.

Third. Real output, a constant dollar measure of GNP adjusted for price changes, rose 5.2 percent in the first quarter, about double the fourth quarter 1976 rise of 2.6 percent. Real final sales, which equals real output minus business inventory changes, rose more slowly in the first quarter, up 3.9 percent compared with a revised 5.7 percent fourth quarter gain—all at annual rate. The smaller rise was attributed to a $9.1 billion decline in the annual rate of net exports.

Fourth. Personal income rose sharply in March for the second biggest monthly gain ever recorded, up 1.7 percent and $24.2 billion to a $1,485.7 billion annual rate, with larger increases in wage and salary disbursements overall, and in factory payrolls, commodity-producing industry payrolls and service industry payrolls than last month. Distributive industry payroll gains were smaller.

Fifth. Consumer prices rose at a double digit 10 percent annual rate in first quarter 1977, easing to a 7.7 percent annual rate in March. Over-the-month changes were respectively eight-tenths percent in January, 1 percent in February, and six-tenths percent in March for the all-items Consumer Price Index. The consumer food index rose six-tenths percent in March after a 2 percent February rise and a nine-tenths percent January rise. Nonfood commodities slowed their advance from seven-tenths to four-tenths percent over-month, while services moved up from six-tenths to eight-tenths percent.

Sixth. Wholesale prices rose at a double digit annual rate, over 13 percent in March, paced by sharply higher farm products and processed foods and feeds prices. Over the month, the all-commodities wholesale price index moved up faster, from nine-tenths percent in February to 1.1. percent in March; industrial prices rose faster, from six-tenths to eight-tenths percent; farm products rose from 2.2 to 2.5 percent; monthly gains, while processed foods and feeds rose from 1.8 to 1.9 percent. The fuels and power index rose less in March, 1.4 percent, than in February, 3.3 percent.

Seventh. Total retail sales eased 1 percent lower in the April 16 sales week, following Easter, but remained 11 percent above year-ago levels at about $13.7 billion this week, according to advance estimates of the U.S. Commerce Department. For the latest 4 weeks sales were also 11 percent above the like period last year—but up 10 percent excluding auto group.

Eighth. New manufacturer's orders for durable goods in March rose to $58.9 billion—a 7 percent rise over February. Shipments rose 8 percent or $4.8 billion to $58.8 billion, leaving order backlogs almost unchanged at $169.5 billion. New orders for primary metals rose 9 percent.

Ninth. Private housing starts rose 17 percent in March to a 2.127 million unit annual rate, up 49 percent over the comparable year-earlier level. Private single-family homes rose from a 1.431 million to a 1.525 million annual rate, while apartment starts in 5-or-more unit apartment buildings nearly doubled from a 263,000 to a 495,000 annual rate.

Tenth. Total employment gained strongly in March, up over half a million jobs above February to reach an 89.5 million seasonally adjusted level. It marks a sustained expansion of 1.7 million persons since October and a 2.6 million gain over the past year (see USDL 77-273, April 1, 1977).

Eleventh. Nonfarm jobs also rose for the fifth straight month, up nearly 490,000 jobs to an 86.4 million level, while nonfarm payrolls also gained nearly 500,000 to 81.3 million as seasonally adjusted. Practically all the total employment gain occurred in nonagricultural industries, whose payrolls rose by $1.5 million over the last 5 months.

Twelfth. The civil labor force rose by nearly 400,000 to over 96.5 million, the second consecutive large monthly gain. The labor force has grown by over a million workers since January and by 2.7 million over the past year, with adult women accounting for more than half of the growth in each period. The labor force participation rate, the proportion of the noninstitutional population either working or jobhunting, reached an all-time peak of 62 percent in March.

Thirteenth. Unemployment declined from 7.183 million in February to 7.064 million in March, as the civil labor force increased. Thus the employment rate declined from the 7.5 percent February level to 7.3 percent in March, while the average duration of unemployment declined 1.5 weeks to 14 weeks, the second successive decline. The unemployment decrease occurred entirely among those who lost their last job or were recalled from layoffs. Total unemployment has declined by 600,000 since November.

Fourteenth. Key unemployment rates show these February to March over-month changes, seasonally adjusted:

All workers down—7.5 to 7.3 percent;

Household heads down—4.9 to 4.6 percent;

Married men down—4.1 to 3.7 percent;

Full-time workers down—6.9 to 6.7 percent;

Minority workers down—13.1 to 12.7 percent;

Adult men down—5.8 to 5.4 percent;

Adult women same at 7.2 percent; and

Teenagers up—18.5 to 18.8 percent.

Fifteenth. Consumer spending and saving. Personal consumption expenditures rose $34.8 billion to an $1,157 billion annual rate while gains in durable purchases, up $11.4 billion in the first quarter, were nearly 2½ times the fourth quarter gain. This upswing in consumer spending paralleled a decline in consumer savings from 5.6 to 5 percent of their disposable income in the first quarter.

I pointed out that capital investment, adjusted for inflation and for expenditures on nonproductive equipment such as pollution-control devices, was significantly behind the rate achieved in previous recoveries. I also said that the greatest risk to our recovery was the accelerating rate of inflation.

I asked what sort of Federal fiscal policy was the most appropriate to the situation as it exists today and is likely to exist in the future. Is it appropriate to propose the largest deficit in history during the third full year of strong economic recovery? Is it appropriate to spend over $467 billion in 1978, nearly $70 billion more than we will take in, when inflation is growing and once again threatening to wreak havoc with the economy?

Some may complain that we are not proposing enough for this group or that group and particularly for stimulus programs. All of these groups are hurt when inflation takes off into the double-digit range. Are you really doing the unemployed a favor by spending money on programs which most everyone agrees create precious few new jobs at enormous costs? Face facts, we told them, we have to recognize that we help no one, and hurt everyone, when we vote money for programs with "popular," "catchy" titles, but which we all know, in our hearts, are inefficient and ineffective. My colleague from New York said: "We will never balance the budget until we learn to say 'No' to worthy causes." Well, the substitute before you now does just that we are saying "No" to some requests for Federal funds. Not because we think them unimportant but because we believe achieving a strong economic recovery with full employment without inflation is more important.

Our substitute resolution is based on four principles:

First. We believe it is absolutely essential to balance the budget as quickly as possible in order to keep our economic recovery strong, and to keep it from falling victim to the vicious-cycle of inflation—begets—recession—begets unemployment—begets—even greater deficits. To accomplish this, we have called for outlays and budget authority significantly below that contained in the resolution. Specifically, we have eliminated the Carter stimulus measures planned for 1978 and beyond because they are simply not needed to stimulate the economy. We have also provided for fair, but not excessive increases in many other fundamental areas, most specifically the human resource programs; and we have provided for fair, but not excessive decreases in other economic stimulus related programs. The end result is a budget with outlays of $440 billion and reduces the deficit to $47 billion. That is $1 billion less than what President Carter is projecting for this fiscal year.

We are proposing a deficit which keeps the trend line going downwards. President Carter needs that trend if he is to balance the budget in fiscal year 1981. Let me put it to you squarely: Vote for our proposal with a reasonable deficit and help the President; or vote for a record—I repeat a record—deficit of $70 billion. Face facts—we cannot balance the budget in fiscal year 1981 if the deficit is $70 billion in fiscal year 1978—the single biggest drop we have ever had in the deficit was $28 billion, the next biggest drop was $13 billion, and we have not had more than 2 consecutive years of declining budgets since 1950. Face it—the deficit in fiscal year 1978 must be smaller than the fiscal year 1977 deficit—especially since there is no economic rationale in fiscal year 1978 for a deeper deficit.

Second. We believe that the first priority of the budget must be to provide for a strong, but not excessive, national defense, and have called for defense outlays in 1978 of $111.9 billion, or the amount contained in the President's budget estimates of February committee's but is requested by a Presi- 1977. This is $2.3 billion more than the dent who said he could reduce the Defense budget by $5 billion.

Third. We believe that the most oppressed people of this country are the taxpayers. We believe that it is patently unfair to finance greater and greater levels of Federal spending by raising the taxes of the working people of this country, but that is exactly what has happened as inflation has pushed our citizens into higher and higher tax brackets while the Congress has refused to recognize that fact by lowering the tax rates. Indeed the Congress has made this worse by contributing, through 20 years of deficit spending, to the very inflation which pushes working people into higher tax brackets. We therefore have made provision in the revenue and outlay targets to accommodate a 10 percent across-the-board reduction in permanent income taxes. For those who supported Mr. Carter's ill-fated $50 rebate we would assume that you will then support this substitute. To not do so, I would remind you, is to condemn the American taxpayers to continued tax increases every year in the future.

Let me say also that we heard a lot on the floor yesterday about the supposed evils of tax relief for big business. Well, this tax proposal is not for business; it is just for the individual taxpayer. So, no one—I repeat no one—can get off the hook by opposing this substitute on the ground that it helps big business and hurts the little guy.

Fourth. We believe that we must provide meaningful, productive, permanent job opportunities for all Americans willing and able to work. This does not mean make-work jobs in the public sector, but jobs created by the expansion of the private sector. We need to further stimulate capital investment by improving the climate for such investment. Our proposal to provide an across-the-board, personal 10 percent tax cut will create 1 million jobs, and will result in savings of approximately $3 billion in unemployment related expenditures. These are realistic estimates based on computations made by the Congressional Budget Office and the Congressional Research Service. These figures show the soundness of a strategy which links tax cuts with spending cuts and aims for a balanced budget with a lightened tax burden on the American people.

One final point. We cannot keep saying we will balance the budget "next year," because next year never seems to come. It is so easy for each of us to think of countless programs and activities which ought to be funded at a higher level, but it is a real test of courage to admit that the health of this Nation's economy and the welfare of our taxpayers must come first.

Do we want to expend over $46 billion in interest alone on that national debt in fiscal year 1978? Everybody is for all of these goodies. And maybe we could bring that debt down by changing the way we operate around here, so that instead of having those authorization bills and appropriation bills, and Ways and Means bills, we would put them all together, and if we want those goodies, we would pay for them in the same bill.

The Members ought to give that some thought. Some of the State legislatures are doing that.

Some may complain that we are not proposing enough in this substitute—which, incidentally, will reduce spending by about $26 billion—for this group or that group, and particularly for a stimulus program. I will ask the Members, in view of the figures I have just given, do we need a stimulus program on top of that?

The CHAIRMAN. The time of the gentleman from Ohio (Mr. LATTA) has expired.

(On request of Mr. CONABLE and by unanimous consent, Mr. LATTA was allowed to proceed for 2 additional minutes.)

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. I thank the gentleman for yielding.

Mr. Chairman, I would like to associate myself with the remarks of the gentleman from Ohio (Mr. LATTA). I think it is a disgrace, given the condition of the economy, that we are looking at a record deficit—not just a large deficit, but a record deficit—in the resolution that is before us. Such a deficit will come

back to haunt us later on, perhaps even this year.

A tax cut of 10 percent across the board would be a considerable advantage to the American people at this time when inflation has put them into a higher bracket. Such a cut, included in this substitute, gives the incentive to both thrift and industry, both critical ingredients to an advancing economy.

A substantial reduction in the total amount of spending is an entirely justified move, given the state of the economy, and the expenditure cuts embodied in the substitute are carefully balanced to avoid hardship and to remove only the ingredient of unnecessary stimulus.

Mr. Chairman, I would like to compliment the gentleman from Ohio (Mr. LATTA) for the work that went into this amendment, and I would like to urge its support.

Mr. GIAIMO. Mr. Chairman, I rise in opposition to the amendment in the nature of a substitute.

Mr. Chairman, I will be very brief.

In effect what the Latta substitute is, is this: It is the old President Ford budget. If we look at the figures, we will find they are almost identical to the budget which President Ford sent up for fiscal year 1978, and it contains a budget deficit of $47 billion. That is a $23 billion reduction in outlays, and these are the reductions:

$8 billion in education;

$4½ billion in income security;

$3 billion in community and regional development;

$1.7 billion in revenue sharing and general purpose fiscal assistance;

$1.6 billion in commerce and transportation;

$1.6 billion in veterans' benefits and services;

$1.2 billion in natural resources, environment, and energy;

And then, of course, the add-on to the defense function which was included earlier today by the Burleson amendment.

Mr. Chairman, if we want to vote for that, if that is what we want to do, then we should support the Latta substitute. However, I do not think we can do that in good conscience.

I also do not think that the statements as to the rosy economic projections will bear close scrutiny. The fact is that the recovery in the economy is not as strong as we would hope. There is a recovery, but according to all our econometric models and the statements of our economists who have made estimates, the recovery is weak. They insist that it is weak and that it needs assistance from the Government by way of economic stimulus.

Mr. Chairman, I will not take additional time of the Members. I think we should vote down the Latta substitute.

Mr. RHODES. Mr. Chairman, I rise in support of the amendment in the nature of a substitute.

Mr. Chairman, there are a couple of points we should bear in mind about this amendment in the nature of a substitute that I do not think the Members understand clearly.

One of them is that this calls for a 10 percent across the board tax cut. I think this may be very important as far as the people back home are concerned.

Another thing the substitute calls for is a reduction in expenditures that would reduce the deficit $22 billion below the deficit in the resolution brought out by the Committee on the Budget. I think this is something that the people back home might be interested in also.

Mr. Chairman, this amendment was not brought forth hastily. It was given a great deal of study. We happen to think that it is in the best interests of the country. We happen to think that the people of the country are going to think a 10-percent tax cut is in the best interest of the country, too.

What we have done is to take the resolution of the Committee on the Budget and try to adjust it to the economic needs of the country as we see them today. All indices clearly point out that the country is recovering very beautifully from the recession, except in the one area of business investment. The President of the United States, I think very wisely, decided not to press his $50 a person tax rebate because it would only have provided inflation without any incentive for investment.

However, a permanent tax cut, one which provides purchasing power equal to 10 percent of the amount of money everybody pays in income taxes, is a stimulus to the people of the United States. This represents money they will be able to spend, money which the business interests will have available. The people who make the investment decisions would realize it will be there, and this will stimulate them to invest money for the purpose of producing more and providing more jobs.

Mr. Chairman, the bottom line is jobs. The Republican Party has never been in favor of the jobs program which has been offered by the administration or by the majority: not because we are not interested in jobs for people, but because we feel that jobs—better jobs and jobs with meaning—can better be supplied through the private enterprise system. This is the reason why this amendment has been offered. I urge my colleagues to bear these jobs in mind because it is important. We feel that this is the way to put America back to work.

One of the things which has always been a truism as far as economics is concerned is that a really honest to goodness tax cut will stimulate the economy.

Mr. Chairman, those Members who were in the Congress in the early sixties, will remember the Kennedy tax cut and what happened to it. Not only did business get better, but revenues actually went up. Business activity increased so much that revenue actually increased rather than decreased. It is important that we understand this so we can adopt this amendment tonight.

The President of the United States has made some campaign promises, and I promised to help him keep some of them. He made the campaign promise that he would try to balance the budget by fiscal year 1981. I want to help him. There is no way in which he can do that; there is no way in which he can balance that budget unless we cut the deficit rather than increasing it to a record $70 billion as proposed by the Democratic majority.

Mr. Chairman, I think it is essential that we help the President. This country needs a budget balanced by fiscal year 1981 as much as it needs anything, and I am going to do the very best I can to help the President do that.

Mr. Chairman, I hope that the rest of the Members of this House will help me.

Mr. BURGENER. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment.

Mr. Chairman and Members of the House, I know the hour is late. I will try to be very brief, but this matter is most important.

We contend that permanent tax cuts work, that they result in capital formation in the private sector, that they result in more decisionmaking for the wage earner. They result in new jobs that last.

Mr. Chairman, we believe that there is collective wisdom and judgment possessed by the American people who earn the money in our country about how to dispose of their disposable income that is greater than that possessed by the social planners and the managers here in the Nation's capital.

There is proof of it, Mr. Chairman and Members of the House; and the proof is bipartisan.

I just want to illustrate this one fact: In the late 1950's and the early 1960's we had a recession very similar to one we went through recently. President Kennedy, followed by President Johnson, made major and permanent tax cuts all across the board, every bracket, including investment tax credits for American employers.

Let me relate what happened. It was predicted that in a 6-year period revenues to the Treasury would be reduced by $89 billion. The facts were that they were increased, increased in that period by $54 billion; and in the last 10 years of this Nation the number of jobs has increased twice as fast as the population, at a rate of 21 percent, without massive Federal intervention.

Mr. Chairman, there is currently a great fear of double-digit inflation. All indicators point toward a recovery now, and the $70 billion deficit would be a disaster and would lead us into double-digit inflation.

Mr. Chairman and Members of the House, we cannot stand by and allow that to happen. I urge adoption of the Latta substitute.

Mr. BROYHILL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the Latta substitute.

Mr. Chairman, the impending vote on the substitute offered by the gentleman from Ohio (Mr. LATTA) may well be the most significant vote any of us cast in this session. This vote will determine I believe whether or not we will condemn the American people and the American economy to another cycle of boom and bust, or whether we will take the manda-

tory initial steps toward restoring lasting stability to the American economy.

Let us be honest with ourselves. The budget proposed by the majority defies every known economic principle. The record $69 billion Federal deficit proposed in the majority's budget contains billions in stimulus for an economy which is recovering beyond any of our expectations and which indeed may be dangerously close to overheating. The threat of renewed double digit inflation is no longer just a threat. It is a reality. Unless we take meaningful effective action inflation will once again be out of control, the purchasing power of every American family will be substantially reduced, consumer demand will drop, inventories will increase drastically and unemployment will rise. We will have repeated once again the inflation-recession cycle which brought our people to the edge of despair a mere 3 years ago.

By virtually every meaningful measure our present economic recovery is strong. President Carter acknowledged as much when he withdrew his request for the $50 rebate. Consumer demand is up sharply. The GNP is growing faster than projected. A half a million new jobs were created last month. New home construction sky-rocketed in March. New starts reflected an annual rate of 2.1 million. Are we now to ignore the economic facts before us and instead provide a record level of stimulus for an economy which in fiscal year 1977 has recovered strongly with far less stimulus than was clamored for by the majority?

President Carter has recently renewed his pledge to balance the Federal budget in 1981. If we approve a deficit for 1978 of $69 billion, which is $20 billion more than the latest OMB estimate of $48.7 billion for fiscal year 1977, we will be guaranteeing that President Carter's pledge to the American people to balance the budget by 1981 will never be a reality. It will be impossible to reduce the budget gap $70 billion in 3 years. Indeed the majority is telling us we cannot reduce it $1 billion this year.

Critics of this substitute have complained that it ignores the elderly, the needy, the unemployed. Nothing could be farther from the truth. This budget takes into account these people's greatest need, the need for economic stability. The Nation's elderly need to know that Congress cares enough about them to prevent double digit inflation that erodes their life savings. This budget takes into account the Nation's poor by taking actions which will prevent inflation from pushing decent housing, decent clothing and a nutritional diet beyond their reach.

This budget takes into account the needs of the unemployed by providing just enough stimulus and incentive to the private sector of our economy to expand and invest, to provide long-term, good-paying jobs for today's unemployed. This budget also concerns itself with the vast American middle class which is tired of seeing Government fiscal policies feed inflation and push the middle class taxpayer into a higher and higher tax bracket where the Government takes an even larger share of the money he or she has worked so hard to earn.

This substitute is the truly compassionate budget. Its compassion is real, rather than illusory. This budget reflects realistic priorities. It supports the funding level requested by the President to maintain an adequate defense. It reflects an increase in human resource funding. Equally as important it reflects the need to reduce the tax burden of the American people. The across-the-board 10-percent tax cut is a fiscally responsible way of reducing the share of our gross national product consumed by the Federal Government. It would increase the economic freedom of the American people by allowing them to make their own spending decisions rather than allowing Congress or the bureaucracy to set spending priorities for the individual wage earners.

The tax cut would also supply the necessary measure of stimulus to insure continued strength in the demand side of the economy while perking up the supply side which has lagged. The tax cut would provide the incentive for Americans to save and to voluntarily invest in the private sector of the economy, rather than being forced to invest in the public sector through continued high taxes.

This substitute is the vehicle for turning our economic policies around. We can choose stability and greater economic freedom for our people or we can choose renewed instability and increased Government controls. There is no doubt in my mind which course the majority of the American people would choose if they could make the choice today.

I want to point out, Mr. Chairman, that the budget resolution as brought forth by the majority would call for a tremendous deficit.

I am concerned, as I know many others are concerned, about the effect that this is going to have on inflation.

I would point out that the Latta substitute not only provides for spending reductions, but also for an across-the-board tax decrease which the American people badly need.

It was proved, as was pointed out by the minority leader, that during the Kennedy tax cut almost 14 years ago, the economy rebounded from a recession at that time; and more tax revenues resulted because of that across-the-board tax cut.

What is wrong with following the philosophy of letting the people keep their hard-earned money in their own pockets and letting them make their own spending decisions? Why send it to Washington to let the bureaucrats make their spending decisions for them?

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. BROYHILL. I yield to the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, I thank the gentleman for yielding to me. I did not have the opportunity during the 10 minutes which were very graciously given to me to go into great details about the tax reduction part of my substitute. But, as has been indicated before, there is provision made for a 10-percent across-the-board tax cut for the individual taxpayers. It does not apply to corporations, it just applies to individuals.

With regard to what my good friend, the chairman of the committee, the gentleman from Connecticut (Mr. GIAIMO) indicated, this is not the same proposal that was presented by the Ford administration, because that did apply to corporations. This does not.

We think this is the right approach. We think the people of this country are deserving of a tax reduction and it could be provided under this proposal and we could still end up with about $22 billion less deficit in fiscal year 1978.

Mrs. HOLT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment in the nature of a substitute.

Mr. Chairman, I rise in support of the substitute to House Concurrent Resolution 195, the first budget resolution for the 1978 fiscal year. The purpose of this substitute is to lower government spending, reduce inflation, and cut taxes to promote real and durable economic growth.

We proposed to reduce outlays by $26 billion, cut the deficit by $21 billion, and allow for a general income tax reduction of 10 percent.

I am absolutely appalled at the resolution that has been reported to this House by the Budget Committee and new estimates by the administration. The projected outlays of $467 billion are $27 billion higher than those originally requested by former President Ford. The deficit would approach a record-shattering $70 billion.

Assuming that economic recovery continues, such an extreme outpouring of unearned, borrowed cash would be extremely inflationary. It would send our economy into another ruinous dive by destroying consumer purchasing power and driving interest rates higher because of Government's drain on capital markets.

Mr. Chairman, the very worst time to run a huge budget deficit is at a time of economic recovery, and our economy is already well on the way to recovery from the last recession. The question is whether we want another surge of roaring inflation followed by another deep recession, which is the pattern we experienced in 1974 and 1975.

We are already feeling some inflationary consequences from the enormous deficit spending of the last 2 fiscal years. If the inflation rate accelerates sharply within the next year, we will be thrown back into another deep recession.

That is the most dangerous feature of the resolution reported by the Budget Committee, but there are other related dangers. It does not address the problem of obtaining investment to expand production and create jobs.

The economic policies of this Congress have been wholly directed at stimulating consumer demand, on the theory that demand will generate production and jobs. I believe this theory has been exploded. Consumer demand is very healthy, but investment is the weakest part of the economy.

Investment requires confidence in the future, and the business community fears that inflation, taxation, and regulation will wipe out profits. Inflation is the greatest worry, although heavy taxation and excessive regulation are also handicapping economic growth.

I might say that Congress is respon-

sible for these restraints on economic development, and it is our responsibility to relax them. At this critical stage in economic recovery, it is important to avoid any further stimulation of demand and concern ourselves with the problem of production.

The substitute which I am supporting would promote strong economic growth and job creation by both reducing the inflationary deficit and allowing general tax reductions, increasing the rewards for investment and work.

This requires rather steep cuts in projected Federal spending, but if we really want healthy economic growth without inflation, this is the course we must pursue. Production is one of the surest methods of fighting inflation and providing an abundance of jobs and goods for the American people, but it is fundamental that more production requires more investment.

The huge cost and regulatory burden of big Government is discouraging investment, and it is time that we reversed that trend. The formula for prosperity is to let the American people retain, spend, and invest more of their own earnings.

Mr. ROUSSELOT. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I rise in support of the Latta substitute to the first concurrent resolution on the budget for fiscal year 1978 as offered by my distinguished colleague from Ohio (Mr. LATTA). He has offered us a constructive and helpful alternative to the Keynesian now $68 billion deficit being proposed by the majority. It is important to note, however, that even the minority initiative provides for a deficit of approximately $48 billion. While this lower figure is commendable, it does not go far enough in eliminating the deficit and, so, later today I will provide my colleagues with the opportunity of voting for a truly balanced budget at a later time.

The minority proposal calls for a simple, across-the-board 10-percent tax rate reduction for every American worker. The purpose of a permanent tax rate reduction is to reduce the tax bias against work, saving, and investment; that is, to increase the reward to work, save, and invest and to make it more desirable for people to invest and to hire unemployed and produce more real long-term jobs. A good case has been made that a tax rate reduction, as proposed by the Latta substitute, will actually increase Government revenues by expanding the tax base. Lower tax rates on a larger tax base can generate more tax revenues than higher tax rates on a smaller tax base. This was proved during the time in the 1960's that the Kennedy tax cuts were put in place.

If we are in fact concerned about fiscal integrity and wish to stop the budget busting that has characterized Federal spending in recent years, then we must start now to live within our means. Deficit spending in the neighborhood of $68 billion, as contained in House Concurrent Resolution 195, will create economic hardship and stress for the 89 million working people. The evidence of the past 16 years, during which we have incurred 15 deficit budgets, shows that bloated deficits—deficits that sap needed money from capital markets and aggravate inflation—have only exacerbated the problems of unemployment and recession, and the burden of proof should rest with those who prescribe this cure for our economic ills to prove otherwise. Found within this first concurrent resolution on the budget for fiscal year 1978 is an economic policy of bigger debt, bigger Government, bigger deficits, unnecessary transfer payments, and a greater lack of concern for the 89 million working American taxpayers. In addition, this irresponsible approach converts the budget process from an instrument of control over wild and unnecessary spending and improper Federal revenue manipulation to an instrument of political mismanagement which will at the same time encourage a bloated Federal Government to become even bigger and will trample increasingly on the economic free choice of our working people. I urge my colleagues to vote on the side of reason and sanity by supporting the Latta substitute.

Mr. SIMON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Ohio (Mr. LATTA).

I shall take only 1 minute.

First of all, I think the process yesterday and today suggests that we may need to refine this whole budget process decisively.

Second, with regard to the immediate amendment, I would point out that the tax reduction feature that is in this amendment is precisely what Dr. Arthur Burns warned our committee on the budget we should not do.

I hope the amendment is defeated.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Chairman, I thank the gentleman from Illinois for yielding to me.

Mr. Chairman, I would ask who wants to vote for a deficit just to get a tax cut? Our good colleague, the gentleman from California (Mr. ROUSSELOT), will offer a tax cut in a balanced budget and that is something that the people would like.

So, vote down the Latta amendment.

Mr. REGULA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and members of the committee, I had contemplated wearing my "WIN" button in anticipation of speaking, because what we are talking about in this amendment is whipping inflation.

Mr. Chairman, I would like to point out a couple of things.

First, that the figures in this budget resolution covering the debt, the deficit, the total revenues, the total outlays and the total budget authority and the functional amounts are purely advisory and therefore can be moved around by this body. I think we should keep that in mind that in voting for this substitute we are really talking about totals, the deficit, revenues, outlays and budget authority.

There are only two fundamental issues. A vote yes on this substitute amendment is a vote against runaway inflation and it is a vote for confidence in the economy of this Nation.

If this body tonight were to adopt this amendment in the nature of a substitute there would be a ripple of confidence running through our economy in business decisions tomorrow that would do a great deal to bring about the kind of continued economic growth that would provide permanent jobs and would provide the taxes to support the local and State governments in doing the kind of things that all of us feel are so important to the quality of life in this country.

Lastly, I would point out that a vote for the resolution as it is before us with the large deficits, with the large debt limits, with the large outlays, is a vote basically to increase the taxes on the American people, the hidden taxes of inflation, as they are pushed into higher and higher brackets and their purchasing power shrinks. In effect we are voting a tax increase if we support the budget resolution without the Latta amendment.

Mr. KEMP. Mr. Chairman, I rise in support of the Latta alternative budget resolution offered by the minority of the House Budget Committee. Not only does this resolution substantially reduce the projected budget deficit for fiscal year 1978 but more importantly proposes a 10-percent reduction in all individual income tax rates to help inflation-proof the incomes of the American people.

The budget for fiscal year 1978 has undergone considerable revision since it was first proposed. First it was revised by President Carter, whose latest revision increases outlays to $462,6 billion. This represents an increase of more than $22 billion above the Ford budget. The majority members of the House Budget Committee, however, have increased this figure still further, to $467 billion. This would result in a projected deficit of $69 billion in fiscal year 1978. I believe the way to get this economy going again, create jobs, reduce inflation and help the average American, is to lower their taxes.

I believe that the American people are tired of deficit spending and they are tired of high taxes. The following table demonstrates the continuous upward trend in deficit spending:

It is a well known fact that every increase in the price level leads to an automatic increase in tax revenues, as inflation pushes individual incomes into higher tax brackets without increasing purchasing power. This means that most individuals have had a substantial increase in their relative tax burden over the past several years. The Congressional Budget Office, for example, estimates that every 1-percent increase in the price level will lead to an automatic 1.2-percent increase in Government revenues. This tax increase, furthermore, falls disproportionately on individual taxpayers because every 1-percent increase in the price level will cause a 1.5-percent increase in individual income tax revenues. The following chart illustrates how this has affected families with average and above average incomes over the period from 1953 to 1975:

DIRECT TAX BURDENS BORNE BY AVERAGE- AND UPPER-INCOME FAMILIES, 1953 AND 1975

Type of tax	Family with average income			Family with twice average income			Family with 4 times average income		
	Tax as percent of family income		Percent increase, 1953–75	Tax as percent of family income		Percent increase, 1953–75	Tax as percent of family income		Percent increase, 1953–75
	1953	1975		1953	1975		1953	1975	
Total	11.8	22.7	92.4	16.5	24.6	49.1	20.2	29.5	46.0
Federal personal income tax	7.6	9.6	26.3	12.8	14.7	14.8	16.6	21.1	27.1
Social security tax	1.1	5.9	436.4	.5	2.9	480.0	.3	1.5	400.0
Local residential property	2.2	4.0	81.8	1.8	3.2	77.8	1.7	2.5	47.1
State-local personal income	.3	1.9	533.3	.9	2.9	222.2	1.2	3.7	208.3
State-local general sales	.6	1.3	116.7	.5	.9	80.0	.4	.7	75.0

Note: Estimates for average family earning $5,000 in 1953 and $14,000 in 1975 assuming all income from wages and salaries and earned by 1 spouse. Estimates for twice the average family: Family earning $10,000 in 1953 and $28,000 in 1975 and assumes that earnings include $105 (interest on State and local debt and excludable dividends) in 1975 and $25 in 1953; also assumes the inclusion of net-long term capital gains of $1,040 in 1975 and $350 in 1953. Estimates for 4 times the average family: Family earning $20,000 in 1953 and $56,000 in 1975 and assumes that earnings of $965 (interest on State and local debt and excludable dividends) in 1975 and $265 in 1953; also assumes the inclusion of net long-term capital gains of $6,400 in 1975 and $1,730 in 1953.

Unless this trend is halted, taxes will continue to increase on all Americans. The disincentive effect this will have on the American economy will slow economic growth still further, continue to depress capital spending, and make it impossible to create the millions of new jobs needed to reduce unemployment and absorb all the new jobseekers who will enter the market in the future.

By contrast, our proposal to cut all individual income tax rates by 10 percent is the best way to restore a high level of real economic growth, create millions of new jobs in the private sector, and expand the economic base of the Nation so that tax revenues can be increased and the budget deficit ultimately eliminated.

It is a fact that high tax rates do not result in higher tax revenues. On the contrary, they actually reduce tax revenues by reducing the marginal incentive to work, produce, or invest. This happens when individuals are discouraged from earning higher incomes because their aftertax reward is too small. Instead, they either forgo income opportunities altogether or put their money into tax-free municipal bonds and the like. The Government has then lost whatever revenues it would have derived at a tax rate low enough to induce these individuals to invest their time and money in profitmaking, revenue-producing enterprises, rather than tax shelters or leisure.

It should be emphasized that the decision to work or take leisure, to invest in profitmaking enterprises or tax-free municipal bonds, is not determined by the total tax burden but by the marginal tax rate. Thus a tax cut and a tax rate reduction are not the same thing and do not affect the economy the same way. A tax rebate, for example, is a tax "cut," but it is really just reverse spending and will act only on the demand side of the economy, just as Government spending does. By contrast, a tax rate reduction increases the incentive to work and invest for everyone, thus affecting not only demand but supply as well. This is a fundamental distinction which Keynesian economics simply does not recognize.

I agree perfectly with those who wish to relieve the small taxpayer by getting the largest possible contribution from the people with large incomes. But if the rates on large incomes are so high that they disappear, the small taxpayer will be left to bear the entire burden. If, on the other hand, the rates are placed where they will produce the most revenue from large incomes, then the small taxpayer will be relieved.

A very important social and economic question is also involved in high rates. That is the result taxation has upon national development. Our progress in that direction depends upon two factors—personal ability and surplus income. An expanding prosperity requires that the largest possible amount of surplus income should be invested in productive enterprise under the direction of the best personal ability. This will not be done if the rewards of such action are very largely taken away by taxation. If we had a tax whereby on the first working day the Government took 5 percent of your wages, on the second day 10 percent, on the third day 20 percent, on the fourth day 30 percent, on the fifth day 50 percent, and on the sixth day 60 percent, how many of you would continue to work on the last two days of the week? It is the same with capital. Surplus income will go into tax-exempt securities. It will refuse to take the risk incidental to embarking in business.

This is the reason why this proposal can promise an increase in tax revenues despite a reduction in tax rates. By inducing individuals to work harder and take their money out of tax shelters; by increasing after tax incomes for all Americans; and by removing the disincentives caused by high tax rates, you will get an immediate expansion of real output and a broadening of the tax base

itself. At the same time, the reduction in Government transfer payments will substantially reduce outlays as well. The result is that the net cost of the rate reduction in terms of the deficit is almost eliminated even in the first year. And, since this proposal would not take effect until January 1, 1978, people and businesses would begin expanding investment and output immediately, in anticipation of higher incomes next year. By the following year, the Government will be taking in more revenue than it would if it had not reduced the rates at all.

Lest one doubt that this theory can actually be proven to work in practice, I should point out that on two different occasions this century tax reductions led to substantial increases in tax revenues and produced the two greatest periods of prosperity in our history. The first occasion was when the wartime surtaxes were eliminated following World War I. Sponsored by Treasury Secretary Andrew Mellon, this large rate reduction was accomplished precisely by promising that not only would tax revenues ultimately be increased but that this would be done by shifting the burden of taxation upward. Under the Kennedy administration the same promise was made and the same thing occurred. The following tables demonstrate that tax revenues exceeded Treasury estimates after the Kennedy tax cuts and that this was accompanied by an increase in the tax derived from individuals with incomes over $100,000:

TABLE 1

[In billions of dollars]

	Treasury estimated revenue losses	Actual revenue gains
1963	−2.4	+7
1964	−5.2	+6
1965	−13.3	+4
1966	−20.0	+14
1967	−23.7	+19
1968	−24.7	+4

TABLE 2.—*Percent of total income tax derived from rates above $100,000*

[In percent]

1963	5.1
1964	6.3
1965	7.6
1966	7.5
1967	8.5
1968	9.2

You do not get this kind of effect without a permanent tax rate reduction. In the Kennedy case, the top rate was reduced from 91 to 70 percent and the bottom rate reduced from 20 to 14 percent.

Recently, President Carter has announced that he will veto any attempt to permanently reduce taxes. At the same time he has announced that he will substantially increase taxes on all Americans to reduce energy consumption. I think that the American people understand this issue better than the Congress or the administration. I suggest, therefore, that a vote for a permanent tax rate reduction today is not only economically sound, but politically sensible as well. I am for it because it will reduce taxes on all classes of income. I am for it because it will encourage more work, production, and investment. I am for it because it will decrease the cost of living. I am for it because it is economically, socially, and morally sound.

But the people of the Nation must understand that this is their fight. They alone can win it. Unless they make their wishes known to the Congress without regard to party this effort to reduce taxes will not pass. I urge them to speak out before it is too late. Must we allow to happen here in America what has happened to Great Britain.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. MOORE. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Ohio (Mr. LATTA).

Mr. Chairman, we are debating a budget resolution, not a detailed tax proposal. We are talking only about aggregate spending and revenue figures. Yet underlying these budget figures are assumptions about the tax and spending policies of the Federal Government in the next fiscal year. And, as we change the assumptions, the figures must change.

In the amendment now being offered, an assumption is made that we will pass an effective tax cut to insure a continued economic recovery—a tax cut similar in form, shape, structure and effectiveness to the tax cut designed by John Kennedy and enacted in 1963.

Mr. Chairman, 15 years ago we were thrown out of Camelot, and for 15 years we have been trying to find the handle to the drawbridge. A Kennedy-style tax rate reduction is that key.

What do I mean by the structure, shape, form of the Kennedy tax cut?

Surely not a rebate. Having the Treasury borrow $11 billion to hand out $11 billion would do very little to stimulate demand, and it would have had no effect on the percent of next year's earnings, interest, or dividends a taxpayer got to keep after taxes. There would have been no increase in the supply of work effort, savings, investment or output.

By a Kennedy-style tax cut, I mean rate reduction—cuts in the marginal tax rates that apply to each additional dollar earned. Economic leaders of the Kennedy era reasoned that such a tax rate cut would directly increase the after tax reward to added work effort, added savings, and added investment, to produce added growth. The added output by the self-employed, the added saving and investment, would produce more orders for factories, machines, steel, glass, and so on. And the new orders produce new paychecks, and the paychecks produce demand. Since capacity and demand both increase, the growth is noninflationary. There is no other form of tax cut that can make that claim. And it all stems from the shape of the tax cut, and the drop in the marginal tax rates.

The added tax base, the added GNP, that a Kennedy-style tax rate reduction produces, lets us project a hefty return to the Government of the tax revenues given up by the tax cut, even in the first year. Again, no other type of tax cut can make that claim.

The most conservative estimates we could find on the response of GNP to a tax rate reduction came from the Senate Budget Committee. They assume a short run multiplier of 1.5, meaning that GNP will rise by 1.5 times the tax cut after 6 months. By year end, GNP will be up by nearly twice the amount of the tax cut. At the present time, the Federal Government is taking 25 percent of incremental GNP. Applying this recovery rate to the GNP produced by the tax cut means a recovery of over 30 percent of the revenue loss from the tax cut even before the year is out.

The Congressional Budget Office is more optimistic, assuming a short run as well as a long run multiplier of 2, according to figures submitted at the time of the second concurrent resolution last year. This implies a recovery of 37 percent of the revenue within the year.

Walter Heller told the Joint Economic Committee in hearings on the President's budget that the Kennedy tax rate cut actually paid for itself in less than 1 year.

To be very conservative, we only took a 30-percent recovery rate, giving the Kennedy tax cut less than one-third of its due.

In addition to the revenues recovered as GNP rises, there will be a savings of more than $2 billion as people leave the welfare and unemployment roles, increasing the revenue recovery, on the most conservative estimates, to between 35 and 40 percent in the first year.

On a full year basis, the Congressional Research Service has given us recovery rates of $14 to $16 billion for every million jobs created, which will return more than two-thirds of the tax cut by its second year, as well as reducing unemployment by nearly a full point. This is a large return in jobs, growth and revenues for a small initial investment.

As a consequence of a Kennedy-style tax cut, we have every historical reason to expect a higher permanent growth rate, a lower unemployment rate, and higher Government revenues on an increased tax base in the years ahead.

We need the growth that a Kennedy-style tax cut can produce. We need a reduction in marginal rates in every bracket to get people in every bracket to work more and play less, to get more saving and less conspicuous consumption, to lure more money out of loopholes and into productive investment.

Our savings rate is the worst in the Western World. Our major trading partners have household savings ratios of from 50 percent to 250 percent higher than we do, according to the Organization for Economic Cooperation and Development. And the Bureau of Labor Statistics has new figures which show the consequences: foreign investment and growth are faster than in the United States. Investment among other Western nations is between 15 percent and 50 percent higher than in the United States. But the clincher is wages. Real wages rose only 11½ percent in the United States from 1967 to 1975. Every other major trading nation surpassed that performance:

[In percent]

Canada	27
Japan	98
Belgium	73
Denmark	59
France	58
Germany	73
Italy	105
The Netherlands	70
Sweden	47
Switzerland	37
Even Britain	40

If we do not get tax rates down to encourage savings and growth, we will have to give up rapid wage increases, rapid job creation, rapid growth of GNP, and the social security benefits we have promised on the assumption that GNP and productivity will be rising sharply over the next 25 years.

Only a permanent reduction in marginal tax rates provide incentives for growth. That is how it was done in Camelot.

We do not need a Merlin to solve our economic problem. All we need is to focus on incentives—the after-tax rates of return to labor, savings and investment.

There was no Merlin in Camelot 15 years ago. Just one key decision—the decision to cut tax rates. That is the handle to the drawbridge.

Mr. MOORE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I commend the gentleman from New York and associate myself with his remarks.

Mr. GIAIMO. Mr. Chairman, I ask unanimous consent that all debate on this amendment end in 1 minute. I think we are all familiar with it.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut (Mr. GIAIMO)?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. JOHN L. BURTON).

Mr. JOHN L. BURTON. Mr. Chairman, I ask the Members not to be misled. There is a big deficit in this. We can get a tax cut and balance the budget when the amendment to be offered by the gentleman from California (Mr. ROUSSELOT) comes up.

Vote "No" on this deficit.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Ohio (Mr. LATTA).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. LATTA. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 150, noes 250, not voting 33, as follows:

[Roll No. 163]

Gradison	Murphy, Ill.	Walgren
Harkin	Myers, Ind.	Wilson, Bob
Jones, N.C.	O'Brien	Young, Alaska

The Clerk announced the following pairs:

On the vote:

Mr. Teague for, with Mr. Rostenkowski against.

Mr. Sikes for, with Mr. Staggers against.

Mr. Evans of Delaware for, with Mr. Moakley against.

Mr. Gradison for, with Mr. Price against.

Mr. Madigan for, with Mr. Derrick against.

Mr. John T. Myers for, with Mr. Diggs against.

Mr. O'Brien for, with Mr. St Germain against.

Mr. Bob Wilson for, with Mrs. Boggs against.

Mr. Young of Alaska for, with Mr. Walgren against.

Mr. Fish for, with Mr. Moss against.

Mr. FITHIAN changed his vote from "aye" to "no."

Mr. WALSH changed his vote from "no" to "aye."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. ROUSSELOT

Mr. ROUSSELOT. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. ROUSSELOT: Strike all after the resolving clause and insert in lieu thereof the following:

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1977—

(1) the recommended level of Federal revenues is $409,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $13,884,000,000;

(2) the appropriate level of total new budget authority is $453,500,000,000;

(3) the appropriate level of total budget outlays is $409,000,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $000,000,000,000; and

(5) the appropriate level of the public

debt is $726,331,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $26,331,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1977, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New budget authority, $120,000,000,000.
(B) Outlays, $112,000,000,000.
(2) International Affairs (150):
(A) New budget authority, $7,000,000,000.
(B) Outlays, $4,000,000,000.
(3) General Science, Space, and Technology (250):
(A) New budget authority, $4,700,000,000.
(B) Outlays, $4,400,000,000.
(4) Natural Resources, Environment, and Energy (300):
(A) New budget authority, $20,500,000,000.
(B) Outlays, $17,000,000,000.
(5) Agriculture (350):
(A) New budget authority, $2,729,000,000.
(B) Outlays, $2,333,000,000.
(6) Commerce and Transportation (400):
(A) New budget authority, $18,600,000,000.
(B) Outlays, $16,000,000,000.
(7) Community and Regional Development (450):
(A) New budget authority, $6,413,000,000.
(B) Outlays, $7,208,000,000.
(8) Education, Training, Employment, and Social Services (500):
(A) New budget authority, $17,922,000,000.
(B) Outlays, $19,359,000,000.
(9) Health (550):
(A) New budget authority, $41,136,000,000.
(B) Outlays, $39,900,000,000.
(10) Income Security (600):
(A) New budget authority, $160,000,000,000.
(B) Outlays, $134,000,000,000.
(11) Veterans Benefits and Services (700):
(A) New budget authority, $18,700,000,000.
(B) Outlays, $18,700,000,000.
(12) Law Enforcement and Justice (750):
(A) New budget authority, $3,200,000,000.
(B) Outlays, $3,100,000,000.
(13) General Government (800):
(A) New budget authority, $3,100,000,000.
(B) Outlays, $3,000,000,000.
(14) Revenue Sharing and General Purpose Fiscal Assistance (850):
(A) New budget authority, $8,000,000,000.
(B) Outlays, $7,000,000,000.
(15) Interest (900):
(A) New budget authority, $37,000,000,000.
(B) Outlays, $37,000,000,000.
(16) Allowances:
(A) New budget authority, $500,000,000.
(B) Outlays, $500,000,000.
(17) Undistributed Offsetting Receipts (950):
(A) New budget authority, —$16,000,000,000.
(B) Outlays, —$16,000,000,000.

SEC. 3. In the third budget resolution for fiscal year 1977, the Congress provided for revenue and spending proposals designed to stimulate the Nation's economy in order to reduce unemployment. These proposals, together with recent indications of more vigorous economic growth in the private sector, provide evidence that the Nation's economy may be returning to the levels needed to provide jobs to millions of our unemployed.

The Congress recognizes, however, that unusual uncertainties surround the current economic outlook for 1977 and 1978—primarily, the economic impact of the stimulus proposals and the likelihood of continued economic growth in the private sector—and that additional time and information are needed to make final determinations with respect to fiscal policy for fiscal year 1978; and declares that, if economic recovery does not proceed satisfactorily during the months immediately following adoption of the first budget resolution for fiscal year 1978, it will be necessary to provide additional stimulus to the economy in appropriate amounts to be determined in the second budget resolution for fiscal year 1978. On the other hand, if the recovery continues to show signs of long-term renewed growth, it may be desirable to reduce some of the economic stimulus provided for fiscal year 1978 in order to make more rapid progress toward a balanced budget.

SEC. 4. Pursuant to section 304 of the Congressional Budget Act of 1974,

(1) Section 1 of S. Con. Res. 10 is amended to read as follows:

"That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

(1) the recommended level of Federal revenues is $355,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $3,300,000,000;

(2) the appropriate level of total new budget authority is $469,700,000,000;

(3) the appropriate level of total budget outlays is $414,250,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors if $59,250,000,000; and

(5) the appropriate level of the public debt is $707,970,000,000."

(2) Section 2, paragraph (10) of S. Con. Res. 10 is amended to read as follows:

"(10) Income Security (600):
(A) New budget authority, $167,700,000,000;
(B) Outlays, $138,100,000,000."

Mr. ROUSSELOT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROUSSELOT. Mr. Chairman, let me urge my colleagues to support this substitute resolution to balance the budget. I cannot support House Concurrent Resolution 195 as reported by the House Committee on the Budget. It is a sham and an insult to the budget process. It calls for a deficit of over $68 billion, very nearly the highest in our country's history. The nature of the resolution is especially incredible considering its purpose in the context of current economic progress. Recently, President Carter announced his withdrawal of support of the $50 rebate.

The reason he gave centered around the fact that the economy no longer needed the extra stimulus which the rebate would have provided. Recovery is proceeding at a most respectable pace, Carter pointed out, and an extra $50 billion in economic stimulus would do nothing but aggravate inflation. I agree with President Carter; the $50 rebate was unnecessary in light of current economic conditions. And yet the Committee on the Budget reports a budget resolution for 1978 with a deficit of over $65 billion! Why, we ask. To ensure economic recovery, to provide jobs, to provide for needed stimulus, the majority tells us.

I submit that with growth in GNP at 5.2 percent for the first quarter of 1977—compared to 2.6 percent for 1976, retail sales climbing, housing starts booming and economic indicators generally looking very favorable, we simply do not need "help" in the form of more deficits. In fact, the only unfavorable economic indicators in the present outlook, and those which threaten sustained growth and recovery, are inflation and capital investment—the very ones which would be further aggravated by passing the Committee-reported budget resolution. That kind of help we can well do without.

For these reasons, I am offering a substitute resolution to House Concurrent Resolution 195 that will bring budget outlays in line with anticipated budget revenues and balance the budget for the first time in several years. If my amendment is passed, spending will be maintained roughly at 1977 levels. My outlay level will be $409 billion—approximately $56 billion lower than the committee figure. By adopting this amendment, then, taxpayers will be able to keep, spend, or invest $56 billion more of what they earn. The net effect of this proposal would be roughly the same as if the voters of the United States turned thumbs down on a $56 billion bond issue.

It is clear that this country is ready to move away from the traditional deficit spending policies that have been touted for so long as the panacea to unemployment and recession. Business Week, in an article for their March 22, 1976 issue, conceded this trend when they stated that the conventional methods of fiscal stimulation to remedy slowdowns in the economy are being discarded as "ineffective" and no longer useful. Many economists and politicians, notably those who are proposing the committee's first budget resolution, suggest that high deficit spending is necessary to reduce unemployment. Addressing this issue, Business Week states:

> Economists and politicians now agree that by themselves the traditional modes of stimulating economies by government spending or increasing the money supply will not end high unemployment. These conventional policies, used to excess, will only create additional inflation in economies that have suffered far too much inflation for years.

Just now the economy is beginning to shrug off the effects of the gargantuan deficits of recent years and the recovery is proceeding apace. To inflate the economy at this point with more deficits would be tantamount to extending an invitation for an encore of the recent reces-

sion with double-digit inflation and even higher unemployment.

Regretfully, however, the guiding light of the thinking of the majority seems to be the Keynesian economics of the thirties which vaunts deficit spending as the cure-all remedy to all economic ills. Everyone knows, after all, that budget deficits stimulate demand and, therefore, employment, they state. The deficits, the Keynesians continue, run through a "multiplier" and serve to boost GNP. Well, everyone who "knows" that deficits are so great ought to take a look at the following table which appeared in a Wall Street Journal editorial dated January 31, 1977.

Deficits and growth—1965–1974

	Av. Def. (Surplus +) Percent GNP	Growth (Av. Ann.) Percent
Italy	−4.04	4.7
Ireland	−3.42	3.9
United Kingdom	−1.19	2.5
United States	−.76	3.3
Netherlands	−.32	4.9
West Germany	−.30	4.1
France	+.34	5.3
Canada	+.78	5.2
Portugal	+.79	6.8
Japan	+1.39	8.7
Australia	+1.43	5.2
Luxembourg	+1.95	3.7
Norway	+3.43	4.5
Finland	+3.54	5.0
Sweden	+4.08	3.5

In interpreting the figures of the table, the Wall Street Journal editorial says the following:

What every one knows is simply wrong: there is no way to read into this table the notion that deficits are good for you. It will be surprising to most Americans, first of all, to learn that not all governments run deficits all of the time. Indeed, in this period a majority of industrial governments were in surplus when averaged over business cycles. The Scandinavian welfare states run the biggest surpluses of all due to their belief, considered fuddy-duddy in the U.S., that social security pensions should be funded like private ones. While obviously deficits are not the only factor at work, by and large nations with a budget balance to a moderate surplus do the best. Those with big deficits tend to do the worst.

In testimony last year before the Senate Subcommittee on Employment, Dr. Arthur Laffer, professor of economics at the University of Southern California, made the following observation:

By increasing spending during a recession, the government reduces the incentive to produce and work. Far from stabilizing the economy, such counter-cyclical spending will, in fact, accentuate the cyclical aspects of the economy. The greater government spending is, and the more closely tied to the level of unemployment it is, the more cyclical will be the economy . . . I doubt very much whether the United States can maintain peacetime full employment without a substantial reduction in the level of government spending as a share of GNP.

It is clear to see, then, that rather than boosting Federal spending to reduce unemployment, which is a rationale for the majority of the Budget Committee, Government expenditures should actually be reduced in order to provide the private sector the capital resources it needs to expand and create jobs.

Deficits, which need to be financed in the private marketplace, do not aid in creating such an atmosphere. Over the last 10 years, the Federal Government will have borrowed in the private capital markets a total of nearly one-third of a trillion dollars on a net basis. In 1976 alone, the U.S. Treasury was responsible for absorbing over 70 percent of all moneys in the securities market, while government at all levels claimed in the neighborhood of 80 percent. The private sector clearly cannot survive in an atmosphere which is so dominated by the Federal Government.

The now familiar argument that this substitute resolution requires a drastic change is no longer valid. The Rousselot Resolution calls for an expenditure level about the same as fiscal year 1977—$409 billion. Rather than drastically meat-axing many areas of the budget, the resolution merely requires a restraint on increases for fiscal year 1978.

As I have mentioned before on previous occasions before this body, there is precedence available for reducing Federal expenditures by large amounts on the part of the Federal Government.

As the following chart shows, between 1945 and 1948, during the Truman administration and while we had a Republican Congress, Federal spending dropped over $60 billion—the current equivalent of $250 billion—yet national income charged ahead.

Federal receipts and outlays from 1945–48

[In billions]

Year	Receipts	Outlays	Surplus or deficit
1945	45.2	92.7	−47.8
1946	39.3	55.2	−15.8
1947	38.4	34.5	+3.9
1948	41.8	29.8	+12.0

The private sector smoothly converted from a wartime to a peacetime economy, provided jobs for millions of veterans, while defying the warnings of the Keynesians who said that unemployment would hit the 10 million mark unless Government jobs programs were increased. This remarkable transition took place because the Federal Government did not preempt the needs of the private sector, and the free market system was left to operate without massive Government interference. Adequate money was available in the capital markets to supply the expansion needs of private industry because the Treasury was not crowding out the private sector and confiscating the lifeblood of free enterprise.

In addition to proposing a balanced budget, my amendment also assumes an across-the-board personal tax cut of 10 percent. The purpose of the tax cut is to reduce the tax bias against work, saving and investment; that is to increase the reward to work, save and invest and to make it more desirable for people to invest and to hire the unemployed and produce real long-term jobs. All of these activities will serve to greatly boost growth and GNP. It is my belief that a 10-percent reduction in personal income tax rates—given the high level at which rates presently are in the United States—will actually increase Government revenues by expanding the tax base. Lower tax rates on a larger base can generate more tax revenue than higher tax rates on a smaller base. This has been established conclusively many times in the last 50 years, most notably in the early 1960's when the Kennedy tax cuts were put in place. Many were concerned that the large tax reductions which Kennedy proposed would result in massive revenue losses. The U.S. Treasury, for example, argued that 6-year revenue losses would total $89 billion. In fact, there were revenue gains of $54 billion realized over a 6-year period as the following table, which many of my colleagues have already seen, illustrates:

EFFECT OF 1962–64 TAX CUTS ON REVENUES, 1963–68

[In billions of dollars]

	1963	1964	1965	1966	1967	1968	Total
Revenue losses estimated in 1963 by U.S. Treasury	2.4	5.2	13.3	20	23.7	24.4	89
Actual revenue gains	7.0	6.0	4.0	14	19.0	4.0	54
Difference in estimates	9.4	11.2	17.3	34	42.7	28.4	143

Source: U.S. Department of Treasury.

There can be little doubt, then, that reductions in taxable income rates do not result in higher deficits, but rather they expand the tax base, increase revenues, boost GNP, increase employment, reduce unemployment, stimulate housing, and increase available funds for capital expansion.

The amendment which I am proposing today gives the Members of this House the opportunity to not only vote for a balanced budget—a goal which is commonly held by all of us—but also to give the 89 million working people of this country a tax break by permitting them

to keep a greater amount of the income they earn. I urge my colleagues to reject bigger government, higher deficits and less economic freedom of choice by joining me in restoring fiscal sanity to our Government and hard-earned tax dollars to American citizens.

Mr. WYLIE. Mr. Chairman, I rise in support of the amendment in the nature of a substitute.

Mr. Chairman, I rise in support of the substitute because I know of no other way to protest a $70 billion deficit. There is no way the President can meet his campaign promise of a balanced budget by 1981 with this kind of a deficit.

Recently I read a statement by Mr. George Santayana who once wrote:

Those who cannot remember the past are condemned to repeat it.

In August of 1974 representatives of the Subcommittee on Financial Institutions Supervision, Regulation and Insurance met in West Berlin to discuss international banking legislation and economic matters with top West German bank regulatory officials. Germans are afraid of inflation more than anything. As they talked they recalled the huge deficits of the Weimar Republic and Hitler's ascension to power when inflation became rampant. They said the overriding reason why Hitler was able to get into a position to come to power was because it took a "bushel basket full" of Reich Marks to buy a loaf of bread. The Republic of West Germany does not run a deficit budget, and our hosts shuddered when we spoke in terms of a public debt of a half trillion dollars. Many of us remember the depression which hit the United States in 1929 following a period of rampant inflation.

Before that in the early 1860's, many States passed constitutional amendments to prohibit deficit financing following an inflation-depression cycle. Indeed, in my own State of Ohio the constitution has such a provision so that the State and each of its municipalities must live within tax revenues collected.

Not long ago there was heated debate in this body about the plight of New York City. New York City got in trouble because it ran up a deficit of more than $9 billion. And who can forget what has happened to England after deficit spending caught up with that great nation.

There may be times when a budget deficit is necessary to stimulate the economy, but it should not be a way of life if our free enterprise system is to remain viable.

Earlier this year I introduced H.R. 80. Its goal is a balanced budget. Under its provisions the House and Senate would each have to declare an "economic emergency" by a two-thirds vote before Federal spending could exceed income. I would like to add that language to the Rousselot substitute but our rules preclude it. I concede there may be times when a temporary budget deficit is a proper economic tool, such as during an economic depression or war; but continual deficits have made inflation a painful, everyday part of our lives and robbed us of the effectiveness it should have as a tool for economic stabilization.

I think most people in the country remember the past and would rather not have a repeat of economic depression or double-digit inflation and I submit the Committee on Budget forgets the past.

Mr. DORNAN. Mr. Chairman, I move to strike the last word, and I rise in support of the Rousselot substitute.

Mr. Chairman, I would just like to ask the Members of this body this: Is there a single Member here who, if they put a simple question on the popular and clever questionnaires we send out to our districts asking "Do you want a balanced budget?", could not predict the response?

Is there anybody from any district, no matter how great the Federal largesse in that district might be, who would expect some response other than an overwhelming affirmation that the American people want a balanced budget?

Mr. Chairman, I believe that the President won last year because of his talk of balanced budgets, zero-balance budgeting, and his claims to restructuring, reorganizing, and reducing the size of the State government in Atlanta, Ga.

I believe if we are honest with ourselves, we must admit most Americans demand a balanced budget. It appears that most of America's media outlets are not here. However, the New York Times is here, AP and UPI are still here, can anybody honestly face them and say the majority of their constituents do not desire a balanced budget.

Mr. Chairman, now that we are 4 months into the 95th Congress, I am sure my colleagues can anticipate, as well as I, many of the pressing economic problems which we will have to face during the next year and one-half. The Congress has faced them before and has attempted to deal with them. Those attempts have not been successful. The problems are not solved. We are facing them still.

I believe that these economic problems are almost entirely the result of one fact: Congress has failed to control the purse strings of the National Government.

It takes no crystal ball to foresee the problems arising out of this failure on the part of the Congress.

THE PROBLEMS WE FACE

First. How is social security to be funded?

Actuarials show that, at current rates of taxation, the future work force will not be able to pay for all the benefits that have been promised today's work force. Is the American citizen of the next generation to be smothered in taxes in order to fulfill the inordinate promises made to his forebears?

Second. How is unemployment to be ended in the long run?

For 40 years, antimarket economists have believed that unemployment could be eliminated instantly if the economy were "fine-tuned" with a little bit of inflation, a little bit of government spending, a little bit of public works. Economic events of the last 5 years have belied that theory. Government spending has never been higher. Inflation is virtually out of control. Public works are still hailed as the panacea of unemployment, but unemployment has reached levels no one should condone.

Third. How can we assure our local and State governments have access to the funding they require?

Local and State authorities which once had access to the private money markets now find that they cannot afford to pay the interest rates on borrowing. The Federal Government has offered higher and higher rates on its own borrowing and driven the smaller governmental units out of the market. To finance further the vast amount of Federal spending, Federal taxation has reached levels that the local and State governments find that their citizens cannot support needed local projects. Local governments cannot borrow because the Federal Government has borrowed all the money. Local governments cannot tax because the Federal Government has taxed all the money.

Fourth. How can runaway inflation be stopped?

In 1946, the dollar was worth 148 percent more than it was in 1975. In 1965, it was worth 72 percent more. In 1974, it was worth 11 percent more. Moreover, the rate of decline in value has accelerated. The value of the dollar has dropped 25 percent in the last 3 years.

Fifth. How can interest rates be brought under control?

Few young couples find that they can afford mortgages nowadays. Businesses cannot afford to borrow to increase their capital investment or hire more employees. Individual borrowers cannot afford to acquire funds for their personal investment.

HOW THE PROBLEMS AROSE

The 95th Congress, I feel sure will try to tackle these problems as the preceding Congresses did. But if the 94th Congress is any guide, the root of the problem will be ignored in almost all of the proffered solutions. There can be no solution of any of these problems without some real fiscal responsibility. None of these problems can be solved without putting an end to the deficit spending that has plagued this country for 16 of the last 17 years and 41 of the last 49. None can be solved without a balanced budget.

Now, Mr. Chairman, I do not say that the majority of the 94th Congress and previous Congresses acted maliciously to prevent the solution of these problems or that certain of its members reaped some personal or political gain from uncontrolled spending. I believe that the ramifications of deficit spending have just not been clearly understood or squarely faced.

I would like to state just what those ramifications are.

THE PRICE OF DEFICIT SPENDING

What have been the dreadful consequences of this irresponsible spending that has been voted by the majority party in so many past Congresses?

First, when the majority party votes huge deficits, somebody must fund them. That "somebody" is the American taxpayer.

The U.S. Treasury is forced to go to the private money market to borrow when its revenues do not meet the ex-

penditures the majority party has voted. The immediate result is a constriction of money available to private borrowers and the individual citizen. Money for home mortgages, for individual investment, for small business growth, for capital investment, for research and development and for hiring is severely limited.

This constriction of available money results in higher mortgage rates which drive couples out of the home market. It also forces a decline in new home construction. This, in turn, results in unemployment in the vitally important construction industry. It results in a decline in capital investment among companies of all sizes, and a decline in investment for research and development. No research means no product improvement, no new products, no new ideas.

The size of the Central Government's activity in the private money market cannot be minimized: It now swallows up over 50 percent of all the private money available to borrowers. Once the Federal Government goes into the market with a "shopping list" of this size, there just isn't much left on the shelves for the American people.

Second, private borrowers are not the only ones crowded out of the money market by the big spenders in the Federal Government. State and municipal governments must also compete for the limited funds. Massive Federal borrowing severely limits the availability of funds that State and local authorities could use for bond issues, for public works projects, rapid transit systems, water purification, for health centers, and for social services of all kinds.

This results in the curtailment of local programs that have been in existence for years and the postponement or cancellation of new activities needed by the citizenry. But local and State governments have found that they cannot just cancel needed programs—they are forced to come begging to the Federal Government for a share of the Treasury's revenue. But it is not revenue that they receive, it is totally a portion of the borrowings of the Federal Government. The same borrowings that have prevented them from borrowing for themselves. Moreover, what the local and State governments receive from the borrowings of the Federal Government has the hidden price tag of Federal redtape, long delay and higher interest rates. They pay a premium on what they could have gotten themselves.

It should now be clear what has to be sacrificed in order for the Central Government to finance its deficit spending: ready mortgage money, capital investment, research and development, increased employment, product innovation, local and State projects.

ARE THE RESULTS WORTH THE PRICE?

But on what does the Federal Government spend all this borrowed money? Is it actually something that is worth this sacrifice or something that benefits society as a whole?

In this Congressman's opinion, the answer is "No."

I believe that many of the Federal spending patterns actually exacerbate the problems created by its massive borrowing.

At the same time that production of goods and services is cut back for lack of capital funds, the Central Government is spending money it has absorbed from the private sector to spend on public programs designed to stimulate demand. The result of artificially stimulated demand and the limitation of business ability to respond to that demand is easy to see: steadily rising consumer prices.

Another—more insidious—harm results from uncontrolled Federal spending. Besides selling its debt instruments in the private money market, the Central Government sells them to the Federal Reserve. But, one would ask, how can the Federal Reserve buy anything? It produced nothing so it has no revenue of its own with which to purchase these debt instruments. The answer: It simply increases the money supply. When one has control of the printing presses, there is no limit to the amount of purchasing that can be done—and no limit to the borrowing of the Federal Government.

With more dollars floating in the economy and the same amount of goods—the Fed having produced nothing to match the dollars it has created—prices must rise. The new money lessens the value of that already in circulation and classic inflation ensues. A general loss in purchasing power, in spite of government redistribution of income, results from an increase in dollars with no accompanying increase in goods.

THIS WAY TO THE POORHOUSE

The policy which has created this situation—and let us make no mistake about which party has instituted this policy—is deficit spending, an unbalanced budget.

The United States lags in capital outlay. Fixed investments between 1960 and 1973 averaged a meager 13.6 percent of gross national product.

The increase in output per man-hour in manufacturing grows more slowly. The annual average growth in efficiency for the United States during the period 1965–75 was a pathetic 2 percent.

Outlays for such things as machinery, computers, and trucks increased 2.5 percent from the spring of 1975 to the end of 1976, after deducting for inflation. In the four preceding economic recoveries, the increase averaged 17.8 percent.

Investment in producers' durable equipment and structures combined was smaller last year relative to the Nation's GNP than in any other year since 1963.

Spending for research and development in 1976 was 6.2 percent lower than it was in 1968, after allowing for inflation. Research got only about 2.25 cents out of every dollar of total national spending, the smallest share since 1957.

We are rapidly approaching the economic state of Great Britain, the queen of deficit spenders. Congressional big spenders are often heard to utter phrases of pity and, "Isn't it a shame about England." But they make no effort to prevent their own country from going her way. Now, the big spenders may argue that we are far from being in the position of Great Britain—but are we? Our real growth was minus 1.8 percent in 1975. Great Britain recorded a drop of only four-tenths percent in the same year. Our situation is not yet as dire as Great Britain's, but the road signs are pointing the same way.

But instead of heeding the signposts, the Democratic majority in the 94th Congress took steps to hurry us along the way. The majority party has consistently approved a national debt that has grown and grown like some malignant cell. At the beginning of the 94th Congress, one which—according to the big spenders—had dedicated itself to "fiscal responsibility," the debt ceiling was $495 billion. The Democrat big spenders then proceeded to up that ceiling to $531 billion in February 1975. Four months later they upped it to $577 billion. The second session of the Congress, as well, showed little evidence of fiscal responsibility: Automatic intermediate debt limits were established by the Democratic Party for 1976. For September 30, 1976, the allowable debt was $636 billion; for March 1977, $682 billion; and for September 1977, the ceiling was raised to $700 billion. That is almost the size of our entire GNP in 1965. The Democratic majority of the 94th Congress voted, in total, a 41 percent increase in our debt ceiling.

And now, the estimated national debt for fiscal year 1978 is $794 billion—about 40 percent of this year's GNP.

How much more will the majority party approve before England finds that it has been joined in the poorhouse by the American people? I do not think the ceiling has to be raised too many more times before that occurs.

In an editorial which appeared a few months ago in the Wall Street Journal, an informal accounting of the total assets and liabilities of the United States was conducted. The bottom line holds little comfort for those who make light of our impending economic crisis.

Although we are a wealthy country, our assets total $5.7 trillion, we are nevertheless up to our ears in debt. Liabilities which include debts not included in the annual budget—social security, veterans payments, defense pensions, Federal pensions, and many other items—total $5.6 trillion. That does not leave much wealth to spare when one considers that items which offset our wealth in this accounting do not include the debts of the State and local authorities.

Now the big spenders here in Congress will argue that this is not a problem because these debts will not all be called up at once. But that is not the point. The point is that the United States is going into deeper debt each year. This massive Government spending, while politically popular with those who receive the Government's largesse—can only lead to unavoidable economic ruination.

THE REAL SOLUTION

Fiscal responsibility—the real kind—not the kind stump speeches are made of—is the only way to avoid this ruination. Our debt must be paid off now. If we

wait, the toll that debt will take will be too great too survive. Our budget must be balanced now. And it must continue to be balanced every year hereafter.

For this reason, I support wholeheartedly the efforts of my colleague from California (Mr. ROUSSELOT) in his efforts to require a balanced budget. It is my sincere hope that the errors of the past will not be repeated and by the passage of his amendment, our Nation will find again the sound footing of fiscal integrity.

Mr. BADHAM. Mr. Chairman, will the gentleman yield?

Mr. DORNAN. I yield to my colleague, the gentleman from California (Mr. BADHAM).

Mr. BADHAM. Mr. Chairman, I rise in support of the amendment offered by my good friend and valued colleague, the gentleman from California (Mr. ROUSSELOT), because I am convinced that the time has come for this Government and this Congress to abandon the practice of spending beyond our means.

Let us look at just how serious the national debt situation really is. The Government of the United States began operation with a national debt from the Revolutionary War of some $78 million. We came close to paying off the entire debt by 1837 when the debt hit an all-time low of a mere $37,000. Since then the debt figure has fluctuated with the condition of the national economy and the demands of war.

We emerged from World War II with a debt that was staggering by the standards of the day. At the end of fiscal year 1946, the national debt was almost $270 billion. The debt fluctuated at about this level until the end of the 1950's. When President Eisenhower left office, the debt had reached $290 billion. I might point out, Mr. Speaker, that the last President to leave office with the debt lower than when he took office was Calvin Coolidge.

But in the 1960's and the 1970's, the Government has run up large deficits and increased the debt by fantastic proportions. In 1965, the debt hit $313 billion. By 1970, it reached $370 billion, and in 1975, it was $533 billion. To put this in perspective, $533 billion represents $2,495 for every man, woman, and child in the United States.

The national debt is now $652 billion, and it may exceed $705 billion by the end of this fiscal year. The interest on the national debt for the current fiscal year is estimated at $42 billion. This is just interest and does not include the repayment of any principal. This makes the payment of interest on the national debt the fourth largest single item in the Federal budget.

I have been encouraged to note that my colleague gathers a larger number of supporters for his amendment to balance the budget each time it is offered. As a freshman Member of this body, this is my first opportunity to join with others who agree that we must end deficit spending in casting a vote in favor of the amendment. I commend my good friend and colleague, Mr. ROUSSELOT, for his leadership in this most important cause, and I am proud to join with him in this effort which surely is one of the most important efforts that any Member of this House can undertake.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment in the nature of a substitute offered by the gentleman from California (Mr. ROUSSELOT).

I must say that I believe his arguments and his estimates are incorrect. I appreciate what the gentleman wants to do. We all want to get a balanced budget, but I do not believe this is the way to do it.

I urge the defeat of the amendment.

Mr. WAGGONNER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and my colleagues, we have heard two "beautiful dreamer" speeches, but this will not work. It cannot be done as proposed. We are wasting our time. Therefore, I say that we have no choice but to vote this amendment down. The budget simply cannot be balanced in one fell swoop with the deficit as large as it now is without total chaos and every Member of this body knows it. I dream, too, but my dream is a practical one.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from California (Mr. ROUSSELOT).

The question was taken and the Chairman announced that the noes appear to have it.

RECORDED VOTE

Mr. ROUSSELOT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 131, noes 271, not voting 31, as follows:

[Roll No. 164]

NOT VOTING—31

Boggs	Evans, Del.	Harkin
Derrick	Fish	Jones, N.C.
Dickinson	Forsythe	Koch
Diggs	Fraser	LaFalce
Dodd	Gradison	Leggett

Madigan	Price	Staggers
Meyner	Roe	Teague
Milford	Rostenkowski	Walgren
Moakley	Russo	Young, Alaska
Moss	Sikes	
Myers, Ind.	St Germain	

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Koch against.

Mr. Sikes for, with Mr. Staggers against.

Mr. Milford for, with Mr. Rostenkowski against.

Mr. Walgren for, with Mrs. Meyner against.

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

Mr. MITCHELL of Maryland. Mr. Chairman, I am offering an amendment to the first concurrent resolution for the fiscal year 1978 budget, which is now generally known as the transfer amendment.

The transfer amendment is a concrete legislative proposal that would reallocate Federal revenues to national priorities. This issue has been a matter of general discussion since the budget process was first implemented. Although, there have been parochial efforts to address this issue, heretofore, the budget process has not been an effective mechanism for reordering national priorities. Consequently, this is the appropriate time for fostering the mandate of the Congress.

As the attached Dear Colleague, which was circulated earlier indicates, the effect of the transfer amendment will be to reduce the military budget by $12.9 billion in budget authority and $4.0 billion in outlays, while creating a net increase of 562,600 new jobs by allocating military budget reductions to employment creating programs.

I would like to share with my colleagues a few of the letters that I have received in support of the transfer amendment.

I believe that the transfer amendment concept will be the first in a series of steps which will permit us to make significant changes in the manner in which our public funds are expended.

U.S. CONFERENCE OF MAYORS,
Washington, D.C., April 25, 1977.

DEAR MEMBER OF CONGRESS: The United States Conference of Mayors supports Representative Parren Mitchell's effort to transfer funds from excessive military spending to underfunded jobs-creating and social programs. The Transfer Amendment to the FY 1978 First Budget Resolution is an important step toward more rational and humane national budget priorities.

The cities of America are still awaiting a serious urban program to diffuse the explosive fiscal and social crisis which the mayors must confront daily. With the stimulus package dismantled, Congress must provide higher levels of support in FY 1978 for job programs, economic development, and maintaining essential city services.

At the same time, a commitment to welfare reform, national health insurance, and an urban investment bank must be made so that the basic ills which threaten our cities and impose hardships on our citizens can be cured.

The funds to begin these programs are available. What has been lacking is a commitment to reorder our priorities and put our resources to better use. In this regard, we cannot afford wasteful Pentagon programs or excessive military spending while basic needs go unmet.

At our last annual meeting in July, 1976, the Conference of Mayors adopted a Resolution which: "calls upon the Administration and Congress to redress the imbalance between domestic expenditures and expenditures for the Pentagon and foreign aid, recognizing that the social defense of this nation is at least as important to the national defense as is our military defense."

The Mitchell Transfer Amendment would begin to redress the imbalance. It would create hundreds of thousands of jobs without raising the deficit or increasing taxes. And it would stimulate a general debate on national priorities. I am proud to support these goals.

Sincerely,

KENNETH A. GIBSON,
President.

N. PLAINFIELD, N.J.,
April 5, 1977.

DEAR MR. MITCHELL: I want to congratulate you on your amendment to transfer moneys from the military budget to urban priorities which we so urgently need whatever they might be.

Wishing you the best success.

Sincerely,

KATHE DRUCKER.

MORAVIAN COLLEGE,
Bethlehem, Pa., March 27, 1977.

Hon. PARREN MITCHELL,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN MITCHELL: Enclosed you will find a copy of a letter I have just written Congressman Giaimo, concerning the budget transfer amendment you are offering.

I want to thank you for your courage and foresight in sponsoring this measure. I hope you will be able to find many co-sponsors and that it will pass successfully the House Budget Committee, the House itself, and finally become law.

I am only sorry a more formal letter could not have been written by the college itself.

Best wishes to you in your struggle to fund important domestic programs and reduce military spending.

Sincerely,

C. CLARKE CHAPMAN, Jr.,
Professor of Religion.

Enclosure.

DEPARTMENT OF RELIGION,
March 27, 1977.

Hon. ROBERT N. GIAMO,
Chairman, the House Budget Committee, House of Representatives, Washington, D.C.

DEAR MR. GIAMO: I write this letter, not in any official capacity, but simply to tell you of the discussion on campus of the transfer amendment proposed to the Budget Committee by Representative Parren Mitchell.

On March 18 the President's Advisory Council of Moravian College met; this is a group made up of the various deans and administrators of the college, together with some representatives from the student body and the faculty. As an advisory group it cannot speak for the college as a whole or in any official capacity, but I think it is fair to say it fairly represents many constituencies of the campus. After some discussion, the consensus was that we found ourselves "in sympathy with the general intent of the transfer amendment" of Mr. Mitchell.

We intend to send to you an official letter of particulars on this position. But legal counsel advised against this, specifically because of uneasiness about possible IRS harassment if even such an informal body as the Advisory Council of the college took a stand relative to any legislative proposal. So no such letter has or will be sent.

However, on my own responsibility, and as a member o fthat Council, I wished you to know of the unusual degree of interest in the transfer amendment. As I perceive it, the reason is that many of us do not see how the federal budget can give sustained and funded attention to the many social needs within our country (and in particular, those needs relative to independent higher education and the funding of the several grant and loan programs of the federal government), if reductions in military spending (function 050 in the FY78 budget) are not made.

It seems to me that military expenditures have been growing at an unprecedented rate for peacetime. I understand the President Carter proposed a $11.6 billion increase in military spending for FY78, an increase of 10.7 percent over the previous year. New weapons procurement would rise 16 percent, after having already risen 37 percent last year. The cost of new weapons systems in the closing months of 1976 escalated by $18½ billion. Where will it all end?

Let me personally urge you to support the Parren amendment, as a first step in readjusting our national priorities. And I thank you for your careful attention to this important matter.

Sincerely,

G. CLARKE CHAPMAN, JR.,
Professor of Religion.

THE UNITED METHODIST CHURCH,
Fayette, Iowa, April 19, 1977.

Hon. PARREN MITCHELL,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. MITCHELL: The Iowa Annual Conference of the United Methodist Church, and its Board of Church and Society, have been on record as supporting the "transfer amendment" concept for shifting federal funds from wasteful military expenditures to domestic programs for meeting human needs. We are communicating support for this measure to our own Congressional delegation, and wish to congratulate you for your leadership in the campaign for a Transfer Amendment.

You should have several strong allies among the Iowa Congressional delegation when the measure reaches the House floor in the persons of Reps. Blouin, Harkin, and Bedell.

Sincerely yours,

BARBARA DALE.

THE COMMONWEALTH OF
MASSACHUSETTS DEPARTMENT
OF MENTAL HEALTH
Dorchester, Mass., April 22, 1977.

Hon. PARREN MITCHELL,
U.S. Congress,
Washington, D.C.

DEAR REPRESENTATIVE MITCHELL: The members of the Bay Cove Mental Health and Retardation Area Board are in support of your amendment to the First Concurrent Budget resolution to transfer several billion from the Defense Budget to be allocated for human services.

Our representatives in the Congress and Senate have been contacted by mailgram today.

We wish you the very best of luck and continued success.

Sincerely,

MARJORIE F. LINDSAY,
Executive Secretary, Area Board.

RED BIRD MISSIONARY CONFERENCE,
THE UNITED METHODIST CHURCH,
QUEENDALE CENTER,
Beverly, Ky., April 21, 1977.

Hon. PARREN MITCHELL,
House of Representatives,
Washington, D.C.

DEAR MR. MITCHELL: I am writing to you to commend you for introducing the Transfer Amendment. I am totally in favor of cut-

ting funds from the military budget and transferring these funds into social programs, which would result in new jobs. This should strengthen the entire economy by increasing tax revenues, and indirectly generating even more jobs.

Thank you for all of your efforts in this area.

Sincerely yours,

ALICE M. FEIND.

WOMEN'S INTERNATIONAL LEAGUE FOR PEACE AND FREEDOM,
Santa Cruz County Branch, April 20, 1977.

DEAR REPRESENTATIVE MITCHELL: Here are Transfer Resolutions signed at our last regular meeting.

We have sent a copy of the names and addresses to our Representative, Leon Panetta, and told him that you have these originals.

We also sent him a report regarding community needs which we have developed from interviewing persons active in education, senior citizens concerns, children's welfare, environmental problems, housing and health care. We have attached this report to this letter.

We note that Naomi Marcus of WILPF, when she testified for the House Budget Committee March 2, said, "What is necessary in order to ease the transition period from a military oriented economy is government planning and government funding for the transition period. With such planning and funding, it is probable that a healthier economy would be produced with a stronger economic base than before the cuts."

There should be a commission in every county to determine both the local domestic needs and the economic impact of military spending and to recommend methods of conversion of jobs supported by military spending to jobs that fulfill human needs. The funds for this beginning step, this commission, could come from cuts in military spending.

We hope your proposed Transfer Amendment is successful.

Sincerely,

PAT MILLER,
For Feed the Cities Not the Pentagon Committee, Women's International League for Peace and Freedom, Santa Cruz Branch.

WESTCHESTER HISPANIC COALITION, INC.,
White Plains, N.Y., March 31, 1977.

Hon. PARREN MITCHELL,
U.S. Congress,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN MITCHELL: The Westchester Hispanic Coalition is in total support of the transfer resolution bill being examined by the Congressional Budget Committee. It is our believe that the economic resources of this nation should be devoted to the uplifting betterment of human needs of the American citizens.

The $18,000,000.00 to be transferred from the defense budget should be used especially in programs that would alleviate employment and that would have direct impact in reducing the high percentage of minorities and especially Hispanics in the unemployment lines.

Aside from the already specified supported programs, we recommend that funds be allocated to CETA Title I and to the Bilingual Title VII Educational programs.

Copies of this letter will be sent to the district congressional Representatives and members of the Congressional Budget Committee.

Sincerely,

HECTOR E. GHIMENTI,
Chairman.

NETWORK,
Washington, D.C., March 21, 1977.

Representative PARREN MITCHELL,
U.S. House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE MITCHELL: Thank you for your leadership in sponsoring a transfer amendment to the Budget Resolution. NETWORK has written newsletter articles for our members as well as mailed materials to our activists on reordering national priorities. We will be phoning around the country to our district and state coordinators to urge them to visit their representatives during April's recess to urge them to vote yes on the transfer amendment.

Instead of spending for more weapons production and for development of new nuclear weapons and breeder reactor programs, NETWORK urges the Congress to use federal dollars for human needs.

We urge cuts in the following programs:

B–1 Bombers—halt production.

MX ICBM—halt research and development.

Cruise missiles—halt research and development.

Nerve gas—cut completely.

ERDA budget for the breeder reactor program; the Clinch River demonstration project.

We support instead increased spending for—

Grain reserves—$6.34 b for FY 78 start up.

National Health Security—$200 m for FY 78 start up.

Full Employment—$16 b.

Displaced Homemaker—$10 m.

Public Service Jobs particularly in non-for-profit sector—$2.5.

CETA Title I—$1.5 b.

Funding for the Rural Development Act and Farmers Home Administration—$16.4.

Consumer Co-operative Bank Bill—$6.5.

Neighborhood Commissions—$2 m.

We appreciate your work for human needs. We only wish we had your Marshall Plan for the cities as an option for this Congressional Budget Resolution.

Thank you for your efforts on behalf of federal spending priorities for people.

Peace,

Sr. MAUREEN KELLEHER, RSHM,
Issue Development Manager.

HOLY TRINITY CATHOLIC CHURCH,
Trinidad, Colo., March 21, 1977.

Hon. PARREN MITCHELL,
House Office Building,
Washington, D.C.

DEAR SIR: It is with considerable interest that I am following your efforts to have a substantial sum transferred from the military budget to one for domestic programs. You have my congratulations for espousing this worthy cause, and my prayers for your success.

In my column for the local paper your efforts are being brought to the attention of Colorado citizens.

Sincerely yours,

Rev. A. J. ADAMS, S.J.

EAST BAY WOMEN FOR PEACE,
Berkeley, Calif., March 24, 1977.

Hon. PARREN J. MITCHELL,
House Budget Committee, U.S. Congress,
House Office Building, Washington, D.C.

DEAR CONGRESSMAN MITCHELL: We heartily endorse your proposed transfer of 15 billion dollars from the Defense Budget to vitally needed domestic programs.

A military budget increase of 10.7 percent for FY 78 above that for FY 77 is unthinkable, just on its face. And when it is combined with actual cutbacks below FY 77 levels for meeting the needs of our cities, our schools, our housing, etc., it is indefensible!

We applaud your leadership in restating the fiscal priorities of this Nation and in taking action to implement them.

Sincerely yours,

GRACE DILLEY,
East Bay Women for Peace.

COALITION FOR COMMUNITY ISSUES,
Vista, Calif., March 24, 1977.

Hon. PARREN MITCHELL,
U.S. House of Representatives,
Washington, D.C.

SIR: Our coalition supports you in your efforts to transfer Military funds to programs that will meet human needs. Good work, we must stop our support of dictatorships throughout Latin America and elsewhere and this is a sound start.

Also, today, our coalition members sent 12 other Mother for Peace postal cards to our 43 dist. Representative Clair Burgener—you will have to push him to admit this—but, you sir are now advised and may proceed as you think best. Mr. Burgener is not known as to turn his back upon the military-industrial complex that serves to sustain San Diego. Push him a bit, he deserves to wake up to the realities of our present crisis.

Sincerely,

JOSEPH O'BRIEN,
Chairman.

NOMOR—COMMITTEE FOR A NUCLEAR OVERKILL MORATORIUM,
Chicago, Ill., March 25, 1977.

Hon. PARREN MITCHELL,
House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE MITCHELL: First of all, as one of the organizations working here in Chicago on the Campaign for the Transfer Amendment, let me say how pleased we are that you have agreed to sponsor the Transfer Amendment.

We realize that much of the proposed Transfer Amendment may change, but we hope the spirit of it—to channel significant deletions in the military budget into social programs—will be met with some enthusiasm, at least by a greater majority than in the last Congress.

We recognize that this process is in its infancy, and we expect to continue with it, as it is an approach favored by supporters of NOMOR, particularly our labor backers in steel, etc. We especially want to emphasize the importance of the cuts of nuclear weapons systems and the $1.9 billion to be freed by declaring a moratorium on development and testing of nuclear devices. The importance of deleting cruise missiles cannot be understressed—I'm sure you're aware that their development poses a qualitative change in the direction of the arms race that, at the very least, is destabilizing. We also support deleting the B–1 bomber, Trident submarine, Missile X, etc., but if you were to ask us our priorities, they would be the aforementioned: moratorium on new devices, stopping the cruise missiles.

Enclosed is a copy of our position statement for your information.

Sincerely,

MARTHA L. SCHMIDT,
Executive Director.

NATIONAL FARMERS UNION,
April 22, 1977.

Hon. PARREN J. MITCHELL,
U.S. House of Representatives, Cannon House Office Building, Washington, D.C

DEAR CONGRESSMAN MITCHELL: On behalf of the National Farmers Union, I am writing to endorse your effort to transfer funds from the military budget to domestic programs during the House's consideration of the First Budget Resolution for Fiscal Year 1978.

The National Farmers Union believes that

Congress has the responsibility to provide the services to the American people which are basic to a decent and stable standard of life. For too long, the country has been spending an unwarranted amount of its precious resources on the military sector at the expense of many domestic programs. Now, through the new Congressional Budget Process and the transfer amendment, Congress possesses the tool to begin reordering our national priorities.

I am gratified to see that many of your suggested new domestic programs would directly benefit rural Americans. Rural development, home weatherization, small business loans and national health insurance are just a few of the programs which will receive transferred funding. In addition, the jobs creating stimulus funds in your amendment will help lift economic burdens generally by generating new revenues.

I firmly believe that this Transfer Amendment will not in any way jeopardize our national defense.

We sincerely hope that your colleagues will recognize the importance of the transfer amendment and will lend support to this worthy cause.

Sincerely,

TONY T. DECHANT,
President.

U.S. CONFERENCE OF MAYORS,
Washington, D.C., April 25, 1977.

DEAR MEMBER OF CONGRESS: The United States Conference of Mayors supports Representative Parren Mitchell's effort to transfer funds from excessive military spending to underfunded jobs-creating and social programs. The Transfer Amendment to the FY 1978 First Budget Resolution is an important step toward more rational and humane national budget priorities.

The cities of America are still awaiting a serious urban program to diffuse the explosive fiscal and social crisis which the mayors must confront daily. With the stimulus package dismantled, Congress must provide higher levels of support in FY 1978 for job programs, economic development, and maintaining essential city services.

At the same time, a commitment to welfare reform, national health insurance, and an urban investment bank must be made so that the basic ills which threaten our cities and impose hardships on our citizens can be cured.

The funds to begin these programs are available. What has been lacking is a commitment to reorder our priorities and put our resources to better use. In this regard, we cannot afford wasteful Pentagon programs or excessive military spending while basic needs go unmet.

At our last annual meeting in July, 1976, the Conference of Mayors adopted a Resolution which: "calls upon the Administration and Congress to redress the imbalance between domestic expenditures and expenditures for the Pentagon and foreign aid, recognizing that the social defense of this nation is at least as important to the national defense as is our military defense."

The Mitchell Transfer Amendment would begin to redress the imbalance. It would create hundreds of thousands of jobs without raising the deficit or increasing taxes. And it would stimulate a general debate on national priorities. I am proud to support these goals.

Sincerely,

KENNETH A. GIBSON,
President.

UNITED MINE WORKERS OF AMERICA,
Washington, D.C., April 22, 1977.

HON. PARREN MITCHELL,
U.S. House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE MITCHELL: The Federal budget reflects the values and commitments of the government toward the American people. At his inauguration, President Carter called for a "new spirit." The way to reflect this "new spirit" in the budget is to establish new spending priorities which return more goods and services to the working people of the country.

We all know the consequences of the old priorities—millions of unemployed, slowed economic growth, rising medical costs and decaying cities. But military spending has risen in "real growth" for the past two years. We are procuring expensive new weapons systems which do not deserve to be funded.

The Mitchell Transfer Amendment to H. Con. Res. 195, the First Budget Resolution for Fiscal Year 1978, would begin to reorder our spending priorities by shifting tax dollars into job-creating programs and new social initiatives. By reducing military spending to reasonable levels and transfering the funds, your amendment would stimulate a gain of hundreds of thousands of new jobs without breaking the deficit ceiling or imposing new tax burdens on our already over-taxed citizens.

I am convinced that your amendment guarantees that our military structure will remain more than adequate to protect national security. Unless we shift monies to produce jobs and to advance social justice, we shall find that the greatest threat to our national defense may well be internal decay rather than an external assault.

On behalf of the United Mine Workers of America, I support your transfer amendment and urge the House of Representatives to make new budgetary priorities the center of its effort to help create a new spirit.

Sincerely,

SYDNEE M. SCHWARTZ,
Assistant Director,
Legislative Department.

STATEMENT BY THE GOVERNOR AND LIEUTENANT GOVERNOR IN SUPPORT OF THE TRANSFER AMENDMENT

As Governor and Lieutenant Governor of Massachusetts, we are aware of the pressures put on state and local governments to provide increased services in the face of insufficient funds. A major source of this fiscal pressure is the massive diversion of resources at the national level from civilian spending to military spending. The insufficient investment of the federal government in necessary programs creates an imbalance which aggravates unemployment and the decline of our industrialized areas.

We agree with the National Conference of Mayors that the time has come to "re-dress the imbalance between domestic expenditures and expenditures for the Pentagon and foreign aid. . . ." We believe that the most important element of our national defense is a healthy, productive population involved in constructive work.

Therefore, we support a cut in military spending for 1978 with the savings applied to domestic, economic and social needs.

Communities whose economies are hurt by these cutbacks should be aided by federal programs so that no one section of our nation bears the financial burden of economic conversion. We support the concept reflected in the Transfer Amendment to the first concurrent budget resolution to be submitted by Congressman Parren Mitchell.

MICHAEL S. DUKAKIS
THOMAS P. O'NEILL III

Mr. ALEXANDER. Mr. Chairman, I rise in opposition to the Emery amendment. This proposal is a deliberate poke in the eye of our Budget Committee which ought, instead, to be commended for the conscientious and careful job it has done.

In addressing ourselves at this time to the work of adopting the first concurrent budget resolution for fiscal year 1978 we are complying with the requirements of the Congressional Budget Control and Impoundment Act of 1974.

I would remind my colleagues of the purpose of that law by quoting from the House report on it:

> The purpose of this legislation is to improve congressional control of budget outlays by (1) establishing a legislative budget process for determining national policies and priorities.

Congress enacted that law in an effort to regain control of its constitutional responsibilities in this field.

Supporters of this amendment to endorse the President's desire to abandon needed water resource projects propose that the House meekly bow to the blatant overriding of congressional constitutional responsibilities for establishing national priorities and spending policies.

They would have us make a sham of the care, diligence, determination and labor those of us here now poured into the effort of the 93d Congress which brought about the passage of the Congressional Budget Control Act and the strengthening of Congress ability to discharge its responsibility for setting national priorities.

The supporters of this amendment would have us say here tonight that it is necessary for Congress to properly discharge its constitutional responsibilities for setting and keeping to national priorities only when we have a Republican administration in the White House.

They would have us tell Members who occupy this Chamber tonight who have, in past years, repeatedly studied and then supported the water resources projects for which this amendment would delete money that they acted against the best interests of the Nation.

Supporters of this amendment would have us adopt it and by that action tell our congressional legislative committees, which have recommended and won approval for those water resource projects, that their work is of no account.

They would have us tell the Nation that the majority of this Congress is so weak as to be willing to agree to the thrashing, by an administration not yet 4 months old, of years of congressional labor, concern, and study.

The supporters of this amendment would have us adopt their proposal and thereby blithely toss into chaos not only our natural resource planning but all our long-range project planning.

They would have us tell the Nation that any new Presidential administration can ignore constitutional responsibilities and nullify the law of the Nation by its own decisions without benefit of prior consultation with and approval of the Congress, if that administration is so fortunate as to represent the same political party as the majority of the Congress.

I do not believe that the majority of this House has so lost its sense of its individual and collective responsibilities or is so ignorant of the fine work that has been done by past Congresses as to yield to the blandishments of the backers of this amendment.

I do not believe that the majority of this House actually is willing to abandon our people to the disastrous future that

will result from failure to fund these water resource projects.

Therefore, I urge that you join me in voting to defeat this amendment.

Mr. BIAGGI. Mr. Chairman, as a cosponsor of legislation to establish a separate World War I veterans pension program I rise in unqualified support of the Anderson amendment. For the last 2 days we have been dealing with budgets for various agencies totaling well into the billions of dollars. This amendment here will require but $500 million but its benefits to the 800,000 World War I veterans in this Nation cannot be measured in dollars and cents.

Without question, this Nation has been unresponsive to the plight of the World War I veterans. Many of these men who risked their lives in defense of their Nation today find themselves fighting a different enemy, poverty. Some veterans are receiving pensions of less than $15 a month. This is a deplorable situation which must be changed, and now is the opportunity to do so.

The gentleman from California (Mr. ANDERSON) is to be commended for this amendment and his leadership on behalf of the World War I veterans. As the senior New York member on the House Select Committee on Aging I feel the time is long overdue for us to make amends to the World War I veterans of this Nation who have received the cold shoulder rather than the compassion of their Government.

I urge swift approval of this meritorious amendment. We must not allow our World War I veterans continue to teeter on the edge of poverty. They have served their country in war and in peace. They have earned this separate pension, it is not a handout. It should be provided to them.

Mr. FRENZEL. Mr. Chairman, the Burleson amendment restores the Defense budget requested by the President, and approved by the House this week. I do not like to vote for an increase of this size, about 15 percent over last year, for any Federal expense category, but I shall support the Burleson amendment.

The reasons why I think this amendment must be adopted are: First, the SALT talks are going poorly; and, second, the Russians are continuing their dangerous military build-up.

Whether the SALT difficulties are caused by the recalcitrance of the Russians, or the inexperience of the new administration, or both, makes little difference until we have an agreement, or are making progress toward an agreement, we cannot afford to cut back any development or procurement beyond the level requested by the President.

I regret the need to vote for outlays at this level but I see no other reasonable course. I only hope that SALT successes will enable us to hold back future increases.

Mr. JONES of North Carolina. Mr. Chairman, on behalf of the 15,000 veterans of World War I living in my State of North Carolina, I gladly rise in support of the amendment offered by my colleague from California, GLENN ANDERSON.

I received a letter from A. J. Falvo, Commander of the North Carolina Department of the Veterans of World War I which I would like to share with you, in part:

> I agree with you wholeheartedly that the time is long overdue to help us who served our country, who now more than ever are deserving of a pension. Many of my buddies have been called by the Great Commander to their last reward, the ranks are thinning out.

I urge my colleagues to support this urgent and long-overdue legislation.

Mr. FRASER. Mr. Chairman, I rise in support of the Emery amendment.

Representative DAVE EMERY of Maine seeks to lower the budget authority and outlay by $100 million in function 300—national resources, environment, and energy—of the first budget resolution for fiscal year 1978. The resolution sets congressional spending and revenue guidelines for the fiscal year 1978 budget.

The Emery amendment is intended to reduce appropriations for water resources projects by $100 million. In light of President Jimmy Carter's review and recommendations for Federal water development programs—deletion of funds for 18 projects and modifications for 5 others—the President's actions deserve our support. I feel this amendment is a reasonable approach.

The President's criteria for review of Army Corps of Engineers and Bureau of Reclamation water projects was focused on environmental impact, cost/benefit ratios, safety issues and impact on beneficiaries. Two projects which fail these criteria, the Garrison Diversion Project and the Cache Basin Project, affect my home State of Minnesota.

The Garrison Diversion Project in North Dakota is a Bureau of Reclamation irrigation project. This project is designed to irrigate 250,000 acres now dry farmed. Some recreation and municipal and industrial water supply benefits would also be provided. However, in order to irrigate 250,000 acres, 220,000 acres of productive land would have to be converted or destroyed. This impact on wildlife habitat, particularly on prairie wetlands for migratory waterfowl, has caused concern in Minnesota's Department of Natural Resources.

Mr. Roger Holmes, chief of the DNR's section on wildlife, wrote President Carter March 15 outlining his concern about the two projects. Mr. Holmes writes to President Carter:

> We have been particularly concerned with the Garrison Diversion Project in North Dakota because of the tremendous impact the project would have on the North American waterfowl resource.

In addition, Minnesota's Pollution Control Agency Board voted April 19 to submit an amicus brief on behalf of the National Audubon Society's lawsuit against the Bureau of Reclamation on the Garrison Diversion Unit. The National Audubon Society has brought suit against the project, charging violation of the National Environmental Policy Act, the Fish and Wildlife Coordination Act, and the international Migratory Bird Treaty and Act. The case is now before the U.S. District Court here in Washington. Hearings are expected shortly.

The Minnesota Pollution Control Agency fears the project will violate Minnesota's water quality in the Red River which forms the boundary between North Dakota and Minnesota. The PCA's March 22 statement submitted for the hearing record as part of the Interior Department's review process elaborated:

> Our new understanding of the magnitude of the GDU lead us to believe that the irrigation return flows from GDU entering the Wild Rice and Sheyenne Rivers and thence the Red River would have a substantial adverse affect on the water quality of the Red River and result in additional water treatment costs for Minnesota cities using the Red River for municipal water, principally Moorhead, Minnesota.

Ms. Marion Watson, chairwoman of the MPCA's citizen board, wrote of the board's concern in a March 8 letter to my office:

> This Agency (the Pollution Control Agency) has for some time expressed its concern that completion of the Garrison Diversion Project, as proposed, would cause degradation of the Red River of the North, violate Minnesota water quality standards and result in significant additional costs for municipal water treatment in Minnesota.

Ms. Watson goes on to say:

> Our position . . . is that it should be stopped and no further funds appropriated for construction until such time as a complete analysis can be made of its total cost including any modifications and the environmental and economic consequences to others be properly balanced against the benefits to North Dakota.

President Carter has recommended modifications for the Garrison Diversion project. The project is now 20 percent complete. It is estimated that it will cost $436.4 million to complete the present plan. The President is seeking to cut that figure by $302 million. The estimated cost of the alternatives he is recommending is $134 million.

Four major irrigations areas and their associated principal supply works, with a minor exception, would be eliminated. The President also promises to take into account the upcoming International Joint Commission report at which time the project will undergo further review. If the President's plan goes through, Minnesota's concerns about the project's implications on water use and water quality degradation from the Sheyenne River into the Red would be relieved.

The Minnesota DNR and PCA also have concerns about the Cache Basin project in Arkansas. Minnesota Attorney General Warren Spannaus outlines the State's concerns in a March 11 letter to President Carter.

Spannaus writes:

> The Cache River project is a matter of great concern of the State of Minnesota, because approximately 15 percent of the mallards produced in this state find wintering habitat in Arkansas. The Cache River-Bayou Deview basin is the most significant wintering site in Arkansas.
>
> Minnesota has been a leader among the states of the Mississippi Flyway in challenging the compliance of the Corps with the National Environmental Policy Act in regard to the Cache River project. Our office has expended considerable time and effort in mounting a challenge before the U.S. District Court in Little Rock and earlier this year before the Eighth Circuit Court of Appeals in St. Louis.

Regardless of the technical legal advocacy of the environmental impact statement on the Cache River construction, we firmly believe the review now under way will confirm that the project will cause severe damage to Flyway waterfowl. We urge that the federal government halt the Cache River construction permanently.

The DNR's chief of wildlife echoes that concern.

The President calls upon Congress to delete funding and deauthorize the Cache Basin project while considering needed protection of remaining bottomland habitat which is the wintering grounds for thousands of migratory waterfowl traveling on the Mississippi flyway.

The 21 remaining projects President Carter has recommended for deauthorization or modifications have similar problems. We cannot assume that these modifications will go through. The Public Works Appropriations Subcommittee chairman has already said he will probably go ahead and recommend funding all these projects despite the President's recommendations.

So, it is up to us signal our concern about wasteful spending and the need to conserve our limited natural resources. I ask for your support in passing the Emery amendment.

Mr. BYRON. Mr. Chairman, in a recent poll of my constituents in western and central Maryland, residents voiced a strong opinion that Congress be wiser and more judicious in its spending and funding programs. And, I am proud to say that this Congress is doing just that. We are making a serious effort to spend wisely, but not wastefully.

In the interest of wise spending, I rise to support continued funding of the Law Enforcement Assistance Administration. As it continues to show lower crime rates, this program shows itself as being one of the most productive and beneficial for the dollars we invest.

In my district, the Howard County Police Department, under the leadership of Cpl. Daniel M. Davis, 3d, points with pride to a successful program aimed at reducing home burglaries. In those parts of Howard County where the burglary prevention program is in effect, burglaries have dropped dramatically. In those parts of the same county, where the program has not yet been instituted, burglaries have increased.

This program is being funded by a grant from the Law Enforcement Assistance Administration. Its success, I believe, is a most eloquent argument for the continuation of LEAA funding.

I would like to share with my colleagues in the U.S. House, this article on the Howard County Police Department's burglary prevention program by Michael J. Clark in today's Baltimore Sun:

HOWARD BURGLAR-BEATERS CLAIM SUCCESS IN ELLICOTT CITY

(By Michael J. Clark)

The Howard County Police Department is claiming "unqualified success" in decreasing the number of residential burglaries in Ellicott City as a result of a special burglary prevention program the department has operated since last June.

Cpl Daniel M. Davis 3d, commander of the county force's "Target Burglar" section, said yesterday that the special team's "crime prevention efforts in Ellicott City have begun to pay off, and I definitely believe our program can successfully deter burglaries."

He said that during the first quarter of 1977, reported burglaries in Ellicott City, where the program has operated, decreased by 69 percent in comparison with the first three months of last year. Burglaries dropped from 36 to 11 in the comparative periods, he said. The decline was noticeable as far back as last fall, he said, but the sharpest drop-off has come since mid-December.

However, in Columbia, where the team has not operated yet, burglaries increased during the same three-month period by 33 percent, or from 56 to 75.

The special burglary prevention unit is being financed by a $117,000 yearly grant from the federal Law Enforcement Assistance Administration, supporting the activities of five detectives and a clerk-typist.

Corporal Davis, a 32-year-old Cornell University business management graduate who has been on the police force for six years, said the extensive work his unit has performed in Ellicott City neighborhoods has been considered "menial and unexciting" by some other members of the department.

The unit's detectives, he said, have trudged door-to-door, interviewing residents and giving them recommendations to improve their looks and lighting and even have advised people to "clear away some shrubbery" to better ward off potential burglars.

"The better hardware on the houses deters the amateurs and the kids who commit 50 percent of the burglaries," he said.

Furthermore, the unit has made 32 presentations to community groups about methods to protect their homes. It has also let the department's engraving kits to area residents, asking them to mark their driver's license number on their valuables. Such items as coin and stamp collections, jewelry and furs are photographed for identification purposes.

Homeowners participating in the program place stickers on their windows warning that "all items of value on these premises have been marked for ready identification by law enforcement agencies."

To date, Corporal Davis said, 13 neighborhoods have enrolled in the department's "Operation Identification" program to mark valuables and have posted large signs at the main entrances to properties.

"The marked personal items are much harder for a thief to sell because pawn shops won't touch them," the unit's commander said.

Although the unit's detectives have made 28 burglary arrests since last June, Corporal Davis said most of the team's efforts have been directed at working with the community.

"The result has been that many officers have viewed our efforts as some kind of public relations effort with the community. No one in the department has ever had the exposure to modern theories of crime prevention before," he said.

The corporal said his unit now feels vindicated, "since burglaries in Ellicott City have dropped off considerably since mid-December, and the Governor's Commission on Law Enforcement [which funneled the federal aid to the unit] has now permitted us to expand our work into Columbia, where the county's burglary problem is now."

Mrs. HECKLER. Mr. Chairman, I rise to speak in favor of the amendment to House Concurrent Resolution 195, which would partially fund a pension increase of $150 for veterans of World War I, and of which I am cosponsor.

As a member of the Committee on Veterans' Affairs, I have sponsored legislation for many years to provide a service pension to certain veterans of World War I and to their widows. I also supported a compromise measure, which passed the House, to provide a 25-percent differential in pension rates for eligible veterans who are 80 years of age and older. Both of those provisions were designed to aid World War I veterans, most of whom relied upon their pension benefits as their major source of income.

Mr. Chairman, for years these veterans have borne the burden of inflation; it is important that we address their needs and seek to redress them. I believe that the measure now before us is an important step in that direction, both for the 27,000 such veterans in Massachusetts and the more than 800,000 who live in our country today.

Mr. SIKES. Mr. Chairman, the note on the Burlison amendment may well be the most significant of the current session. It will say to Russia and the world that America is or is not prepared to stand strong—to hang tough—in the face of an obvious push for Communist supremacy worldwide.

This vote can reveal America's reaction to the collapse of the efforts to revitalize the SALT II talks between Russia and the United States, a collapse due to Russian arrogance gained through growing military strength.

It is obvious that there must now be greater stress on more adequate military preparedness for America. This does not mean an arms race. It means the Russians are close to superiority and that they will take advantage of this situation. The steady gains by the Russians have left them in position to deal more aggressively in conferences and throughout the world. Only a strengthening of American military posture will change this situation. The Russians apparently feel that this is the time to flex their muscles and they are pressing for advantages worldwide.

The Burlison amendment is only a small beginning but it can be a very significant one.

This is not a time to cut America's defense. Even a modest reversal of the downward trend in America's defense posture will produce a significant reaction abroad and a reawakening of confidence at home. One more backward step will produce just the opposite. The free world wants America to lead. We can lead only if we are strong.

Mr. FRENZEL. Mr. Chairman, today the Congress, in considering its 1978 budget resolution, is taking off into its semiannual jaunt into fantasy land.

I will avoid the specifics of today's resolution, because they have been thoroughly discussed. But I do want to touch upon some of the high points of the fiction that we have created for the people.

It may come as a surprise to know that our national statutory debt limit is still $700 billion. After all, in last year's third resolution we acted to bring it up to $718.4 and today we will undoubtedly jump that up to the recommended $801.1 billion. That is another 11.5-percent increase—mere peanuts for a Federal budget. However, it is precisely $101 billion more than the law allows, and many billions more than prudence would permit. The servicing of our debt has increased 19 percent since our last budget

fantasy, and that interest is the fourth largest item in today's resolution.

This year's deficit, as calculated by the committee, is the source of some pride to some Members because it is supposedly based on more realistic economic projections than the President's. I applaud this, but I find little joy in a 1978 deficit of $64.3 billion.

Much of the program initiation designed by our new administration to combat our economic situation is in this bill. So-called stimulus items in it are: $5.9 billion for 750,000 public service jobs, $1.7 billion for countercyclical assistance, $3.1 billion for accelerated public works, and $2.4 billion for special employment assistance. There simply is not time for me to dissect each of these expenses, but even a cursory glance tells us that the public works jobs will cost about $25,000 per job per year in projects taking from 3 to 5 years. The countercyclical grants-in-aid will, as will the public works spending and, to a certain extent, the public service jobs spending, be used heavily for replacement of State and local funds which would have been spent anyway.

In short, these programs may be useful but they are inappropriate for our current economic situation. Because the spending will occur over the next 1½ years, these programs will give little immediate help. This kind of stimulus was not needed 3 months ago when it was proposed—nor when the President withdrew his rebate—and it is not needed now.

I will be supporting a number of amendments intended to inject a smidgen of reality into this exercise. The most significant will be the Latta amendment to reduce individual taxes by 10 percent and to reduce next year's debt by spending reductions of $36 million.

Unless this resolution is substantially amended, I urge that it be defeated. We simply cannot lay deficit on top of deficit, without contributing to a serious increase in an already much too high rate of inflation.

The Congress has an unsurpassed reputation for appropriating more than it is willing to raise. Sooner, I hope, or later, the people are going to catch on to Congress lack of fiscal responsibility. The vote on this resolution and on the Latta amendment may well be the people's best evidence on fiscal responsibility, or irresponsibility.

Mr. STAGGERS. Mr. Chairman, I regret that I am not able to deliver these words in person, but by the time the amendment on which I now rise in support comes up for a vote, I will be in my home State of West Virginia at the Baker Veterans' Administration Center in Martinsburg.

This center provides many much needed services for veterans of my home State, Ohio, Pennsylvania, and is to be expanded and modified to improve the available services.

But just as this center provides a needed service, so also does the amendment offered by my friend from California, GLENN ANDERSON.

This amendment seeks to increase the veterans section of this first concurrent resolution on the budget by $500 million. The money could be utilized to fund a $50 pension to those men and women who served our country in its time of need and now find themselves in need.

I gladly cosponsored a bill, H.R. 55, to provide a much needed monthly pension of $150 for these veterans of World War I. There are 9,000 in my State alone. Since that time of initial introduction, 160 Members of this Congress have joined with Congressman ANDERSON and myself in cosponsorship.

I urge my many friends and colleagues to recognize the urgency of this amendment and pass this amendment. Our veterans deserve no less.

Mr. SEBELIUS. Mr. Chairman, I wish to address myself to function 350, agriculture, of the first concurrent resolution on the budget—fiscal year 1978 House Concurrent Resolution 195.

As reported by the Budget Committee, this agriculture budget outlay figure was $2.88 billion, which was $547 million more in outlays than President Carter's budget request.

On Monday, the first amendment to House Concurrent Resolution 195, offered by Mr. GIAIMO, increased among others, function 350 from $2,880,000,000 to $4,395,000,000, which was a $1,515,000,000 increase.

Mr. GIAIMO made the following statement in support of the increase for the agriculture budget:

Mr. GIAIMO. Mr. Chairman, I offer a Budget Committee amendment to the first budget resolution for fiscal year 1978 to cover reestimates of commodity program expenditures in the agriculture functional category. The amendment increases outlays for the agriculture function and the budget resolution total by $1,515 million. This change is necessary to accommodate recent administrative actions and changes in the economy which will require payments to be made under current law.

The committee was aware during its markup that some adjustment would have to be made for this program, but deferred action until events settled down and a reliable estimate could be developed. Among other things, during committee markup, the administration was in the process of presenting its farm policy recommendations to the Congress. I have discussed this matter several times with the gentleman from Washington, the distinguished chairman of the House Agriculture Committee, and his staff, and I have also talked about it to Director Lance of the Office of Management and Budget.

The administration has now submitted a revised estimate for this program, which has been reviewed by the Congressional Budget Office and the committee staff. This increase assumes that administrative actions to extend wheat loans—the reseal program—to expand storage facility loans, and to increase price support levels for wheat, feedgrains, and dairy will require additional expenditures. Further, it is assumed that deteriorating economic circumstances for commodities, such as wheat, will require larger loans and payments.

I wish to emphasize that the amendment addresses only payments expected to be made under current law. It assumes no legislative changes for 1977 crops. Payments made for this program under current law are mandatory. There is no choice. It was just a matter of developing a reliable estimate, which I believe we now have.

The Budget Committee, in my opinion, has addressed only one part of the congressional budget equation—that is, the President's recommendation. The President revised his Agriculture budget after the Budget Committee reported House Concurrent Resolution 195, and the first amendment taken up on the floor responded to that increase of President Carter's.

What about the Agriculture Committee proposals? The Agriculture Committee forwarded to the Budget Committee the following recommendation regarding target prices, loan levels, and related programs on March 15, 1977:

I. PRESIDENT'S BUDGET REQUESTS FOR EXISTING PROGRAMS WHICH REQUIRE REENACTMENT OR MODIFICATION OF AUTHORIZING LEGISLATION FOR FISACL YEAR 1978

Major issue or program	President's request		Committee recommendation		Comment
	Budget authority	Outlays	Budget authority (difference)	Outlays (difference)	
* * * * * * *					
C. AGRICULTURE (350)					
1. Commodity Credit Corporation—Price support and related operations (12-4336-0-3-351).	$1,234,342,000	$866,799,000	----------	+$1,467,400 3,325,000	The committee has recommended a range of figures based upon its best judgment of the outlays likely to occur under existing programs and the alternate types of legislation that it considers most probably will be enacted. Listed below is an explanation of the assumptions made for each of the operations of CCC that resulted in the committee's range of increases.
(a) Dairy		163,700,000	----------	+216,900,000	Recommended outlays based upon legislation providing for 85 percent of parity.
(b) Feed grains		230,900,000	----------	+114,100,000 969,100,000	Recommended 2 alternatives: (a) assumes no legislation which would affect 1977 crop; (b) assumes legislation affecting the 1977 crop which sets the target price at the estimated cost of production using average acquisition values for land and a loan rate based on the same ratio to the target price as under the current program. This resuits in a target price for corn of $2.20 and a loan rate of $1.94. Both alternatives assume a 50 percent increase in disaster payments based upon the unusual weather pattern in recent months.

I. PRESIDENT'S BUDGET REQUESTS FOR EXISTING PROGRAMS WHICH REQUIRE REENACTMENT OR MODIFICATION OF AUTHORIZING LEGISLATION FOR FISCAL YEAR 1978—Continued

Major issue or program	President's request		Committee recommendation		Comment
	Budget authority	Outlays	Budget authority (difference)	Outlays (difference)	
(c) Wheat		143,300,000		(a)+553,700,000 (b)1,556,700,000 (c)856,700,000	Recommended 3 alternate assumptions: (a) assumes no legislation affecting the 1977 or 1978 crops; (b) assumes legislation basing target price and loan rates on cost of production for both the 1977 and 1978 crops (a target price of $3.15 for 1977 and $3.34 for 1978, and a loan rate of $2.86 for 1977, and $3.03 for 1978); (c) assumes new legislation affecting the 1978 crop but not for the 1977 crop. Under all 3 assumptions there was included an amount for an increase in disaster payment activities based upon the recent unusual weather activity and an increase in outlays as a result of a fiscal year 1978 wheat reseal program to encourage continued storage of surplus wheat on the farm. The reseal program would reduce receipts from repayment of prior year loans and add interest and storage costs to CCC for those loans.
(d) Cotton		125,700,000		+47,800,000	Recommended an increase based upon an anticipated 50 percent increase in disaster payments. The committee also considered the same alternatives as stated above for feed grains but considers that possible legislation basing target prices and loan rates on cost of production should have no effect on program costs since market prices should exceed target prices.
(e) Peanuts		62,400,000		+51,500,000	The recommendation is based on a continuation of the acreage allotment for the 1978 crop at the current level of 1.6 million acres instead of the President's budget assumption that it would be reduced to 1 million acres.
(f) Rice		117,000,000		+89,500,000	Assumes a continuation of the current program for fiscal year 1978 but recommends an increase in program costs based upon March 1978 revised budget projections by the USDA.
(g) Tobacco		−37,700,000			No change.
(h) Wool and mohair		3,300,000		+49,000,000	Recommends an increase based upon new legislation which would establish support price at $1.20 per pound (90 percent of parity) in lieu of $0.72 per pound for wool produced in calendar year 1977.
(i) CCC export credit sales program		−2,500,000		+231,500,000	Recommends an increase based upon projections that because of high carryover stocks the gross credit outlays for fiscal year 1978 would be $1 billion, the same as in fiscal year 1977, and would not be reduced by $250 million as estimated in the President's budget.
(j) Farm storage facility loan program		−3,000,000		+112,400,000	Recommends an increase based upon an expansion of the program to provide additional farm storage facilities for the storage of grain under a reseal program as reflected in recent statements of the administration.
(k) Soybeans					No change.
(l) All other programs		98,900,000		+1,000,000	Recommended an additional $1 million for dairy indemnity program contingencies.
*	*	*	*	*	* *

At this time both the House and Senate Agriculture Committees are marking up their farm bills. The Senate has a provision in its bill—on which the full committee has voted—raising target prices and loan levels for the 1977 wheat crop. The Subcommittee on Livestock and Grains has also reported to the full committee on the House side its recommendations for increases in target prices and loan levels for the 1977 wheat and feed grains crop. That matter will be taken up by the full committee this week.

Thus, I take this opportunity to place the Members on notice that in acting on House Concurrent Resolution 195 without waiting for the reporting of the farm bill by the House and Senate Agriculture Committee they foreclose an intelligent discussion of the Budget Committee's recommendation for a budget target for function 350—agriculture, incorporating President Carter's latest revisions but not your own congressional legislative committee recommendations for 1977 or 1978 crop costs.

I submit to you that House Concurrent Resolution 195, fortunately, only sets "targets." And, I am fully aware that at least in 15 instances, budget limitations have been waived in this session on the floor of the House with respect to legislation which would have exceeded budget ceilings set by the House.

Most certainly, in my opinion, the farm bills will contain proposals increasing target prices and/or loan levels for 1977 crops, and all Members should be on notice of this prospective action as it relates to budget ceilings.

I fully expect that some Members at that time will raise questions about such proposals—as is their right. But, also, I fully expect that the committee will seek and obtain the necessary waivers of the Budget Act provisions to meet the serious needs of our Nation's farmers—especially our wheat farmers who are beset by drought, low commodity prices, and high production costs.

President Carter's proposal for 1978 crops does not help our farmers this year. As our farmers tell us, "the future is now." If the farmers do not get help for their 1977 crops, their future as farmers is all but eliminated.

Please keep the foregoing in mind when considering House Concurrent Resolution 195 and when we bring our farm bill to the floor.

AMENDMENT OFFERED BY MR. GIAIMO

Mr. GIAIMO. Mr. Chairman, I offer a technical amendment, which is in order under the Budget Act to conform the aggregates to action taken on prior amendments.

The Clerk read as follows:

Amendment offered by Mr. GIAIMO: In the matter relating to the recommended level of Federal revenues strike the amount and insert in lieu thereof $398,094,000,000";

In the matter relating to the amount by which the aggregate level of Federal revenues should be decreased strike the amount and insert in lieu thereof "$1,073,000,000";

In the matter relating to the appropriate level of total new budget authority strike the amount and insert in lieu thereof "$505,656,000,000";

In the matter relating to the appropriate level of total budget outlays strike the amount and insert in lieu thereof "$466,732,000,000";

In the matter relating to the amount of the deficit strike the amount and insert in lieu thereof "$68,638,000,000";

In the matter relating to the appropriate level of the public debt strike the amount and insert in lieu thereof "$794,968,000,000".

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, strike the amount and insert in lieu thereof "$94,968,000,000."

Mr. GIAIMO. Mr. Chairman, under the Budget Act it is in order to offer a technical amendment to conform the aggregates to actions which have been taken. Now, there have been many amendments offered here. The amendments were clearly explained and they defined the amounts of money which were added to or removed from the first budget resolution.

But, there are mathematical inperfections in some of the amendments that deducted from or added to the original base figure, as well as in other amendments that deducted or added to amendments for which there were substitutes, or perfecting amendments. Now, it is essential—and the Budget Act provides—that this kind of amendment, which is purely technical in nature, will make the necessary mathematical corrections

to make the numbers conform to the intentions as expressed by the votes today. That is what the amendment provides.

Mr. LATTA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have checked this amendment, and we agree with it. It is a technical, mathematical amendment.

Mr. CEDERBERG. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Michigan.

Mr. CEDERBERG. Mr. Chairman, I witnessed this exercise, and as one who was involved in putting the Budget Committee together, and had serious reservations about the effectiveness of the Budget Committee, I think we have proved conclusively tonight—yesterday and today—that it is time to get rid of the Budget Committee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. GIAIMO).

The amendment was agreed to.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, since being granted the honor to serve on the Budget Committee 2 years ago, I voted for past budget resolutions. I have attempted to persuade Members of the House to vote for past budget resolutions, and my attempts to so persuade them were based upon the intention of the budget process. In the last 2 days, yesterday and today, we have seen an utter and complete perversion and bastardization of the budget process. If, by some miraculous parliamentary maneuver, that terrible damage can be undone before the final vote, then I have got another option; but unless that can be accomplished, I have no choice but—for the first time in my service on the committee—to vote against this first concurrent budget resolution.

Mr. OBEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to ask the House, if this resolution is still in its present form when the final vote comes, to vote against it. I, in committee and on the floor, voted against money for programs I believe in, in order to be fiscally responsible, in order to try to bring to the House a bill which is fairly balanced.

If I am to impose discipline upon myself—and this is the whole point behind the budget process—then I have a right to expect other Members to do the same thing. But, I think we ought to look at what happened over the last 2 days.

Over the last few days we took out the rebate. We have left in many superfluous, gratuitous and unasked for items. We have added $4 billion to the Pentagon budget.

I think we ought to ask how we have handled committee functions in this bill. The House authorizing committees asked for $32 billion for natural resources and energy. The Budget Committee rejected one-third of that amount. The Committee on Education and Labor asked for $30 billion, and the Budget Committee rejected 25 percent of that amount. For Commerce and Transportation, the authorizing committees asked for $23 billion. We rejected 10 percent of that amount. For the Committee for Community Development, we were asked to spend $9.7 million. We rejected 17 percent of that amount. For Defense we were asked to spend $121 billion. We rejected 4 percent of that amount. On the floor, all but $1 billion of that 4 percent was restored.

Many people who voted to restore it are people who would not vote for this budget resolution no matter what was in it, because they do not like the deficits, or so they say.

My grandfather told me that if you buy the groceries, you pay the bill. I am not a sadist, and I am not about to carry the load for a package which somebody else put together.

I would like to say something else too. I probably should not say this, because I know the chairman would not want me to say it. But I am going to say it anyway.

This bill has been out of committee 28 days. I know the chairman of the Committee on the Budget has been down to the White House three separate times since this bill came out of committee. I know he has talked to the director of the Bureau of the Budget. I also know that not once did either of them raise with the chairman of this committee directly their concerns about the cut in the defense budget which has been referred to time and time again on this floor.

Yet we are told that the President is unhappy with the defense cut. It seems to me that, out of common courtesy, if the President is unhappy, he owes it to the committee and he owes it to the chairman to say so directly and openly.

I am going to vote against this, and I urge the Members to do so also because, as I indicated, 17 percent restraint on community development, 25 percent restraint on education and training, 33 percent restraint on national resources and energy, and 1 percent restraint on defense is simply not a balanced budget approach. We have not had restraint by the people who preach it the loudest. And unless we can do something about it yet tonight. I would urge the Members to vote against this resolution so that we can address it again when the House is in a more serious mood.

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Missouri (Mr. ICHORD).

Mr. ICHORD. I thank the gentleman from Wisconsin (Mr. OBEY), for whom I have the greatest respect because he has made a valiant effort in this body to legislate honestly and with integrity.

I do not know whether he can do it or not, but the gentleman has tried. But in my own mind I feel this way: I would say to my good friend, the gentleman from Wisconsin (Mr. OBEY), that he is being very vindictive when he says he is going to vote against this, because let me point out what is the only significant increase that has been made.

Mr. OBEY. Mr. Chairman, I reclaim my own time, and I refuse to yield further.

Mr. ICHORD. This refers to the defense budget and the President's request.

The CHAIRMAN. The gentleman from Wisconsin (Mr. OBEY) has the floor, and he controls the time.

Mr. OBEY. Mr. Chairman, if the gentleman from Missouri (Mr. ICHORD) or any other Member wants to attack me for being vindictive, that Member can do it on his own time.

All I am suggesting is that this is not the kind of a package which I campaigned for back home with my taxpayers.

Mr. Chairman, I would urge that the Members look at this as I have.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. OBEY) has expired.

Mr. GIAIMO. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I know it is late. I hate to take this time, but I do think we have an important decision to make tonight. That decision is whether Congress can discipline itself and live within a budget process. That is what is at stake here tonight. If we have to stay here a little while longer, I am ready to do that, and I hope the rest of the Members will be here so we can do the work we are paid to do. I will say to my friend, the gentleman from New York (Mr. PIKE) and other Members that this is part of the work we are paid to do with the salary increase we received this year.

It is essential that the budget process works. If we make a travesty of the process, we are not going to be given any gold stars by our constituents. Believe me, our constituents are not as concerned, as some of us would think, about congressional pay; but they certainly are concerned about whether we do our jobs down here and do what we think is right for the country.

This budget process has to work. We made a commitment when we adopted this process and when we told Presidents they could not impound funds and set budget priorities unilaterally. We told them that we would do it here.

Let us just think of what we have done here. We have beefed up the budget deficit from $64.2 billion to almost $68.6 billion. What some of the Members may not know is that this budget deficit has inherent in it a legislative reform package that we must enact. If we do not enact it, we are going to have to add $2 billion more to the budget deficit. That, I will say to my colleagues, would put it over $70 billion.

We hear a great deal of talk here about budgets from our friends on the minority side, but they do not vote for budget resolutions to any great degree. They have not voted for them before in the past, either in committee or on the floor, and I can assure my colleagues that they will not do so tonight, based on their past performances.

There are also some conservative Democrats in this House who do not vote for

budget resolutions as we would hope they would. It is the more liberal Democrats who have supported the budget process in past years in the Congress.

It is these liberal Democrats who have supported the budget process in the Congress in past years who have asked for some fair treatment and for a sharing of the burden of budgetary belt-tightening. They have said that it is not right to eliminate tax rebates that would go to the little people of America but keep in the resolution business tax relief that would benefit the business community. They believe that it is not fair to hold up on the parts of the economic stimulus package that would help the unemployed, but then provide goodies all along the line for special interest groups.

They also think that the Defense Department, which is clearly the only agency of Government that receives massive budget increases year after year, should not share the burden. They do not think it is fair to say that the Defense Department's budget cannot be reduced by one single dollar. They are saying, "Let us all share in this difficult process of holding down the deficit."

Mr. Chairman, that is why we are here tonight, and now we are asking our friends here to vote for this first budget resolution for fiscal 1977, even though they may be most unhappy about it. I am asking them to vote for it, although I realize they may be most unhappy. Then we will try to work out these problems in conference.

Mr. Chairman, there has been a suggestion made that we offer a substitute resolution here, restoring this budget to its original set of figures. That would be the original resolution that we brought in here to the Members. We could ask them if they would accept it if we brought it in with its original dollar figures. There have been suggestions made that this could be a compromise gesture at this last point, and this would be done in order to try to preserve this budget process and make it possible, perhaps, to pass this first budget resolution.

If we do that, it is going to open the measure up to the very same amendments that had been offered before. We might move to limit time and get a vote on these amendments. It would include a vote on the Burleson amendment, on the Pike amendment, and perhaps on other amendments offered today that could be reoffered.

I hesitate to do that, but if the Members wish, we could offer that amendment and provide for a time limitation so as to strictly limit debate. If we want to preserve the budget process, we could go back to the original figures that we had—with a $64.2 billion deficit—and perhaps work out some compromises in the areas of disagreement that we have debated so hard on here today. We could then, perhaps, work those compromises out in the Senate. It would take a little more time, but it might well preserve this budget process.

Mr. Chairman, I am very fearful that if we do not do something like that, this budget resolution may fail and we will have to go back to committee and start all over again, with very little time before our May 15 deadline.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. GIAIMO) has expired.

(On request of Mr. FLOWERS and by unanimous consent, Mr. GIAIMO was allowed to proceed for 2 additional minutes.)

Mr. FLOWERS. Mr. Chairman, will my friend, the gentleman from Connecticut, yield?

Mr. GIAIMO. I yield to the gentleman from Alabama.

Mr. FLOWERS. Mr. Chairman, I plead guilty to being one of those Members who suggested this alternative to him. I did so for what I think is a very good reason, and that is the preservation of this process.

I came down on this issue as the gentleman from Maryland and the gentleman from Wisconsin came down on it, but for different reasons.

I think it is a menagerie that we have exhibited here in the last couple of days. My friends on the other side of the aisle have not exactly shown the kind of responsibility that I hope we would if we were in the minority here.

I am not casting aspersions on anyone's intent or intestinal fortitude or whatever, but I say this to the Members of the House on both sides: When we have some really tough votes around here, where are we going to be if we cannot even have a little process like this proceed as it should?

What about the energy package, which will be a tough one to tackle? How many people have the guts to tackle that when we have shown what we have shown here during the last couple of days?

I have supported some Members in the past on legislation. I voted along with some Members in the past and voted against the position of some Members in the past; but I think we have to restore an orderly process here in considering legislation.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, if this can be accomplished, if we can get back to the original resolution that we brought out on this floor, despite my deep and abiding concerns about the inadequacies of the resolution, I am prepared to support it, Mr. Chairman, because that one, at least made some sense, but what is before us now does not make a damn bit of sense.

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. WRIGHT), the majority leader.

Mr. WRIGHT. Mr. Chairman, the suggestion just offered by the chairman of the committee is a very innovative one. I have never seen it done that way before. It just depends on how satisfied or how dissatisfied the Members of this House may be with what has heretofore been done.

I should think that if the process suggested by the chairman were to be followed, we ought not again open it up all at the same time. That would be imprudent if that were followed through in that way, because of what we might decide.

Mr. Chairman, how many of the Members would rather see it the way it came out of committee, without any changes, with the hope that those who were ready to go to the conference would try to bear in mind the responsibility of the membership, or would the Members rather see it just as it is right now?

I do not know, but let us look around now, Mr. Chairman. This is a strange arrangement.

Let me just ask the Members that question.

POINT OF ORDER

Mr. BAUMAN. Mr. Chairman, I make a point of order.

The CHAIRMAN. The gentleman from Maryland will state his point of order.

Mr. BAUMAN. Mr. Chairman, under the rules of the House, only the presiding officer can put a question to the body.

The CHAIRMAN. The Chair will state that the gentleman is correct. The gentleman is correct that we will proceed under the rules of the House.

The Chair recognizes the gentleman from Massachusetts (Mr. O'NEILL), the Speaker of the House.

Mr. O'NEILL. Mr. Chairman, I have not had a chance to talk with the chairman of the committee on this question, and surely I would not want to encroach upon his rights if I did.

The hour is 12:30 in the morning. We have been debating this item for 2 days. Some of the Members are pleased with what has happened. Some of them feel saddened and feel that those they represent are being treated unjustly.

Mr. Chairman, this is a democratic system. This is the way we operate, but it is now 12:30 in the morning. I have been a legislator for 40 years, and I have seen that every time that it is unwise to legislate beyond the stroke of midnight.

Truly, I think it would be a mistake for the House of Representatives, Mr. Chairman, at this time to bring up the amendment you mentioned. We set rules earlier in the year that on Mondays we would quit at 5:30 p.m. and on Tuesdays we would quit at 5:30 p.m. and on Wednesdays we would work until we finished the day's legislation. I think we have come to the end of the day's legislation.

All we are trying to do here is set targets. Some Members may not approve of those targets but there will be a resolution with other targets later in September, if this passes today.

If we do not pass the legislation along this line what would happen? Any legislation with entitlements cannot be

brought to the floor of the Congress. For example, the black lung bill, just using that as an example, could not be brought up before the Congress unless it went to the Committee on Rules for waivers of points of order.

No appropriations bill can be brought before the Congress under the rules that we have set up unless we have first passed this preliminary version of the budget.

I believe we ought to vote now and let the chips fall where they may. If it passes well and good, if it does not pass, I would hope that the Committee would bring the legislation back to the floor next week. But I do hope we would go on and vote for the final passage of this bill tonight.

Mr. GIAIMO. Mr. Chairman, I move that the Committee do now rise and report the concurrent resolution back to the House, with amendments, with the recommendation that the amendments be agreed to and that the concurrent resolution, as amended, be agreed to.

The CHAIRMAN. The question is on the motion offered by the gentleman from Connecticut (Mr. GIAIMO).

The motion was agreed to.

Accordingly the Committtee rose; and the Speaker having resumed the Chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the concurrent resolution (H. Con. Res. 195) setting forth the congressional budget for the U.S. Government for the fiscal year 1978, had directed him to report the concurrent resolution back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the concurrent resolution, as amended, be agreed to.

The SPEAKER. Pursuant to section 305(a), title 3, Public Law 93-344, the Congressional Budget Act of 1978, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the concurrent resolution.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 84, nays 320, not voting 29, as follows:

NOT VOTING—29

Boggs	Jones, N.C.	Roe
Derrick	Koch	Rostenkowski
Diggs	LaFalce	Russo
Dodd	Leggett	Sikes
Evans, Del.	Madigan	St Germain
Fish	Meyner	Staggers
Forsythe	Milford	Teague
Fraser	Moss	Walgren
Gradison	Myers, Ind.	Young, Alaska
Harkin	Price	

The Clerk announced the following pairs:

Mrs. Meyner with Mr. Teague.
Mr. Staggers with Mr. Sikes.
Mr. Rostenkowski with Mr. Milford.
Mr. Moss with Mr. Russo.
Mr. Price with Mr. Dodd.
Mr. Leggett with Mr. Harkin.
Mr. Fraser with Mr. Jones of North Carolina.
Mr. Diggs with Mr. LaFalce.
Mr. Koch with Mr. Derrick.
Mrs. Boggs with Mr. Evans of Delaware.
Mr. Roe with Mr. Fish.
Mr. St Germain with Mr. Gradison.
Mr. Walgren with Mr. Forsythe.

Mr. GONZALEZ changed his vote from "nay" to "yea."

Mr. LUKEN changed his vote from "yea" to "nay."

So the concurrent resolution was rejected.

The result of the vote was announced as above recorded.

POINT OF ORDER

Mr. BAUMAN. Mr. Speaker, a point of order.

The SPEAKER pro tempore (Mr. MCKAY). The gentleman will state it.

Mr. BAUMAN. The Chair made no mention of a motion to reconsider. Is a motion to reconsider in order?

The SPEAKER pro tempore. The gentleman will be informed that on this resolution there is no motion in order for that purpose under the Budget Act.

Mr. BAUMAN. I thank the Speaker.

GENERAL LEAVE

Ms. HOLTZMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous material on the concurrent resolution just voted on.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

PERSONAL EXPLANATION

Mr. FOLEY. Mr. Speaker, on Wednesday, April 27, on rollcall 156, I was unavoidably not recorded. If I had been present, I would have voted no.

PERMISSION FOR SUBCOMMITTEE ON LEGISLATION AND NATIONAL SECURITY OF COMMITTEE ON GOVERNMENT OPERATIONS TO SIT DURING 5-MINUTE RULE ON THURSDAY, APRIL 28, 1977

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Legislation and National Security of the Committee on Government Operations be permitted to sit on tomorrow, Thursday, April 28, 1977, while the House is proceeding under the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, can the gentleman tell us whether there will be a markup of the bill, or is this just for hearings?

Mr. BROOKS. In the morning, we hope to have a markup of a bill, but in the afternoon we will just be having a hearing. This has been cleared with the ranking minority member on the committee.

Mr. ROUSSELOT. Can the gentleman tell us what the bill is that is so important?

Mr. BROOKS. It is a bill. It is a very interesting bill. The gentleman will like it.

Mr. ROUSSELOT. If it is that good I will like it. The gentleman cannot give us any idea of what it is?

Mr. BROOKS. The gentleman is a very gracious man.

Mr. ROUSSELOT. The gentleman cannot give us any idea of what the bill is?

Mr. BROOKS. We have got several bills that we may have a hearing on. One bill has been set at 3 o'clock, and is to hear Senator KENNEDY. It is a bill to provide for a publication of those programs which are available to public bodies, and put them in one collated publication. Those are all the public programs, and we are going to have a hearing on that later. We have not passed that bill yet.

Mr. ROUSSELOT. But the gentleman is not going to mark it up?

Mr. BROOKS. No.

Mr. ROUSSELOT. So it is for hearings only?

Mr. BROOKS. That is correct.

Mr. ROUSSELOT. I appreciate my colleague's reply. The gentleman does not plan to meet in the afternoon then?

Mr. BROOKS. 3 o'clock.

Mr. ROUSSELOT. I thank the gentleman, and I withdraw my reservation of objection.

Mr. MILLER of Ohio. Mr. Speaker, reserving the right to object, I would ask for a point of information. I understood the gentleman's statement was that the committee would meet tomorrow. Is that Thursday or Friday—since it is now 1 a.m. Thursday, the 28th.

Mr. BROOKS. Well, technically, really, it would be today.

Mr. MILLER of Ohio. I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON HUMAN RESOURCES OF COMMITTEE ON GOVERNMENT OPERATIONS TO MEET THURSDAY, APRIL 28, 1977

Mr. FOUNTAIN. Mr. Speaker, I ask unanimous consent that the Subcommittee on Human Resources of the Committee on Government Operations, which is now engaged in markup, be able to continue today from now on and in the afternoon on the countercyclical revenue-sharing bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

THIRD REPORT OF UNITED STATES SINAI SUPPORT MISSION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–130)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on International Relations and ordered to be printed:

To the Congress of the United States:

I am pleased to transmit herewith the Third Report of the United States Sinai Support Mission. This report describes the manner in which the Mission is continuing to carry out its peacekeeping responsibilities by operating an early warning system in the Sinai, as called for in the basic agreement between Egypt and Israel signed on September 4, 1975. This report is provided to the Congress in conformity with Section 4 of Public Law 94–110 of October 13, 1975.

The report emphasizes the successful completion on February 22, 1977, of one full year of operations. With the completion of initial construction activity, the Sinai Field Mission has had an opportunity to analyze in detail various elements of the Mission's activity. In particular, attention has been directed to improving operating procedures, to upgrading equipment and to reducing personnel through the introduction of advanced technology.

The parties to the agreement continue to affirm their satisfaction with the role of the United States in the Sinai and the fair way in which the Sinai Support Mission has discharged its responsibilities for the early warning system.

As our initiatives to help the parties to the Arab-Israeli dispute move toward a resumption of negotiations, it is important that the United States continue to fulfill its commitments. As long as the Sinai Support Mission is able to make a positive contribution to these efforts, I will urge that the Congress continue its support for this important mission.

THE 12TH ANNUAL REPORT OF DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Banking, Finance and Urban Affairs;

To the Congress of the United States:

I am transmitting herewith the Twelfth Annual Report of the Department of Housing and Urban Development, describing its activities for the calendar year 1976.

This Report covers a period of time prior to the commencement of my term of office.

JIMMY CARTER.

THE WHITE HOUSE, *April 27, 1977.*

ESTABLISHING FOR THE UNITED STATES A STRONG AND EFFECTIVE NUCLEAR NONPROLIFERATION POLICY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–131)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on International Relations and the Committee on Science and Technology and ordered to be printed:

To the Congress of the United States:

The need to halt nuclear proliferation is one of mankind's most pressing challenges. Members of my Administration are now engaged in international discussions to find ways of controlling the spread of nuclear explosive capability without depriving any nation of the means to satisfy its energy needs. The domestic nuclear policies which I have already put forward will place our nation in a leadership position, setting a positive example for other nuclear suppliers as well as demonstrating the strength of our concern here at home for the hazards of a plutonium economy. Today I am submitting to the Congress a bill which would establish for the United States a strong and effective non-proliferation policy.

This bill relies heavily upon work which the Congress has already done, and I commend the Congress for these valuable initiatives. I look forward to working with the Congress to establish a strong, responsible legislative framework from which we can continue strengthened efforts to halt the spread of nuclear weapons.

Among our shared goals are: an increase in the effectiveness of international safeguards and controls on peaceful nuclear activities to prevent further proliferation of nuclear explosive devices, the establishment of common international sanctions to prevent such proliferation, an effort to encourage nations which have not ratified the Non-

Proliferation Treaty to do so at the earliest possible date, and adoption of programs to enhance the reliability of the United States as a supplier of nuclear fuel.

This bill differs from pending proposals, however, in several respects:

1. It defines the immediate nuclear export conditions which we can reasonably ask other nations to meet while we negotiate stricter arrangements. The proposals currently before Congress would impose criteria that could force an immediate moratorium on our nuclear exports, adversely affecting certain allies whose cooperation is needed if we are to achieve our ultimate objective of non-proliferation.

2. It defines additional nuclear export conditions which will be required in new agreements for civil nuclear cooperation. In particular, we will require as a continuing condition of U.S. supply that recipients have all their nuclear activities under IAEA safeguards. I view this as an interim measure and shall make it clear to all potential recipients and to other nuclear suppliers that our first preference, and continuing objective, is universal adherence to the Non-Proliferation Treaty.

3. For the near future, it attempts to tighten the conditions for U.S. nuclear cooperation through renegotiation of existing agreements to meet the same standards as those we will require in new agreements. I believe that this approach will better meet our non-proliferation objectives than will the unilateral imposition of new export licensing conditions.

4. It increases the flexibility we need to deal with an extremely complex subject. For example, instead of requiring countries that want our nuclear exports to foreswear fuel enrichment and reprocessing for all time, it allows us to draft new agreements using incentives to encourage countries not to acquire such facilities. It also permits me to grant exceptions when doing so would further our basic aim of non-proliferation. All new cooperation agreements would, of course, be subject to Congressional review.

This bill is intended to reassure other nations that the United States will be a reliable supplier of nuclear fuel and equipment for those who genuinely share our desire for non-proliferation. It will insure that when all statutory standards have been met, export licenses will be issued—or, if the judgment of the Executive Branch and the independent Nuclear Regulatory Commission should differ, that a workable mechanism exists for resolving the dispute.

Since I intend personally to oversee Executive Branch actions affecting non-proliferation, I do not think a substantial reorganization of the responsibility for nuclear exports within the Executive Branch is necessary. This conclusion is shared by the Nuclear Regulatory Commission.

The need for prompt action is great. Until domestic legislation is enacted, other countries will be reluctant to renegotiate their agreements with us, because they will fear that new legislation might suddenly change the terms of cooperation. If the incentives we offer them to renegotiate with us are not attractive enough, the United States could lose important existing safeguards and controls. And if our policy is too weak, we could find ourselves powerless to restrain a deadly world-wide expansion of nuclear explosive capability. I believe the legislation now submitted to you strikes the necessary balance.

JIMMY CARTER.

THE WHITE HOUSE, *April 27, 1977.*

MRS. GERTRUDE SKINNER, NATIONAL VOLUNTEER OF THE YEAR

(Mr. STOKES asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. STOKES. Mr. Speaker, I have a guest in Washington today who is a very distinguished citizen from Cleveland, Ohio. Mrs. Gertrude Skinner is in Washington, D.C., this week to receive an award as this Nation's Volunteer of the Year. The award is being made by Joint Action in Community Service, Inc.

Mr. Speaker, Mrs. Skinner, who is 70 years of age, and who has five children, 17 grandchildren, and nine great-grand children is a straight "A" undergraduate student at Case Western Reserve University in Cleveland, Ohio. She anticipates receiving her bachelor of arts degree with a major in English in June. This remarkable lady at 70 years of age, is also a leader of the American Association of Retired Persons and an excellent tennis player.

The award which she is receiving has been given to her in recognition of the fact that she has personally helped over 1,500 young men as they returned to Cleveland from Job Corps centers around the Nation. Of the 5,000 dedicated Joint Action in Community Service volunteers who advised young corpsmen across the United States, none were found to match Mrs. Gertrude Skinner.

This dedicated lady was born in Tuskegee, Ala., and is the widow of a Baptist minister. She is a member of the Cleveland Mayor's Crime Commission, a director of the Cuyahoga plan, and an active member of the St. Timothy Missionary Baptist Church.

Mrs. Skinner says that the secret to her success in helping other people is that at 70 years of age, her philosophy is to not ever give up. She has been quoted as saying:

> It saddens me sometimes to see those who have deteriorated to the point where they are breathing but not living, but once in awhile, one man I've worked with will come forward with his eyes shining, then you realize your work was worthwhile.

Mr. Speaker, I am indeed proud of the accomplishments of Mrs. Skinner who is a resident of my congressional district. I am sure that you and my colleagues in the House are equally proud of her accomplishments and that all of us wish her many more years of volunteer service on behalf of her community.

Mr. Speaker, I submit herewith an article which appeared in the Cleveland Plain Dealer on April 24, 1977, on Mrs. Gertrude Skinner:

KEEP TRYING NO MATTER WHAT, NATION'S TOP VOLUNTEER ADVISES

The secret, said Gertrude Skinner, 70, lies in not ever giving up.

"It saddens me sometimes to see those who deteriorated to the point where they are breathing but not living," Mrs. Skinner said. "But once in a while, one man I've worked with will come forth with his eyes shining. Then you realize your work was not for nothing."

On Tuesday, Mrs. Skinner of 12413 Tuscora Ave. NE will be in Washington, D.C., to receive the National Volunteer of the Year award for her eight years with the Job Corps.

She has worked closely with more than 1,500 young Job Corps members, many from her own Glenville neighborhood—setting up contacts with possible employers and easing the switch from high school or unemployment to a job.

But the most important and difficult task for Job Corps counselors, Mrs. Skinner said, is convincing Corps members of their own worth.

"It's salvaging lives," she said, "and that is the most rewarding work in the world."

Mrs. Skinner, a widow, recalled working three years ago with a young man who had no family or close friends and lacked confidence because of a speech impediment. She succeeded in getting him a maintenance job that paid fairly well, she said.

"But once he had the job, it was as if he couldn't believe it. He was so frightened. His supervisor told me, 'I can't baby-sit with this man.'

"I asked if I could just have 10 days with this man. I counseled him every day. I told him he didn't have to worry about what people thought; he didn't have to look elsewhere. He needed only his own strength.

"You should have seen his face when he got the first paycheck! Now I check with him once in a while. He's doing well."

So is Mrs. Skinner. Her five children are grown. She plays tennis, works with the Job Corps and the city's Council for Economic Opportunities and watches the sun rise every day.

REPORT ON STATUS OF FISCAL YEAR 1977 CONGRESSIONAL BUDGET UNDER THIRD BUDGET RESOLUTION

(Mr. GIAIMO asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. GIAIMO. Mr. Speaker, on behalf of the Committee on the Budget, and as called for by the Congressional Budget Act, I am reporting to the House on the status of the fiscal year 1977 congressional budget under the third budget resolution.

Since my last report to the House on March 28, 1977, three changes to the current level for spending and revenues have occurred. The extension of Federal supplemental unemployment benefits has been signed into law (Public Law 95–19), the conference report on the spring supplemental appropriation bill (H.R. 4877) has been ratified by both Houses, and there has been a reestimate by CBO of the level of receipts under current tax law. The accompanying table summarizes these changes to the current level which have transpired since my last notification to the House.

It should be noted that the Office of Management and Budget has transmit-

ted to the Congress a review of spending and revenue estimates for fiscal years 1977 and 1978. This review by OMB primarily addresses the effect of the withdrawal of the $50 rebate proposal and the continued outlay underruns of approximately $6 billion for fiscal year 1977. These estimates may be revised when the midsession review of the budget—which is required under section 602 of the Budget Act—is submitted by the administration on July 15. At that time, a comprehensive review by the two budget committees and CBO will take place and any necessary adjustments to the current level will be made.

As debate continues in both Chambers on legislation of tremendous significance in this fiscal year, notably the Economic Stimulus Appropriation and the Tax Reduction and Simplification Act, we must closely monitor their progress and that of any other spending and revenue measures which would bring the Congress closer to the limits imposed by the budget resolution. Therefore, it is important for us to understand that there is little room for additional legislative initiatives by either the President or Congress not contemplated within the boundaries set forth during this fiscal year.

Thank you, Mr. Speaker.

I include the following:

SUMMARY OF CHANGES TO THE CURRENT LEVEL FOR FISCAL YEAR 1977

[In millions of dollars]

	Budget authority	Outlays	Revenues
Enacted (Mar. 30, 1977)	420,262	401,323	356,500
Entitlement authority and other mandatory items requiring further appropriation action	28	28	
Continuing resolution authority	1,384	1,165	
Changes to the current level:			
1. Revenue reestimate			−500
2. Extension of Federal supplemental unemployment benefits (Public Law 95–19)		+528	
3. Spring supplemental appropriation (H.R. 4877)	+26,826	+7,352	
Current level, Apr. 22, 1977	448,500	410,397	356,000

Note: Detail may not add to totals due to rounding.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE BUDGET,
Washington, D.C., April 27, 1977.

Hon. THOMAS P. O'NEILL, JR.,
Speaker, U.S. House of Representatives, The Capitol, Washington, D.C.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedures which it had adopted it connection with its responsibilities under Sec. 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending. I am herewith transmitting the status report under Sec. 1 of S. Con. Res. 10, the Third Budget Resolution for FY 1977. This report rejects completed action on spending and revenue measures as of close of legislative business, Friday, April 22, 1977.

Sincerely yours,

ROBERT N. GIAIMO,
Chairman.

REPORT TO THE SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1977 CONGRESSIONAL BUDGET ADOPTED IN S. CON. RES. 10—REFLECTING COMPLETED ACTION AS OF APR. 22, 1977

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate level	472,900	417,450	347,700
Current level	448,500	410,397	356,000
Amount remaining	24,400	7,053	8,300

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $24,400 million for fiscal year 1977, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in S. Con. Res. 10 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $7,053 million for fiscal year 1977, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in S. Con. Res. 10 to be exceeded.

REVENUES

Any measure that would result in a revenue loss exceeding $8,300 million for fiscal year 1977, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in S. Con. Res. 10.

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., April 25, 1977.

Hon. ROBERT N. GIAIMO,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for these items contained in the most recently agreed to concurrent resolution of the 1977 budget. The current level estimates are as of close of business April 22, 1977.

The only change from my previous report is the inclusion of the Spring Supplemental Appropriation Bill (H.R. 4877). The conference agreement has cleared both House and Senate.

Sincerely yours,

ALICE M. RIVLIN,
Director.

[In millions of dollars]

	Budget authority	Outlays	Revenues
1. Enacted	420,262	401,851	356,000
2. Entitlement authority and other mandatory items requiring further appropriation action	28	28	
3. Continuing resolution authority	1,384	1,165	
4. Conference agreements ratified by both Houses	26,826	7,352	
Current level	448,500	410,397	356,000
3d concurrent resolution	472,900	417,450	347,700
Amount remaining (under appropriate level)	24,400	7,053	8,300

PARLIAMENTARIAN STATUS REPORT SUPPORTING DETAIL, FISCAL YEAR 1977 AS OF CLOSE OF BUSINESS APR. 22, 1977

[In millions of dollars]

	Budget authority	Outlays
I. Enacted:		
Permanent appropriations and trust funds	211,161	195,232
Offsetting receipts	−55,882	−55,882
Previously enacted (94th Cong., 2d sess.)	265,488	261,796
Enacted this session:		
Urgent power supplemental (Public Law 95–3)	6	6
Energy research and development deferrals (H. Res. 305, 306, and 307)		18
Budget rescission bill, 1977 (Public Law 95–10)	−48	
Urgent supplemental appropriation for disaster relief (Public Law 95–13)	200	200
2d budget rescission for fiscal year 1977 (Public Law 95–15)	−664	−47
Extension of Federal supplemental unemployment benefits (Public Law 95–19)		528
Total, enacted	420,262	401,851
II. Entitlement authority and other mandatory items requiring further appropriation action:		
Function 800—Claims and judgments:		
Estimated requirements	86	86
Offsetting receipts (Indian claims)	−58	−58
Total, entitlement authority	28	28
III. Continuing resolution authority: Labor-HEW items not considered: Function 500—Temporary employment assistance	1,384	1,165
IV. Conference agreements ratified by both Houses: Spring supplemental appropriation (H.R. 4877)	26,826	7,352
Total current level, as of Apr. 22, 1977	448,500	410,397
3rd concurrent resolution	472,900	417,450
Amount remaining:		
Over ceiling		
Under ceiling	24,400	7,053

Note: Detail may not add due to rounding.

PRESIDENT SHOULD LEVEL WITH CONGRESS AND PUBLIC ON HIS REORGANIZATION PLANS

The SPEAKER pro tempore (Mr. McKAY). Under a previous order of the House, the gentleman from Illinois (Mr. DERWINSKI) is recognized for 5 minutes.

Mr. DERWINSKI. Mr. Speaker, in the continuing "Carterization" of the Federal Government, it is becoming increasingly difficult to determine where the streamlining begins and the political motivation ends. If the President means what he says about an open administration, he should level with Congress and the public on his reorganization plans. Instead, he has shown a penchant for piecemeal partisan political moves which

undercut the efficiency of some of the Federal agencies which he hopes to streamline. A flagrant case in point is the administration's reported decision to make a clean sweep at the Civil Service Commission.

Prior to 1956, Civil Service Commissioners, although subject to Senate confirmation, served at the pleasure of the President. Then, based on the recommendation of the House Post Office and Civil Service Committee, legislation was enacted giving Civil Service Commissioners 6-year terms on a staggered basis. The committee's recommendation was based on a comprehensive study it made into the operation and administration of the Commission. The committee report concluded the new law would "achieve for the Civil Service Commission greater independence of action, continuity of top management and freedom from outside influence or domination through the establishment of 6-year overlapping terms of office for Civil Service Commissioners."

Since then, Presidents have respected the spirit of the law. President Kennedy made two appointments in 1961 to fill the seats of two Republican members since one had resigned and the other's term had expired.

President Carter finds himself in a similar situation, but apparently will respond differently. When Chairman Robert Hampton, a Republican and an original Kennedy appointee, retired last January, he had 2 more years to serve on his term. The term of another Republican, Georgianna Sheldon, who is acting Chairman, expired March 1, while Ludwig Andolsek, a loyal Democrat, has 4 years remaining in his term.

Based on her experience and endorsements from the Republican leadership, Mrs. Sheldon should be reappointed to a 6-year term. When Commissioner Andolsek's initial appointment expired, he was given a 6-year reappointment under a Republican administration.

President Carter seems to be speaking with a forked tongue insofar as personnel practices of the administration. The President has emphasized nonpartisan and merit selection. Yet there is a pattern of cronyism in administration appointments and, in this case, a deliberate effort to make the Civil Service Commission a rubber stamp for the administration.

The President should be content to name his own chairman to head the Civil Service Commission. In the process, he would be continuing Presidential compliance with the spirit of the 1956 law.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. McKINNEY), is recognized for 10 minutes.

Mr. McKINNEY. Mr. Speaker, my support for the congressional budget process as a necessary fiscal management tool is well known in this Chamber. However, I only wish I could place similar trust in the House legislative scheduling process which continues to reflect an arbitrary and almost whimsical unpredictability. Based on the skimpy, and apparently unreliable, floor schedule information we receive, I am forced to juggle my time between constituents, committees, phone calls, my staff, floor sessions and—heaven forbid—my personal time—never knowing what news the next legislative bell or whip call will bring.

Given this unacceptable situation, the inevitable occurred yesterday. Relying on the representations of both Democratic and Republican leadership spokesmen that Tuesday's session would entail only general debate, I made a personal commitment which could not be canceled. I simply cannot ignore the many other demands on my time to hover outside the Chamber door awaiting the leadership's next sudden change of heart. I respectfully request a more reliable legislative schedule and a more thorough and timely distribution of any subsequent changes.

Had I known that amendments to the first budget resolution were to be considered yesterday, in addition to the general debate, I would have voted against each change except that offered by my colleague Mr. GIAIMO to strike funds no longer needed to finance the scuttled rebate program. I would have opposed the addition of $1.5 billion in budget authority for farm price supports because it reverses the progress made by the previous administrations toward freeing our agricultural markets from Government interference. In addition, I would have opposed the deletion of business tax reduction funds because public works and public service jobs mean nothing to the economic recovery of the Northeast unless we stimulate industrial plant location, relocation, and expansion.

Finally, I would have strenuously opposed amendments offered to strike congressional, executive, and judicial pay raises from the budget. In this regard, I would like to associate myself with the remarks of the distinguished House majority leader, Mr. WRIGHT, who eloquently defended the merits of the raise as well as the shortcomings of the now-altered procedure by which it was enacted.

I only wish to add my own thoughts as to the pernicious effect of "pay raise politics" and other meaningless political posing on the budget process. Believe me, I do not want or need anyone to fight my battles for me. My views on the pay raise issue are well known. But yesterday's vote was a hollow symbolic gesture which threatens to undermine the integrity and usefulness of the budget process. Far from being the direct vote on the raise I have joined my colleague, Mrs. FENWICK in demanding, the deletion of $7 million from the general Government function category merely reduces that aggregate amount and virtually guarantees that we will authorize and appropriate moneys in violation of the budget resolution.

The amendments' authors would have us believe that doctoring the budget in this fashion will deny us salaries already awarded by statute. On the contrary, the proper authorizing and appropriating committees must make those funding decisions with the budget as a nonbinding guide. By bringing the divisiveness and acrimony of this substantive issue—the appropriate congressional pay scale—to bear on the budget process we endanger its legitimate fiscal function and make it the scapegoat of our frustration. It was just this type of undisciplined approach to budgeting which doomed previous attempts at congressional accounting. I had hoped for better in this Congress. I still do.

MORE GASOHOL RESEARCH NEEDED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Montana (Mr. MARLENEE) is recognized for 5 minutes.

Mr. MARLENEE. Mr. Speaker, energy is one of our Nation's biggest problems. Our nonrenewable fossil fuels are dwindling rapidly. Shortages are in the news more and more. The time to map our future energy plan is now. The winter of 1977 so aptly demonstrated how short our supplies can get in times of extraordinary need. Every gallon of gasoline saved could be used as fuel oil to heat American homes and run industry. It is in this spirit that I am introducing a bill to direct the Energy Research and Development Administration to investigate gasohol and other grain-based products which have a potential fuel use.

Gasohol is a motor fuel composed of 90 percent gasoline and 10 percent ethyl alcohol derived from agricultural products. Agricultural products with a high starch content, such as wheat, corn, milo, molasses, potatoes, and sugar beets, can be used to produce ethyl alcohol. According to tests already conducted, the yield of alcohol from corn is approximately 2.5 gallons per bushel. The yield from other grains varies according to their starch content. Tests involving cars using a 90 percent gasoline-10 percent gasohol mixture have been made, and the gasohol was found to be competitively priced with unleaded gasoline. The test cars also have had better mileage. In view of these promising test results, we need a further commitment from ERDA to pursue research on this potential fuel source.

A CONGRESSIONAL BEST SELLER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO), is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, it has been 1 month since I addressed my colleagues about the most popular paperback currently being read on Capitol Hill—the consumer credit guide—"Give Yourself Credit." In its first month, over 2,000 copies were distributed and more than 10,000 written requests have been received by the House Banking Subcommittee on Consumer Affairs. These requests are continuing to arrive at a rate of 100 a day.

There is good reason why this 130-page booklet of explanations and guidelines is so much in demand. It covers

many of the areas of consumer credit legislation, most of which would be complicated and intricate without explanation. The text covers subjects such as credit reports, interest rates, savings accounts, automobile leasing, loans, credit cards with their finance charges, and billing errors.

The book answers the important questions—what kinds of information are contained in a consumer lease and when is there a billing dispute, and what type of information is contained in a consumer's credit file? The answers to these and other questions are supplied by the consumer credit guide, and much of the book is written in an easy to understand question and answer format. The readers of this book will obtain a good, basic understanding of laws such as the Equal Credit Opportunity Act, the Consumer Leasing and Fair Credit Reporting Acts, and the Truth in Lending and Fair Credit Billing Acts.

The book contains a helpful glossary of terms used in the text. There is also a list of Federal agency addresses to be contacted for particular problems when a consumer has a specific complaint or problem.

The initial reaction from consumers and legislators who have read "Give Yourself Credit" has been highly complimentary. A resolution for the reprinting of an additional 20,000 copies passed the House this week and will enable the subcommittee to fulfill the growing demands.

I am happy that the subcommittee's guide has met with such success and I feel confident that it will go a long way in helping consumers to understand their rights under the consumer credit laws.

OSHA DUST STANDARD MAY RESULT IN COTTON GIN CLOSURES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 60 minutes.

Mr. ALEXANDER. Mr. Speaker, a recently proposed new dust standard for all segments of the cotton industry except harvesting has cotton farmers across the Nation up in arms. This new standard would reduce the present OSHA standard from 1,000 micrograms of total dust per cubic meter of air to 200 micrograms.

In order to meet this new standard, cotton gins would have to be enclosed in completely air-conditioned buildings and equipped with highly sophisticated air-filtering systems. The costs necessitated by this proposal would put an impossible hardship on scores of small cotton ginners in Arkansas and throughout the South.

I would like to share with my colleagues a letter I have written to Dr. Eula Bingham, Assistant Secretary of Labor for Occupational Safety and Health, in which I propose a revision of the OSHA proposal to exempt from compliance cotton gins which produce less than 1,000 bales of cotton annually.

I would also like to share with my colleagues testimony presented at OSHA's April 12 field hearing on this issue in Greenville, Miss., by Mr. Gene Woodall, cotton specialist with the Cooperative Extension Service for the State of Arkansas. Mr. Woodall outlines the particular impact this dust standard will have on Arkansas:

WASHINGTON, D.C.,
April 27, 1977.

Dr. EULA BINGHAM,
Assistant Secretary of Labor for Occupational Safety and Health, Department of Labor, Washington, D.C.

DEAR DR. BINGHAM: OSHA's recent proposal to reduce its present dust standards from 1,000 micrograms of total dust per cubic meter of air to 200 micrograms for all elements of the cotton industry except harvesting will have a devastating effect on small cotton gins in Arkansas and throughout the South

I would urge that OSHA seriously reconsider its present disposition in this matter. I am aware of the series of public hearings currently underway, both in Washington and in the field, to elicit reactions to the proposal. I can tell you that I have yet to find a cotton ginner in my part of the country who does not fear that this proposal will result in the closure of scores of small cotton gins.

For your information, I am enclosing a copy of testimony presented at OSHA's April 12 hearing in Greenville, Mississippi with the Cooperative Extension Service for the state of Arkansas. Mr. Woodall's testimony outlines the particular problem this new dust standard will cause in Arkansas.

Recognizing that there may well be a need to revise this standard to correct situations existing in larger cotton ginning operations and in textile mills, I would hope that OSHA would at the very least exempt cotton gins that produce less than 1,000 bales annually from this stringent regulation.

I do not have to tell you I'm sure that most small farmers and businessmen view the Occupational Safety and Health Administration as the enemy. We need to reverse that trend of thinking. I do not believe there is a farmer or small businessman in this country who would buck at compliance with regulations that are fair and reasonable.

I want to take this opportunity to congratulate you on your appointment to this position of great importance to all working Americans. I look forward to our continued association.

With kind regards, I am
Sincerely,

BILL ALEXANDER,
Member of Congress.

STATEMENT BY WILLIAM E. WOODALL

I am William E. Woodall, Extension cotton specialist, with the Arkansas Cooperative Extension Service located at 1201 McAlmont Street, Little Rock, Arkansas. I am speaking for the Arkansas Cooperative Extension Service and on behalf of the Arkansas cotton industry.

Arkansas is a major cotton-producing state, ranking fourth in the U.S. in terms of bales produced. Arkansas is exceeded in production by Texas, California, and Mississippi.

Arkansas' agricultural income in 1975 was $2.14 billion, with $190,662,000 coming from cotton and cottonseed. Cotton is the state's fourth leading source of agricultural income.

Cotton is a major source of agricultural income in 25 eastern Arkansas counties and is significant in an additional 20 counties.

The cost of ginning a bale of cotton varies from community to community. However, the average for the state is approximately $40. This is a significant part of the total cost of cotton production, and we do consider ginning a part of production.

Arkansas' longtime average production is about one million bales. There are approximately 300 active gins in the state. This figures out to be about 3,300 bales per gin per year.

If the total volume was so distributed to where each gin did in fact gin 3,333 bales annually, this would be a workable and economical situation.

Unfortunately, this is not the true situation. We have 15 counties that produce less than 1,000 acres annually. In these 15 counties, 11 have no active gin within the county. This means that producers in these 11 counties are presently transporting cotton from one county to another in order to get it ginned. In most instances, they are transporting their cotton to a low-volume gin which is struggling financially to continue to operate. And if that gin closes due to imposed dust regulations which will require a cash outlay for additional equipment, the gin will surely close. If this should happen, the present gin customers will cease to produce cotton.

Gins that cease to operate in areas with less than 2,000 acres of production will not be replaced due to the low volume of ginning available in the area. In these areas, this acreage of cotton will be lost permanently.

Based upon my experience and observations over the past 29 years, once an area goes out of cotton production, it never returns to cotton.

Cotton production is far more important to the economy of a community, a county, and the state than many people realize, if only the acres devoted to the crop are considered.

Most cotton-producing areas also produce soybeans. In many counties, cotton and soybeans are the only major commodities produced. In the principal cotton and soybean counties, there will be four acres of soybeans to each acre of cotton. In these cases, soybeans may well return more net dollars per farm to the producer than cotton. However, cotton will return a higher net per acre and will generate more dollars in the community than will soybeans. This is due to the larger requirement for machinery, herbicides, insecticides, fungicides, fertilizer, defoliants, capital, and management compared to soybeans. Also, cotton is ginned, warehoused, compressed, and the seeds processed locally, whereas soybeans are harvested and shipped out of the community or even out of the state directly from the field creating no further revenue within the community.

Soybeans are becoming a highly concentrated crop on many farms and in many communities. When any crop is concentrated in an area, problems with diseases, insects, nematodes, and soils problems develop over time, and we are now seeing these problems occur after only about 20 years of increasing concentration of soybeans.

We should, in my opinion, be concentrating our efforts on further crop diversification and not concentration. We need cotton to continue as a viable commodity to prevent producers from going to a soybean monoculture which would ultimately lead to a depressed agricultural economy in many rural communities.

The proposed gin dust standard will lead to the closing of many gins, resulting in many producers quitting cotton production which in turn will result in economic hardships for local lending agencies, machinery and chemical dealers, and cotton-related industries; declining land values; and a declining local tax base.

The Arkansas Cooperative Extension Service is concerned about the well-being of all the people. We support all reasonable efforts to ensure that all people have a safe and healthy environment in which to work and live. However, we seriously question the advisability of imposing strenuous dust control regulations as now proposed on the cotton ginning industry with no more evidence than now exists that the regulations are needed to protect the health of those employed in the industry.

We recognize that cotton dust is injurious to the health of those working in the cotton textile industry; but in the proposed gin dust regulations, not enough consideration has been given to the short period of exposure of a gin worker compared to a textile mill worker.

In Arkansas, our ginning season lasts for approximately three months. About 80 percent of the crop is ginned within a six-week period. Much of the remaining six weeks, gins only operate parts of a day or gin on specified days during the week. The gins are relatively open, and most workers are not confined to a specified working area much of the working time.

Due to the short exposure period, openness of the gin building, and lack of confinement of gin employees as compared to a cotton textile mill, it seems grossly unfair to place textile mills and cotton gins under the same dust regulations, even assuming that there is ample supporting evidence to impose such strict regulations on the cotton textile mills.

Imposing the strenuous gin dust regulations as now proposed will seriously affect the economy of many individuals, rural communities, and ultimately the state of Arkansas. I would suggest very strongly that this be considered before any cotton gin dust regulations are imposed.

UNIFORM FINANCIAL DISCLOSURE STANDARDS FOR OUR THREE BRANCHES OF GOVERNMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 5 minutes.

Mr. KASTENMEIER. Mr. Speaker, the House and the Senate have now made significant changes in their official conduct codes by requiring public financial disclosure statements by Members and employees. This new requirement will be written into permanent law.

It is essential that these financial disclosure provisions be extended uniformly to the other two branches of our Government, the executive and the judiciary, as proposed by H.R. 1, financial Disclosure Act.

Mr. Speaker, more than 170 Members have now cosponsored the Financial Disclosure Act:

LIST OF COSPONSORS

Glen Anderson, California.
John Anderson, Illinois.
Mark Andrews, North Dakota.
Thomas Ashley, Ohio.
Les AuCoin, Oregon.
Herman Badillo, New York.
L. A. Bafalis, Florida.
Alvin Baldus, Wisconsin.
Max Baucus, Montana.
Edward Beard, Rhode Island.
Berkley Bedell, Iowa.
Anthony Beilenson, California.
Jonathan Bingham, New York.
James Blanchard, Michigan.
Michael Blouin, Iowa.
Richard Bolling, Missouri.
David Bonior, Michigan.
Don Bonker, Washington.
David Bowen, Mississippi.
John Brademas, Indiana.
William Brodhead, Michigan.
Clair Burgener, California.
Yvonne Burke, California.
John Burton, California.
Phillip Burton, California.
Bob Carr, Michigan.
Shirley Chisholm, New York.
Thad Cochran, Mississippi.
William Cohen, Maine.
Thomas Coleman, Missouri.
John Conyers, Michigan.
Tom Corcoran, Illinois.
James Corman, California.
Robert Cornell, Wisconsin.
David Cornwell, Indiana.
Baltasar Corrada, Puerto Rico.
William Cotter, Connecticut.
Ronald Dellums, California.
Norman Dicks, Washington.

Timothy Wirth, Colorado.
Lester Wolff, New York.
Antonio Borja Won Pat, Guam.
Robert Young, Missouri.
Clement Zablocki, Wisconsin.
Leo Zeferetti, New York.

AN ENERGY POLICY FOR AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEVITAS) is recognized for 5 minutes.

Mr. LEVITAS. Mr. Speaker, I strongly commend President Carter for his visionary energy message to the American people. It is courageous and challenging and something I believe the American people understand and will respond to. I believe the people have been ahead of their Government in recognizing the need for a long-range, comprehensive energy policy and have been waiting for just this sort of strong national leadership that the President has shown.

For the most part, I endorse and support the proposals which President Carter has put forth. Conservation, home insulation, coal conversion, and solar energy are just a few elements that merit our enthusiastic support.

There are a few proposals with which I differ or need more evidence to support. For too long, we have tried to remedy all our problems at the expense of the middle-income taxpayer. Energy is no different. Increases in the taxes on gasoline will not hurt the rich who have

elastic budgets and who will just pay more, but not really feel it too badly in their pocketbooks; and it will not really hurt the poor who will be subsidized by the Government to reduce the financial impact. It will, however, strike deep into the inelastic pockets of the middle-income taxpaver who needs his/her car to drive to work or maintain a household, who uses a car for the job, et cetera. These are basic essentials. These people cannot be expected to do all the conserving and all the taxpaving as well as paying the price of inflation.

We are going to have to sacrifice, there is no doubt about it. The supply of cheap fuel is gone, and the supply of natural, expensive fuel is diminishing. But, if we are going to make up our minds to sacrifice, then we must all give things up together. It must be shared sacrifice just as we share and pull together in time of war. The entire spectrum—from rich to poor—are going to have to give things up. Our lifestyles are going to have to change. We are going to have to learn to depend more on mass transit. Instead of homes and offices heated like hothouses, we are going to have to learn to live with sweaters and warm socks in the winter. But the point is that all of us are going to have to learn to adjust to changing energy conditions.

It simply is not fair for the middleclass, working person to be asked once again to pay the tab for everyone.

One other aspect of the President's message which to me fell somewhat short, is that he did not put more emphasis on the development of new and alternative sources of energy.

Our economy depends on energy. We need to have new energy sources and supplies to keep that economy strong. Also, the American people should be able to have a good standard of living and they are entitled to it. We, as a nation, have worked hard, developed our resources to the best advantage, and progressed further than any other nation on the Earth. We have been wasteful of those resources, it is true, and we are going to have to learn to conserve them better. But, conservation alone is not going to fill up the empty oil barrels, empty fuel tanks, empty furnaces. It will only stretch out those resources left to us for a period of time.

New, alternative fuel sources have not even been tapped to any extent. Synthetic fuels, gasoline from coal and other materials, new uses of coal, biomass, geothermal, in situ gasification are just a few possible new sources of energy, along with solar energy, which must be developed; and we are going to have to have them. Now is the time to make the decision to invest in, search for and develop these new forms of energy. Now is the time to decide how to divert money into research and mass production technology that is necessary to perfect solar heating, electric cars, coal gasification, synthetic fuels, and the like. We have the talent to do it. We have the wealth to do it. All we need now is the willpower to decide to do it.

A nation that put a man on the Moon and developed assemblyline technology can figure out a way to heat homes, travel from place to place, cook, and cool itself off without robbing the most productive sector of our economy to do it.

President Carter has rendered this Nation today, and future generations, a great service by embarking us on this new direction. Let us work cooperatively and constructively with him to get the job done. We can do it. We must do it.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. RYAN) is recognized for 5 minutes.

Mr. RYAN. Mr. Speaker, on Monday, April 25, 1977, I was in my district on legislative business and as a result, not present for the various votes taken during the session for that day.

If I were present, I would have voted as follows:

Rollcall No. 147—H.R. 5675, authorization for investment of public moneys. The bill passed by a vote of 384 to 0. Had I been present, I would have voted "aye."

Rollcall No. 148—Amendment by Mr. DELLUMS of California to H.R. 5970, Department of Defense authorization for fiscal 1978, to strike $134 million for development of the MX mobile ICBM missile. The amendment was defeated by a vote of 88 to 301. Had I been present, I would have voted "no."

Rollcall No. 149—Amendment by Mr. ASPIN of Wisconsin to H.R. 5970, Department of Defense authorization for fiscal 1978, to place all future military enlistees under the congressional pension system. The amendment was rejected by a vote of 148 to 247. Had I been present, I would have voted "aye."

Rollcall No. 150—Amendment by Mr. TREEN of Louisiana to H.R. 5970, Department of Defense authorization for fiscal 1978, to prohibit the expenditure of funds for the purpose of advertising the existence of the special discharge review program. The amendment was agreed to by a vote of 291 to 96. Had I been present, I would have voted "aye."

Rollcall No. 151—H.R. 5970, Department of Defense authorization for fiscal 1978—final passage. The bill passed by a vote of 347 to 43. Had I been present, I would have voted "aye."

THE PRESIDENT'S NONPROLIFERATION PROPOSALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 10 minutes.

Mr. BINGHAM. Mr. Speaker, today the President forwarded to the Congress the administration's proposals for dealing with the nuclear proliferation crisis. I wish to commend President Carter for the top priority which he has clearly given to the nonproliferation issue. I am encouraged to see the new administration acting with dispatch in this area.

The Congress is eager to enact effective nonproliferation legislation. Last year significant legislation in this area would have been sent to the President had it not been for procedural objections raised in the Senate. This year I have joined with a number of colleagues in both the House and the Senate to introduce comprehensive legislation designed to combat the proliferation peril. This legislation (H.R. 4409, S. 897) enjoys broad-based bipartisan support in the Congress. It recognizes the need for imposing consistent criteria which will apply across the board to our nuclear exports. It is sensitive to the need for allowing a maximum of flexibility for the President and the Congress in enforcing these criteria.

The opportunity we have this year to address the proliferation crisis is one we should seize; it may not come again. We need to spell out precisely those conditions under which we will or will not export nuclear hardware and nuclear fuel. The President's proposal does not do this; most particularly, it does not go far enough in seeking to restrain the spread of reprocessing overseas. The legislation enacted by the Congress will have to be less ambiguous than the President's proposal on the critical reprocessing question.

Mr. Speaker, I share the President's assessment that "the need for prompt action is great" * * * and I look forward to working with the administration to translate our mutual nonproliferation goals into specific nonproliferation legislation. While I am somewhat disappointed that the President's initial proposals do not go farther, I am reasonably confident that the Congress and the administration, sharing as we do a sense of great urgency, can get together and write a strict, comprehensive and effective nonproliferation policy into law before the end of the 1st session of the 95th Congress.

DID ENERGY MESSAGE BACKFIRE?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. VAN DEERLIN) is recognized for 5 minutes.

Mr. VAN DEERLIN. Mr. Speaker, first indications are that most Americans support the general thrust of President Carter's energy conservation proposals. This is true in California and my home county of San Diego.

Most of us acknowledge that we are, indeed, faced with an energy crisis and that some sacrifices may be required of all of us.

But in moving forward on this program, we should be aware of possible pitfalls.

In San Diego, the mere announcement of the energy program, particularly the feature coupling a new excise tax on so-called "gas guzzler" cars with rebates on small economy models, created considerable consternation, both among auto dealers and the auto buying public.

Ironically, sales of compact cars—the very kind which the plan is intended to promote—have tumbled.

Total new car sales were down by 15 to 25 percent in the week following Mr. Carter's message, in the San Diego area. Sales of domestic compacts were hardest hit, dropping by as much as 50 percent, as consumers began awaiting word on whether they would get money back, and in what amounts.

Sellers and buyers alike complain of the uncertainty in both new and used car markets.

Should a prospective small car purchaser wait until a rebate law is on the books before committing himself to the purchase?

Will the rebates, when and if they are enacted, be retroactive—and if so, to which date? How are dealers supposed to cope with the paperwork burden which a rebate provision would impose?

These are critical questions which must be answered, and soon, if the programs are to work in the way they are intended. And of course for persons who for whatever reason feel they need a larger standard car, the uncertainties are just as great. They need to know how much, when, to whom and for what reasons the penalty tax must be paid in order to buy intelligently.

While I have no particular sympathy for the auto industry as such, I am greatly concerned about the hundreds of thousands of rank-and-file workers whose jobs may hang in balance as these decisions are made.

I intend to reserve final judgment on these matters until all the answers are in.

A REPORT ON DELIVERY OF ALASKAN NATURAL GAS TO THE LOWER 48 UNITED STATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wyoming (Mr. RONCALIO) is recognized for 5 minutes.

Mr. RONCALIO. Mr. Speaker, as its chairman, I report to the House today on oversight hearings conducted during the last 2 months on the selection of an Alaska natural gas transportation system. The Indian Affairs and Public Lands Subcommittee of the Committee on Interior and Insular Affairs, concluded five days of hearings last week.

One of the most important energy decisions confronting the Nation is the selection of a system to transport natural gas from the North Slope of Alaska, and particularly from Prudhoe Bay, to the lower 48 States. In recognition of the importance of this decision, Congress enacted last year the Alaska Natural Gas Transportation Act of 1976. The act establishes an orderly process for selecting an Alaska natural gas transportation system. Under the act, special reports and recommendations to the President are required from, first, the Attorney General, then the Federal Power Commission, and finally the Council on Environmental Quality. By September 1, the President will make his recommendation to Congress.

First, the Attorney General will report to the Congress, his findings and recommendations with respect to the antitrust problems and issues relating to the production and transportation of Alaska natural gas. The report, which was mandated by section 19 of the act, should receive serious consideration during the course of the decisionmaking process.

FPC DOES YEOMAN WORK

The Federal Power Commission's responsibility is to gather all relevant facts and considerations to evaluate the three proposed systems and all viable alternatives in accordance with the detailed criteria specified in section 5 of the 1976 act, and to present its report and recommendations to the President. In an unprecedented action, the FPC scheduled 4 days of hearings before the full Commission on the Alaska natural gas transportation issue. These 4 days of hearings, which were conducted earlier this month, show that the Commissioners are devoting the serious attention to this issue that Congress intended; they are to be complimented for this action. When they have filed their report with the President, on May 1, we in the Congress will need to evaluate it with great care.

CEQ REPORT DUE

In view of the limitations placed by the 1976 act upon judicial review pursuant to the National Environmental Policy Act, the Council on Environmental Quality was also directed by the act to hold hearings and to make a report and recommendations to the President. The Council has scheduled these hearings for May 16 and 17 in Anchorage, Alaska, and for May 23 and 24 in Washington, D.C. The notice announcing these hearings indicates that the Council intends to conduct a wide ranging inquiry into the potential impacts of the three proposals on the environment. The Council will review the entire record, as that record pertains to the environment in the broadest sense of the word, and to consider all factors which may be relevant to potential environmental impacts. This extensive review is consistent with the intent of Congress in placing a heavy burden on the CEQ in connection with the Alaska natural gas transportation decision.

OTHER AGENCY ACTIONS

Other Federal agencies will file comments with the President on the competing gas transportation systems. The Environmental Protection Agency has received a report on a risk assessment of the three projects. This assessment, which was prepared for EPA by an independent contractor, Resource Planning Associates, weighs the risks of construction delays and the possibilities of noncompletion of the three systems and thus examines one of the most critical factors relating to the ultimate decision. The Department of the Interior, with the assistance of the Aerospace Corp., has supplemented its economic and risk analysis, which it originally performed pursuant to Public Law 93–153. I understand that the Department will further supplement its study before commenting to the President. These actions, together with those of other affected agencies, show that the comments to the President called for by section 6(a) of the act will be thorough and useful.

PRESIDENT'S FINAL DECISION

Once the President has received all of these reports and comments, he should be able to make a rational and fully informed decision. The President's decision designating a system will not become effective unless approved by both Houses of Congress within 60 days of its submission. This will require the relevant committees and both Houses to act very promptly; committee action will have to be completed in 30 days and floor consideration within the same amount of time. Accordingly, it is important for the Congress to keep informed about the issues involved as they develop.

MANY WITNESSES HEARD

I am quite pleased with the oversight hearings that the subcommittee conducted; they constituted a necessary first step towards the responsible discharge of our duties under the 1976 act. Most members of the subcommittee, including Congressman Udall, the chairman of the full Interior Committee, participated. During the 5 days of hearings we heard from proponents of all three proposals. John G. McMillian and Darrell MacKay of Northwest Pipeline, Edwin Phillips of Westcoast Transmission of Canada, and Robert Blair of Alberta Gas Trunk Line of Canada testified for the Alcan project; Clyde Hargrove and William Brackett of Alaskan Arctic Gas, Vernon Horte of Canadian Arctic Gas, Harry LaPape of Southern California Gas, and John Sproul of Pacific Gas and Electric testified on behalf of the Arctic Gas project; and John Bennett testified on behalf of the El Paso project.

We also heard from Brec Cooke of the Wilderness Society, Brock Evans of the Sierra Club, Sid Wolf of the Environmental Policy Center, and Francois Bregha of the Canadian Wildlife Federation. In addition, we received informative testimony from Lt. Gov. Lowell Thomas, Jr. and Attorney General Avrum Gross of Alaska; Sam Raddi, Daniel Johnson, Dennis Nicholas, Joe De La Cruz, Paul Andrew, and others representing Canadian native groups; Jack Curran, John Brown, and Bill Moody, representing labor; Lawrence Raicht for the State Department. Other interested persons who testified were Congressman DON YOUNG of Alaska; Ebon Hopson, mayor of Alaska's North Slope Borough; Prof. Arlon R. Tussing of the University of Alaska; John Steen of the North West Territories Legislative Assembly; and Charles R. Hetherington and John Houlding on behalf of the Polar Gas Project.

Since the act mandates consideration of viable alternatives, we also received testimony from Prof. Sullivan Marsden of Stanford University on one alternative that has been discussed—the possibility of converting the natural gas to methanol and shipping it to the Lower 48 States in that form.

The hearings surfaced much information that is vital to responsible congressional action and thus will enable us to discharge our duties under the act far more effectively. Further oversight hearings may be necessary to monitor developments following the report by the Attorney General and the recommendation by the FPC to the President on May 1.

ALL SYSTEMS VIABLE

One of the more important benefits from the hearings was that the advantages and disadvantages of all three proposed systems were clearly laid out. In my opinion, they established beyond any

doubt that all three projects are viable. All three have been advanced by responsible entities which have substantial experience in constructing and operating natural gas pipelines. I believe that any one of the three could be financed. I also believe that none of the three can do totally without subsidy or Government financial help of some kind.

The shippers of the Alaskan gas will have to work out a number of matters with the system that is ultimately selected, but this should not be an insurmountable problem. The President should be in an excellent position to negotiate with the Prime Minister of Canada with respect to an Alaska natural gas transportation system since he will have three viable options as a basis for negotiating.

THE ALCAN ROUTE

The Alcan project has been proposed by Northwest Pipeline Corp. and three Canadian partners. Northwest is the major natural gas transmission company in the Northwestern United States; its Canadian partners are large transmission companies with experience in pipeline construction north of the 60th parallel. Between them, Westcoast Transmission and AGTL transport about 90 percent of the gas that is exported to this country from Canada. Both have supplied gas to the United States for many years and have earned a well deserved reputation for responsibility. Alcan would be an all pipeline system which follows the Alyeska oil line to the vicinity of Delta Junction, Alaska, the Alcan highway into Canada, and existing Canadian utility corridors to the United States-Canada border.

The proponents of the Alcan system asserted that it would be able to deliver gas 2 years sooner than either of the other proposals, a significant advantage in view of the natural gas crisis that the Nation experienced this past winter. According to Alcan's proponents, it would have the least risk of cost overruns and delay in construction, largely as a consequence of its utilization of existing corridors and of access to the pipeline from all weather roads. A study, performed by Research Planning Associates—an EPA contractor—indicates a high probability that Alcan could be completed first with the least potential overrun. In addition, Alcan's proponents asserted that it would have the lowest cost of service. The Alcan proposal was endorsed by the Wilderness Society during the hearings and the Alcan route was supported by the other environmental groups which testified. While favoring El Paso, representatives of the State of Alaska stated that Alcan was, in their view, a solid second choice.

PLANS REVISED

Alcan originally proposed a 42-inch pipeline which utilized existing Canadian systems. This proposal was criticized by the FPC staff for high fuel consumption, low expansibility, and commingling of Alaskan and Canadian gas. Alcan responded to these criticisms by filing its new 48-inch express line proposal. Opponents of Alcan noted that it is approximately 250 miles longer than the Arctic Gas route as a consequence of its use of common corridors. Finally, Alcan would cross Canadian territory which is currently the subject of a dispute between the Canadian Government and Canadian native groups. It is difficult to determine how serious a time obstacle this will be to construction of the Alcan system. However, the president of Foothills Pipe Line, a Canadian participant in the Alcan proposal, indicated that this problem is being resolved by the Canadian Government. Alcan's proposal is clearly an option that merits the President's serious consideration.

THE ARCTIC PROPOSAL

A second proposal is that advanced by the Arctic Gas consortium. Arctic Gas is composed of 16 large gas transmission, distribution and production companies—8 American and 8 Canadian. The Arctic Gas proposed route would go directly east from Prudhoe Bay into Canada where it would connect with a spur line designed to transport Canada's MacKenzie Delta reserves. The line would then proceed south through the MacKenzie Valley and on to the U.S. border. A portion of Arctic's capacity is dedicated to the Canadian market; this gas would be dropped off in southern Canada for ultimate delivery to eastern Canada.

Like Alcan, Arctic Gas proposes to transmit the Alaskan gas to regions east and west of the Rocky Mountains; the amounts of gas distributed to the east and west would be approximately the same under either proposal. The Arctic Gas proposal was the first one advanced and thus has received the longest and most extensive scrutiny. The members of the consortium have spent over $150 million on development of the Arctic Gas plans, which has led to be a detailed and carefully considered proposal. Arctic's proponents assert that it will have the lowest cost of service and the lowest fuel usage. Representatives of the laborers' and operating engineers' unions supported the Arctic Gas project during the hearings.

The Arctic Gas proposal, however, was opposed by all environmental groups who testified, principally because of its impact on the Arctic National Wildlife Range. According to those who oppose the Arctic Gas proposal, it could face substantial risks of cost overruns and construction delays. In addition, several witnesses testified that Arctic Gas faces significant problems with native claims disputes in Canada; the testimony at the hearings indicated that these problems appear serious. Finally, opponents of the Arctic Gas proposal asserted that it would link the transportation of Alaska natural gas to Canadian decisions which vitally affect Canadian energy policy. The Arctic Gas proposal requires a Canadian decision in favor of immediate development of its Mackenzie Delta reserves, but several witnesses contended that it is not clear that Canada will want to develop these reserves in the near future. However, Arctic Gas is clearly an option which merits the President's serious consideration.

THE ALL-AMERICAN LNG ROUTE

The third project is the LNG proposal by El Paso, one of the largest gas transmission companies in the country. El Paso would transport the gas by a pipeline paralleling the Alyeska oil line to the southern coast of Alaska. There the gas would be liquefied and shipped by cryogenic tanker to California where it would be regassified and transported throughout all States by existing gas pipelines. El Paso asserted that utilization of an "all American" route would benefit the United States by placing the project solely within the control of the United States, thus eliminating the need for relying on Canada. El Paso also pointed out that its system would not be taxed by the Canadian Provincial governments with the result that American gas consumers would not be forced to bear this burden.

Finally, the El Paso proposal would create more jobs for Americans—both during construction and during operation—than either other proposal. The State of Alaska endorsed the El Paso proposal because of its benefits to the State; in addition, representatives of the maritime unions strongly endorsed El Paso during the course of our oversight hearings.

The major drawbacks to the El Paso proposal, as described by other witnesses, are its cost of service and the fact that it would transport this supply of energy to California, even though the energy is needed in the balance of America as well. In addition, several witnesses stated that there was a greater risk of project "downtime' because an LNG system requires complex liquefaction and regassification facilities. However, we are fortunate in that El Paso, like Alcan and Arctic Gas, is a proposal which is worthy of serious consideration. Also, El Paso has gained much experience and has an excellent record in LNG worldwide systems of gas transportation.

BERGER REPORT DUE

In Canada, the Berger Commission is scheduled to release in early May its report on the land claims of Canadian natives living in the North West Territories, through which the Arctic Gas line would run. The Canadian Government has recently established a commission to report on land claim issues in the southern Yukon by August 1, 1977. The National Energy Board, Canada's equivalent of the FPC, is expected to complete its proceedings in early summer.

The NEB determination will then go to the Canadian cabinet for final disposition. Thus, Prime Minister Trudeau should be able to outline to the President Canada's position on the Alaska natural gas transportation issue when they meet in late summer. This schedule, if followed, would enable the President to make his decision by September 1.

Obviously, a number of complex and interrelated actions must be completed before the President will be in a position to decide. As a result, the issue may not be ripe for decision by the September 1 deadline. In that event, the President will be able to delay his decision for up to 90 days, as permitted by section 7(a)(2) of the act. We enacted this provision because we recognized the complexity of the issues involved and because we be-

lieve that additional time might be necessary to reach a sound decision.

Accordingly, it appears that the selection process is proceeding on track.

Mr. Speaker, this should give every Member of the House a current update on the hearing just concluded. Our committee will use this means for a later report as developments warrant.

THE LEGISLATIVE PRIORITIES OF NEW YORK'S HISPANIC COMMUNITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BADILLO) is recognized for 15 minutes.

Mr. BADILLO. Mr. Speaker, this past weekend I was privileged to participate in what I believe is a landmark event in New York's Hispanic community. When I decided several months ago, as the only northeastern member of the Congressional Hispanic Caucus, to sponsor and undertake to organize the first conference on the problems of the Puerto Rican and Hispanic Community in the New York metropolitan area, I was aware both that there were problems unique to the community, and that there were thoughtful, innovative people working on the solutions. But the more than 300 community activists and leaders that gathered together last Saturday brought a collective awareness and thoughtfulness that I believe will have far-reaching and beneficial results, not only for New York's Hispanic community, but for Latinos across the country.

I called the conference because, during the next weeks, the Congressional Hispanic Caucus will be preparing legislative proposals that will be presented to the President and to the various Cabinet members whose departments these proposals will impact. Although the Hispanic community of New York shares the same problems as all American Latinos, there are many aspects that are unique to the northeast, and particular to an urban area with the density of New York. Many problems are exacerbated or exaggerated, some, on the other hand have simpler solutions than in other parts of the country. In any event, what this conference did was to enable a major sector of the population to express its own ideas, to define its own needs and to articulate what the Federal Government must do to improve the quality of their lives.

The importance of the conference was underscored by the presence of Joseph Aragon, Assistant to the President, who came to listen and to report to the President the discussions in which he participated, and the feelings he sensed among the people attending the conference. His presence indicated both the President's concern and his knowledge that there will have to be special steps taken to bring the well-being of the Hispanic community more in line with that of the rest of the country.

The conference, which was attended not only by Puerto Ricans, but by Dominicans, Cubans, and all other segments of the very varied Hispanic population of our city, really began several weeks earlier with the organization of task forces headed by outstanding leaders in their fields. They included: The arts, Martha Vega; criminal justice, Cesar Perales; early childhood, Dora Collazo Levy; economic development, Ray Norat; education, Alfredo Mathew; employment, Nestor Llamas; health, Joseph Morales; higher education, Victor Alicea; housing, Blanca Cedeno; immigration, Father Jose Alvarez; parks and recreation, Pedro Rivera; poverty programs, Roberto Anazagasti; senior citizens, Suleika Cabrera Driname. Each task force prepared a working paper which served as a basis of discussion for the workshops at the conference.

At the end of each workshop, recommendations were made, which were offered as resolutions at the afternoon session and accepted, with some comments and additions by all the participants in the conference.

What this means, of course, is that the proposals that I shall present are truly representative of the feelings and ideas of the community, and it proved that a truly grassroots attempt to develop and create policy can be effective.

The papers presented at the conference, and the recommendations they produced are valuable, and I commend them to the attention of my colleagues who are concerned with the critical choices they will face in this session on legislation affecting Hispanic lives. During the next few weeks, I shall be entering these documents into the CONGRESSIONAL RECORD, and I hope you will read them carefully.

I am beginning with the working paper on illegal immigrants, or, as we more appropriately call them, undocumented workers. It was prepared by Father Jose L. Alvarez, of the Archdiocese of New York, who is certainly one of the most committed and knowledgeable leaders in the complex and cloudy area of immigration law modification. I am beginning with Father Alvarez' paper for a very specific reason. Within the next few days, the President's Task Force on Immigration, comprised of representatives of the Justice Department, the Department of Labor, and the White House, will present their proposals for action to him. When they are made public, I hope that they will compare favorably with what those with enormous expertise in this area feel must be our priorities. I am hopeful that you will make that comparison for yourself, and help me to ascertain whether the administration is going in the right direction in dealing with this problem.

The document follows:

UNDOCUMENTED IMMIGRANTS IN THE UNITED STATES

(By Father Jose L. Alvarez)

INTRODUCTION

In initiating the Tricentennial of our great nation, built by immigrants of the world, which earned us the title of "nation of immigrants," we cannot overlook the principles of humanity and generosity emanating from our Constitution, nor the democratic sense of brotherhood, openness and neighborliness which has guided our policies toward other nations, especially Latin America, for 200 years.

President Carter, in his inaugural address, quoted the biblical words of the Prophet Micah (Micah 6:8) "good works, love, forgiveness and walk with humility." President Carter said: "This inauguration ceremony marks a new beginning . . . and a new spirit among us all." He further added: "We reject an inferior quality of life for any person—Our government must, at the same time, be both competent and compassionate. We are now struggling to enhance equality of opportunity. Our commitment to human rights must be absolute, our laws fair . . . the powerful must not persecute the weak, and human dignity must be enhanced. We know that the best way to enhance freedom in other lands is to demonstrate here that our democratic system is worthy of emulation. To be true to ourselves, we must be true to others." The words of our President are very much in accord with those of our past President John F. Kennedy, who wrote: "Immigration policy should be generous; it should be fair; it should be flexible. With such a policy we can turn to the world with clean hands and a clear conscience. Such a policy would be an expression of our agreement with George Washington that 'The bosom of America is open to receive not only the opulent and respectable stranger, but the oppressed and secuted of all nations and religions, whom we shall welcome to a participation of all our rights and privileges, if by decency and propriety of conduct they appear to meet the enjoyment'."

In view of the "new spirit" mentioned by our President, we believe the moment has come to courageously confront, and offer a definitive solution to, this immigration problem, with concrete proposals to elucidate the present situation and seriously regulate the future entry of immigrants to the United States with a new Immigration Law.

To arrive at such legislation, we must follow the principles of our Constitution, leaving aside the prejudice and discrimination which has, on many occasions, influenced legislation that has converted and in many instances continues to convert, these immigrants into victims or "scapegoats" to rationalize our unemployment or economic problems. As stated by the 250 Catholic Bishops of the U.S.A. in their declaration of August 20, 1975—"We must withdraw from these infantile excuses and find the solution to these problems in the more profound causes, where they truly exist." A new Immigration Law can only be effectively enacted if we begin with the positive side of immigration. Congresswoman Elizabeth Holtzman (D-N.Y.) on May 26th 1976 on the reopening of Ellis Island, said: "Those who entered here repaid this nation a thousand-fold, for along with ragged clothing, and the few kopecks, or lira, or drachmas they brought, they carried America's greatness with them." We must resolve the present situation in a positive manner.

Before proceeding to positive the solutions we propose, we wish to clarify once and for all the inconsistency and infantilism of many of the attacks on workers without documents of residency by the INS, the AFL–CIO and the popular press, asserting that undocumented immigrants take jobs from American citizens, depress wages and working conditions, increase public assistance rolls, do not pay income taxes and social security deductions, hinder union organization and even affect the U.S. balance of payments adversely. On the other hand, as stated by Father Mark Day in December 1976: "It is again significant to note that these charges have not been made by our government, media and political spokesmen against hundreds of thousands of refugees from Hungary, Cuba and Vietnam. These have never been called 'illegals' and instead have been defended by our Presidents from any suggestion that they were anything but of great value to our nation."

Until recently, the above charges have gone unchallenged. But in the past three years, churches, some enlightened trade unions, immigrant protection associations, other groups and responsible Americans have, in greater numbers, conducted protests, conferences and lobbying efforts to offset the negative stereotypes and propaganda.

And now, let us lay open these accusations:

(1) Illegals do not cause unemployment

There are no exact statistics on the number of undocumented immigrants in the United States. A generally accepted figure is that of eight million. The total work force of the U.S. is generally accepted as 100 million. It would be foolish to assume that 8 million of undocumented immigrants are automatically displacing American workers. Among all these undocumented persons are non-working women and small children, as well as hundreds of thousands of citizens who are technically considered illegal, but who have filed papers and are waiting to become permanent residents.

The Linton & Company Report (Nov. 17, 1975), contracted for by the U.S. Department of Labor stated: "Their impact . . . is least likely in the American labor market . . . they are apparently quite consistently paid at wages at the lowest range of the low-wage scale . . ." Their labor is thus not competitive with American workers and, in fact, aids—not depresses—the economy. According to an editorial in the Wall Street Journal entitled "The Illegal Alien Non-Problem" (Jun. 18, 1976) "Unions naturally complain that this market competes unfairly with their own members. On the other hand, employers argue that illegals provide manpower for jobs that citizens simply won't take, such as busboys and kitchen help. In a city like New York, which has been driving away business through high cost, the illegals may well be providing the margin of survival for entire sectors of the economy . . . Legal or not, the present wave of Western Hemisphere immigrants is already enriching and contributing to North American society." Moreover, since September 1973 a Federal law bars the issuance of Social Security cards to persons not authorized to work.

(2) Illegals are not burdens for public assistance or the economy

The "Linton Report" ascertained that Social Security taxes were withheld for 77% of undocumented immigrants, and Federal income taxes for 73%. Less than 4% had children in public school or collected unemployment insurance. Yet only 1.3% obtained food stamps, only one-half of one percent had been on welfare. The Report concludes that illegals "were far more likely to have participated in programs that involved the payment of taxes than the use of tax-supported services". They are afraid and, logically, they shun public assistance programs. Many never file for refunds. And, as mentioned in the "Wall Street Journal" in the same editorial, "The government is obviously getting more than it gives."

On the other hand, "no studies have been published showing the production value of the undocumented immigrant's work in terms of dollars and cents, nor the amount of money each immigrant family contributes as consumers of goods and services, nor the number of jobs that they create. This sum would greatly outweigh the amount of money the immigrants send across the border." (Fr. Mark Day, Migration Today, Dec. 1976).

(3) Illegals are not enemies of the Unions

Nor is there any proof that undocumented immigrants per se hinder union organization efforts. Some private studies have demonstrated that, especially in the Northeast of the U.S., there are thousands of undocumented workers that are members of the unions. But whenever unions actively defend the interest of those workers, they can be counted upon as the staunchest allies.

(4) To legislate sanctions to the employers of illegals would be to create discrimination

We propose that there be no legislation to sanction employers of undocumented workers because this would be a negative solution which would create serious cases of violations of the constitution and discrimination as well as racism. The 250 Bishops, who compose the National Conference of Catholic Bishops of the U.S.-USCC, declared on Aug. 20, 1975: "By providing sanctions against any employer who hires an illegal alien, this legislation would create a situation that assuredly will lead to discrimination against any person belonging to a minority group whose legal status might be called into question. Legal aliens and minority groups citizens will be denied employment simply because employers will not want to run the risk of inadvertently violating the law . . . In attempting to solve an economic problem this proposal will create a civil rights problem of horrendous magnitude." The National Council of Churches, the Anti Defamation League of B'nai B'rith (Oct. 7, 1975) and numerous other civic and religious organizations in the U.S. have made similar statements.

The consequences of such a law would be: a) Employers, as well as unions and others referring persons for employment, would become policemen. It is the responsibility of the government, and not of private citizens, to keep tabs on aliens within U.S. borders. b) Many employers, understandably cautious, would not hire U.S. citizens-Puerto Ricans, Mexican-Americans or of other Latin origins— or citizens who lacked documentary proof of U.S. birth—as is often the case with people from the South. c) Racism would be intensified against Latin Americans, who constitute the largest group of immigrant workers. d) An atmosphere of suspicion between neighbors, fellow employees and others would be fostered, leading to widespread use of informers and violations of the constitutional rights of citizens. And e) To penalize empolyers would tend to drive illegal aliens to jobs where the employer is insensitive to law violations, adding to the problems of crime, drugs, prostitution, etc.

POSITIVE SOLUTIONS

1. A perfected immigration law

We propose a more just, humane and complete new law of immigration that will perfectly regulate the flow of immigrants in the future. That this new Law include reunification of families, respecting the rights of the spouses, families and children of immigrants born in the U.S. In denying immigrant parents the rights to adjust their status, it attacks the stability of family life and deprives American born children of their basic rights as U.S. citizens. Than Section 4—Section 203 be amended (a) from the present "Immigration and Naturalization Act" in this respect.

2. Quota increase for Latin America

The present economic situation of Latin American countries is forcing massive immigration. Justice, and a good neighbor policy with these countries from which the majority of our immigrants come, impels us to grant them a larger quota more proportioned to the circumstances.

3. U.S. aid to develop Latin America

The origin of this massive immigration is the underdevelopment of the economy and industry in Latin America. The only form of abatement is to attack the root of the problem. And that is why we ask that simultaneously, a generous development program of aid to the nations in Latin America be instituted by the United States.

4. Amnesty for illegals presently in the United States

Similar to Canada's action four years ago which faced a situation similar to ours, and recently Argentina as well, the new Law of Immigration should include a generous AMNESTY, or a regulation of the status of all immigrants who are already in the U.S. A massive deportation of almost eight million people would be emotionally and economically traumatic to the country as a whole, as well as to the deportees; it would be practically impossible and costly to carry out; and would create a tarnished image of the United States and our democracy in the eyes of the world by pushing millions of people without a future into misery and death.

In its June 18, 1976 editorial, the Wall Street Journal said that "the easiest, cheapest and fairest way to protect the labor market will be to legalize the immigrants, putting the law to work protecting them rather than persecuting them".

The Domestic Council Committee on Illegal Aliens, a committee of Cabinet officials, headed by the former Attorney General Edward Levi said in their 257-page report of January 9, 1977, that it was "concerned about the large number of illegal aliens already in the United States." The Cabinet officials said the Government should focus on prevention instead of deportation, adding. "The commitee believes that massive deportation is both inhumane and impractical" . . . , and suggested "a . . . form of amnesty".

Churches, immigrant protection associations and many other civic groups support an AMNESTY, especially the U.S. Catholic Conference of Bishops—USCC—which in its statement before the Sub-committee on Immigration and Naturalization of the Senate Committee on the Judiciary (April 1, 1976) said:

"This amnesty is the only just and humane solution to this important aspect of the problem which would be consistent with the tradition and ideals of a country which has been known as the 'nation of immigrants'. That is to show, once again, our generosity by allowing these people to become lawful residents. Consequently, we have advocated that a meaningful amnesty provision be incorporated into this legislation . . . We do not, however, advocate amnesty for criminals, procurers, and other immoral persons, subversives, violators of the narcotic laws or smugglers of aliens".

Based on these principle elements of humanity and brotherhood between men and countries, we proopse the following legislation.

1. Adopt and promuglate a more just, humane and complete new law that will perfectly regulate the orderly entrance of immigrants into the U.S. in the future, that this new law include amending the 1965 Act regarding the reunification of families, respecting the rights of the spouses, families, and children of immigrants born in the United States.

2. Amend the Immigration and Naturalization Act, Section 203(a) to include the parents of children born in the United States.

3. Amend the Immigration and Nationalization Act, Section 201(a)(2) to increase the quota of immigrants from Western Hemisphere countries to 200,000.

4. Enact programs that will aid the economic and industrial development of the nations in Latin America.

5. Adjust the status of any alien who on July 4, 1976 was in the U.S. in violation of law, to that of an alien lawfully admitted for permanent residence, if the alien—

(1) makes application therefor within one year after the date of enactment of the Act;

(2) is found physically present in the United States on the date of enactment of this Act;

(3) is not found a criminal, procurer, immoral, subversive, violator of the narcotic laws or smuggler of aliens.

6. That in the future legislation, instead of using the present term of "illegal" on documents and declarations, the term "economic refugee" be used, which is more suitable for the actual situation.

HUMAN RIGHTS: A CANADIAN VIEW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

Mr. LAFALCE. Mr. Speaker, during the past few months, both the President and Congress have focused considerable attention on the issue of international human rights. This desire to create a better climate for the development of human rights will require much delicate and sensitive negotiation. We, as a nation, must be very careful to maintain a balanced perspective regarding how much pressure is useful and appropriate to exert in our dealings with other countries whose attitude on this subject is opposed to our own.

The problem will require much thought, as do all issues which have no clear solution. While we develop our thoughts, I believe it will be helpful to consider the words of Don Jamieson, the Canadian Secretary of State for External Affairs in a speech to the Canadian Council of Churches and the Canadian Council of Catholic Bishops on March 16, 1977 in Ottawa.

In his remarks, Secretary Jamieson speaks to the very important issue of whether a particular action in regard to human rights will be both effective and appropriate. The comments help to shed more light on this subject and I would like at this time to share them with you. The text of the speech follows:

THE CANADIAN VIEW OF THE COMPLEX ISSUE OF HUMAN RIGHTS

Canada has already established a reasonably good record in international human-rights-oriented activities over the years.

Unfortunately, it seems that, in this struggle, while there have indeed been developments that are encouraging (no major wars for over 30 years, a measurable improvement in international awareness of the interdependence of the world community, a heartening increase in developmental-assistance flows from richer to poorer nations, an apparent increase in the enjoyment of personal liberties even within the restrictive regimes of Eastern Europe), nevertheless there still exist too many gross violations of human rights in many countries, violations that are naturally a cause of concern to Canadians and that all of us would like to be able to rectify or at least ameliorate in one fashion or another. How Canada should react to such situations, what considerations should guide us, what constraints affect us, will be the theme of my talk this evening.

CONTEXT OF INTERNATIONAL ACTION

I should like to stress at the outset that there is a fundamental difference—which, it seems, is not always readily appreciated—between our domestic activities in the human rights field and the action that Canada can take internationally. The difference between the domestic and international spheres of action is twofold: the first is the problem of *standards;* the second is the question of enforcement *machinery.*

We in countries of Western traditions too frequently assume that those standards of conduct and behaviour towards our fellow man are perceived as having equal validity by other governments.

But the perspective of other countries is, in fact, often different, partly because they may not be Western or democratic in background, or partly because their economic situations are vastly different from ours. Western democracies traditionally accord priority to civil and political rights, while Third World countries often place their pressing economic needs ahead of human rights issues. It may seem callous or insensitive to Canadians, but we are told regularly in international bodies that a majority of underdeveloped states are more concerned with alleviating starvation and promoting their development and, in so doing, attaching a greater priority to the duties of citizens than to their rights.

Although Canada's approach to international human rights reflects our traditions (the ethics and moral codes of a Western Christian society), our approach is only one of many, and, I should add, not an approach that enjoys majority support internationally. The Universal Declaration of Human rights is not a binding legal instrument, and other covenants and conventions that may have enforcement provisions are binding only upon their signatories. Even when a state accedes to a convention or signs an agreement, it does not necessarily mean that it accepts its obligations immediately. Not all the parties who signed the Helsinki Final Act feel bound to accept its provisions at once; rather, it is regarded as a long-term program towards which participants should strive.

Moreover, even when states disregard their obligations, there is frequently little that can be done to urge compliance. The UN Commission on Human Rights has a fairly cumbersome procedure for dealing with gross and persistent violations of human rights, while other bodies, like the new Human Rights Committee, on which there is a Canadian, and the Committee on the Elimination of Racial Discrimination, consist of independent experts serving in their personal capacities. The Canadian Government as such, can, therefore, take no official action in these bodies.

In the absence of consensus and of effective enforcement machinery at the international level, therefore, we have been forced to rely upon other methods, essentially political and diplomatic, in which to convey to other governments our concerns about human rights. Canada can use multilateral bodies, such as the Commission on Human Rights, to make known our attitude towards events in other countries; at such meetings, we can vote on resolutions varying in tone and substance from mild requests for information to denunciations and condemnations.

Multilateral bodies may impose sanctions dealing with trade, aid or trade in specific types of goods; such sanctions may be legally binding (as are Security Council sanctions) or voluntary (as are resolutions of the General Assembly). States may, of course, also impose sanctions unilaterally or jointly with other states, by curtailing aid, ending trade relations, or by going as far as suspending diplomatic relations. We can also make direct representations on a bilateral basis; such representations may range from expressions of concern, to requests for redress of specific grievances, to formal protests.

But there are no firm and fixed rules for raising and discussing what are essentially the domestic concerns of other states; some countries simply refuse categorically to permit any exchange of views. Canadians are justifiably indignant at flagrant abuses of the fundamental rights of the individual in Uganda, South Africa and in many other countries in Eastern Europe, Latin America and elsewhere. Moral indignation alone, however, will not establish universal standards of human rights, or ensure the creation of machinery to enforce such rights.

COURSES OF ACTION

My problem, as SSEA, goes one step further: it is to find, amid the differing interests, attitudes and traditions of other states, a way of expressing Canadian concerns, of alleviating conditions we find deplorable, and of solving the largely anonymous individual cases in which the Canadian interest is strong and persistent.

When we approach the issue of raising human rights questions with other countries, we generally consider two criteria in arriving at a course of action: the first is, what action will likely be *effective;* the second is, whether an action would be *appropriate;* whether our action, if taken, will be effective has to be subject to balanced and careful examination.

When we have cordial relations with states, for example, low-key, private discussions are demonstrably more likely to resolve outstanding individual difficulties, and in turn, create the atmosphere for the additional reconciliation of problems of concern to Canadians. When relations are poor, and progress on human rights issues is negligible, it may be necessary to make our case public, even though public pressure can as often contribute to a hardening of attitudes as it may to a meeting of minds.

The difference between "public" and "private" diplomacy is not always appreciated by Canadians. Public support for dissidents in the Soviet Union may, for example, be of help to their cause, for it provides the very publicity that in turn prevents Soviet authorities from implementing more repressive measures. Just last month, for instance, it was decided to convey to the Government of the Soviet Union the disappointment and deep concern of the Canadian people at the arrest of certain prominent Soviet citizens who had been speaking out on the question of human rights.

Similarly, I spoke in the House of Commons just the other day on the human rights climate in Uganda. Our concerns in this area were made quite clear to the Government of Uganda, and at the recently-concluded session of the UN Commission on Human Rights. With respect to Uganda, let me say this: there is no question that the Ugandan Government is engaged in the systematic killing of those who are thought to be in opposition to it. Yet the international community has taken no action. The Commission on Human Rights was eventually willing to devote a great deal of its time in open session expressing its "profound indignation" at events in Chile, but was not prepared to voice even the mildest public criticism of the situation in Uganda. The Canadian delegation introduced a resolution urging the Ugandan authorities to accept an impartial, international investigation. This was a reasonable position, consistent not only with previous Canadian action, but also with accepted international practice, which requires respect for national sovereignty. But so great was the opposition to our resolution that we were forced to allow it to stand without vote rather than have it summarily rejected in secret session, where, under the rules of the Commission, none of the proceedings can be reported.

DOUBLE STANDARD EXISTS

I might add that many of the same countries that protected Uganda from any meaningful criticism in the UN Commission on Human Rights, and refused to associate themselves with a U.S. resolution on Soviet dissidents, are loud in defence of human rights elsewhere. A double standard in the human rights field is an unhappy fact of international life. For its part, the Canadian Government will refuse to accept the conclusion of the Commission that it has discharged its responsibilities satisfactorily. We intend to continue to press, at the UN and in other bodies, for meaningful and concrete action to bring the Government of Uganda—among others that have persistently

violated the international standards of behaviour in human rights—observe the obligations they have freely accepted.

But public discussion of particular family-reunion cases in Eastern Europe, on the other hand, could have severe repercussions, because the people concerned do not have the protection afforded by the international spotlight, and would have no recourse if Canadian efforts to secure reunion in Canada were blocked as result of public discussion. Here we have opted for "private" diplomacy, and I am happy to report that, in most countries of Eastern Europe, we have seen a marked increase in the number of reunited families.

Pressure to speak out is always great, and it comes mainly from people whose indignation is kindled by what must seem like our official silence and inactivity. Regarding Chile, a country about which I have received a lot of mail recently, Canada has been particularly active with regard to the human rights situation in that country and will continue to be so as long as evidence of violations persists. In addition to speaking and voting on these issues in international forums, we have spoken directly to Chilean representatives. As a concrete indication of the concern of Canada for the human rights violations taking place in Chile, we have authorized 5,360 Chilean refugees to find permanent homes here. Ninety-two former Chilean political prisoners and approximately 200 of their dependents have achieved similar status. Canada's record with regard to promoting the regrowth of human rights in Chile is second to no other nation's and Chilean officials are well aware of this.

We have a responsibility, however, to exercise delicate judgment as to when to "go public" and when to continue with "quiet diplomacy". The phrase "quiet diplomacy" may seem to some a euphemism for a lack of responsiveness. This simply is not the case. In the proper circumstances, it can accomplish far more in the long run than public appeals that may satisfy an immediate pent-up frustration but cut off prospects for a satisfactory resolution of conflicting views. An illustration of this type of approach is our attitude towards Indonesia. During a visit to Indonesia last year, my predecessor, Mr. MacEachen, took the opportunity of a meeting with Foreign Minister Malik to raise the problem of political prisoners and to express the concern with which a number of Canadians view this issue. Mr. MacEachen noted that some of the detainees have already been released by the Indonesian Government, and expressed the hope that this trend would continue. We have been encouraged that this trend has, in fact, continued since that time.

IMPORTANCE OF ULTIMATE GOALS

Whether a given course of action will be effective depends, as well, on our ultimate goals. If we seek to rectify isolated abuses or aberrations in a state's normal performance in the human rights field, the task is generally manageable; but if we seek to alter a firm policy or the fundamental basis of another state's society, the issue is not likely to be resolved, at least easily or quickly. South Africa, for example, has resolutely refused to yield on the *apartheid* question, which is not simply one of that state's peripheral customs but an integral part of its social composition.

The appropriateness of Canadian action is related to our record, principles and traditions. We should not wish to condemn hastily, before the facts are in or before we can reach reasonably firm conclusions after an examination of the available evidence. Similarly, it would not be appropriate to expect other countries to do more than we are prepared to do at home.

The Canadian record, both at home and in international bodies like the Commission on Human Rights, is excellent, and we have a right to be proud of the conditions we enjoy in this country. At the same time, we are not perfect, and we must be vigorous in our efforts to secure the highest possible standards.

As Christians, we must never lose sight of human rights at any time, and must always be willing to convey our concerns to others. The Canadian Government has a right and duty to act that we expect other states to respect, just as we expect other states to respect, just as we respect their right to approach us on similar issues. At the same time, we have to be prudent. For our actions to be meaningful, they must reflect the genuine concerns of Canadians. This, in turn, means that we cannot be involved to the same degree in every single human rights problem, because there is a danger that a Canadian action would eventually be interpreted as simply yet another empty moral gesture, which other countries could then dismiss.

Seriousness is an obvious consideration. While we cannot ignore any discernible pattern of violations of human rights anywhere in the world, our case will be stronger where the offence is greater and if the weight of Canadian and of world opinion is behind our representation. Thus the determination whether Canadian action is appropriate depends upon a careful assessment of a number of factors respecting Canada and the other countries concerned.

While stressing our moral considerations, we must also be realistic and recognize the difficulties in drawing a line between human rights and other areas of activity. The suspension of aid is frequently suggested as a response to human rights violations, and it may seem on the surface to be an understandable way for a donor country to react. You will agree with me that we cannot question the need to provide food aid to some impoverished countries. But, in the area of economic aid, let me emphasize the real dilemma we face in attempting to determine what part of, for instance, a project for a cement-plant or an irrigation scheme benefits the people and what part ends up simply serving the aims of a government unresponsive on the question of human rights. This fine line, as I describe it, is hard to draw in practice, and I can only repeat that I have an open mind on this subject. I am prepared to consider possible courses of action available to us if I can be convinced that such action will prove effective.

At the same time, there is a real difficulty in acting on many economic issues. If we go beyond what is called for by international sanctions, where do we draw the line as matter of policy? If we take unilateral action, and it accomplishes nothing, what have we gained?

We accept international sanctions as the only really meaningful and potentially-effective measures against repressive regimes. Although we receive numerous requests to take action in cases of varied gravity, importance to Canada and humanitarian concern, we must necessarily consider the possible consequences of our action on future cases, in the hope that we can continue to be effective in human rights issues.

We have a responsibility, too, to consider the long-term implications of our representations, especially if they give rise to hopes which we cannot fulfil. If, through our actions, we encourage unwarranted expectations, so that the pressures generated by dissidents become intolerable to a given regime, what guarantees can we provide for their safety, or for the stability of their whole societies, in the event of massive upheavals in their states, such as occurred in Hungary in 1956 and Czechoslovakia in 1968? There are other implications that must be taken into account before determining a course of action. We may have other humanitarian interests—for example, our refugee program in Chile—that we should wish to safeguard by remaining on at least proper if not cordial terms with the other country concerned.

I have spoken frankly this evening about the problems and the types of considerations which govern our attitude to human rights issues.

As most of you consider human rights a matter of utmost priority, I hope, nevertheless, you will agree that the way in which we seek to deal with human rights violations is delicate and difficult and is subject to numerous considerations.

The question of human rights is one of the most complex issues in foreign policy because it strikes to the root of our traditions and therefore constitutes a potential challenge to other societies whose traditions may essentially be different.

Despite the need for delicacy and balanced judgment, Canada will continue to uphold internationally the course of human rights, in the legitimate hope that we can eventually ameliorate the conditions of our fellow men.

PERMISSION FOR SUBCOMMITTEE ON ECONOMIC OPPORTUNITY OF COMMITTEE ON EDUCATION AND LABOR TO MEET THURSDAY AND FRIDAY, APRIL 28 AND 29, 1977, DURING THE 5-MINUTE RULE

Mr. ANDREWS of North Carolina. Mr. Speaker, I ask unanimous consent that the Subcommittee on Economic Opportunity of the Committee on Education and Labor be permitted to meet on tomorrow, and, if necessary, on Friday of this week during the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I wonder if the gentleman's request has been cleared with the minority side?

Mr. ANDREWS of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from North Carolina.

Mr. ANDREWS of North Carolina. Mr. Speaker, the request has been cleared with the gentleman from Minnesota (Mr. QUIE). This is his request, as a matter of fact.

Mr. BAUMAN. This is for the purpose of markup?

Mr. ANDREWS of North Carolina. Yes, it is.

Mr. BAUMAN. But it has the support of the minority side?

Mr. ANDREWS of North Carolina. It has the approval of the gentleman from Minnesota (Mr. QUIE). That is the only Member I can speak for.

Mr. BAUMAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

HOW MUCH IS ENOUGH?

(Mr. MICHEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MICHEL. Mr. Speaker, I have recently come across some very interesting documents I want to place in the RECORD today. They show the pay scales of top businessmen, labor leaders, and baseball players. When you examine

them you find out some very interesting facts about the current state of American society.

Mr. Henry Ford had "total remuneration" in 1976 of $970,000. Mr. Ford, may I remind you has given the world both the Edsel and Robert McNamara. But that is what he is paid.

Mr. Reggie Jackson and Mr. Thurman Munson of the New York Yankees will each make at least $250,000 in salary this year. These gentlemen are considered experts at their trade if they perform well at bat slightly more than 3 times out of every 10. They are considered geniuses if they perform well at bat 4 times out of every 10.

Mr. George Meany of the AFL–CIO is paid a mere $90,000 a year. Mr. Meany has given us, among other masterpieces of economic nonsense the late and unlamented common situs picketing bill and a host of economic schemes guaranteed to drive the average wage earner to the wall. Yet he is paid $90,000 a year.

Yesterday the House, in a show of breast beating not seen since the last showing of King Kong, heroically voted to delete money for the congressional pay raise. Many Members took to the floor in sackcloth and ashes, weeping and gnashing their teeth, throwing themselves around in a frenzy of remorse because they would be receiving $57,000 in salary for representing the people of their district. Only someone with a heart of stone could keep from weeping when these Members, with one eye on the gallery, moaned and groaned that they were not worth $57,000, that, indeed, it would probably be better if they were just given some stale bread and water and allowed to sit in the corner. Such a display of self-contempt has not been seen since the last meeting of the National Masochistic Association.

Well, they got their way. They made their point. We all now know, officially, that they do not consider themselves worth $57,000. Who am I to question their judgment? Unfortunately, they also denied that salary to those of us who believe a Congressman's job is worth that salary.

Let me just say this: There has been more hypocrisy about this salary raise than any other issue in my memory. My own view is this: If the institution of Congress is so bad that its Members do not deserve $57,000 a year then there should be a serious and immediate move made to amend the Constitution and get rid of the institution itself. If the argument is that the institution is a good one but its current Members are bad then the answer is to vote them out of office and elect Representatives who are worth the salary. I am willing to take that risk.

Mr. Speaker, I hope the figures I am about to introduce in the RECORD survive and are discovered a thousand years from now, along with yesterday's RECORD. Our descendants will look on these figures with amazement. Those who built cars, they will say, were worth almost a million dollars a year to society; those who ruled unions were worth $90,000; baseball players were worth fantastic salaries—but those who every 2 years came before the voters and defended their record in free and open debate and then were returned, to do the absolutely necessary tasks of a democratic form of government, were judged by some of their colleagues unworthy to receive $57,000 a year. Those in the future will look back toward this time and shake their heads in disbelief.

At this point I want to insert in the RECORD the salary figures I mentioned earlier:

100 HIGHEST PAID U.S. MANUFACTURING EXECUTIVES IN 1976

Executives and company	1976 total remuneration	Percent gain or loss	Estimated annual pension	Common shares owned	Percent gain or loss
CHAIRMEN					
Henry Ford II, chairman, Ford Motor	$970,000	+190.6	.....	48,354	−1.3

HOW THE UNIONS REWARD THEIR TOP EXECUTIVES

The job of running a national union is one of trouble and turmoil. But a survey of the pay of union presidents finds that most are well rewarded for their efforts.

In 1975, for instance, five union presidents each received more than $100,000 in salaries, allowances and expenses. Three years earlier, only two men crossed the $100,000 line.

Fourteen union presidents in 1975 got $80,000 or more from their organizations—twice as many as in 1972.

The chart on this page gives details on the 25 highest-compensated union presidents. Figures were obtained from the most recent union financial reports made to the Labor Department.

Top pay. The highest salary on record last year went to Frank E. Fitzsimmons, president of the Teamsters Union, whose 1.9 million members make it the nation's largest labor organization. His annual salary of $125,000, set in 1971, was raised 25 per cent last June by delegates to a Teamster convention. Mr. Fitzsimmons henceforth will earn a $156,250 salary.

Union members were even more generous to Edward T. Hanley, president of the 436,000-member Hotel and Restaurant Employes and Bartenders International Union. That union's convention last May doubled Mr. Hanley's salary, from $50,000 to $100,000 a year.

Even before his salary was doubled, Mr. Hanley was being paid more in salary, allowances and expenses than the chief executive of any other union. In addition to his former salary of $50,000, he received in the year ended April 30, 1975, an allowance of $36,450—or $100 a day, which he says was reported as income for tax purposes—plus expenses of $52,102. In all, he got $138,552.

Mr. Hanley's expense account that year included $41,682 in direct billings to the union for dinners, banquets and other entertaining he hosted while conducting union business. His reported expenses did not include much airline travel, however. * * *

WHAT 25 HIGHEST-PAID UNION PRESIDENTS MAKE

[Salaries, allowances and expenses of union presidents in 1975, latest available, as listed in reports filed with the U.S. Department of Labor]

	Salary	Allowance	Expenses	Total
1. Edward T. Hanley, Hotel, Restaurant Employees	$50,000	$36,450	$52,102	$138,552
2. Frank E. Fitzsimmons, Teamsters	125,000	2,738	7,148	134,886
3. James T. Housewright, Retail Clerks	105,000	13,000	4,482	122,482
4. Jesse M. Calhoon, Marine Engineers	71,500	----------	45,458	116,958
5. Hunter P. Wharton, Operating Engineers	90,000	21,400	996	112,396
6. C. L. Dennis, Railway Clerks	70,000	26,703	----------	96,703
7. George Meany, AFL-CIO	90,000	----------	1,482	91,482
8. Daniel E. Conway, Bakery, Confectionery Workers	55,000	2,600	33,672	91,272
9. I. W. Abel, Steelworkers	75,000	----------	12,786	87,786
10. Martin J. Ward, Plumbers	56,375	29,220	----------	85,595
11. S. Frank Raftery, Painters	53,799	14,310	15,869	83,978
12. John J. O'Donnell, Air Line Pilots	57,791	5,194	20,730	83,715
13. John H. Lyons, Iron Workers	59,000	14,580	9,485	83,065
14. Albert Shanker, Teachers	$58,333	$8,874	$15,803	$83,010
15. Charles H. Pillard, Electrical Workers (IBEW)	72,688	----------	6,384	79,072
16. William R. Steinberg, Radio Association	64,927	----------	8,719	73,646
17. James Siebert, Metal Polishers	33,710	11,630	27,834	73,174
18. Willian Sidell, Carpenters	62,200	8,800	1,057	72,057
19. Harold C. Crotty, Maintenance of Way Employees (RR)	56,417	----------	14,533	70,950
20. Jerry Wurf, State, County, Municipal Employees	60,000	7,200	2,684	69,884
21. Joseph Belsky, Meat Cutters	61,154	----------	8,157	69,311
22. George Hardy, Service Employees	57,543	----------	10,997	68,540
23. Kenneth J. Brown, Graphic Arts Workers	42,583	----------	25,945	68,528
24. Fred A. Burki, United Retail Workers	64,901	1,300	2,186	68,387
25. Leonard Woodcock, Auto Workers	46,432	----------	20,452	66,884

STARTING PLAYERS SALARIES

(Compiled by United Press International)

AMERICAN LEAGUE

Baltimore Orioles

C—Rick Dempsey, $40,000.
1B—Lee May, $130,000.
2B—Tom Shopay, $28,000.
SS—Mark Belanger, $140,000.
3B—Doug Decinces, $40.000.
LF—Pat Kelly, $60,000.
CF—Al Bumbry, $55,000.
RF—Ken Singleton, $160,000.
DH—Eddie Murray, $19,000.
P—Jim Palmer, $180,000.
Total: $852,000.

Boston Red Sox

C—Carlton Fisk, $160,000.
1B—George Scott, $175,000.
2B—Denny Doyle, $80,000.
SS—Rick Burleson, $125,000.
3B—Butch Hobson, $40,000.
LF—Jim Rice, $150,000.
CF—Fred Lynn, $195,000.
RF—Carl Yastrzemski, $200,000.
DH—Bernie Carbo, $65,000.
P—Ferguson Jenkins, $150,000.
Total: $1,340,000.

California Angeles

C—Terry Humphrey, $40,000.
1B—Tony Solaita, $50,000.
2B—Jerry Remy, $80,000.
SS—Bobby Grich, $200,000.
3B—Dave Chalk, $60,000.
LF—Bruce Bochte, $50,000.
CF—Joe Rudi, $200,000.
RF—Bobby Bonds, $175,000.
DH—Don Baylor, $190,000.
P—Frank Tanana, $225,000.
Total: $1,270,000.

Chicago White Sox

C—Brian Downing, $50,000.
1B—Jim Spencer, $70,000.
2B—Jorge Orta, $60,000.
SS—Allen Bannister, $30,000.
3B—Eric Soderholm, $40,000.
LF—Ralph Garr, $160,000.
CF—Chet Lemon, $35,000.
RF—Richie Zisk, $125,000.
DH—Lamar Johnson, $35,000.
P—Ken Brett, $70,000.
Total: $675,000.

Cleveland Indians

C—Ray Fosse, $75,000.
1B—Andre Thornton, $35,000.
2B—Duane Kuiper, $40,000
SS—Frank Duffy, $55,000.
3B—Bill Melton, $85,000.
LF—Buddy Bell, $75,000.
CF—Rick Manning, $40,000.
RF—Jim Norris, $19,000.
DH—Rico Carty, $90,000.
P—Dennis Eckersley, $45,000.
Total: $559,000.

Detroit Tigers

C—Milt May, $50,000.
1B—Jason Thompson, $45,000.
2B—Tito Fuentes, $90,000.
SS—Tom Veryzer, $40,000.
3B—Aurelio Rodriguez, $75,000.
LF—Willie Horton, $100,000.
CF—Ron Leflore, $75,000.
RF—Ben Oglivie, $60,000.
DH—Rusty Staub, $165,000.
P—Dave Roberts, $75,000.
Total: $775,000.

Kansas City Royals

C—Buck Martinez, $50,000.
1B—John Mayberry, $150,000.
2B—Frank White, $50,000.
SS—Fred Patek, $135,000.
3B—George Brett, $175,000.
LF—Joe Zdeb, $19,000.
CF—Amos Otis, $140,000.
RF—Al Cowens, $40,000.
DH—Hal McRae, $120,000.
P—Paul Splittorff, $70,000.
Total: $949,000.

Milwaukee Brewers

C—Charlie Moore, $45,000.
1B—Cecil Cooper, $100,000.

P—John Montefusco, $145,000.
Total: $747,000.

PIKE AMENDMENT TO DELETE THE $7 MILLION IN THE FIRST BUDGET RESOLUTION FOR THE PAY RAISE

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, I had to be present on official business in my district yesterday and missed the vote on rollcall No. 154 on the amendment offered by Representative OTIS G. PIKE to delete the $7 million in House Concurrent Resolution 195, first budget resolution for fiscal year 1978, for the pay raise recently authorized by the President on the recommendation of the Commission on Executive, Legislative, and Judicial Salaries, which took effect without a vote by the Congress.

Had I been present yesterday, I would have taken the same position I took in my statement which I submitted on February 9 to the Subcommittee on Compensation and Employee Benefits to which the proposed pay raise was referred in the House, and I would have voted aye on rollcall No. 154 to delete that appropriation.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. FISH (at the request of Mr. RHODES), for today and the balance of the week, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. QUAYLE), to revise and extend their remarks, and to include extraneous matter:)

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 955. An act to amend the Federal Crop Insurance Act; to the Committee on Agriculture.

S. 1240. An act to extend the time for conducting the referendum with respect to the national marketing quota for wheat for the marketing year beginning June 1, 1978; to the Committee on Agriculture.

ADJOURNMENT

Mr. HEFTEL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 3 minutes a.m.), the House adjourned until tomorrow, Thursday, April 28, 1977, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1356. A letter from the Chairman, U.S. Water Resources Council, transmitting a draft of proposed legislation to amend the Water Resources Planning Act (79 Stat. 244) as amended; to the Committee on Interior and Insular Affairs.

1357. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to authorize a U.S. loan to Portugal; to the Committee on International Relations.

1358. A letter from the Administrator, Federal Energy Administration, transmitting a report covering the month of December 1976, on sales of refined petroleum products, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1978; to the Committee on Interstate and Foreign Commerce.

1359. A letter from the Administrator, Federal Energy Administration, transmitting the quarterly report covering October-December 1976 on imports of crude oil, residual fuel oil, refined petroleum products, natural gas, and coal; reserves and production of crude oil, natural gas, and coal; refinery activities; inventories; exploratory activity, exports, nuclear energy, and electric power, pursuant to section 11(c)(2) of Public Law 93-319, as amended; to the Committee on Interstate and Foreign Commerce.

1360. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting reports concerning visa petitions approved according certain beneficiaries third and sixth preference classification, pursuant to section 204(d) of the Immigration and Nationality Act, as amended (79 Stat. 915); to the Committee on the Judiciary.

1361. A letter from the Deputy Director, Administrative Office of the U.S. Courts, transmitting the annual report on applications for court orders made to Federal and State courts to permit the interception of wire or oral communications during calendar year 1976, pursuant to 18 U.S.C. 2519(3); to the Committee on the Judiciary.

1362. A letter from the Acting Administrator of General Services, transmitting a revised building project survey report for the Government Printing Office, Washington, D.C., pursuant to section 11(b) of the Public Buildings Act of 1959, as amended; to the Committee on Public Works and Transportation.

1363. A letter from the Comptroller General of the United States, transmitting a report on the examination of the financial statements of the Federal Financing Bank for fiscal years 1975 and 1976, pursuant to section 106 of the Government Corporation Control Act, as amended (GGD-77-36, April 27, 1977) (H. Doc. No. 95-132); jointly, to the Committees on Government Operations, and Ways and Means, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. TEAGUE: Committee on Science and Technology. S. 36. An act to authorize appropriations to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and for other purposes; with amendment (Rept. No. 95-224). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. KASTENMEIER (for himself, Mr. RODINO, Mr. DANIELSON, Mr. DRINAN, Mr. SANTINI, Mr. ERTEL, Mr. RAILSBACK, Mr. BUTLER, Mr. EDWARDS of California, Mr. CONYERS, Miss JORDAN, Mr. MAZZOLI, Mr. HARRIS, Mr. WIGGINS, Mr. FISH, and Mr. SAWYER):

H.R. 6692. A bill to extend certain programs under the Education of the Handicapped Act; to the Committee on Education and Labor.

H.R. 6693. A bill to amend the Child Abuse Prevention and Treatment Act to extend the authorization of appropriations contained in such act; to the Committee on Education and Labor.

By Mr. GILMAN (for himself, Mr. BADILLO, Mr. BURGENER, Mr. BAUCUS, Mr. BENJAMIN, Mr. DUNCAN of Tennessee, Mr. EDGAR, Mr. EDWARDS of Oklahoma, Mr. EILBERG, Mr. ERTEL, Mr. HUGHES, Mr. LAGOMARSINO, Mr. MITCHELL of New York, Mr. MITCHELL of Maryland, Mr. MONTGOMERY, Mr. NEAL, Mr. RANGEL, Mr. RINALDO, Mr. TREEN, Mr. WALSH, and Mr. WINN):

H.R. 6694. A bill to provide for the termination of all American assistance to any country which fails to take adequate steps to control illegal trade in narcotics; to the Committee on International Relations.

By Mr. GOODLING:

H.R. 6695. A bill to establish under the direction of the Secretary of Housing and Urban Development a State-administered program providing financial assistance to individuals and families for the purpose of purchasing and installing solar heating (or combined solar heating and cooling) equipment; to the Committee on Banking, Finance and Urban Affairs.

By Mr. HUGHES:

H.R. 6696. A bill to amend the Federal Rules of Evidence to protect the privacy of rape victims, and for other purposes; to the Committee on the Judiciary.

By Mr. KELLY (for himself, Mr. WALKER, Mr. ABDNOR, Mr. RUDD, Mr. KINDNESS, and Mr. HYDE):

H.R. 6697. A bill to provide for mandatory sentences for crimes committed while carrying a firearm; to the Committee on the Judiciary.

By Mr. McDADE:

H.R. 6698. A bill to amend the Regional Rail Reorganization Act of 1973 to require ConRail to make premium payments under certain medical and life insurance policies, to provide that ConRail shall be entitled to a loan under section 211(h) of such act in an amount required for such premium payments, and to provide that such premium payments shall be deemed to be expenses of administration of the respective railroads in reorganization; to the Committee on Interstate and Foreign Commerce.

H.R. 6699. A bill to amend the Legislative Reorganization Act of 1946 to require that a cost-of-living pay adjustment for Members of Congress may take effect only if such adjustment is approved by the Congress by recorded vote; to the Committee on Post Office and Civil Service.

H.R. 6700. A bill to provide that certain benefits payable to certain railroad workers will be exempt from Federal income tax; to the Committee on Ways and Means.

H.R. 6701. A bill to amend the Internal Revenue Code of 1954 to provide a basic $5,000 exemption from income tax for amounts received as annuities, pensions, or other retirement benefits; to the Committee on Ways and Means.

By Mr. MARLENEE:

H.R. 6702. A bill to require research into the comprehensive and various uses of grain or grain products in the development and use of fuels, and for other purposes; to the Committee on Science and Technology.

By Mr. PERKINS:

H.R. 6703. A bill to authorize necessary flood protection at locations in Kentucky and West Virginia on an expedited basis; to the Committee on Public Works and Transportation.

By Mr. RAHALL:

H.R. 6704. A bill to authorize necessary flood protection at locations in Kentucky and West Virginia on an expedited basis; to the Committee on Public Works and Transportation.

H.R. 6705. A bill to provide the Corps of Engineers with continuing authority to provide technical assistance to States and political subdivisions thereof in the planning, design and preparation of specifications for snagging and clearing projects in navigable streams and tributaries thereof; to the Committee on Public Works and Transportation.

By Mr. ROGERS:

H.R. 6706. A bill to strengthen and improve the early and periodic screening diagnosis, and treatment program and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mrs. SMITH of Nebraska:

H.R. 6707. A bill to amend part B of title XI of the Social Security Act to exempt small hospitals and other small inpatient facilities, in rural and other areas, from the requirement of review by a professional standards review organization and from the related requirements and provisions of that part; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 6708. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for optometric and medical vision care; jointly, to the Committes on Ways and Means, and Interstate and Foreign Commerce.

By Mrs. SPELLMAN:

H.R. 6709. A bill to authorize recomputation at age 60 of the retired pay of members and former members of the uniformed services whose retired pay is computed on the basis of pay scales in effect prior to January 1, 1972, and for other purposes; to the Committee on Armed Services.

H.R. 6710. A bill to provide for unbiased consideration of applicants to medical

schools; to the Committee on Interstate and Foreign Commerce.

H.R. 6711. A bill to provide for the installation of telecommunications devices for the deaf in agencies of Federal, State, and local government, in offices of Members of Congress and in other locations; jointly, to the Committees on Government Operations and House Administration.

By Mr. LEACH:

H.R. 6712. A bill to amend the Agricultural Trade Development and Assistance Act of 1954; to the Committee on International Relations.

By Mr. SATTERFIELD (for himself, Mr. BUTLER, Mr. COLLINS of Texas, Mr. DAVIS, Mr. EARLY, Mr. FITHIAN, Mr. GLICKMAN, Mr. HEFTEL, Mr. JACOBS, Mr. KINDNESS, Mr. ROBERTS, Mr. ROBINSON, Mr. SIMON, Mr. SYMMS, and Mr. WHITLEY):

H.R. 6713. A bill to amend the Federal Food, Drug, and Cosmetic Act to broaden the discretion of the Secretary of Health, Education, and Welfare respecting certain food additives found to induce cancer in animals; to the Committee on Interstate and Foreign Commerce.

By Mr. HYDE (for himself and Mr. MARRIOTT):

H.J. Res. 419. Joint resolution proposing an amendment to the Constitution of the United States guaranteeing the right of life to the unborn; to the Committee on the Judiciary.

By Mr. WINN:

H.J. Res. 420. Joint resolution proposing an amendment to the Constitution of the United States with respect to the offering of prayer in public buildings; to the Committee on the Judiciary.

By Mr. KEMP (for himself and Mr. HANSEN):

H. Con. Res. 209. Concurrent resolution designating April 30, 1977, Vietnam Memorial Day; to the Committee on Post Office and Civil Service.

By Mr. KEMP (for himself and Mr. DELANEY):

H. Res. 524. Resolution designating May 3 as Polish Constitution Day; to the Committee on Post Office and Civil Service.

By Mr. THOMPSON:

H. Res. 525. Resolution dismissing the election contest against Richard Kelly; to the Committee on House Administration.

H. Res. 526. Resolution dismissing the election contest against Bob Gammage; to the Committee on House Administration.

H. Res. 527. Resolution dismissing the election contest against Abner J. Mikva; to the Committee on House Administration.

H. Res. 528. Resolution dismissing the election contest against Carl D. Pursell; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII,

112. The SPEAKER presented a memorial of the Legislature of the State of Hawaii, relative to strengthening the Nation's electric utility industry; to the Committee on Interstate and Foreign Commerce.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2

By Mr. BAUCUS:

Strike all of section 510(b)(5), page 258, lines 21–25 and page 259, lines 1–22 and insert in lieu thereof:

(5) the proposed surface coal mining operation if located west of the one hundredth meridian west longitude, would—

(A) not be located within an alluvial valley floor, or

(B) not materially damage the quantity or quality of water in surface or underground water systems that supply these valley floors referred to in (A) of subsection (B)(5)

Provided, That this paragraph (5) shall not apply to those surface coal mining operations located within or adjacent to alluvial valley floors which in the year preceding the enactment of this Act were engaged in the commercial production of coal or which had obtained prior to January 4, 1977, specific permit approval by the State regulatory authority to conduct surface coal mining operations within said alluvial valley floors; and

By Mr. BAUMAN:

Subsection 522(a)(3), page 314, line 7, after "will" strike the dash and strike subsections (A), (B), (C), and (D) through line 22. In lieu thereof insert the following: "be incompatible with existing State land use plans or programs of such plans or programs developed according to this section."

Section 714, page 357, line 19, strike all through page 359 line 24. Renumber subsequent sections accordingly.

By Mr. BEVILL:

Section 521(a)(5) on page 311, line 13, insert after "occurs", "; *Provided*, That any notice or order issued pursuant to this section which requires cessation of mining by the operator shall expire within seven days of actual notice to the operator unless a public hearing is held at the site or within such reasonable proximity to the site that any viewings of the site can be conducted during the course of public hearing. The burden of proof shall be on the Secretary or the regulatory authority, as the case may be, to establish by substantial evidence the basis for the cessation order or notice."

By Mr. MURPHY of Pennsylvania:

Section 507(a)(11), page 245, line 22 and page 246, line 7: Add on page 245, line 22 after "(11)" and before the word "a" "When requested by the regulatory authority."

Add on page 246, line 7 after "availability;" "If not requested, the regulatory authority will include the basis of this determination in its written finding pertinent to permit issuance or denial in Section 510(b)."

Section 513(b), page 265, lines 3 through 24: Commencing on line 3 with the words "a hearing" delete the remaining section in its entirety through line 24 the words "by this Act." and insert the following: "an informal conference requested, the regulatory authority may then hold an informal conference in the locality of the proposed mining, if requested, within a reasonable time of the receipt of such objections or request. The date, time, and location of such informal conference shall be advertised by the regulatory authority in a newspaper of general circulation in the locality at least one week prior to the scheduled conference date. The regulatory authority may arrange with the applicant upon request by any party to the administrative proceeding access to the proposed mining area for the purpose of gathering information relevant to the proceeding. Not less than ten days prior to any proposed informal conference the regulatory authority shall respond to the written objections in writing. Such response shall include the regulatory authority's preliminary proposals as to the terms and conditions, and amount of bond of a possible permit for the area in question and answers to material factual questions presented in the written objections. The regulatory authority's responsibility under this subsection shall in any event be to make publicly available its estimate as to any other conditions of mining or reclamation which may be required or contained in the preliminary proposal. In the event all parties requesting the informal conference stipulate agreement prior to the requested informal conference and withdraw their request, such informal conference need not be held. After the informal conference, the regulatory authority, upon request, may order a public hearing. At this public hearing, the applicant for a permit shall have the burden of establishing that his application is in compliance with all the requirements of the applicable State or Federal program under this Act."

Section 519(a), page 300 lines 4 through 22: Commencing on line 4 with the word "within" delete the remaining section in its entirety through line 22, and insert the following: "As a part of any bond release application, the applicant shall submit a copy of a letter which he has sent to the property owners, whose surface was affected and to the appropriate local governmental body, notifying them of his intention to seek release from the bond."

Section 519(a), page 300 lines 4 through 22: Commencing on line 4 with the word "within" delete the remaining section in its entirety through line 22, and insert the following: As a part of any bond release application, the applicant shall submit a copy of a letter which he has sent to the property owners, whose surface was affected and to the appropriate local government body, notifying them of his intention to seek release from the bond.

Section 519(f), page 303 line 3: On line 3 delete "person with a valid legal interest" and insert in lieu thereof "affected property owner."

Section 519(f), page 303 line 7: On line 7 delete "The last publication of the above notice" and insert in lieu thereof "filing the request for release of bond."

Section 519(f), page 303 lines 14 through 16: Commencing on line 14 the word "advertised" delete the remaining section in its entirety through line 16 and insert in lieu thereof "given to the affected property owner and local government unit."

Section 519(e) through (h), page 302, line 23 to page 304, line 5: Commencing on page 302, line 23, with "(e)" delete the remainder of the section through page 304, line 5.

Section 521(a), page 311, line 13: Add on line 13 after the word "occurs." "*Provided*, That any notice or order issued pursuant to this section which requires cessation of mining by the operator shall expire within fifteen days of actual notice to the operator unless a hearing is held before a hearing examiner appointed by the State regulatory authority or if none exists by the Secretary at the site or within such reasonable proximity to the site that any viewings of the site can be conducted during the course of the hearing. The burden of proof shall be on the Secretary or the regulatory authority, as the case may be, to establish by substantial evidence the basis for the cessation order or notice whereupon the hearing examiners may independently continue the cessation order or suspend, alter or terminate same."

By Mr. PRESSLER:

Section 510, after line 6, page 261, insert the following new paragraph:

(d)(1) There shall be established a special procedure on Strip Mining for Prime Farmland.

(2) For five years following the date of enactment, no application for a permit or revision thereof shall be approved unless the applicant demonstrates that prime farmland does not comprise more than 10% of the surface area to be disturbed pursuant to an applicant's mining plan. Such demonstration shall be based upon soils maps and data verified for accuracy by the Secretary of Agri-

culture; provided that nothing in this subparagraph shall apply to any permit issued prior to April 1, 1977, or to any revisions or renewals thereof including those authorizing contiguous expansion of such permitted areas.

(3) The regulatory authority may, after consultation with the Secretary of Agriculture, and pursuant to regulations issued hereunder by the Secretary of the Interior with the concurrence of the Secretary of Agriculture, grant a variance from subparagraph (d)(1) if the operator demonstrates and the regulatory authority finds on the basis of data relating to prime farmlands comparable to those covered by the permit application that the operator can restore the land affected to a condition at least fully capable of supporting the uses which it was capable of supporting prior to any mining.

(4) Within 60 days of the date of enactment, the Secretary of Agriculture shall publish a definition of "prime farmland" and a notification of methods for the determination thereof.

(5) Within four years of the date of enactment, the Secretary of Agriculture shall conduct such research, experimentation and studies as are necessary to determine whether, and with what reclamation procedures, prime farmlands should be made available for surface mining operations and based thereon make appropriate recommendations to the President.

By Mr. SIMON:

Page 180, after item 529 insert the following new items:

Sec. 530. Coal mine subsidence account.

Sec. 531. Subsidence compensation.

Page 332, after line 8, add the following new sections:

COAL MINE SUBSIDENCE ACCOUNT

SEC. 530. (a) There is established in the Treasury of the United States a separate account (hereinafter in this section referred to as the "account").

(b) The account shall consist of the amount of subsidence fees received by the Secretary of the Interior and deposited in the account under subsection (d).

(c) It shall be the duty of the Secretary of the Treasury to hold the account, and to report to the Congress each year on the financial condition and the results of the operations of the account during the preceding fiscal year and on its expected condition and operations during the next five fiscal years. Such report shall be printed as a House document of the session of the Congress to which the report is made.

(d) All operators of coal mining operations shall pay to the Secretary of the Interior, for deposit in the account, a subsidence fee of one cent per ton of coal produced. Such fee shall be paid no later than 30 days after the end of each calendar quarter beginning with the first calendar quarter of the first calendar year beginning after the date of enactment of this Act.

(e) Any portion of the subsidence fee not properly or promptly paid pursuant to this section shall be recoverable with statutory interest from coal mine operators in any court of competent jurisdiction.

(f) Amounts in the account shall be available, as provided in appropriation legislation, only for making expenditures to carry out the coal mine subsidence damage compensation program established under section 531 of this Act.

SUBSIDENCE COMPENSATION

SEC. 531. (a) The Secretary of the Interior, acting through the Bureau of Mines, shall establish a program of compensation for damage caused by coal mine subsidence.

(b)(1) The program established under subsection (a) shall provide that upon application by any person who claims to have sustained damage as a result of the subsidence of any coal mine located within the United States, the Secretary of the Interior shall determine the amount of such damage, if any, attributable to such mine subsidence. Upon a determination of the amount of such damage, the Secretary of the Interior shall, subject to the limitation contained in paragraph (2), pay from the acount established under section 530 to the person sustaining such damage an amount equal to one-half of the amount of such damage.

(2) The Secretary shall make a quarterly determination of the amount available in the account established under section 530. If the sum of the payments authorized to be made during such quarter under paragraph (1) exceed the amount available in such account, the amount of such payments to each person entitled to receive such payments during such quarter shall be reduced by a ratable portion of the amount by which such sum of payments exceeds such amount available.

(3) The Secretary shall make a quarterly determination of the amount available in the account established under section 530. If the sum of the payments authorized to be made during such quarter under paragraph (2) exceed the amount available in such account, the amount of such payments to each person entitled to receive such payments shall be reduced by a ratable portion of the amount by which such sum of payments exceeds such amount available.

By Mr. SKUBITZ:

Section 401(h), page 207, line 10 delete the whole subsection through line 24 on page 207.

Page 204, line 15 after the word "abandoned" and before the word "mine" insert the word "coal."

Page 204, line 16 after the word "abandoned" and before the word "mine" insert the word "coal".

Page 204, line 19 after the word "abandoned" and before the word "mine" insert the word "'coal".

Page 208, line 3 after the word "previous" and before the beginning of the word "mining" insert the word "coal".

Page 211, line 9 after the word "reclaimed" and before the word "mined" insert the word "coal".

Page 211, line 10 after the word "unreclaimed" insert the word "coal".

Page 211, line 11 after the word "by" and before the word "mining" insert the word "coal".

Page 215, line 10 after the word "unreclaimed" and before the word "mined" insert the word "coal".

Page 215, line 14 after the word "from" and before the word "mined" insert the word "coal".

Page 216, line 1 after the word "surface" and before the word "mining" insert the word "coal".

Page 222, line 11 after the word "previous" and before the word "mining" insert the word "coal".

Page 222, line 18 after the word "surface" and before the word "mines" insert the word "coal".

By Mrs. SPELLMAN:

Page 226, line 13, insert "(1)" after "(c)".

Page 227, after line 3, insert the following new paragraphs:

(2) After 18 months after the date of enactment of this Act, no permit shall be issued under this Act in any State by the Secretary or the State regulatory authority with respect to surface coal mining operations proposed to be carried out on any slope of 20 degrees or more.

(3) After 42 months after the date of enactment of this Act, no surface coal mining operations shall be carried out in any State on any slope of 20 degrees or more.

(4) The 18-month period described in paragraph (3) may each be extended for an additional 12 months in any case in which the Secretary determines that such extension is necessary to prevent or minimize production losses and employment dislocations. For purposes of such determination, the Secretary shall study the extent to which such losses and dislocations will result from complying with the provisions of such paragraphs.

(5) The provisions of paragraphs (2) and (3) shall not apply to any surface coal mining operations in which the operator is mining on flat or gently rolling terrain, on which an occasional steep slope is encountered through which the mining operation is to proceed, leaving a plain or predominating flat area.

Page 259, after line 22, insert the following new paragraph and redesignate the subsequent paragraph (and all references thereto) accordingly:

(6) the area proposed to be mined only includes slopes of 20 degrees or more which are authorized and not prohibited for surface coal mining operations under section 502(c); and

Page 284, line 12, after "mining" insert the following: "authorized and not prohibited under section 502(c)".

By Mr. JEFFORDS:

On page 261, after line 6, insert the following new paragraph to section 510:

(d)(1) For five years following the date of enactment, no application for a permit or revision thereof shall be approved unless the applicant demonstrates that prime farmland does not comprise more than 10% of the surface area to be disturbed pursuant to an applicant's mining plan. Such demonstration shall be based upon soils maps and data verified for accuracy by the Secretary of Agriculture; provided that nothing in this subparagraph shall apply to any permit issued prior to May 1, 1977, or to any revisions or renewals thereof including those authorizing contiguous expansion of such permitted areas.

(2) The regulatory authority may, after consultation with the Secretary of Agriculture, and pursuant to regulations issued hereunder by the Secretary of the Interior with the concurrence of the Secretary of Agriculture, grant a variance from subparagraph (d)(1) if the operator demonstrates and the regulatory authority finds on the basis of data relating to prime farmlands comparable to those covered by the permit application that the operator can restore the land affected to a condition at least fully capable of supporting the uses which it was capable of supporting prior to any mining.

(3) Within 60 days of the date of enactment, the Secretary of Agriculture shall publish a definition of "prime farmland" and a notification of methods for the determination thereof.

(4) Within four years of the date of enactment, the Secretary of Agriculture shall conduct such research, experimentation and studies as are necessary to determine whether, and with what reclamation procedures, prime farmlands should be made available for surface mining operations and based thereon make appropriate recommendations to the President.

EXTENSIONS OF REMARKS

THE NURSE PRACTITIONER

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. BYRON. Mr. Speaker, the Frederick News-Post recently contained a feature article on the outstanding work of Mrs. Jean S. Frizzell, a nurse practitioner. Along with her husband, Dr. James Frizzell, she renders outstanding service to the Frederick community and both of them are to be congratulated.

I think this article does an excellent job of describing the important contributions of Mrs. Frizzell and other nurse practitioners. I feel that this article might be of interest to other Members of Congress by helping to provide an insight into the increasingly important role nurse practitioners are playing in the delivery of health care services.

This is particularly relevant, because of pending legislation which would enable greater participation by nurse practitioners in the care of patients using medicare and medicaid. I would, therefore, like to include the article in the RECORD at this point:

BEYOND THE RN—THE NURSE PRACTITIONER

(By Pat Sikes)

The nurse practitioner is new to Frederick, but not to the medical community.

So what is a nurse practitioner?

A nurse practitioner can be an attractive young woman with modishly styled blonde hair who speaks medical jargon a mile a minute.

That's only a thumbnail sketch of Jean S. Frizzell, A.N.P., who is a member of a small but growing profession presently numbering approximately 2500 in the U.S., with nearly 250 in Maryland. They are graduates of some 100 programs established over the U.S. to train the nurse practitioner. Only the University of Maryland and Johns Hopkins University provide the prescribed program in the State of Maryland.

Besides the nurse practitioner, nurses are serving in two other expanded roles—the nurse midwife and the nurse anesthetist.

The concept of a trained person who could perform basic physical and psycho-social assessments originated in the early 1960's. Dr. Henry Silva and Dr. Loretta Ford of the University of Colorado proposed that there was a need in the area of preventive medicine for well-baby health care. "A mother with a well baby has lots of questions," said Mrs. Frizzell, Frederick's only adult nurse practitioner.

It was further proposed that the need could be served by someone other than pediatrician. Such a person was needed, for instance, to perform a routine physical examination, in the school systems, to oversee out-patient care.

But the registered nurse was not the complete answer. To protect the public, advanced training would have to be required.

A pilot study was conducted to determine professional and patient response to the idea. It was highly favorable. In fact, the idea went one step farther. The nurse practitioner concept was expanded to include adult primary health care.

A nurse practitioner should not be confused with a physician's assistant or physician's extender. Nor is she a mini-doctor. "A physician is disease-oriented rather than health-oriented," said Mrs. Frizzell. "The physician is not trained, for instance, in nutrition or psycho-social counseling."

Serious self-discipline and stringent training is required to become a certified nurse practitioner. A nurse practitioner must be a registered nurse, licensed by the State Board of Examiners of Nurses, having presented credentials and met criteria established by the Board. Generally, after two years' practice as an RN, she then must attend a formal Nurse Practitioner program in an academic setting.

Most states require a year's internship functioning as a nurse practitioner, followed by an exam to show evidence of clinical competence. If passed satisfactorily, meeting other criteria as determined by the individual state board, the nurse practitioner is certified. Evidence of continuing education and practice in agencies, hospitals, the U.S. Public Health Service, university infirmaries, Planned Parenthood clinics, to name but a few, is required at the end of each year. Private practice or co-practice with an established physician is rare.

Mrs. Frizzell's credentials are impressive. She was graduated from the University of Vermont in 1968 with a BS in Nursing. From Catholic University, Washington, D.C., she received her MS in Nursing in 1972. She was certified an Adult Nurse Practitioner in 1974 after having attended the Northeast Regional Medical Program at the University of Vermont. Mrs. Frizzell has supplemented and continued her education since 1970, expanding her knowledge in specific areas relating to her practice: respiration, diabetes, cardiology, alcoholism, stroke, nutrition, weight control, digestive disease. Her professional experience includes hospital staff nursing, medical-surgical instruction, administration, primary care perception and research. Since 1973, Mrs. Frizzell has co-practiced with a physician as an adult nurse practitioner, the last two and one half years with her husband, Dr. James A. Frizzell.

Technically speaking, a nurse practitioner is an RN functioning in an expanded role as a health appraiser. In so doing, the nurse practitioner elicits and records a comprehensive health care history traditionally associated with the physician. She performs a complete physical examination using such skills as "auscultation, percussion, palpation and inspection." (To medical illiterates, that means listening, tapping, touching with trained hands and the tools of the medical trade. As Mrs. Frizzell demonstrated, a nurse practitioner has to be able to talk in physicians' language.") She subsequently initiates appropriate screening and diagnostic procedures, recommending x-ray and lab tests, if indicated.

In the co-practice of Frizzell and Frizzell, the doctor in the house views Mrs. Frizzell's contribution as a nurse practitioner as invaluable. "A physician's assistant would not be able to do what she does," said Dr. Frizzell. "The physician's assistant would not have the background and training for taking case histories."

Competent comprehensive case histories are extremely important to the Frizzells. Said Mrs. Frizzell, "Jim and I share the same philosophy that you can't take care of a toe if you don't know what it's attached to."

Doesn't finding out "what it's attached to" take a great deal of time? "We practice slow medicine," replied Mrs. Frizzell. "We schedule appointments at half-hour intervals, allowing one-hour intervals, allowing one hour for physical examinations.

The husband-wife relationship in the team co-practice creates no unusual problems. The ones they have are "routine and minor," according to Dr. Frizzell.

Nor is authority a problem. "The limits are pretty well defined using a jointly prepared protocol. If anything, it makes us doubly careful."

Protocol in the medical sense is not exactly diplomacy. A written protocol is an established plan of therapy for treating the parameters of a certain disorder. The protocol outlines specific treatment accorded acute, episodic and long-term management of chronic diseases and disorders such as diabetes and high blood pressure. Protocols are usually mutually established between the health care practitioners utilizing them. "For instance," said Mrs. Frizzell, "if I recommend a certain pharmaco therapy, diet or activity for a patient, Jim and I must agree." A nurse practitioner at the present time, cannot legally sign a prescription.

Mrs. Frizzell described a typical first session with a patient. "I take a complete history and perform a physical examination. If the patient is a woman, I teach her how to self-examine her breasts. I take a Pap smear, which doesn't have to be done by a physician, you know. We talk about female anatomy, birth control, diet and weight control. Depending on the patient's age, we may talk about menopause. If the patient is over 40, I may suggest a cardiogram and cancer detection program."

"We talk about health based on the patient's history, comparing health care needs as perceived by the patient and her family, and the extent to which these needs are being met. The patient is guided to ask herself, 'Should I be doing more or should I be doing less?'

"I test for glaucoma which is usually the realm of the ophthamologist. If there are teens in the family, there may be drug-related problems which need counsel. The wife and her husband may need marital counseling. If the patient is a smoker, and wishes to stop smoking, we outline a program to help.

"If tests reveal a gastrointestinal disorder, Jim may see the patient next. If there is an elevation of cholesterol and triglycerides another appointment is scheduled with me for nutrition counseling. If any time during the physical I find anything that is not within my realm, I call Jim over.

"We schedule a daily telephone hour for the convenience of patients who have questions or are anxious to hear lab results."

The role of the nurse practitioner doesn't stop with her daily office practice. She identifies problems in the clinical area that requires study, and works independently and/or in collaboration with others in seeking answers to these problems. She continually evaluates the role of the nurse practitioner in terms of consumer, self and colleague satisfaction.

Mrs. Frizzell is a member of the Maryland Nurses' Association. She belongs to a subgroup, Primary Care Special Interest, composed strictly of nurse practitioners specializing in the areas of pediatrics, adults, obstetric-gynecology, school, family. Most members of the sub-group are pediatric and adult practitioners. In sub-group sessions members dialogue on-going practice, comparing problems and rewards, discussing interrelated audits, sharing news of others in their field within the state.

Just how does the nurse practitioner rate on the current scales? "The role of the nurse practitioner has proven itself to be cost ef-

fective," said Mrs. Frizzell. "There is a high degree of patient satisfaction with the primary health care provided by the nurse practitioner. I receive a great personal satisfaction practicing as a nurse practitioner. The responsibility is greater. When an RN makes a mistake it is the hospital's or the doctor's fault, when I make a mistake, it is my fault. The financial reward just all depends."

The Frizzells were honored this past summer by their selection for study by the National Joint Practice Commission. Their co-practice, combining the physician and the nurse practitioner in equal parts, was one of 30 U.S. primary care sites chosen. The Commission explored the best approach to health care in light of economics, patient satisfaction, viable functioning and service to purpose. Dr. and Mrs. Frizzell, their patients and other area doctors were interviewed. Commission findings have yet to be published.

In the future the role of the nurse practitioner undoubtedly will be altered. It makes good medical sense in terms of colleague evaluation health care advances and health care demands. The sharing of inter- and intra-professional evaluations proposes further implications for the education and practice of the nurse practitioner. Mrs. Frizzell maintains a leader's position to this end. She is associated with the Maryland State Board of Examiners of Nurses, Maryland Nurses Association, American Nurses Association and Sigma Theta Tau, national honorary nurses' fraternity. She is a member of the Board of Directors of the Frederick County Heart Association, and Public Health chairperson for their Nursing Education Committee.

According to Mrs. Frizzell, the most urgent problem facing her profession is, "There are not enough qualified RNs. A person becomes an RN in a number of ways. Some could be inadequate. Years of training vary; some may have three years, some four or five. We prefer a baccalureate background and are pushing for a Master's. The advanced nurse practitioner must have a Master's degree."

If all nurse practitioners hold themselves to the same high standards as Jean S. Frizzell, her profession is destined to be known as "distinguished."

OLD FASHIONED INGENUITY EVEN WORKS IN ENERGY

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. FRENZEL. Mr. Speaker, yesterday morning's Washington Post carried a front page story describing a new energy saving electric motor that could do more to advance the cause of energy conservation than has been accomplished by the entire Federal energy establishment supported by millions of dollars in Federal funding.

What makes this story so remarkable, and, at the same time, so familiar, has to do with the fact that this invention was produced by one man, Cravens Wanlass, working at home without benefit of any Federal funding.

The story is remarkable because we had come is believe, in this era of NASA-type technological advances, that significant research could only be done by committees backed up by billions of dollars in Federal funding. Today's problems, we were told, were too complex for one person to make a difference. The only trouble was that someone apparently forgot to explain these facts of life to Mr. Wanless. He never "understood" what he was up against and in the process knocked much of this conventional wisdom into a cocked hat.

The story has a faintly familiar ring to it because it describes a part of our heritage we had almost forgotten, namely our tradition of good old Yankee ingenuity. It is a story that has repeated itself throughout our history. Mr. Wanless described it this way: "It's not an obvious design—it looks like a dumb thing to do."

A spokesman for Southern California Edison Co. put it another way: "No one ever thought about doing it the way he did."

No doubt the energy establishment in Washington this week will begin the task of reprograming its computers, reworking its projections of energy consumption, drawing new scenarios of a world still woefully short on energy. But the picture will have changed significantly for the better because of one man with a different idea.

BARRING U.S. ASSISTANCE TO COUNTRIES FOSTERING ILLEGAL NARCOTICS TRAFFIC

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. GILMAN. Mr. Speaker, I recently introduced H.R. 5135, legislation prohibiting U.S. foreign assistance to those countries not taking adequate steps to prevent narcotic drugs from being illegally transported, directly or indirectly to the United States, or sold within the jurisdiction of such countries.

As a member of the House Select Committee on Narcotics Abuse and Control, I have found that while results of some of our Nation's coordinated efforts aimed at the illegal narcotics traffic provide some basis for encouragement, the back of the illegal narcotics network is far from broken.

Since introduction of this bill, a good number of my colleagues have expressed their interest in initiating deliberate action directed toward ending the ease by which illegal narcotics finds its way into this Nation. They concur that this measure would significantly increase the pressure on those leaders of foreign nations heretofore unresponsive to the plight of not just the United States, but also the many other nations that are suffering from the escalating illegal narcotics traffic.

Mr. Speaker, I am pleased to list the following Members who feel as I that legislation of this nature is long overdue and who have cosponsored this bill:

Mr. Badillo, Mr. Burgener, Mr. Baucus, Mr. Benjamin, Mr. Duncan (Tenn.), Mr. Edgar, Mr. Edwards (Okla.), Mr. Eilberg, Mr. Ertel, Mr. Hughes, Mr. Lagomarsino, Mr. Mitchell (N.Y.), Mr. Mitchell (Md.), Mr. Montgomery, Mr. Neal, Mr. Rangel, Mr. Rinaldo, Mr. Treen, Mr. Walsh, and Mr. Winn.

CONGRESSMAN ANNUNZIO INTRODUCES LEGISLATION TO EXEMPT $5,000 OF RETIREMENT INCOME FROM TAX

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. ANNUNZIO. Mr. Speaker, on March 22, 1977, I introduced H.R. 5293, which would provide a basic $5,000 exemption from Federal income tax of retirement income for an individual or a married couple. This legislation will help to alleviate the hardship so many of our older citizens are having to endure by providing them with some relief from the high cost of living and at the same time it will make our income tax system more equitable.

Under present law, benefits paid under the Social Security Act and the Railroad Retirement Act are fully exempt from Federal income tax. The retirement income of individuals retired under other pension plans, public or private, is fully taxed once the employees' contributions are recovered.

Prior to the enactment of the Tax Reform Act of 1976, relief for persons receiving taxable pensions ostensibly was available through the use of the retirement income credit. Most of the features of the credit had not been revised since 1962 when the maximum level of income on which the credit was computed was set at $1,524. Also, in an effort to make the treatment of those receiving taxable pensions parallel with those receiving tax-free social security benefits, rules for obtaining the retirement income credit had become so complex that many elderly persons did not take advantage of it. They found themselves incapable of computing it. Others found that these rules made them ineligible for the credit. For example, the earnings cutback feature of social security was also included in the rules for obtaining the credit.

Since the base for computing the credit was restricted to retirement income, elderly taxpayers who had to work because their pensions were insufficient to support them had to subtract all or a portion of their earned income from the base and often were eliminated from the relief provided by the credit.

The Tax Reform Act of 1976 restructured and converted the retirement income credit to a tax credit for the elderly, available to taxpayers 65 or over regardless of whether they have retirement income or earned income. The maximum amount for computing the credit was increased to $2,500 for a single person and to $3,750 for a married couple filing a joint return where both are 65 or over. The 1976 act eliminated the earnings cutback feature for taxpayers 65 and over as well as other rules which coordinated the credit with social security and thus greatly simplified its computation.

These changes made by the Tax Reform Act of 1976 are decided improvements over prior law. However, other inequitable features were introduced or

continued. Although the earning cutback feature was eliminated for taxpayers 65 and over, an income phaseout based on adjusted gross income was substituted. Under this phaseout, the maximum amount on which the credit is computed must be reduced by $1 for each $2 of adjusted gross income above $7,500 for single taxpayers and $10,000 for married couples filing a joint return. Many elderly taxpayers who had been eligible for the retirement income credit under prior law were shocked to find in preparing their 1976 tax returns that they were no longer eligible for any credit at all under the new law. The exemption of retirement income provided under my bill does not include any phaseout provision. Thus, the basic amount left tax free can be expected to continue from year to year.

A discriminatory feature of prior law was continued in the Tax Reform Act of 1976. This is the application of the tax credit for the elderly to taxpayers under 65 years of age. Just as the retirement income credit was under prior law, the elderly credit is only available to those under 65 receiving a pension under a public retirement system. The maximum base for computing the credit is increased as in the case for taxpayers 65 or over—to $2,500 for a single taxpayer and $3,750 for a married couple filing a joint return. However, as under prior law, the base is restricted to retirement income and the earnings cutback feature is retained. The adjusted gross income phaseout does not apply to these retirees.

These special provisions for public retirees under age 65 are certainly questionable. First, why should one group of early retirees be singled out for favorable tax treatment? Increasingly, participants in private pension plans are seeking early retirement. There is no reason to expect that their needs in retirement will be any different from those of public retirees. They should be treated the same by our tax laws. Second, if these public retirees under age 65 do not earn income, they do not have to reduce the base for computing the credit even if their adjusted gross income exceeds the levels applicable to taxpayers age 65 and over. This gives public retirees under age 65 an advantage over taxpayers age 65 and over who do not have earned income. H.R. 5293 eliminates these inequities since it has no age and income level limitations, and it does not restrict its benefits to retirees of any particular retirement system.

Although $5,000 is not a great deal of money these days, I believe that removing this basic amount of retirement income from Federal income taxation will lift a tremendous burden from that segment of our society which is least able to carry it. In recent years the financial problems confronting older Americans have become more and more acute. Inflation hits those living on fixed incomes the hardest, and many older Americans live on fixed income. Increases in the cost of food, medical care, housing, and transportation are particularly hard on them.

Census figures for 1974 show that the median income for a husband and wife family with the husband 65 years of age or older is $6,642. This amount is less than half of the $16,253 median income for a husband and wife family with the husband between the ages of 25 and 44. The least we can do is give some minimal relief to older couples by leaving $5,000 of retirement income exempt from tax.

The passage of H.R. 5293 is a step in the right direction, and I urge the support of my colleagues in the Congress for this legislation.

JOE MILLER

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. CHARLES H. WILSON of California. Mr. Speaker, on May 3, the city of Hawthorne, Calif., honors its 1977 Citizen of the Year, Mr. Joe Miller for his outstanding service to the community. I wish to bring Joe Miller to the attention of this Congress in order to commend to the nation the example of his civic dedication and the high caliber of his achievement.

I have known Joe Miller for many years. I have had personal acquaintance with his outstanding qualities; in particular, his strong sense of fair play and his dedication to the best interests of Hawthorne. A director of the Hawthorne Community Hospital for 4 years, Joe Miller was recently installed as the president of the hospital board. A Hawthorne city councilman for the past 12 years and chairman of its Redevelopment Agency, Joe Miller has served as both mayor and mayor pro tempore of Hawthorne. He actively promoted the development of the recently opened Hawthorne Plaza shopping mall, which promises to renew the economic life of the Hawthorne city center.

As if the challenges of city government were not enough, Joe is an active member of the Hawthorne Kiwanis Club and remains on the YMCA Board of Directors. He served with distinction as the chairman of the Hawthorne Bicentennial Committee, and was awarded a special citation and commendation by President Ford and the 94th Congress for his professionalism and ability. The local Chamber of Commerce also joined in recognizing this special achievement.

Special achievement and distinction in service to his country are perhaps to be expected of a man who received five Bronze Stars and two Silver Stars for extraordinary service in the U.S. Navy in World War II. With this record, he was a natural choice for my advisory Congressional Selection Committee for the National Military Academies.

Joe Miller fulfills his civic responsibilities with a single-mindedness and an intolerence for evasion that the city has long respected. I know he has brought these same qualities to his service on the California State Democratic Committee.

In spite of his many public duties, Joe Miller continues to lead a full family life with Lucille, his wife of 28 years, and with his four children, three of whom are triplets. An "instant family" seems to have been a natural response to the pressure of Joe's commitments.

The city of Hawthorne has been revitalized by men like Joe Miller. It is with great personal pleasure that I commend the city and Joe Miller on his selection as the 1977 Hawthorne Citizen of the Year.

GLEN ECHO PARK, MD.

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. STEERS. Mr. Speaker, I include in the RECORD my testimony before the Interior Subcommittee of the Appropriations Committee:

TESTIMONY OF CONGRESSMAN NEWTON I. STEERS, JR.

Mr. Chairman: I would like to plead the case for special, emergency funding for Glen Echo Park, in Glen Echo, Maryland. This Park, located within two miles of the District of Columbia, has been owned by the National Park Service for about a year and a half, though it has been operated by the Park Service for seven years while the General Services Administration held title to the property.

Glen Echo was acquired by the federal government in 1969 in order to protect the Potomac Palisades from development of high-rises, which would have adversely affected the Potomac River shoreline, the C&O Canal Historic Park, and the Clara Barton House—all of which are located adjacent to Glen Echo Park. The concept underlying the Park—which was once a very popular amusement park—is to return Glen Echo to its original purpose, to serve as a "Chautauqua" through which culture and crafts can be taught to the people of this country. Glen Echo is the ideal site for such a renaissance of the Chautauqua concept, for it was originally established in the 1890's as the National Chautauqua. After operating for only one year as a cultural center for the people of the country, the National Chautaqua was closed because of an outbreak of malaria which was traced to mosquitos in the caverns of the Park. The Park fell into disrepair and finally fell victim to the wreckers ball. Eventually, the site was rebuilt as the Glen Echo Amusement Park and abandoned in the 1960's. The present Glen Echo Park could well fall victim to a fate similiar to that of the original Glen Echo—not related to a malaria epidemic—but to a lack of construction funds for renovation and restoration of the buildings.

The buildings at Glen Echo were in terrible shape when it became federal property. And the Park Service was unable to spend any capital funds on property before it was titled to them, so deterioration continued. Presently, the teachers and students of arts and crafts who use the Park have pitched in and spent large amounts of their own money to restore a variety of buildings. However, many of the repairs necessary are well beyond the means and capabilities of the citizens who are helping out. The list which I have included demonstrates the severity of the problems at Glen Echo, as perceived by the Park Service in preparing these estimates. Roofs need repairs, founda-

tions need shoring up, insulation must be installed. We are talking about a sum of $340,000 to complete these needed repairs if this federally owned and operated Park is to meet minimum standards for safety and health.

I realize that the funding requirements of the Park Service are great and that the amount available is small. However, it would be wise to note that unless these emergency repairs are completed, some of the buildings will surely have to be destroyed—also at great cost to the government.

Current estimates for demolition of concrete structures such as those at Glen Echo reveal that ripping down Glen Echo's buildings would cost at least $250,000 and that additional substantial costs would be incurred because of the need to stabilize the land and landscape the entire site. I propose that it is far wiser to take these buildings and repair as many of them as possible so that the Park will continue to serve as a constructive site for large numbers of people from all over this country. Last year, according to Park Service estimates, over 130,000 people visited Glen Echo and over 3,000 took classes in arts and crafts and such practical arts as auto repairs. In addition, according to a response from the Park Service to the Senate Interior Appropriations Subcommittee, Glen Echo is serving as a model for other urban cultural parks throughout the country. And as demonstrated by a letter of support for funding which has been signed by all six Members of Congress from the Washington metropolitan area, the Park serves the entire region on a year-round basis.

Unless Congress appropriates money for Glen Echo as a line item, all of the people who have benefited from and enjoyed Glen Echo will be deprived the opportunity to learn the crafts and customs—and modern societal needs—which this facility offers. Its programmatic monetary needs are not that great. As a matter of fact, Glen Echo's entire budget for FY 77 was $239,000 but the Park *brought in* $90,000 in grants, payments from Montgomery County Public Schools, publication sales and carrousel rides! The Park is extremely popular, is largely supported through its own "moneymaking" ventures and the need for one-time physical repairs must be met. I do not think that the government can afford to allow this park to be destroyed through neglect or inaction. I urge this Subcommittee to at least begin funding the renovation of this facility so that its full potential as a modern-day Chautauqua can be attained and so that the people from all over this country can continue to utilize and enjoy the unique opportunities of Glen Echo Park.

I would be pleased to respond to any questions which you might have.

I. 1-TIME PROJECTS NEEDED AT GLEN ECHO TO ELIMINATE SAFETY HARAZDS IN AREAS PRESENTLY BEING USED FOR PUBLIC PROGRAMS IN PRIORITY ORDER

Map key No. and building name	Project description	Present name	Amount
			0
16—Crystal Pool	Remove back section of seriously deteriorated locker room which hangs over northbound lane of GW Parkway.	Metal sculpture, wood sculpture, stone carving, figure modeling, children's sculpture.	$55, 00
19—Spanish Ballroom	Shore up falling foundation of tower on GW Parkway side	Drama classes, dance classes, music, drama and dance performing, jewelry making.	20, 000
24a—Kiddieland	Remove loosened sheet metal roofing	Not used but very hazardous	4, 000
19—Spanish Ballroom	Replace crumbled beams, flooring, and front stucco facade	(Same as above)	25, 000
8—Yellow Building	Repair sagging beam and install dust collection system for sawdust.	Woodworking class, cabinetmaking, ceramic classes, and demos.	10, 000
5—Ceramic Yurt	Repair sagging roof	Ceramic classes, public demonstrations	5, 000
25—Children Workshop	Replace loosened floor tiling	Handicapped childrens' program	5, 000
Park Grounds	Repair and/or remove deteriorating asphalt	Walking and picnicing	15, 000
20—Adventure Theater	Install sprinkler and smoke detection system	Childrens' theater performances, drama workshops	25, 000
16—Crystal Pool	Stabilize front section of locker room which has deteriorated roof and footers.	(Same as above)	15, 000
	Replace steel support beams that have deteriorated.	(Same as above)	10, 000
15—Old First Aid Station	Repair main electrical service junction that has rusted box, exposed wire and cracked insulation.	Summer sculpture classes, main electrical service to northwest section of park.	7, 000
21—Cuddle Up	Repair falling and leaking roof	Summer performances	6, 000
Subtotal			202, 000

II. 1-TIME PROJECTS NEEDED AT GLEN ECHO TO STABILIZE STRUCTURES IN AREAS PRESENTLY BEING USED FOR PUBLIC PROGRAMS IN PRIORITY ORDER

19—Spanish Ballroom	Repair leaking roof	(Same as above)	15, 000
9—Chautauqua Tower	Repoint stone	Parks and history sales gallery, visitor center, class registration, historic exhibit.	30, 000
16—Crystal Pool	Seal concrete decking to prevent future deterioration of structural supports.	(Same as above)	5, 000
22—Bumper Car Pavillion	Repair badly leaking roof	Picnicking, outdoor summer performances, special festival food service.	5, 000
Parking lot	Regrade to eliminate drainage erosion which causes "river" when raining and large glare ice patch in winter.	Only public parking lot, summer performances	5, 000
7—Caretakers House	Replace leaking roof	Woodworking class, cabinet class	5, 000
12—Park Office and U.S. Park Police Office	Repair leaking roof	Park offices for 53 employees, creative writing, photography, Montgomery County school, multipurpose crafts room.	10, 000
24b—Auto Awareness Workshop	Repair leaking roof	Auto workshops	2, 000
15—Old First Aid Station	Repair leaking roof and deteriorating walls and windows	(Same as above)	3, 000
23—Laff House	Replace leaking and falling roof and repair flooring	Needed for handicapped program	15, 000
Subtotal			95, 00

III. 1-TIME PROJECTS NEEDED AT GLEN ECHO TO HEAT AREAS SO YEAR ROUND PROGRAMS CAN BE CONTINUED IN PRIORITY ORDER

8—Yellow Building	Insulate building and install heating system	(Same as above)	8, 000
16—Crystal Pool	Insulate space and install heating systems	(Same as above)	7, 000
9—Chautauqua Tower	Insulate and upgrade heating system	(Same as above)	30, 000
24b—Auto Awareness Workshop	Insulate and install heating system	(Same as above)	2, 500
Subtotal			47, 500

IV. CONTINUING NEEDS AT GLEN ECHO IN ORDER TO MAINTAIN FACILITIES AND TO PREVENT FUTURE DETERIORATION

DELTA NU ALPHA TRANSPORTATION FRATERNITY, YOUNGSTOWN CHAPTER 6, CELEBRATES NATIONAL TRANSPORTATION WEEK, MAY 15–21, 1977

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. CARNEY. Mr. Speaker, the week of May 15–21, 1977, is National Transportation Week. Delta Nu Alpha Transportation Fraternity, Chapter No. 6 of Youngstown, Ohio, will join other DNA chapters throughout the United States in commemorating this occasion.

Delta Nu Alpha is a national transportation fraternity dedicated to furthering education in transportation. The objectives of the fraternity are:

First. To promote greater knowledge of traffic and transportation among its members by holding informal discussions of traffic and transportation matters at all regular meetings.

Second. To foster and promote the exchange of information, experience, and ideas and cooperation among its members.

Third. To foster academic and practical transportation advancement.

Fourth. To develop an appreciation of the traffic profession as a motivating factor in industry and commerce.

Fifth. To inculcate and encourage justifiable professional consciousness among those engaged in transportation and traffic management.

Sixth. To encourage young persons of ability to enter and remain in the field of transportation and traffic management as a life work.

During National Transportation Week, an award will be presented to the Transportation Person of the Year and the Delta Nu Alphain of the Year.

In addition, a truck fair will be held at the Eastwood Mall in Niles, Ohio. Equipment from the various modes of transportation will be on display to promote and inform the public more fully on the importance of transportation. There will also be television, radio, and newspaper coverage of this event and National Transportation Week to foster a better understanding of the vital role of transportation in our daily lives. Presentations will be made to local high schools to interest and inform students of transportation as a possible career opportunity.

The mayors of the surrounding communities have been invited to the dinner meeting on May 13. The speaker for that meeting will be Mr. Melvin York, past national president of Delta Nu Alpha and lifetime member of Youngstown Chapter No. 6.

The present officers of Delta Nu Alpha Chapter 6 are:

President: Joe Secich.
First Vice President: Don Smith.
Second Vice President: Ed Vogler.
Secretary: Audrey Barker.
Treasurer: Jim Novak.
Directors: Thom Holzshu, Bill Ripple, Frank Mazzarino.

The chairperson of National Transportation Week is Jack Harlan.

Mr. Speaker, I want to take this opportunity to commend President Joe Secich and the other officers and members of Delta Nu Alpha Transportation Fraternity, Chapter 6, Youngstown, Ohio, for their contributions in the field of transportation. I also want to wish them a most successful and rewarding National Transportation Week.

ARE THERE NO LIMITS?

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. BROOMFIELD. Mr. Speaker, on April 14, Joan Mondale, wife of the Vice President of the United States, headed a list of dignitaries unveiling one of the world's tallest sculptures on Chicago's West Side. It is a $100,000, 100-foot-tall, 20-ton steel baseball bat which the U.S. Government erected in front of its new 10-story Social Security Administration building in Chicago that houses about 3,000 employees of the SSA's Bureau of Retirement and Survivors Insurance.

The General Services Administration sets aside a portion of a building's estimated construction cost to provide new Federal buildings with contemporary artworks. Under this policy, Claes Oldenburg was commissioned for $100,000 to design, fabricate, and install the skyscraper-high baseball bat.

I do not propose to pass judgment on the artistic merits of this towering structure, but I raise this question: Is it appropriate use of the tax funds paid by the working people of this country, especially at a time when every taxpayer is feeling the cruel pinch of the eroding purchasing power of every paycheck? I think not.

In commissioning this project GSA has displayed great imagination in disbursing the hard-earned tax funds of the American people. At a time when more and more Americans are rightly demanding that the Federal Government show restraint in its spending, it offers an outrageous example of irresponsible spending by the Government.

This is but one of the many art projects the General Services Administration has commissioned through the art-in-architecture program it supervises. The program originated in 1962. It seems to me this is one of those programs with small, well-intentioned, and worthy beginnings that has mushroomed and gone far beyond its intended purpose. It should receive top priority in President Carter's zero base budgeting and congressional scrutiny. Some budget items may be "uncontrollable," but the baseball bat sculpture is convincing evidence the art-in-architecture program of the General Services Administration is a "controllable" budget item. In addition, the practice of setting aside a portion of a building's estimated construction for funding artworks should be examined since it is deceptive and conducive to excessive spending.

It is essential that we reexamine closely the way the taxpayer's money is being spent. I think private subscription would be an appropriate way to pay for the baseball bat sculpture erected in Chicago, because this method would permit freedom of choice in the payment. I do not think it is appropriate for the American taxpayer to pay the $100,000 bill. It is an example of wasteful and inappropriate use of tax funds which Congress should take necessary steps to correct.

WELFARE REFORM

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for April 27, 1977, into the CONGRESSIONAL RECORD:

WELFARE REFORM

It is easier to find fault with the present welfare system than it is to devise a new one.

Welfare reform is becoming one of the most widely discussed policy matters in the country. With a comprehensive study of the nation's welfare system now well underway, the President will be receiving a definitive report soon. Welfare reform will be one of the biggest and most difficult reorganization tasks ever undertaken in this nation. There is an overwhelming consensus that the 40-year-old $60 billion welfare system needs to be changed.

One of the main problems is that, while everyone favors it, welfare reform means many things to many people. Some want to restructure the whole system; others want to have the federal government lift the burden of welfare cost from the states and local governments. Some want existing benefits increased; others want to cut welfare cost. Some want to make the administration of the present system efficient and responsive; others want to overhaul the administration completely. No matter how carefully crafted a welfare reform proposal may be, it is almost certain to encounter some opposition.

The average American wants to help the needy, but at the same time he does not want to give a free ride to cheaters and sluggards who refuse to work. He is aware that the present welfare system just is not working, in part because:

It provides an incentive for a husband and a wife to split up and discourages single mothers from marrying;

It is costly to administer, confusing to recipients and administrators alike, and replete with opportunit'es for fraud and abuse;

It discourages some people who could work from taking jobs;

It treats people very differently even though their circumstances are very similar;

It discourages poor people from saving any of the welfare money they receive;

It causes a family receiving benefits from more than one program to lose income if benefits under one of the programs are raised only slighty; and

It is shaped by 21 committees in the Congress, 50 state governors and legislatures, 6 cabinet departments, 3 federal agencies, 54 states and territorial welfare agencies, 1500 county welfare departments and by the

United States Supreme Court and many lesser courts.

The goals of welfare reform are not difficult to state. It should:

Provide an adequate income for the disabled and for others who are unable to earn it themselves;

Provide incentives to those who can work to do so;

Prevent fraud and abuse in the programs;

Encourage families to stay together;

Provide the same benefits to persons in the same circumstances; and

Make the administration simple, efficient and inexpensive.

According to the Department of HEW, the major questions to be asked by welfare reformers are these:

Exactly who should be covered at what benefit levels, and what factors should influence benefit levels?

What kind of benefits should be provided?

Under what conditions should welfare recipients be required to work, and what sort of work should they be required to do?

What could the system best promote the goal of family unity?

How should the system be financed, and who should administer it?

What steps should be taken to stamp out fraud and corruption in the system?

Basically, there are two schools of thought on how best to achieve the goals of welfare reform. One school believes the existing system should be scrapped and replaced with a new system in which a direct cash payment would be made to all who met simple eligibility requirements. The other school believes that total reform is politically and economically impossible, and it argues that step-by-step improvement of the present system is the only live option.

It behooves each of us to be less dogmatic about the "welfare mess." We must be more willing to address seriously and constructively the difficult choices presented by the issues central to an informed discussion of welfare reform.

A TRIBUTE ON THE 75TH ANNIVERSARY OF OUR LADY OF GOOD COUNSEL CHURCH IN NEWARK

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. RODINO. Mr. Speaker, last Sunday, Our Lady of Good Counsel Church in Newark commemorated its 75th anniversary of service to its parishioners and his community. For all those years—through two World Wars, a depression, good times and bad—the church has stood as a symbol of continuity, stability, and compassion.

Thousands of people from the Newark area have worshiped at Our Lady of Good Counsel, finding there the inner spiritual strength and inspiration to lead decent lives, and carrying away with them the special wisdom and peace imparted by the priests and the sisters who have served there.

My own family and I have worshiped at the church for nearly 30 years. My children's spiritual roots were developed there. For us, as for so many others, Our Lady of Good Counsel has enriched our lives and helped us in times of trial.

Mr. Speaker, to mark the 75th anniversary of the founding of Our Lady of Good Counsel, a solemn pontifical mass was celebrated last Sunday by Archbishop Peter L. Gerety of Newark, retired Archbishop Thomas A. Boland, Auxiliary Bishop John Dougherty, Episcopal Bishop Joseph A. Francis, vicar of Essex County, and Episcopal Bishop Jerome A. Pechillo, vicar of Hudson County. With them were 28 priests, including Father Thomas B. Smith who for 19 years has wisely and gracefully served at Our Lady of Good Counsel, first as an assistant and now as pastor.

This Friday, the week-long celebration of the church's diamond jubilee will be concluded with a banquet in Newark to be attended by many of those to whom the church has meant so much over the years. Former parishioners are coming from all across the Nation, drawn by the fact that they have always retained a bit of the church, wherever they went. I am privileged to be honorary chairman of the dinner committee.

Mr. Speaker, I should like to conclude these remarks by quoting from the program distributed at last Sunday's mass:

May the good Lord bless us all and enable us to be of service to Him and to His children everywhere for many more happy years.

That is my prayer too.

FAUNTROY CLARIFIES NEWS ARTICLES

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. FAUNTROY. Mr. Speaker, over the past 2 days, the Washington Post has run two news stories and one editorial about questions I have raised concerning journalists and the manner in which the House assassinations probe has been treated by some in the print media. I wish to clarify certain positions which those news articles have attributed to me so that my colleagues in the Congress may clearly understand where I stand.

The House Assassinations Committee has no plans, current or future, to call news reporters before it for purposes of probing their coverage of the investigation. I have simply stated that I have a personal interest in finding out whether certain news reports have been influenced by reasons other than providing information to the public. My interest stems from my belief that some of the reports have been unfair and without bases. It seems to me that some of the reports have been designed to discourage the probe by the House.

Objectivity in reporting on as sensitive a matter as these assassinations probes is of great importance, in my view. My concerns in this regard were prompted by a published report in the Washington Star-News of November 30, 1973, in which it was reported that the CIA employed some 40 journalists who doubled as undercover contacts. On December 1, 1973, the Washington Post carried a similar article. I am including for the RECORD both articles as part of my remarks.

One of the two undercover contacts whom the articles identified is currently assigned to cover, report, and interpret the activities of the committee for the Washington Star-News. I simply wonder how many of the unnamed former contacts are similarly reporting and interpreting the probe. That is the extent of my interest.

I am a strong supporter and advocate of hard, factual news coverage, and I cherish dearly the right of every American to speak out. I am, however, greatly troubled by the thought that the news media, which has much influence over us, has, at least in the past, been linked to the CIA. My concern is heightened by revelations of domestic activity and abuses by the CIA, revelations which, in part, caused both the House and the Senate to establish select committees to investigate intelligence agencies.

In assessing the initial investigation of the Kennedy assassination the Senate select committee concluded at book V of its final report of the Select Committee To Study Governmental Operations With Respect to Intelligence Activities:

The Committee has, however, developed evidence which impeaches the process by which the intelligence agencies arrived at their own conclusions about the assassination, and by which they provided information to the Warren Commission. This evidence indicates that . . . the investigation of the assassination was *deficient* and that facts which might have substantially affected the course of the investigation were not provided the Warren Commission or those individuals within the FBI and CIA, as well as other agencies of Government, who were charged with investigating the assassination.

Although I have publicly stated my concern, I have not sought, nor have I intended, to intimidate the press. I am hopeful that these remarks serve to clear the air surrounding this issue. I believe all my colleagues will agree that it is a sad and dangerous commentary on our news delivery system if those charged with informing the public have personal interests at stake.

The news articles follow:

[From the Washington Star-News, Nov. 30, 1973]

JOURNALISTS DOUBLING AS CIA CONTACTS

(By Oswald Johnston)

The Central Intelligence Agency has some three dozen American journalists working abroad on its payroll as undercover informants, some of them as full-time agents, the Star-News has learned.

After CIA director William E. Colby ordered a review of the practice two months ago, agency officials found the names of some 40 full-time reporters, free-lance journalists and correspondents for trade publications in their files as regular undercover contacts who supplied information to agents in the field and who are regularly paid for their services.

The use of foreign correspondents by the CIA has been quietly suspected—and feared—for years by legitimate reporters who have worked overseas. But the suspicion has never been verifiable until now. The facts were made known by an authoritative source.

The continuing extent of the practice and its wide scope, which is believed to have been scaled down since the Cold War tensions of the 1950s, was apparently a surprise even to Colby, who last month ordered a significant

cutback in the CIA relationship with journalists connected with major news organizations.

No longer to remain on the agency payroll is the one category of journalist-agents whose continued existence could most seriously compromise the integrity of the American press in general and possibly cripple its ability to function overseas.

To be phased out is a small group of no more than five full-time staff correspondents with general-circulation news organizations who function as undercover contacts for the CIA and are paid for their services on a regular contractual basis.

It is understood that three of these agents have maintained their CIA contacts without the knowledge of the news organizations involved, but that the CIA sideline of the other two is known to their civilian employers.

Sources refused to identify any of the reporters involved, but it is understood that none of the five agents who are being cut off were regular staff correspondents of major American daily newspapers with regular overseas bureaus.

Colby is understood to have ordered the termination of this handful of journalist-agents in the full realization that CIA employment of reporters in a nation which prides itself on an independent press is a subject fraught with controversy.

Nevertheless, he has approved explicitly the continued maintenance of more than 30 other CIA agents abroad who are not strictly newsmen but who rely on some kind of journalistic "cover" for their intelligence operations.

Among those to be maintained is by far the largest category of journalist-agents: A group consisting of about 25 operatives scattered across the globe who appear to the world as free-lance magazine writers, "stringers" for newspapers, news-magazines and news services, and itinerant authors. (A stringer is a journalist, usually self-employed, who offers news-magazines on a piece-work basis to news organizations which do not have regular staff members in the stringer's city.)

Agents in this category are not regularly identified with any single publication, and most of them are full-time informants who frankly use their writing or reporting as cover for their presence in a foreign city. Most of them are American citizens.

Most are paid directly and regularly for services rendered, but a few of these semi-independent free-lance writers occasionally draw on CIA funds to pay out-of-pocket expenses for trips in which the agency had an interest or for entertaining a useful contact.

A second group of overseas correspondents whom Colby intends to keep on the payroll consists of eight writers for small, limited-circulation specialty publications, such as certain types of trade journals or commercial newsletters. It is understood that most in this group operate as paid CIA informants with the approval of their employers.

Colby also intends to keep up the quiet, informal relationship the agency has built up over the years with many reporters working at home and abroad and editors who for their part maintain regular contact with CIA officials in the routine performance of their journalistic duties.

No money changes hands under these relationships, either as occasional payment or as reimbursement for expenses. In general, the relationship is limited to occasional lunches, interviews or telephone conversations during which information would be exchanged or verified. Each side understands that the other is pursuing only his own tasks.

In such a relationship, the reporter would be free to use the information he gained in a news story, and occasionally the CIA agent might make use of what he has learned from the reporter. Very likely, the CIA official would report the gist of his conversations with the reporter to his superiors, orally or in a written memo.

In this group, sources indicated, the CIA includes Star-News reporter Jeremiah O'Leary whose name apparently found its way into agency files as a result of contacts of this professional type during assignment overseas for the Star-News.

(Star-News editors have discussed this matter with O'Leary and other sources and have found no evidence to suggest that either he or this newspaper has been compromised.)

Veteran intelligence operatives are understood to look with mixed feelings on Colby's decision to break off CIA contacts with legitimate full-time correspondents.

On the one hand, journalists operate under conditions that, in the eyes of a professional spy, provide a natural "cover," combined with unusually good access to people and places abroad that would be unavailable to persons in other professions.

The use of journalist-agents is known to be widespread in Communist-bloc countries where the press is government-controlled, and during the 1950's the Tass correspondent who was also a Soviet agent was almost proverbial.

At the same time, agency officials are known to recognize that CIA penetration of the American press, if discovered or even suspected to exist on a wide scale, would further damage the CIA's shaky public image at home and could seriously compromise the reputation of the American press.

For both of these reasons, sources were extremely reluctant to give any details of the operations in which journalist-agents were involved or to discuss their assignments in any but the most general way. Sources who verified the existence of the practice refused to reveal how much the agents were paid or where they have been deployed.

Colby himself is thought to be solely responsible for the decision to cut off the CIA relationship with full-time staff correspondents for general news-gathering organizations.

During his Senate confirmation hearings last summer, Colby promised in the aftermath of the Watergate-related disclosures of domestic political espionage that he would take pains to operate "an American intelligence agency"—that is, one with operations compatible with a democratic society.

Colby's cutback on CIA use of the press is understood to have been governed by that promise.

Nevertheless, Colby has privately justified past use of the news media as agency cover by stressing that newsmen operatives were not as a rule used as vehicles for planting propaganda.

As a matter of standard operating procedure, sources insist, an agent operating under cover as a freelance writer or as a staff correspondent for a newspaper of news agency almost never had his news stories or articles "critiqued" by his case officer.

While propaganda admittedly has been an important part of clandestine CIA operations abroad, that function has been kept separate from the routine running of agents, even though both assignments belonged to the agency's Clandestine Services, under the Operation directorate.

Accordingly, the extensive network of dummy foundations through which the CIA was revealed in 1967 to have funneled cash to such publications as Encounter magazine or such organizations as the American Newspaper Guild was not related to the use of newsmen or writers as intelligence operatives in the field.

If anything, the use of newsmen in this way seems to have been carried out at the discretion of station chiefs abroad, with little or no central oversight.

Until late last summer, neither Colby himself nor the top officials in the Operations directorate had any precise information on how many clandestine agents were currently operating under journalistic cover.

During September, in the aftermath of revelations that the Nixon administration used journalists as paid political spies during the 1968 and 1972 presidential campaigns, and in response to queries from the press, Colby ordered an in-house investigation within the Clandestine Services to find out exactly what the situation was.

The specific impetus for the press inquiries, which in turn spurred Colby to order the Operations directorate to search its files, was the published disclosure that Seymour K. Friedin, a political spy for the 1972 Nixon campaign, regularly passed information to the CIA when working as a syndicated columnist in Europe during the 1950s.

[From the Washington Post, Dec. 1, 1973]

USE REVEALED BY COLBY SURVEY—NEWSMEN SUPPLY DATA TO CIA

The Central Intelligence Agency has been paying more than three dozen agents operating under journalistic covers abroad for part-time or full-time services.

This was determined by CIA Director William E. Colby as the result of a survey of undercover agents spurred by recent congressional inquiries into possible domestic operations of the agency.

Colby has reportedly decided to remove from the CIA payroll a small number of full-time news correspondents with whom the agency had contracted for services, according to authoritative sources.

But it is understood that he plans to retain the services of the majority of the journalist agents, who are not associated with major publications but function under various reportorial covers.

The CIA director was reported to be out of town yesterday on official business and agency spokesman would not comment officially on the report, published in the Washington Star-News. It was independently confirmed, however, by knowledgeable officials.

Rep. Lucien Nedzi (D-Mich.), chairman of the House Armed Services Subcommittee on Intelligence, said yesterday he would make inquiries into the practice of paying journalists for intelligence services.

"I can't say I'm really surprised." Nedzi said of the disclosure. "I suppose the real problem was whether the press was being used to peddle a certain line. To it was an arrangement for gathering of intelligence. I find it difficult to see much wrong with it."

So far the only two journalists names that have emerged from the CIA's file belong to a smaller group of perhaps a dozen correspondents with whom the agency has maintained informal, unpaid, working relationships. One is former Europe-based columnist Seymour K. Freidin, who was implicated as a supplier of information to the Nixon campaign in 1972. The other is Star-News correspondent Jeremiah O'Leary, as reported in the Star-News story.

O'Leary was mentioned in a category of newsmen who occasionally exchange information with CIA officials in the routine performance of journalistic duties without any monetary considerations.

Interviews with CIA station chiefs or lesser officials in overseas posts are not uncommon practices for correspondents of most major publications in the performance of their news-gathering functions. Normally, however, it is not considered part of the journalistic function to provide information to government agents.

Several former CIA operatives expressed surprise at the number of newsmen Colby discovered on the agency's current payroll.

"It's quite a bit more than I would have expected," said one CIA veteran who now monitors agency activities on Capitol Hill.

The majority of this group, some two dozen, were determined to be operating under the cover of freelance journalists or "stringers" (correspondents not on the regular staffs of publications) working in foreign posts.

In 1967 the agency was wracked by a massive series of disclosures that it was underwriting activities of book publishers, magazines, student and cultural organizations and trade unions, including the American Newspaper Guild.

In the aftermath of those revelations the CIA was understood to have withdrawn from covert financing of such organizations as well as from a network of foundation conduits through which the money was channeled.

More recently agency officials have been questioned by congressional oversight committees—in the aftermath of the Watergate scandal—about CIA involvement in domestic activities. Several bills have been proposed designed to curtail domestic operations of the CIA.

There have, however, been no recent revelations of CIA penetration of domestic institutions comparable to the scale of those uncovered in the late 1960s.

ISRAEL: TWENTY-NINE YEARS OF INDEPENDENCE

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. ROSENTHAL. Mr. Speaker, the search for a peaceful settlement in the Middle East is uppermost in the minds of many in Washington this week.

At the White House, President Carter has been meeting with Jordan's King Hussein, the third Middle East leader to visit here in the administration's continuing round of exploratory talks. These began in February with Secretary of State Vance's trip to the Middle East and visits to Washington by Israeli Prime Minister Rabin and Egyptian President Sadat. Next month the President will meet with the leaders of Syria and Saudi Arabia.

Another meeting taking place in Washington this week is the annual policy conference of the American Israel Public Affairs Committee.

Speaking to the AIPAC conference, Senator FRANK CHURCH of Idaho declared:

> Peace . . . must be for this and not another generation.

That means, he explained, the normalization of relations: The exchange of Ambassadors, commercial intercourse, and cultural contacts, so that over time both Arab and Jew may adjust to 'normality.'"

Senator CHURCH observed:

> I suspect today that much of the venom directed against Israel in the United Nations and in the Middle East is a reflection of the resentment that this small nation engenders because it is an oasis of freedom in the midst of a desert of authoritarian governments.

The United States has an important role to play in the peace process, he pointed out, but it cannot be a substitute for direct negotiations among the parties directly involved. That will mean resisting immense political and economic pressures exerted by some segments of American business and their friends among the oil-rich Arab states, he added.

Israel is celebrating its 29th anniversary of independence—and the first year in which not one of its soldiers was killed in hostile action with the enemy along its borders. Hopefully, it will be the first of many such years.

Mr. Speaker, I am inserting in the RECORD the full text of Senator CHURCH's excellent speech before the AIPAC annual policy conference dinner.

ISRAEL: TWENTY-NINE YEARS OF INDEPENDENCE—A CELEBRATION OF LIFE

(By Senator FRANK CHURCH)

We are here to celebrate the 29th year of Israel's independence. It is, of course, true that Israel has lived so precaricously that every added year becomes a cause for celebration. But I think it is particularly appropriate this year to review the basic considerations which underlie the relationship between the United States and Israel.

For this is a year in which, under the leadership of President Carter, the United States itself is seeking to reestablish a better balance in its foreign policy between principle and pragmatism. For too long, our foreign policy had been dominated by so-called "hard headed" assessments in which immediate and purely material advantages were sought. Now we are rediscovering that the American character demands that our foreign policy reflect a due regard for principle. And principle, the principle of justice, was from its inception the heart of the American commitment to Israel.

Thus, the Jewish demand for a national state, even before Israel was established, called forth a universal response. Orde Wingate, the famous guerilla leader who died in Burma in World War II, may have said it best:

"When I was at school . . . I was looked down on, and made to feel that I was a failure and not wanted in the world. When I came to Palestine I found a whole people who had been treated like that through scores of generations, and yet at the end of it they were undefeated, were a great power in the world, building their country anew. I felt I belong to such people."

But in our own State Department, there were many who feared that the establishment of a Jewish state would prejudice American relationships with the Arab world and therefore urged a postponement of Jewish national independence. These objections were steadfastly overridden by President Truman. On May 14, 1947, the same day that David Ben-Gurion officially proclaimed "the establishment of the Jewish state in Palestine, to be called the State of Israel," President Truman extended de facto recognition to the fledgling government. In effect, principle won out over "hard headed" pragmatism, which I believe to have been as misguided then as it is today. And this is what I want to review with you: the proposition that where Israel is concerned, a principled policy is the only suitable one for a people like our own.

From its inception, Israel has not had an easy existence. No sooner was the new state proclaimed than it was invaded by the armies of its Arab neighbors, under the mistaken assumption that they would gain an easy victory over the citizen army assembled by the new nation. In 1967, Gamal Abdel Nasser dismissed the United Nations troops stationed in a buffer zone between Israel and Egypt and, then, closed the straits of Tiran at Sharm El Sheik, a move which would have denied Israel access to the Red Sea. That move led to the Six Day War in which Israel prevailed; it is important for us to remember this sequence of events, for the territorial disputes between Israel and its neighbors would not exist today if Nasser had not initiated his provocative act at Sharm El Shiek.

Behind Nasser's move in 1967 lay a vision of a Pan Arab nation stretching from Egypt through Syria, with no room for the interloper Jewish state. And this is the basic issue which lies at the roots of the Arab/Israeli question: Do Israel's neighbors now accept the legitimacy, the right—not the privilege—of Israel to live in peace as a fully sovereign and legitimate state in the Middle East? That is the issue on which there can be no equivocation, no ambiguity, no discrepancy between private and public statements.

The PLO has never yet revoked the cardinal points of the Palestine National Covenant of 1968: that the "Zionist presence" must be purged by "armed struggle"; that the "partitioning of Palestine . . . and the establishment of Israel is fundamentally null and void"; and that only Jews permanently settled in mandated Palestine by 1917 have the right to remain there after "liberation."

Nor did the March 20 Cairo declaration reveal any softening of these harsh provisions. The Cairo statement rejected UN Resolution 242 as a framework for peace; promised an "uncompromising determination . . . to continue the military struggle," an "escalation of fighting in the occupied land," the rejection of "all forms of American arrangements"; and a continuing designation of Zionism as "racism."

In the aftermath of Sharm El Sheik, the 1973 Arab offensive on Yom Kippur, and the most recent Cairo declaration, it is imperative to secure tangible evidence that the fundamental premise which underlies the PLO covenant and which led to the closing of Sharm El Sheik, namely, the premise that Israel is an illegitimate presence in the Arab crescent, has been abandoned. Peace, in other words, must be for this and not another generation, and it must be manifested in the normalization of relations: the exchange of Ambassadors, commercial intercourse and cultural contacts, so that over time both Arab and Jew may adjust to "normality."

Is this utopian, mere fantasy? I think not. Former *Washington Post* correspondent, Dan Kurzman, described in his book, *Genesis 1948: The First Arab-Israeli War*, a unique relationship which had developed on the battlefield between Yeroham Cohen, then an aide to Yigal Allon, the Commander of the Southern front, and the then General Nasser:

"In February, 1950, Gamal Abdel Nasser and Yeroham Cohen met in El Aujer and drove together to Fahya so that Nasser could point out the location of Israeli graves. As they walked among the graves, Nasser asked, "Do you remember, Yeroham, when we sat on the grass, and I told you I didn't think I would ever see my wife and daughter again?'

" 'Yes, Gamal. And I told you that you would not only see your daughters, but would have a son as well.'

" 'Well, I've got a son.' That night, Cohen, on returning to Tel Aviv, sent a package of baby clothes to his Egyptian friend."

It was too bad, he reflected, that a man like Gamal Abdel Nasser was not running Egypt.

In a sense, we can sum up the basic Middle East dilemma with this question: Can the gap be bridged between the unremitting hatred reflected in the PLO covenant and the human dimension represented by the delivery of baby clothes for Nasser's son?

In bridging that gap, the United States

has an important role to play. But it must make it clear that, in providing its good offices, it is facilitating, not substituting, for direct negotiations between the parties. For, if real peace is to be achieved over whatever period of time, it must begin as it has historically begun in other conflicts—the Franco-Prussian War, World Wars I and II—with direct face to face negotiations in which the opposing sides implicitly acknowledge the legitimacy of each other.

We cannot wipe out 29 years of history. During that time, Israel has been beleaguered. It has come to rely upon its own defense capability rather than to ask, as other countries have, for the deployment of American troops or the establishment of American bases as a security shield. Consequently, Israel has had to develop strategic and tactical military doctrines to compensate for its small geographical area and before 1967, its precarious borders, which at one time made it potentially possible for an enemy to cut the country in half merely by overrunning ten miles of Israeli territory. In direct negotiations between the parties, this border alignment will inevitably and, rightfully so, become a prime source of concern to Israel. Similarly, we must expect the Arab states, in the process of negotiation, to seek a resolution of the Palestinian question. But this is the stuff of genuine negotiations, in which the United States ought not to substitute for the parties.

Once before the United States interposed itself. As George Ball notes in his recent article in Foreign Affairs, the Eisenhower Administration, back in 1957, obtained the withdrawal of Israeli troops from the Sinai with a "private American commitment to preserve Israeli access through the Gulf of Aquaba." In George Ball's words, "This commitment was at best waffled on during the May, 1967, crisis" which followed Nasser's closing of Sharm El Sheik. In short, where another nation's survival may be at stake, the United States should not itself assume the responsibility of settling the vital issues, giving in return commitments, well meant at the time, but not possible to fulfill by later Administrations in other circumstances. So, while we have a role to play in facilitating negotiations, it is a role which calls for a large degree of discipline in restraining our natural impatience to get on with the job by doing it ourselves. This is one case where we should keep our do-it-yourself kit at home.

Yet, I think we must be realistic and recognize that the pressures to achieve a settlement at virtually any price will be very great. Looming in the background of Middle East negotiations is the spectre of economic coercion. The wealthiest governments in the world today are the oil-rich Persian Gulf countries, fortified with the economic and financial power that a sixfold increase in the price of oil has given them. American companies and banks want in on the financial bonanza, and too many of them are willing to do virtually anything to get their share, including compliance with the Arab boycott of Israel.

Two years ago, I was the first to make the boycott list public because I thought we could never deal with it unless we brought it up from under the table and placed it out for all our citizens to see. I think it important that we understand what is, and what is not, at issue. What is not at issue is the right of an Arab state, in belligerency with Israel, to boycott Israeli goods. What is at issue is the right of an Arab state to reach into the United States and (a) impose a secondary boycott by directing an American firm not to do business with Israel as a condition of doing business in the Arab country, or (b) impose a tertiary boycott by directing an American firm to have no transactions with another American firm which does business with Israel or has Zionist connections, whatever that may mean.

The economic grains of acquiescence may be enormous, but so is the moral cost. Once we admit the principle that another country has amassed the economic power to dictate the terms upon which American firms do business with each other or with nations friendly to us, then we have conceded a cornerstone of our independence. And I fear that it will not stop there. Subtly at first, more overtly later, we will find American firms governing their hiring and promotion policies and determining with whom they do business, in accordance with what they think will please the Arabs, rather than ordinary commercial criteria. The time to stop the rot is now, before it tears into the very fabric of American society.

If there was ever a test of principle and morality in American foreign policy, this is it. There was a time, of course, when this country would never even have hestitated as to its behavior. On December 17, 1911, back in a time when moral principles mattered more to the government than has been true in the recent past, President Taft abrogated a lucrative trade agreement with Czarist Russia which was shortly to go into effect because the latter refused visas to American Jews. And earlier than that, clear back in May of 1885, the United States was informed by the Austrian Government that Mr. Anthony Reiley would be unacceptable as envoy plenipotentiary to Vienna because, in the words of the Imperial Government, "The position of a foreign envoy wedded to a Jewess by civil marriage would be untenable, even impossible, in Vienna." Let me read you what our Secretary of State Bayard said in reply. He wrote:

"It is not within the power of the President nor the Congress nor of any judicial tribunal in the United States to take or even hear testimony, or in any mode to inquire into or decide upon the religious belief of any official, and the proposition to allow this to be done by any foreign government is necessarily and a frotiori inadmissable.

"To suffer an infraction of this essential principle would lead to a disenfranchisement of our citizens because of their religious belief, and thus impair or destroy the most important end which our constitution of Government was intended to secure."

Oh, how much we need to have that kind of forthright language used again by those who lead this land!

I come from a state where there are very few Jews. I don't suppose there are more than a couple of hundred Jewish families in the whole of Idaho. Still, I've always felt very strongly about our bond with Israel, because I think that it serves the interests of the United States to preserve in that part of the world a bastion of friendship in a little land that has demonstrated its determination to live and its capacity to defend itself when necessary. But also because I think it is morally right for us to do this. In a way I expect that the vitriolic feeling against Israel in the Middle East among the Arab countries is due, in part, to the same considerations that led our own infant country to be isolated in the world of the 18th century. In his introduction to the *Federalist Papers*, Clinton Rossiter, the American historian, noted that one of our early leaders, James Madison, won his honored place in our history as Secretary of State by guiding the then friendless Republic through the dangerous waters of international hostility. It may be difficult to conceive today that the United States in her early years, stood alone. But as an anomaly in a world composed of entrenched autocracies, the new Republic was at first suspect and then feared by the great monarchs of Europe, not because of power, for we had none, but because of the force of the ideas which impelled its creation. And I suspect today that much of the venom directed against Israel in the United Nations and in the Middle East is a reflection of the resentment that this small nation engenders because it is an oasis of freedom in the midst of a desert of authoritarian governments. As Prime Minister Rabin observed, "There are all too few nations in the world that uphold these democratic forms and objectives."

In the 1930's, we saw unprincipled great powers sacrifice the interests of small powers and in the process fan the winds of war. If we in the United States remember the fateful lessons of the Second World War, if we steadfastly uphold our own principles against whatever pressures may be mounted against them, then truly we shall have heeded the words of Leviticus: "To proclaim liberty throughout the land, and justice to the inhabitants thereof."

So, as we celebrate Israel's independence here tonight, let me conclude with a toast reserved for occasions such as this, L'Hyaim—to life—for this small country, this courageous people, and the enduring principles of justice, freedom and democracy.

SPANKING SCHOOLCHILDREN

HON. ELIZABETH HOLTZMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Ms. HOLTZMAN. Mr. Speaker, on April 19 the Supreme Court, in the case of Ingraham against Wright, held that school children are not constitutionally protected against even the most severe and excessive kinds of corporal punishment.

The school child—

The majority declared—

has little need for the protection of the Eighth Amendment.

I consider this decision a disgrace; our constitutional rights have no age limitation. As the New York Times noted editorially:

Each member of the errant majority deserves at least five whacks.

I commend the following editorials on the subject from the April 21 Washington Post and New York Times to my colleagues:

TO SPANK OR NOT TO SPANK

The Supreme Court's decision that the spanking of school children can never be "cruel and unusual punishment" does not open the way for wholesale, violent beatings of pupils. There are laws in most states against that, and teachers who abuse children are subject, at least in theory, to jail terms and damage suits. On the other hand, the decision does not leave students with much protection against spankings that are either unjustified or simply excessive. Teachers don't often lose when the punishment they have inflicted upon a child is challenged.

So the argument—to spank or not to spank—will go on without much court intervention. Maybe that's the way it should be, given the disagreement among parents and even experts on the efficacy of such punishment. But the Court's decision offers no comfort for those who believe spanking is counterproductive, particularly when the ruling is coupled with a decision two years ago in which the Justices said parents have no right

to bar school officials from spanking their children.

Teachers in two states—Massachusetts and New Jersey—are now barred by law from spanking students. Those in many others are specifically authorized to spank as long as the spanking is not excessive or brutal. But punishing a student for something he didn't do is rarely considered excessive, and standards of brutality vary dramatically from place to place. In this particular case, one eighth grader was hit 20 times with a half-inch thick paddle while being held over a table; he needed medical attention and was kept out of school for 11 days. Whatever label you put on it, that seems to us to be punishment that is cruel and unusual.

The rationale of the Court's majority for saying it is not, at least in terms of the Constitution, is that the bar against "cruel and unusual punishments" applies only to punishment administered under the criminal law. This is a narrow reading of that provision, a reading that is difficult to square with some prior decisions. The Court ruled not so long ago, for example, that it is cruel and unusual punishment to deny adequate medical care to a prisoner, although the denial was not imposed by the law but came about because of misconduct by a prison doctor.

Just as thin, it seems to us, is the distinction the Justices have drawn between being spanked and being suspended. Under this decision, a student can be spanked without being told what the punishment is for or being given a chance to say, "Hey, you got the wrong kid." But under other decisions, the same student has a federal right to at least those rudiments of a hearing before being suspended. Maybe to adult eyes a spanking is less serious than a suspension. But we're not sure students look at it that way, and we know it is not less serious when it results in medical treatment and 11 days out of school.

PADDLING JUSTICE

The Supreme Court, by a 5-to-4 majority and a tortuous bit of reasoning, has decided that school children enjoy no constitutional protection against paddling or other corporal punishment, no matter how severe or arbitrary. It ruled in essence that most of the country still favors whacking misbehaving kids, that state laws provide enough safeguards for how it's done, that the school can be held accountable by community and parents, that teachers should not have to bother with pre-paddle hearings and that the kids can always sue if they are hurt too much or by mistake. Each member of the errant majority deserves at least five whacks.

The opinion, written by Justice Powell on behalf of Chief Justice Burger and Justices Stewart, Blackmun and Rehnquist, applied to the case of two 14-year-old students of a Miami junior high school who said they had been subjected to a "reign of terror" by paddle-wielding school officials. Their claim of excessive and incapacitating punishment was not disputed. The issue, rather, was whether children in school, like criminals in prison, are protected by the Eighth Amendment of the Bill of Rights, which prohibits "cruel and unusual punishments," and by a requirement of "due process" before punishment.

The legalisms of the majority were well disputed by Justice White, on behalf of Justice Brennan, Marshall and Stevens. The beatings, he noted, were so severe that they would have clearly violated the Constitution if inflicted on a hardened criminal. In the view of the minority, paddling a child for disobeying regulations is an act of state punishment, no different from paddling a prisoner in jail, and no less serious just because most paddlings are well managed. Spanking in school can be justified, Mr. White held, but not under all circumstances or to any extreme.

There is no doubt that corporal punishment is a traditional tool in our culture's education system. But teachers are not in fact reliable instruments of justice. In both theory and practice, therefore, most paddling is an abomination of custom. Precisely because only two states (as well as New York City) have banned it and because 21 states sanction it, the child-beaters ought to be on notice that they must observe procedural safeguards and constitutional limits as to who gets smacked and how hard and how often.

The Court's reluctance to bring children under the cloak of the Constitution—denying them the rights afforded adult criminals—tells much about a strongly entrenched American attitude that mistakes justice for coddling. A judge of the Indiana Supreme Court posed the proper question as long ago as 1853, when he noted that it had become illegal for a husband to beat his wife, a master his apprentice or even an officer an ordinary seaman, and asked: "Why the person of the schoolboy should be less sacred . . . is not easily explained." Indeed it is not, except by the fear of five jurists who seem to prize the myth that sparing the may spoil the child. An unjust rod—or reading of the law—will hurt us all.

BOB HOPE—AN INSPIRATION

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. YOUNG of Florida. Mr. Speaker, in my opinion one of the more satisfying contributions that a Congressman is privileged to make during his term of office, is the role he plays in helping needy individuals with their problems. On a daily, often hourly basis, we are called on to help the elderly, the disabled, the sick, and the poor. Their problems may seem insignificant when compared with the work that is conducted in this Chamber, but to the individual requesting assistance, there is nothing more urgent or important. We sometimes forget, however, how important this aspect of the job is—this use of our office in helping others. It usually takes a letter, or a phone call from a tearful but grateful constituent to remind us. We can be reminded in other ways, however, as I was this morning when I read an article about a man in another profession, who graciously gives of his God-given talents to others. A man whose unselfish love for his country, and particularly to those who defend it with their lives and limbs, is an inspiration to all.

The man is Bob Hope, and the article I am referring to appeared in the latest issue of Modern Maturity. I would like to share with my colleagues his philosophy, in the hope that it might remind each of us how important and rewarding service to our fellow man can be. At the age of 73, most people can say they have contributed enough to others, and certainly Mr. Hope can rest assured that he has, but he continues to give because, as he says, "It comes back to you carloads." The article follows:

BOB HOPE—"MY FORMULA FOR FITNESS"

(By Richard Bauman)

Ask Bob Hope when he's going to retire and he'll answer: "Retire? Retire to what? I've already retired in that I'm doing only the things I want to do."

In any given week, those "things" might include: joking his way through two personal appearances, a benefit show, often as not in different parts of the country, and a visit to a veteran's hospital or a speech at a college.

When he's not hustling around the country, Hope will work on a television special or consult with colleagues on a movie he's planning to produce. And for good measure, he'll play a couple of rounds of golf.

A hectic schedule? Yes, and one that would wilt a person half his age. But for Hope, the constant activity is his way of maintaining a meaningful relationship with life. It's a relationship that blends work, an interest in others, and just plain having fun. And with him it's often difficult to separate one from the other.

"I have to be involved in things and with people," says Hope. "It's essential for me. It keeps the mind fit, and you get fresh ideas and thoughts through contact with others and being involved in things you believe in."

In this vein, Hope feels it's necessary to help others whenever possible. He seems to greedily snatch opportunities to help a large variety of people and organizations. In fact, nearly every nationally recognized charitable organization has benefited at one time or another from his time and talent.

One of his most famous efforts at helping others is through the Bob Hope Desert Classic golf tournament that he sponosrs each year in Palm Springs, Calif. Through it, more than 5 million dollars have been raised for the Eisenhower Medical Center in Palm Desert and numerous other desert charities. Hope also donated the 80 acre site for the medical center.

His trips at Christmas time to entertain U.S. Armed Forces stationed around the world have been legend. Although his last trip overseas was in 1972, he annually takes a "mini-troupe" to visit and entertain the veteran's and military hospitals in the United States. Says Hope of all his trips, "I'm emotionally atuned to the great men and women who protect this country. For me they're still the greatest audience in the world."

Yet he feels a person doesn't have to do monumental things to share himself or herself with others in a meaningful way. "It isn't the amount of time or money you give so much," says Hope, "as a willingness to make an effort to help."

As an example, he told of a truck driver in Boston who's an amateur clown. "He spends a couple of days each month entertaining at a children's hospital. The kids love him and he loves making them happy.

"Nearly everyone has a talent or ability he or she can share with others who will appreciate it. Don't be afraid to give a little of yourself to others. We all have the gland of helpfulness and we all enjoy doing something for others once we know there's a need. And I've found when you do, it comes back to you in carloads."

He vividly recalls an incident to prove that: "We had just done a show at Lai Khe (Vietnam), that was in 1969, and as I was leaving, a soldier reached out and put something in my hand. It was a Zippo lighter. It may not seem like much, but it was all he had. To me it was a touching way of saying thanks, and it was hard to hold back the tears."

That soldier was showing his gratitude for what Hope had given him and hundreds of other GIs there. A taste of home and an hour or two of humor in a place that normally wasn't very humorous.

"How can you help but feel satisfied when

someone expresses gratitude like that," says Hope.

"And I think we all need to develop a sense of gratitude for all the good things we have. Family, friends, good health, just living in this country. These are things most of us take for granted, and we shouldn't. When things seem bad, taking a good look at all the good things that are ours can only lift our spirits.

"As for me, I've been lucky, very lucky. I have so many good things to remember." But Hope's had his down moments, too. "One was when I had a hemorrhage in my left eye and had to enter the hospital. Quite frankly I was more than just down, I was scared.

"What if the condition worsened or I went blind, I wondered. But I knew many people were concerned about me and wishing me well; and excellent doctors were caring for me, so I had to be grateful. And I began to feel better and more confident. I knew everything would be all right."

Hope says that when a person starts looking around and discovering the good things, he realizes that everything isn't perfect, but chances are they're a lot better than he thought.

Hope has remained a top entertainer for years and seemingly gets along with everyone. Most of the time that's true. But in anyone's life there are going to be disagreements with others, and when you're a celebrity, criticism is bound to come your way.

A few years ago he was misquoted by a reporter and that misquote brought a mountain of criticism his way. It concerned his feelings about the Vietnam war. "I was quoted as saying, 'The war is wonderful.' But what I said was, 'The kids in the war are wonderful.' "

Sure, he was angry about being misquoted, but not with the people who were reacting to that statement. They didn't know the truth. "I maintain a philosophical attitude toward such things," notes Hope. "I feel people have a right to their opinions, and you have to be understanding of others even when they're criticizing you or disagreeing with you.

"It helps, though," he adds, "if you can laugh about it. I've found humor is an excellent antidote for tension and anger. Instead of dwelling on the point of irritation, share a joke or two with someone, recall a funny incident from a similar situation. Believe me, it helps."

This might seem like a natural solution for a person who makes a living with quick-draw jokes and stories. But he claims anyone can do it. "After a few good laughs, the feelings of resentment diminish and you get a better perspective of things. Humor is sort of a balancing wheel. I've found it can reduce tension in nearly any situation.

"I didn't invent this idea though," claims Hope. "Science has confirmed that having fun—just feeling happy—has a measurable effect on our health and well-being. I've seen the healing power of laughter while visiting GIs in hospitals."

To sort of break the ice, he often uses this line when entering a hospital ward. "Don't bother to get up for me." In most cases the patients can't get up anyway. At one hospital though, the bedridden occupants beat him to the punch.

"As I walked in, there was a sign made especially for me. It said, 'Welcome, Bob Hope, we would stand up and salute, but at the moment we're all hung up.' That was in an orthopedic ward," he recalls, "and I wasn't worried or tense about meeting those guys. How could I be when they came up with something like that?"

Illness isn't a requirement for using humor effectively.

"Each of our recent Presidents," Bob says, "has had a good sense of humor, which is fortunate for me. I've been taking digs at Presidents since Roosevelt. Crosby says it was Teddy, but that's not true. It was F.D.R.

"I think the more pressure and problems a person faces, the more need there is for humor to help keep a perspective, not only for the Presidents but for every living person."

Hope takes care of his physical self, too. He watches his diet, and he gets proper rest, although this must sometimes include catnapping between engagements.

"I can steal a nap just about anywhere," he says. "On a plane, in my dressing room, just before a show or in the car being driven to or from the airport. Once you develop the knack, it's great for recharging the batteries."

After a nap of 15 or 20 minutes, he feels refreshed and revitalized. "You know," he quipped, "if more people would only take catnaps, the world would be full of peppy people."

Exerise is important to him. Golf is one of the loves of his life, but when a golf course isn't near at hand or open after a personal appearance, he walks several miles instead. And as one of his associates notes, "He doesn't just stroll. Bob walks at a pace that doesn't afford time for window shopping."

According to Hope, one thing that keeps him on top of things is that he's always "looking for new ideas and approaches. New ideas get other ideas flowing and that keeps the mind fresh and alert."

As testimony to that, he has recently signed a new three-year contract with NBC and Texaco for his television specials. His eighth book, "The Road to Hollywood," has been completed, and he's recorded a new album entitled "America's 200 Years Old, And There's Still Hope."

Of Bob Hope, the famous author John Steinbeck once said: "This man drives himself, and is driven. It's impossible to see how he can do so much, can cover so much ground, can work so hard and be so effective."

When you look over what Hope did in one year alone, Steinbeck's words are not an overstatement. Out of 365 days in 1975, 296 of them were consumed in doing personal appearances, benefits, and speaking engagements throughout the country—not to mention television specials and golfing benefits.

"Too many people stop living when they retire," notes Hope. "Being active and involved keeps you going. It does me. And I agree with Milton Berle when he says, 'Laughter is an instant vacation.' To that I add, 'For me and so many others, laughter is therapy, be you the laugher or the laughee.' "

PERSONAL EXPLANATION

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. MAZZOLI. Mr. Speaker, on Friday, April 22, I was unable to answer two roll call votes because of previous commitments in my home district.

Had I been present, I would have voted "yea" on Roll No. 145, agreeing to the Journal of Thursday, April 21, and "no" on Roll No. 146, an amendment to the Department of Defense authorization bill to prohibit the procurement of the Airborne Warning and Control System Aircraft unless NATO agrees to purchase these aircraft.

JOHN GARDNER—AN UNCOMMON CAUSER

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. MIKVA. Mr. Speaker, after founding and guiding what has become one of the most unique and influential lobbies in or out of Government, John Gardner has retired as the head of Common Cause. In just seven years, he has proven what his detractors said was impossible; namely that concerned citizens can bring about fundamental reforms in the legislative process and the way in which decisions are reached. Common Cause has brought the public interest into Government by insisting on the basic principles of fairness and official accountability and, in so doing, has measurably enriched our system.

One of the best ways of judging the impact of any organization is by examining who its critics are and what form their criticism takes. While many persons of different philosophies have disagreed with various Common Cause initiatives along the way, its most vocal and persistent foes have been those who have resisted the dual notion that the public has a right to know and be heard and that its elected officials have an obligation to fulfill their mandate with a judicious use of the power with which they have been entrusted. It is easy to see how former campaign finance laws—or the lack thereof—the seniority system and other rules of Congress and the regulation of lobbiests have been the target of Common Cause's wrath. In turn, it is equally understandable how the chief benefactors of these "old ways"—have been the organization's most unswerving opponents. Powerless groups do not attract this kind of attention; indeed, an accurate measure of Common Cause's influence has been the intensity of its detractors.

Common Cause has managed to balance power and the pressures for change in Government by injecting the public interest into the public forum. While the concept of a public lobby is not new, it has taken John Gardner's leadership to recognize the exigencies of political power and marshal the collective voice of average citizens who are frustrated by the inertia, complexity and size of Government, as well as the organization of forces with vested interests in resisting change. Legislation should result from the competing forces of equally legitimate interests, and Common Cause has brought this ideal closer to reality.

In the final analysis, the significance of Common Cause's impact lies in the simplicity of its goals. We often have cynically assumed that access to our system of Government will never be equally available to every citizen; that politics is a club in which membership is determined by favors, money and influence; and that leaders can never be forced to account for their actions. During the past 7 years, Common Cause has demon-

strated that these notions need not be truisms. With other issue-oriented public interest groups, Mr. Gardner's brainchild has helped usher in a new era in which truly democratic forces have regained control of legislative and governmental processes.

We owe much to John Gardner's insight and prudence of leadership. His continued presence in Washington offers hope that the Gardner agenda for change has not yet been fully satisfied.

HOW MUCH OF ALASKA SHOULD BE LOCKED UP?

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. YOUNG of Alaska. Mr. Speaker, hearings are presently being held in a House Interior Subcommittee on legislation to classify for single purpose over one-third of the land in the State of Alaska.

This bill, H.R. 39, will drastically affect the use of coal and oil reserves, preclude the development of 80 percent of the State's hydroelectric power and remove the opportunity to use most of the State's timber and food crop producing land.

The effects of the upcoming decisions will extend far beyond the State of Alaska. It is my hope that Congress can come up with a sensible management plan for our great State. A State with magnificent beauty and vast quantities of needed resources.

I would like to share with my colleagues a view that comes from the outside of the 49th State. The following editorial from the Seattle Times represents a balanced view that is growing among those who realize the multifaceted importance of Alaska's lands within the perspective of the national interest:

THE TIMES' OPINION AND COMMENT: HOW MUCH OF ALASKA SHOULD BE LOCKED UP?

Congressional hearings in Washington, D.C., open this week on an issue that overshadows even the Alaska oil pipeline in terms of long-range importance to the 49th state.

Environmentalist groups all across the country are calling it their "issue of the decade." Others call it the "greatest subdivision in history."

At issue are the so-called "D2 lands," in reference to Section D2 of the Alaska Native Claims Settlement Act of 1971. The act, which granted 40 million acres of Alaska land to natives in return for access to pipeline-corridor properties, established a commitment to reserve millions of other acres for public use.

The key question: How many millions?

Several bills are before Congress to answer this question varying ways. But the immediate focus of attention is on the so-called "Alaska Coalition Bill," whose chief sponsor is the powerful chairman of the House Interior Committee, Representative Morris K. Udall, Arizona Democrat.

The popular designation of Udall's measure is a misnomer. It has very little to do with any coalition within Alaska, but represents an attempt by environmental extremists who live far from the 49th state to prescribe Alaska's future.

The bill—combined with existing parks, wildlife refuges, and scenic rivers—would lock up 146.6 million acres in Alaska's wilderness-preservation system.

That is larger than the combined area of New Jersey, Connecticut, Massachusetts, Hawaii, Delaware, Maryland, Vermont, West Virginia, New Hampshire, Maine, Indiana, South Carolina and Kentucky.

In that vast area, extending into every major geographical segment of the state, all economic development other than tourism (largely of the backpack variety) would be banned.

Most of Alaska's rich mineral resources, including an estimated 130 billion tons of coal and many strategic minerals in short supply, would go untapped.

The unlimited potential of Alaska food and fiber resources would go largely unrealized. And the state's road and rail system would be limited for the most part to the existing skeleton network.

In other words, Alaska's economic development would be permanently stunted.

No one seriously concerned with this issue suggests that additional millions of acres, beyond the 32 million so classified, should not be set aside for single-purpose (scenery and wildlife) use.

But the Udall bill represents an altogether unreasonable overreach that is contrary not only to Alaska's interest, but to that of a nation increasingly and dangerously dependent on the import of strategic raw materials from abroad.

The hearings opening this week are before an Alaska-lands subcommittee under the chairmanship of Representative John F. Seiberling, Ohio Democrat. The hearings will be continued later in other cities, including Seattle June 20.

Our hope is that out of the hearings will emerge common-sense legislation that endorses multiple use, as opposed to the single-use concept, for a reasonable part of America's northern storehouse of resources.

NOTICE OF HEARINGS BY HON. RONALD M. MOTTL, ACTING CHAIRMAN, SUBCOMMITTEE ON EDUCATION AND TRAINING, COMMITTEE ON VETERANS' AFFAIRS

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. MOTTL. Mr. Speaker, the Veterans' Affairs Subcommittee on Education and Training plans to continue its public hearings on Wednesday, May 4, to consider the implementing provisions of Public Law 94–502, the Veterans' Educations and Employment Assistance Act of 1976.

The witnesses will be limited to Members who may wish to appear personally with regard to any of the provisions of Public Law 94–502. Members wishing to testify at the May 4 hearings should make the necessary arrangements with the subcommittee staff located in room 335, Cannon House Office Building or by calling 225–3527. The hearing record will be kept open for 1 week for Members who wish to submit a statement for the RECORD.

FIRST CONCURRENT RESOLUTION ON THE BUDGET

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. HARRINGTON. Mr. Speaker, today the House continues consideration of the First Concurrent Budget Resolution for fiscal year 1978, and the various policy considerations which underlie the setting of ceilings on budget authority and outlays in several functional categories.

The debate and voting on this concurrent resolution will have consumed 2 days. In the end, we will undoubtedly decide on a final budget for next year which deviates little from the committee recommendation, which itself deviates little from the recommendation of the President, which, in turn, deviated little from the recommendations and budgets of the President before him.

The process is a charade designed to convince the public of something it will probably never believe: that Congress is in control of a rational, deliberate, and fiscally responsible process of setting receipts and expenditures. It is a charade because, despite the intricate system of bureaucracies and deadlines set out in the congressional budget process, we do not have any better set of priorities in Federal spending than the days when billions of dollars in appropriations were rammed through the Congress in the final days of a legislative session. It is a charade, because the Budget Committee, while claiming to have no power to decide funding for individual programs and initiatives, actually chisels these funding levels into stone with the quiet passage of the First Concurrent Budget Resolution. And it is a charade, because through supplemental appropriations, budget waivers, and Third and Fourth Budget Resolutions, we have—often for good reasons—lost control in the end of the total amount of money spent and revenues collected.

In short, despite the impressive number of very thorough option papers published by the Congressional Budget Office, the new budget process has not produced any real options at all, either for the Congress or the country. We continue to waste extravagant amounts of money on military boondoggles justified in the name of national security, while tolerating inhumane levels of despair, suffering, and frustration at home. We continue to misdirect and mismanage much of the money set aside for domestic programs, while turning aside more imaginative approaches in the name of fiscal responsibility. And we continue to squander millions of dollars each year for research into answers for our dilemma when we do not have yet an adequate system of considering the new options already set out requiring only some political will and personal fortitude on the part of the elected officials.

This catalog of failings cannot be laid solely at the feet of the House and Senate

Budget Committees. But if the question be asked: How has the new budget process allowed us to begin to identify problems and choose among creative options for solving them, that answer, I am afraid, is that the process has been an expensive failure.

No better example need be cited than the relative funding levels for defense and domestic programs. The American public has no stomach anymore for the promises that tomorrow, always tomorrow, the appetite of the Nation's defense establishment will finally be satiated, that we will finally begin to address in a fundamental way our pressing problems at home. We look to the new administration for that change, and find that while there is some improvement, it is more symbolic than significant. We look to the authorizing committees, perhaps, to help reorient priorities through their requests to the Budget Committee, only to find that the committees representing domestic area functions are timid and unimaginative in their requests, while the Committee on Armed Services remains as unafraid and imaginative in defense of the military as we have traditionally come to expect. And we look, finally to the Budget Committee, potentially the great priority setter, the master of the big picture. But we find, alas, that once again the day of economic conversion has been put off, at least for another fiscal year.

I wish I could believe that it was only the great Russian bugaboo which could explain this refusal to shift priorities after all these years of promises and speculation. But I think we give the Russians too much credit. More significant has been our collective laziness, timidity, the lack of leadership, and the absence of will here in the Congress, and in the budget process particularly, which has prevented us from taking a radically fresh look at our budget priorities and coming up with some acceptably low alternative to the $109 billion in military subsidy set for next year.

In its 139-page report to the House, we get no sense of this great debate from the House Budget Committee. Instead, under the section on national security, we get the bland and innocuous statement:

> The committee did not consider individual line items in its consideration of the fiscal year 1978 budget request. Rather, it concentrated on trends which are readily discernible when the budget is examined in large aggregates such as personnel and compensation, purchases of all types, and use of funds previously appropriated.

Nowhere in the entire 139 pages of facts and figures, projections and promises, is anything approaching a rebuttal or even recognition of the excellent argument put forth in supplemental views by Representatives MITCHELL and STOKES that the relative balance between defense and nondefense spending "as irresponsive to basic human needs." One is forced to conclude with Messiers STOKES and MITCHELL that the budget process is merely a bookkeeping process, another bureaucracy with another set of regulations designed to preserve things as they are.

Later this year, however, the Budget Committee will change its tune. When one Member wants to extend veterans' educational benefits, or another increase in assistance to retarded children or handicapped adults, the scions of the Budget Committee will rise piously to express their sympathy with the idea, but the reservation that these new initiatives were not included in the assumptions of the budget resolution. These assumptions, we later find out, are the agreements between authorizing committees and the Budget Committee as to just what exactly is included in the functional category ceilings. They are the line items which the committee says today do not exist.

I must join with my good colleagues, Representatives MITCHELL and STOKES, to ask at what meeting the Budget Committee decided that the B–1 bomber was more important than a frontal assault on the problem of unemployment for those 40 percent of the youth in our urban areas. What was the time and room number of the session in which the cruise missile was rated more vital to our national interest than national health insurance programs. What was the vote by which the committee decided to increase the number of generals in the Pentagon while holding at current levels the number of teachers in our schools, policemen on our block, and social workers in our homes.

The tragedy is that these meetings were never held—by the Budget Committee or any other. Those votes were never taken, those issues never wrestled with. And that is the whole irrelevancy of this process, the so-called congressional budget process. We have an expensive system to make sure that we spend only a tolerable amount more than we take in each year, and make sure that no radical departures are taken to improve or reorient public policy. Nothing more, nothing less.

To put it more succinctly: Either the Budget Committee should admit that it does pass on major line items in its budget assumptions, and deal with that reality out front; or it ought to admit that it is merely a pawn of the authorizing and appropriating committees and the Office of Management and Budget, and stop all this talk about revitalized congressional processes. They can't continue to have it both ways.

Today, the Budget Committee claims we are only talking about general categories and bottom lines. So be it. The bottom line of the congressional budget process is that the priorities are as misplaced as they have been since the heyday of the Vietnamese conflict, and that Federal spending is largely irrelevant to the needs and wants of the American people. By its acquiescense, the budget process is now an accessory and instrument to that failure.

I congratulate Representative MITCHELL and Representative STOKES for their efforts at the logical transfer of moneys to where they are so desperately needed. Even a modest compromise in favor of reorienting Federal spending would be a major legislative accomplishment. My fear, however, is that only a handful of our House will have the foresight and the will to deal as fundamentally with Federal spending as they have.

In this same regard, Mr. Speaker, I would like to insert into the RECORD the statement made on this subject by the honorable Governor and Lieutenant Governor of Massachusetts. I urge all Members to read it as a statement of support at all levels for increased attention to domestic needs:

STATEMENT BY THE GOVERNOR AND LIEUTENANT GOVERNOR IN SUPPORT OF THE TRANSFER AMENDMENT

As Governor and Lieutenant Governor of Massachusetts, we are aware of the pressures put on state and local governments to provide increased services in the face of insufficient funds. A major source of this fiscal pressure is the massive diversion of resources at the national level from civilian spending to military spending. The insufficient investment of the federal government in necessary programs creates an imbalance which aggravates unemployment and the decline of our industrialized areas.

We agree with the National Conference of Mayors that the time has come to "redress the imbalance between domestic expenditures and expenditures for the Pentagon and foreign aid. . . ." We believe that the most important element of our national defense is a healthy, productive population involved in constructive work.

Therefore, we support a cut in military spending for 1978 with the savings applied to domestic, economic and social needs.

Communities whose economies are hurt by these cutbacks should be aided by federal programs so that no one section of our nation bears the financial burden of economic conversion. We support the concept reflected in the Transfer Amendment to the first concurrent budget resolution to be submitted by Congressman Parren Mitchell.

MICHAEL S. DUKAKIS,
THOMAS P. O'NEILL, III.

GASOLINE TAX UNFAIR TO RURAL AMERICANS

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. SHUSTER. Mr. Speaker, in 1975, the House of Representatives unceremoniously rejected a gasoline tax increase that came to the floor as part of an energy bill. The House concluded that such a tax would impose an unfair burden on certain segments of our population, while in effect rewarding other energy consuming segments by increasing their relative purchasing power through the absence of a tax.

President Carter is now proposing that we reevaluate our response to that 1975 initiative and approve a gas tax increase that could amount to as much as 50 cents a gallon under certain consumption patterns. The Carter plan would add 5 cents to the present 4-cent per gallon Federal gas tax for each year in which consumption exceeds the President's gasoline consumption goals.

I am opposed to this plan, Mr. Speaker, because any increase in the Federal gas tax would be grossly unfair to rural

Americans as well as those in our society who are poor or disadvantaged.

Both the proponents and opponents of the gas tax increase agree that it is regressive. Indeed, a Library of Congress analysis of rationing versus a higher tax stated:

Admittedly it (a gas tax increase) is regressive, but in a world where the appearance of fairness is at least as important as actual fairness there is a great advantage in any charge which falls automatically on any purchaser in proportion to the amount he purchases, and thus avoids all the individual decisions and administrative messiness of rationing systems.[1]

That same paper asserted that—

The strongest argument in favor of a gasoline tax is its impersonality.[1]

But what is impersonal, Mr. Speaker, about making it more expensive for a rural American, who lives in a small village 20 miles from his place of employment, to get to work? What is impersonal about making it impossible for a widow on social security to drive the 15 miles to the nearest pharmacy for her daily medication? Or what is impersonal about preventing a farm family of seven from driving 20 miles to church on Sunday?

These are just some of the consequences of a gas tax increase, Mr. Speaker, which would have a devastating effect on rural Americans while leaving those in urban areas untouched.

Most rural Americans, we must remember, do not have access to the wide-ranging and sophisticated mass transit systems that are found in most urban areas, and must depend exclusively on cars for their livelihood, daily needs, and recreation. William Greider, in an April 25, 1977, Washington Post article, described it this way:

The new pattern of country living is a man or woman who drives 100 or 150 miles a day from their farm or small town for a job in a medium-sized city. In Kentucky, people who live in benighted mountain counties drive the turnpike to good jobs in Lexington. In Illinois, a woman drives 140 miles a day commuting from Carbondale to Mt. Vernon. In the West, the distances are more awesome still.[2]

Our vast system of Federal-aid highways, has opened up whole new worlds to rural Americans. It has provided the freedom of mobility not afforded in less mobile societies, and has significantly increased their job choices. It has permitted people to hold jobs that would otherwise not be available to them. And it has been felt dramatically in the changing demography of our Nation. Since 1973, there has been a net outmigration from urban areas to rural and small town America, and there is every indication that this trend will continue. Long-distance commuting, made possible by more cars and more roads, has stimulated new development and new population growth in rural America. Now that growth, and the livelihoods and lifestyles of millions of Americans, is threatened by a regressive tax scheme that would stop and then reverse all the benefits that increased mobility has brought to rural America.

Urban dwellers would not feel this pinch, because while many already use buses, subways, and taxicabs, many more will be encouraged to do so with no penalty. They have the option of leaving their cars at home, or not buying one at all. They can take a bus to work, walk to the grocery store, and have medication delivered by a neighborhood pharmacy. They can take cabs to concerts and movies, stroll through the park for instant recreation. Rural Americans do not have these choices, and a gas tax will penalize them by making it more costly to engage in every day activities, which requires the use of their automobile.

And rural Americans, Mr. Speaker, are the group of Americans who can least afford a reduction in their purchasing power. The U.S. Census Bureau reported that the average per capita income in areas of 2,500 people or less was $2,498, while the per capita income of urbanized areas—50,000 population or more—was $3,434.[3] For a typical family of five, Mr. Speaker, the difference in family income between the urban and rural family would be $4,680—the difference between $17,170 for the urban family and $12,490 for the rural family.

This means that while a rural family of five is already bringing home an average of nearly $5,000 less than a comparable urban family, the gas tax would eat away further at his purchasing power making that real difference even greater.

I am sure there are those who will argue that it is less expensive to live in rural areas, but to those let me suggest that they visit a rural community and compare. Inflation has touched the countryside much as it has the overcrowded cities, and the difference in the cost of living, if any, is far from $5,000 per year.

Furthermore, automobile driving rural Americans are already subsidizing urban mass transit riders through their gas tax contributions to the highway trust fund. While rural folks pay their own way by buying an automobile, maintaining it, and keeping it filled with gasoline, mass transit riders pay roughly half of what it costs to operate urban mass transit systems. Some of it is made up with general revenue funds through programs under the Urban Mass Transportation Act, but the rest comes from the urban program and transfer provisions of the Federal-aid highway program, financed almost wholly by the gas tax supported highway trust fund. And this year, trust fund revenues can be used for mass transit operating subsidies.

Mr. Speaker, how much more must rural Americans be asked to endure? Is it fair to impose an additional hardship on a class of people already burdened with low incomes, poor services, and a generally declining economy? Edward F. Renshaw, a professor of economics and natural resources at the State University of New York, and a widely respected authority on tax and environmental matters, wrote:

Data on energy consumption which were collected by the Energy Policy Project at the Ford Foundation suggests that higher excise taxes on gasoline would be quite regressive . . . and would worsen the distribution of effective purchasing power for many low and moderate income families that cannot afford a new automobile and do not have access to convenient public transportation.[4]

Professor Renshaw added that—

Higher gasoline taxes . . . ought to be delayed until poorer families have better access to used vehicles that are fuel efficient.[4]

Mr. Speaker, it is clear that an increase in the gasoline excise tax would have a devasting impact on rural and disadvantaged Americans. There is no justification for this, particularly in light of the uncertain conservation value of a gas tax increase—which I shall deal with in a future article. Surveys have shown that the lowest fifth of all families in 1970 received only 5.5 percent of all family income, while the top 5 percent received nearly 15 percent.[4] A gasoline tax increase would certainly contribute to even further polarization of America's economic structure.

Mr. Speaker, 2 years ago, the House of Representatives rejected a gas tax increase that would have radically altered the lifestyles of rural Americans. I urge my colleagues in the Congress to reaffirm our support for equal treatment for all Americans by rejecting the Carter gas tax proposal with equal fervor.

FUNNY FIDEL?

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. MICHEL. Mr. Speaker, I came across a story on the front page of the New York Times, April 25, 1977, that made me wonder just how long it is going to take for some people to learn the basic economic facts of life. The story, headlined "Cubans Admit Their Economy Is in Serious Trouble," told of a visit of American businessmen to Cuba. They were told by Fidel Castro that the Cuban economy has "deficiencies—lots of deficiencies." The rest of the article goes on to list those economic deficiencies, among which are scarcity of consumer goods, shoddy products in stores, a coffee allotment of 1 ounce per week, a $3 million-a-day subsidization of the Cuban economy by the Soviet Union, low manufacturing ability, and a construction industry which is directed by Castro to construct no building higher than five stories so that the cost of elevators will be eliminated. In short, another Communist paradise, in which workers and peasants are treated equally: Both are exploited.

Under the Batista dictatorship, Cuba had the highest standard of living in the Carribean area and one of the highest in all of Latin America. Under the

[4] Edward F. Renshaw, "Automobiles: The Case for a Negative Expenditure Tax," Tax Notes, March 14, 1977.

Castro dictatorship, Cuba has what are coyly referred to as "economic troubles." Batista's was an efficient economy and an inefficient dictatorship. Castro's is an efficient dictatorship and an inefficient economy.

We are told Castro has made improvements in such areas as education. We were told Mussolini made the trains run on time. We are told Castro is popular. We were told Hilter is popular. We are told Castro wants "better relations" with the United States—and now we know why: Communism has destroyed the economy of Cuba and the spirit of its most productive workers.

Mr. Speaker, there is something macabre about a report of American businessmen chuckling over Fidel's little jokes—he can be "amusing" the Times tells us—while, perhaps only a few miles from where they are sitting and drinking rum, men and women are rotting in underground cells for no other reason than that they believe the Cuban people would be better off without dictatorship of any kind, either right or left. Fidel can be very amusing, it seems.

President Carter talks about human rights. President Carter wants to establish better relations with a government whose record on human rights is as notorious as it is abominable. What does the United States serve to gain by economically helping Castro? No one in this House has ever satisfactorily answered that question. In order to provide some facts about current conditions in Cuba, I include the New York Times article, "Cubans Admit Their Economy Is in Serious Trouble" in the RECORD:

CUBANS ADMIT THEIR ECONOMY IS IN SERIOUS TROUBLE—U.S. BUSINESSMEN TOLD OF TECHNOLOGY NEEDS

(By Jerry Flint)

HAVANA, April 22.—Cuban officials, in five days of frank talk with Minnesota businessmen, made it clear this week that their Communist nation is in serious economic trouble.

The officials gave the message in almost every meeting that they wanted to make deals—economic, and quite possibly political.

"We have deficiencies," said Fidel Castro, President of Cuba's State Council, "lots of deficiencies."

"We cannot develop our own technologies," added Angel Gomez-Trueba, First Deputy Minister of Cuba's Committee for Economic Cooperation. "We must bring them into our country. There is no other way."

On the political side, Mr. Castro at one moment linked the ending of the American embargo on trade with Cuba to his willingness to discuss Cuba's activities in Africa and the Middle East. And he assured the American businessmen that the Cubans had fixed a date for their military withdrawal from Angola, although he did not say what that date was.

Even without the Cubans' many admissions of trouble, the visiting businessmen could see these signs of economic problems:

Havana itself, despite construction in progress, is shabby, with many buildings in an apparent state of semi-disintegration.

Consumer goods are scarce and high-priced. A pair of pink galoshes sells for 5 pesos, or $6.25 at the official exchange rate. That is the low price for rationed goods, and practically everything is rationed to assure fair distribution. Goods sold outside the rationing system legally may cost three to eight times as much.

The coffee ration (and coffee is a favorite Cuban drink) has been squeezed down to about an ounce a week to save beans for export.

A modification of the five-year plan is under way, stretching out industrialization but emphasizing anything that will reduce imports and increase exports.

Young Cubans are willing to buy practically anything from the visiting Americans—their shoes, hats, even sunglasses—for more cash than these items cost back home.

But possibly the most obvious symbol of economic troubles was the lavish display of hospitality that the Cubans put on for the Americans. There were two elaborate meetings with Fidel Castro. One was an hour-and-a-half session of handshaking and answering questions from the 52-member group; the second was a four-hour rum-and-lobster meeting with 16 of the Minnesotans in his office. He also sent a truckload of gifts for them on departure. Other high-level officials led day-long discussions on the Cuban business climate, and the Cubans staged two impressive banquets for their guests.

Some foreigners stationed in Havana say the economic troubles have intensified because a massive administrative decentralization reform is causing confusion in the bureaucracy, which they say is relatively inefficient, at the lower levels anyway.

But the heart of Cuba's economic troubles lies in the poverty of the island itself, its low level of natural and energy resources and its blessing and its curse—sugar. Three years ago sugar brought more than 60 cents a pound. Today it is about 10 cents a pound, and recently it was as low as 7 or 8 cents.

CUBA'S CROP PROBLEM

"Seven cents is below the cost of production," President Castro told the American visitors during a half-hour explanation of why Cuba grows sugar instead of other food crops for its own consumption. (It is more profitable.) The Soviet Union pays three times the current world price for Cuban sugar, and Westerners say the total Soviet subsidy here runs about $3 million a day. But Cuba still has 2 million metric tons or possibly 2.5 million, more than a third the crop, available for the world market.

Sugar is the nation's major export and source of hard currency. In 1971, before the big sugar boom, Cuba's exports to the non-Communist world (mostly sugar) were valued at $300 million. In 1974 they soared above $1 billion. Last year they were down to $600 million.

Cuba needs exports to buy products and technology. The nation's manufacturing ability is low. Even some of Cuba's national garment, the guayabera ("guava picker") shirt, is imported from Panama. And the promotional literature for Havana cigars is printed in Spain.

RESTRICTION ON COSTS

Although Cuba is short of housing future buildings are to be kept to five stories in height, Mr. Castro said, to hold down the cost of spending foreign currency for such things as elevators.

Mr. Castro said his first priority for importing from America, should the trade embargo be lifted, is technology: for a nitrogen fertilizer plant (one bought from the British is "a failure," Cubans say) and for nickel processing, transportation, construction, agriculture, industry, textiles, plastics and food.

Importing technology has its problems the Cubans conceded. Some of it just doesn't work in tropical Cuba. Even in agriculture, for example, the productivity of dairy cows is discouraging, Cubans say.

But the main problems with technology transfer are restrictions imposed by the sellers. They may not allow Cubans to use the technology in production of export goods. And the Cuban market—9 million, including children—is too small to support much production for local consumption only.

EARS OPEN FOR DEALS

All these economic problems are pushing the Cubans into new directions. After one official told the American businessmen that joint ventures were impossible, still higher officials came back the next day and said the opposite.

Contract manufacturing, payment for plants with the production from those same plants and the use of foreign capital and management talent are all possibilities, Cubans told Americans. Cuban law does not take such ventures or investments into account, but over and over again the Cubans emphasized that "any proposition will be listened to." They said that deals could be worked out with a bit of imagination. Industries such as food, candy, pulp and paper, citrus processing, auto parts and tourism were mentioned as possibilities for some type of joint enterprise.

Tourism is another troublesome business the Cubans are being pushed into. One of them said that, "when the time comes, we will have to stop and think if it is convenient to us to have large numbers of Americans" swarming over the Communist island.

In addition, Mr. Gomez-Trueba, said, "large investments must be made, hotels must be built and a large infrastructure must be created." And then there's the problem of devoting a good part of a socialist economy to making Americans comfortable. Nevertheless, Mr. Castro said, Cuba will move ahead to increase tourism.

While Mr. Castro and others warned that even a resumption of economic relations would not mean enormous trade immediately, he said Cuba would make "adjustments" in its own economic planning to accommodate the potential benefits from trade with America.

Buying from America would be an important factor in improving Cuba's economy because it could buy key products for less. Cuba imports 200,000 tons of rice a year from the Orient, for example, when America is a major rice producer. In addition, much of the technology Cuba wants is available only from America. And, of course, American consumer-type goods are popular.

A MARKET IN UNITED STATES?

But Mr. Castro also said "I don't see how we'll be able to buy" unless Cuba can sell goods to the United States. Cuba could sell cigars, rum, nickel, citrus fruit and fish products, but big dollar earnings could come only by selling sugar in the United States again, and in large volumes.

The American visitors were generally impressed by the Cuban officials they met, sometimes because of the open acknowledgement of economic problems and sometimes by the Cubans caution in predicting quick cures.

"Miracles simply do not occur in a country's economy," said Mr. Gomez-Trueba.

Immediately after the Castro Government came to power in 1959, Cuba de-emphasized sugar and began an industrialization program, which failed. Then there was a massive effort to emphasize sugar, which disrupted the nation's entire economy.

Today the officials talk about hopes for slower, steadier gains: some sugar production increases, some gains from American trade, more efforts to find local resources.

THE POLITICAL OUTLOOK

On political issues that divide the United States and Cuba, Mr. Castro said the ending of the embargo "would make discussion of all other problems easier." In the past he has emphasized that he wanted it ended before any political talks so Cuba would not be negotiating under what he considered a threat of force. When asked about

Cuba's support for guerrilla movements, he has also said that Cuba would not give up its political principles.

But in his last four-hour evening meeting with the American businessmen—newsmen were excluded from this group—Mr. Castro may have modified his position. Raul Aguilar, a Minnesota banker who is a native of Mexico with an excellent command of the Spanish language, told a newsman afterward that Mr. Castro had said that, once the embargo was lifted, discussions of Cuban activities in Angola, Africa generally and the Middle East would be possible. Other businessmen at the meeting said they were told that Cuba had 5,000 civilian technicians in Angola—exclusive of the military force—and that some civilian technicians were being substituted for military people.

"If you see anyone else in authority in Washington, greet them in our behalf," Mr. Castro told the Minnesota businessmen in an earlier meeting, "and make them aware of our point of view. If you can, then you will have made an unforgettable contribution to the relations of Cuba and the U.S.A."

IN HAVANA, SOME FLATTERY FOR AMERICANS, AND BUSINESS TALK

HAVANA.—If a sparrow falls, Fidel knows. A visiting delegation of Minnesota businessmen put on a lunch for Cuban officials here. Premier Castro wasn't at the lunch, but he met with the Americans a few hours later in his office. "I heard about that turkey at your lunch today," he said, referring to the big, lean bird the businessmen brought from their state. He had heard reports about the cheese and the strawberry pie, too, "I was even told there was very good beer."

Earlier in the visit an American had asked about the obvious warmth of the Cuban people toward Americans despite nearly two decades of official antagonism. When Fidel met the businessmen later, he took up the subject. Despite the troubles, he said, "we never planted in our people hatred and chauvinism against North Americans." The American was later congratulated for having asked Fidel such a good question. "I didn't ask Fidel anything," he said. "I asked that of another Cuban a couple of days ago." The question got back to the President anyway.

Fidel can be amusing. With the American businessmen, he poked one solid, well-built American from the Pillsbury Company lightly on the stomach and said, "You must not eat much of your product." And he can flatter. "They told me an army of businessmen has come," he said. "It's a dangerous army." But he said with admiration: "I always appreciate men who move, who are active, who begin things." The Minnesotans loved it.

If the President made any mistake it was when he invited 16 of the 52 persons sponsored by the Greater Minneapolis Chamber of Commerce to his office for four hours of cocktails and conversation. The 36 others were irked, but a truckload of presents to the businessmen—three bottles of rum, a box of his favorite cigars, a voodoo doll and Cuban records for everybody—soothed any jealousies.

Businessmen are businessmen. "I just met a man who said he heard I was looking for a bank, and he said he's got a bank for sale," said John Morrison, chairman of El Dorado International, on the plane going to Havana. "I'm going to get something out of this trip one way or the other."

He ran across another good idea, too. His company makes recreational vehicles, and the big vans devour gasoline. One traveling companion suggested he test a diesel engine in one of them, telling him that one of his suppliers had a new diesel. "That's worth looking into," said Mr. Morrison.

Ray Cowdery, whose company makes carpet sweepers, discovered there aren't any carpets in Cuba. But he kept busy explaining to the Cubans how his handpushed machine is just as good on floors (he called them "floor sweepers" instead of carpet sweepers), how they are much lower priced than the electric sweepers Cuba might get from the East European bloc and how economical they might be in a power-short country.

Undoubtedly the Cubans have worked hard to improve the status of women. But all the high officials American businessmen talked to were men, and only two women were noticeable among the lesser officials (then again, there were no women among the American business people.)

Women still hold their traditional jobs in hotels and restaurants as maids and waitresses, while the headwaiters of the better restaurants are all men.

But one Cuban tour guide said: "Things have changed. Now I offer to do the dishes at night, but my wife says: 'Oh, you look so tired, don't. I will do that.' I still don't do the dishes, but now I am a hero."

United States businessmen visiting Cuba in the future might remember these things: They are called Norteamericanos and are warmly welcomed. Cubans, particularly the children, are eager to pose for photographs and love chewing gum, which they don't have. Young Cuban men will try to buy the clothes off the visitors' backs because civilian goods are scarce. Or they will try to get the visitors to buy goods for them at the special shops for tourists.

There was a small radio, for instance, at the tax-free tourist shop in the hotel, and it was priced at 11 pesos, or $13.70 at the official exchange rate. Later a similar radio was spotted in a store open to Cubans, but its cost was 110 pesos. (The Cubans use the dollar sign, so a price tag in Havana that says $11 means 11 pesos.)

There isn't much to buy in Havana. The shops open to tourists sell cigars, rum and a traditional Cuban shirt called the guayabera—literally, "guava picker." Most goods in the regular commercial stores are rationed and are unavailable to tourists. Prices are high, and the merchandise appears to be of mediocre quality. Dull-looking shoes are 8 pesos under the ration system. Equally cheap-looking shoes free of ration coupons are about 14 pesos, or $17.50.

Everyone in Havana seems to have seen the movie "Jaws." American songs of a decade ago ("I Never Promised You a Rose Garden") are often heard on the radio but with a Cuban lilt.

There are a few reminders of the Russians but not many. At the airport a couple of old four-engine Soviet-made bombers are parked. The signs in the airport area say "Welcome" in English, Spanish and Russian. Many of the ships in the harbor fly the Soviet flag, and there are any number of Soviet-made jeeps on the street, but that's about it.

Americans were warned against sending mail back home from Havana. "It will take five to six months," warned an old Cuban hand. "Just like in America," responded a Minnesota businessman.

Havana, an automobile buff's paradise, may be the last home of the great American cars of the postwar decade. On the streets are seen 1955 Chevrolets, 1953 Dodges, 1950 Cadillacs and obsolete nameplates such as DeSoto, Studebaker and Imperial. "There have to be some great mechanics around here," said one visitor, "to keep those things running."

Havana is drab and run down, but whether it is dirty apparently depends on where the visitor comes from. Minnesota businessmen thought it was, and pointed to trash on the streets and along the beaches. But New Yorkers on the trip, accustomed to the Big Apple's midtown, said, "What trash?"

GORDON McLENDON—THE OLD SCOTCHMAN

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. TEAGUE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include an article which appeared in the April 17 edition of the Dallas Times Herald concerning a very good friend of mine, Mr. Gordon McLendon. He has been of great help to me over the years and I think the following article adequately and accurately sets out the qualities of this individual:

THE OLD SCOTCHMAN

(By Ashley Cheshire)

Ball one. Strike two. Strike three swinging. Side retired.

That was all that came down the wire and the broadcaster, still a kid really, sat there in the studio in the basement of the old Cliff Towers Hotel and wove it all into a baseball game.

Foul ball. Ball four. Smith pitching for Jones. That was all. It was a lot like a drama. Like a play with a plot based on the thinnest fragments of fact. Runner out stealing, runner out short to first, home run. And yet it lived. He made it larger than life.

"Jackie Robinson," he would say. "There's Robbie, hunched over at the plate in that bowlegged stance of his, waiting for the pitch. His forehead is bathed in sweat."

Or, "Pee Wee Reese, the Kentucky Colonel, a little guy, like a brown little peanut, a peanut-sized guy. Reese a called strike, a fastball on the outside corner, the count stands at one and . . ."

Or, "Pafko stretches, the pitch comes in. It's a high foul in the stands behind the plate. Well, would you look at that. Caught by a red-headed kid with a catcher's mitt. That's some proud 10-year-old."

It was fantastic and all, except for the basics, made up. All you'd expect from a baseball game . . . and more. Even the kid's name was made up. The Old Scotchman he called himself and for years listeners thought he was one of Connie Mack's buddies. Twenty-six years old and he's "The Old Scotchman." Can you believe that Gordon McLendon?

Today, McLendon, a small, round-faced man nearing 60, and once a gubernatorial candidate, is a partner in radio station KNUS. He says he was impressed with the potential audience for baseball when he saw servicemen in the Pacific drop everything to listen to the Armed Forces Radio Network game of the day. So in 1947, the guy with idols like Ted Husing and Bill Stern, stepped into the presidency of KLIF, a radio station then owned by his father, with plans to emphasize sports. But he found he couldn't offer live baseball broadcasts.

In the late 1940s major league club owners allowed broadcasts of games in visiting and home team cities. But no major league broadcasts were allowed within 50 miles of their far-flung farm system teams. In this way to protect minor league teams, national broadcasters were in effect, limited to the All-Star Games and the World Series. McLendon devised the "re-created" broadcast to get around the owners and from the beginning it was a success. Within weeks stations were eager for KLIF's broadcasts and the resulting network of stations soon became the Liberty Broadcasting System. The Liberty flourished until 1952 when a protracted battle with the major leagues for broadcast rights ended in its demise. At its peak the LBS had 458 member stations, second only to Mu-

tual. It offered other features, later even live broadcasts, but the Liberty Broadcasting System's re-created Game of the Day was the source of its game.

"We always said at the beginning and end, and I believe somewhere in the middle, that it was recreated and not live, but apparently that went right over the heads of our listeners," says McLendon. "It was generally believed that they were live."

They certainly sounded that way. Crowd noise, ballpark announcers, bat-on-ball and colorful, detailed descriptions. The broadcasters, McLendon and in later years people like Lindsey Nelson, were careful not to use the word "here," an outright lie, but anything else was fair.

The studio in Oak Cliff was nothing but a basement walled in Celotex. There was an announcer and a sound technician and a guy who announced players' names into a trash can to simulate the PA system at the ball park. The other member of the crew was a $350-a-week man, who from a New York hotel room, monitored the local broadcasts on a radio and typed the details on a TWX wire to Dallas. They chose New York because the city had three major league teams at the time and that virtually assured a game every day.

"The sound man had two recordings, one with normal crowd noise and one with extreme crowd noise, for the background," says McLendon. "He would mix the sound according to what was going on on the field."

In a ballgame the engineer might boost the noise and the announcer would quickly have to figure out some explanation for the cheers; a rhubarb, a dog on the field or some fan falling onto the field. Dogs on the field were good excuses for when the telephone cable to New York broke, as were lengthy discussions at the mound and foul balls. McLendon said he once had a batter foul off 30 pitches before the wire was repaired and "play" resumed.

The announcer sat, usually, in his shirtsleeves and sweating steadily in the stuffy room, at a desk with a microphone in front of him. He had earphones on his head which let him hear the crowd noise and that helped him get into the mood of the game. The louder the noise got the more excited he became. Also on the desk was a catcher's mitt and ball to simulate the sound of a ball thumping into the catcher's mitt and from the ceiling hung a bat, a full-sized Louisville Slugger.

"We tried a lot of things, but finally the only way we could get the sound of the crack of the bat when it hits a ball was to hit a bat with a five-cent pencil," McLendon says. "So we hung a bat from the ceiling and everytime somebody connected, I'd rap that bat with the pencil. Over the radio it sounded just like it."

McLendon remembers leaving that studio drenched in sweat after a particularly exciting double header.

"You could work yourself into a fairly high level of excitement," he says.

On rainy days or days when no game was scheduled, the LBS would air its re-creation of a game from the past. They would get the play-by-play from The Sporting News and simply enact it over the radio as if it were being reported live. One such game was the 1917 double no-hitter between the Cincinnati Reds and the Chicago Cubs. Fred Toney of the Cubs and Hippo Vaughn, a native of Weatherford, Tex., for the Reds, pitched nine innings of no-hit ball and Vaughn lost the no-hitter and the game in the 10th inning. It happened, McLendon says, that Toney, out of baseball for years, happened to turn on the broadcast while driving his car near his home in Ohio.

"The poor guy," says McLendon. "He hadn't listened to a game in years. He didn't know what was happening, suddenly he was pitching again.

"He ran his car off the side of the road and wrecked it. And he sent us the bill for damages . . . which we gladly paid."

Through the years McLendon has maintained, despite criticism from the big league owners, that he was doing nothing unethical.

"I always felt like we were doing the public a service," he says. "I thought I was giving the public a great pelasure, and I think I did."

But he has never denied that the Game of the Day was essentially drama.

"It was acting in the purest sense," he says. "The game, whether originally good or bad, dull or exciting, became as good as the human mind could make it. We had that advantage. All our games could be exciting."

In fact, he says, he came to prefer the re-creations to actual live broadcasts he made a few years later.

"You were less the actor at the ballpark," he said "It just wasn't the same."

Which may have been what Fred Toney thought that day somewhere in Ohio.

ANTI-DEFENSE LOBBY PUSHES TRANSFER AMENDMENT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. McDONALD. Mr. Speaker, the old anti-Vietnam coalitions which worked so diligently to insure the victories of the Vietcong, Khmer Rouge, and Pathet Lao have turned their experience-organized apparatus toward slashing the U.S. defense budget. I provided extensive reports on the formation and activities of Coalition for a New Foreign Military Policy—CNFMP—in the CONGRESSIONAL RECORD of February 26, 1976, pages 4734–4735; and January 12, 1977, page 1063.

The Women's International League for Peace and Freedom—WILPF—an organization thoroughly penetrated by the Communist Party, U.S.A., since at least the early 1960s and which works closely with the World Peace Council, a Soviet Communist front which promotes Western disarmament on one hand while providing logistical support for Soviet approved terrorist movements on the other, has been highly active in the antidefense lobby's congressional letter writing and visitation work. WILPF has directed its supporters to:

Action—Generate wires and telephone calls to your representatives:

1. Stress the need to establish new national priorities through the Budget process;
2. Urge them to vote for the Mitchell Transfer Amendment as a way to do this.

Many of our offices have begun receiving letters in support of transferring out needed defense funds. I am calling the work of these coalitions to my colleagues attention so that we may all be better able to distinguish true constituent interests from organized special interest pressure.

According to the CNFMP's anti-defense strategist. the transfer amendment it supports would do the following:

Department of Defense reductions[1]*—budget authority, fiscal year 1978*

I. Financial: Unexpended funds (500); eliminate inflation on purchases (500)	1,000
II. Strategic Programs: Cancel acquisition of B–1 (2,162); defer development of MX (134)	2,296
III. New Programs: Cancel F–18 (656); slow production of F–16 (400); defer military assistance program (975); 1-yr. shipbuilding holiday except for Trident (3,505); Cancel XM–1 tank (295); add R&D for V/STOL (100)	5,731
IV. Level of Effort Reductions: Eliminate real growth in RDT&E (979); reduce military construction program (300); reduce military and civilian support personnel by 60,000 (450)	1,729
V. Reduce Existing Programs: Cancel remaining F–15 aircraft (1,400); phase out F–106 and EC–121 (81); eliminate 2 of 8 National Guard Army Divisions (122); eliminate 1 of 3 Active Marine divisions (232); eliminate 1 of 16 Active Army Divisions (317); reduce FY78 Trident program from 2 to 1 (700); cancel F–14 (941); phase out oldest B–52 and KC 135 aircraft (207); defer AWACS (378); mothball 2 carriers (155); mothball 20 Amphibious ships, leave 48 (158)	4,691
Totals	[2] 15,447

[1] All numbers in parenthesis indicate the reduction or increase in budget authority (in $ millions) for the particular program.

[2] The reduction in FY78 Outlays from this amendment would equal $4.7 billion in FY78, $7.9 billion in FY79, and $10.2 billion in FY 1980 and after.

The Coalition for a New Foreign and Military Policy has circulated a list of its local demonstrations and activities in support of U.S. cutbacks in defense preparedness. A copy of the list follows:

TRANSFER

Months of hard work are coming to fruit as events in support of the Mitchell Transfer Amendment are held across the country. The list below is by no means complete, but it illustrates the kinds of work being done. The success of the transfer strategy can be measured by the breadth of these grass-roots coalitions:

January 16: The 2,700-member Citizens for Participation in Political Action (CPPAX) in *Massachusetts* votes to make the Transfer Amendment a top priority for 1977. The Mass. Coalition for New National Priorities, of which CPPAX is an active member, files resolution H. 5279 with the Massachusetts State Legislature supporting a "major" transfer.

January 20: A ¾ page ad on priorities appears in the *San Jose, Ca.* Mercury, placed by WILPF. . . . A guest editorial on the Transfer Amendment by Sylvia Zisman is printed in the *New Jersey* Journal; a similar radio spot, "Tax relief via Operation Transfer", airs several times on WVNJ.

January 25: *Mercer County, N.J.*, Board of Chosen Freeholders adopts a strong "new priorities" resolution.

January 29: A "Human Security Exchange" is held in *Eugene, Ore.*, involving 30 community groups, including CALC, Lane County Transit District, Community Mental Health Clinic, Friends of the United Farm Workers, and the League of Women Voters a display compares long paper strips whose lengths are proportional to military and social spending.

February 7: *Plainfield, N.J.*, City Council passes a transfer resolution.

February 15: *Schenectady, N.Y.*, Peace Center places B–1/Transfer ad in Schenectady News with 229 signatory contributors.

February 20: The 1,000-person California Conference on Alternative Public Policy in *Santa Barbara, Ca.*, adopts a statement calling for an initial transfer of $25 billion. . . . Another Mother for Peace in *Los Angeles* does a 20,000-piece mailing on the Transfer Amendment.

March 9: *New York City* chapter of the National Association of Social Workers (NASW) holds special meeting on the transfer campaign at the Hunter College School of Social Work . . . a transfer resolution is endorsed by the Coordinating Council on Human Relations, a grouping of 105 *Detroit* organizations, including the Metro Detroit AFL–CIO, PTA, NOW, NAACP, Jewish Labor Council, and the United Church of Christ; due to the efforts of WILPF.

March 12: Coalition to Cut Military Spending holds a "Conference to Save the City" at the *San Francisco* library on the need for a priorities transfer, featuring Vivian Hallinan (WILPF), Banning Garrett (Internews), S. F. Sheriff Richard Hongisto, Sharron Farrell (Amalgamated Clothing and Textile Workers) and Linda Wang (Chinatown Coalition for Better Housing) . . . transfer resolutions are taken to the *Alameda* and *Contra Costa County, Ca.* Board of Supervisors, and the *Berkeley, Ca.* City Council.

March 13: A "Special Meeting on the Priorities Crisis", co-sponsored by representatives of WILPF, ADA, Maryland Churches United and the John-Hopkins Chaplain at Johns-Hopkins University in *Baltimore.*

March 15: Northern *Ohio* Project on National Priorities and senior citizens groups hold a press conference to protest President Carter's proposed budget priorities. . . . *Cleveland* chapter of NASW holds 2 days of priorities activities with Marion Anderson (PIRG/Michigan) and Jack Nicholl (Coalition staff).

March 17: Illinois State Senator Harold Washington and Jack Nicholl give a briefing on the transfer amendment, sponsored by the *Chicago* Campaign for the Transfer Amendment (CTA). CTA creates a broad-based working group of individuals and organizations whose activities include participation by AFSCME, Service Employees International Union (SEIU), United Electrical Workers, Hull House Employees, CALC, Eighth Day Center for Justice, AFSC, Midwest Academy, and CDFP, among others.

March 19: A Citizen's Action '77 public hearing in *Portland Me.*, hears testimony for the Transfer Amendment from City Councillor John O'Leary, AFSCME, NOW, SANE, Maine Teachers Association (NEA), We Who Care, Falmouth Ecumenical Network, AFSC, and the State Democratic Committee . . . Statewide California Democratic Council meeting in *San Jose, Ca.*, endorses Transfer Amendment.

March 23: Mass. Coalition for New National Priorities sponsors a march from the Federal Building to City Hall to the State House in downtown *Boston* to protest the priorities of the Carter budget.

March 24: 80 people from 23 community groups attend a "Public Meeting on the Federal Budget" in *New Haven, Conn.*, to discuss strategies to influence Rep. Giaimo, chairman of the House Budget Committee. A resolution in support of the Transfer Amendment has been introduced into the Connecticut State Legislature.

March 25: Rep. Parren Mitchell holds a press conference on the Transfer Amendment in *Cleveland*, with participation by United Labor Agency, Urban League, NASW, CDFP, Women Speak Out, AFSC, Cleveland Inter-Church Council, and the Episcopal Diocese of Cleveland.

March 26: *Philadelphia* Friends Yearly Meeting—representing 12,000 people—formally endorses Transfer Amendment.

March 29: Sylvia Zisman and Al Swenson of N.J. SANE testify before the Joint Appropriations Committee of the N.J. State Legislature in *Trenton, N.J.* in support of the Transfer Amendment.

April 2: *New Jersey* AFL–CIO Conference of Labor Union Women passes resolution supporting N.J. SANE's Operation Transfer.

April 7: A student group at Colorado College raises the transfer issue at a town meeting in *Colorado Springs, Colo.*; they plan a day of transfer activities with speaking by Bette Bono of the Chicago CTA . . . Sen. Cranston meets with *San Francisco* Bay area community leaders on the transfer issue, including Berkeley City Councilwoman Loni Hancock, Charles Schwartz (Livermore Labs), and representatives of the Inter-University Committee, International Longshoremen's and Warehousemen's Union (ILWU) Local 6, AFSC, Ecumenical Peace Institute.

April 8: *Chicago* Sun-Times editorial board gives general support to transfer measures.

April 15 (Tax Day): *Hawaii* Longshoremen's Union Local 142 introduces the Transfer Amendment to the National ILWU Biennial Conference in *Seattle, Wash.* for endorsement . . . Westchester People's Action Coalition in *White Plains, N.Y.*, sponsors a county-wide leafletting day; they have 10 literature tables set up and are leafletting unemployment offices . . . CALC organize a "tug of peace" on the downtown mall in *Eugene, Ore.*, with taxpayers lined up on one side, and military contractors and big business on the other . . . AFSC in *Dayton, Oh.*, sponsors a Courthouse Square rally with speakers on the Transfer Amendment, B–1, military spending and jobs, and disarmament. AFSC presents testimony on the effects of military spending on the community to the Dayton City Commission . . . the Northern Ohio Project on National Priorities ends a week-long leafletting effort with an outdoor transfer display and protest in *Cleveland's* Public Square . . . an AFSC vigil on the B–1 and Transfer Amendment is held at the General Electric offices in *Philadelphia* . . . LEPOCO presents street theater on the priorities issue at post offices in *Allentown* and *Bethlehem, Pa.*—with a "talking mailbox" which asks: "Is this where you want your money to go?"

April 16: A Citizen's Forum is held in *Boston's* Faneuil to hear testimony on the Transfer Amendment by organizations including the Meatcutter's Union, Amalgamated Clothing and Textiles Worker's, CPPAX, WILPF, and State Representative Mel King.

April 19: *Chicago* CTA holds a Citizens' Hearing on priorities, with testimony by 20 organizations, including AFSCME, SEIU, B–1 Campaign, AFSC, CALC, and the Settlement House Community Center.

April 22: The Transfer Amendment is presented for endorsement to the national meeting of the National Association of Neighborhoods in *Pittsburgh.*

May 7: The *Spokane, Wash.*, Peace and Justice Center presents a workshop on the B–1 and the Transfer Amendment to the Washington State Democratic Council.

WAR ON CRIME MUST GO ON

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. CORRADA. Mr. Speaker, in 1968 the United States Government launched one of its most visionary and imaginative programs to eradicate crime in the United States. It was the intention of the Congress to assist the States in their fight against crime and to enhance the administration of justice. Puerto Rico is an excellent example of how beneficial this type of program can be for our society. We have been able to establish a series of successful programs for the benefit of our law enforcement agencies as well as for our judicial machinery in general. We are now harvesting the fruits of the Federal aid and our efforts against crime in Puerto Rico.

As we consider House Concurrent Resolution 195 now before us, we have to weigh that the war on crime must go on despite reductions in the Federal budget. But without Federal aid the task will be even more difficult. Please bear in mind that the LEAA budget has been cut for 3 years in a row, from a high of $895 million in fiscal year 1975 to a possible $504 million for fiscal year 1978, if the House Budget Committee recommendation for reduction of LEAA funds is approved by the House. The reduction will amount to one-third from its fiscal year 1977 level. This trend is placing in jeopardy the existence of various state programs that are instrumental in fighting crime, and it should be stopped for the benefit of our society.

It may not be currently fashionable to support the continued existence of the Law Enforcement Assistance Administration, which may not claim to be perfect. But, certainly, we would place ourselves in an untenable position in the future if our support for reductions in the total LEAA budget would lead to a sharp increase in other expenses, directly resulting from the reduction in our total effort to fight crime.

One only need to mention the increased welfare costs, the cost of detention of criminals, and the costs that one can never estimate in money terms—the anguish and suffering of those individuals afflicted by crimes against the person.

The Puerto Rico Crime Commission has been an invaluable instrument in fighting crime in our Caribbean setting, and much of this effort has served to reduce the related problems of drug traffic on the eastern seaboard.

Support to any amendment to increase the funds for LEAA, or to restore its funding to this fiscal year 1977 level, will allow the Puerto Rican authorities, in cooperation with the U.S. Department of Justice and with LEAA itself, to carry on its war aganst crime in Puerto Rico.

THE POTTSVILLE PLAN

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. YATRON. Mr. Speaker, we all know and appreciate the outstanding contributions made by service clubs to the communities back in our home districts. We also know that the full poten-

tial of these groups often is not realized because of competition or fragmentation of efforts. A solution to this problem, known as the "Pottsville Plan," has been successfully developed by the Rotary, Kiwanis, Lions, and Jaycees clubs in Pottsville, Pa.

Pooling their efforts, these fine organizations recruited 60 of Schuylkill County's finest high school senior football players to compete in the Senior Charity Bowl. The program drew the active support of 48 service clubs in the county and raised $20,000 for regional charities. Instrumental in the effort's success were: Mr. Cy Wachter, president, Pottsville Lions; Mr. Steve Littell, president, Pottsville Kiwanis; Dr. Gary Scheib, president, Pottsville Rotary; Mr. Jim Bowman, president, Pottsville Jaycees; and Mr. Walter Jones. Schuylkill County recreation director and past president of the Pottsville Rotary.

The success of the Schuylkill County service clubs has brought their program international recognition. I would like to commend to the attention of my colleagues the following article, which appeared in the February 1977 issue of the Rotarian magazine:

ON POTTSVILLE'S GRIDIRON, EVERYONE WINS!

There was a new football team in town in Pottsville, Pennsylvania, last June, and it was a four-platoon operation under the management of such seasoned football fans as the members of the city's four service clubs.

For a collective 191 years the Rotary, Kiwanis, Lions, and Jaycees clubs of Pottsville had been engaged in community betterment and service—but always in single endeavors. In 1975, all four decided to unite in forming a committee called the Senior Charity Bowl Inc., with Rotarian Charles Quandel as president. The purpose of the corporation was to make plans for a football game to raise money for various charities selected by the service clubs. But soon the clubs' efforts moved well beyond the city limits of Pottsville as members began asking their brother service clubs throughout surrounding Schuylkill County for help in recruiting the 60 best high school senior football players. In addition to talent, the football bowl sponsors also needed equipment, uniforms, insurance, advertising, officials and other personnel for the game and property management, half-time entertainment, tickets, publicity, medical examination for the players, concessions, and various other services and supplies needed to make the game and the arrangements concerning it a "polished, professional performance."

In all, 48 service clubs and more than 2,000 persons were directly involved in efforts to make the game the spectacular and financial success it turned out to be: the event raised more than $20,000 for regional charities.

It wasn't all smooth sailing, according to head promoter Walter Jones, Schuylkill County recreation director and a past president of the Rotary Club of Pottsville; but the motivation and careful planning of the committee and the dedication of all who helped assure that it would be a sure winner, not only for local charity projects but also as a "showcase of Schuylkill County gridiron talent as well." Coaches from colleges and universities throughout Pennsylvania and beyond were invited to send representatives to view the young athletes in action.

The "Pottsville Plan" has unlimited potential for variation in your town and region. Your club could join with other service clubs in sponsoring baseball, cricket, gymnastics, all kinds of local sports competitions. Or you need not restrict yourselves to sports. Arts and crafts and other local interests should lend themselves well to similar treatment.

ESSAY ON CRITICAL CHOICES

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. MARTIN. Mr. Speaker, in an attempt to encourage young people, who will become the leaders of tomorrow, to devote their best thinking to the critical choices the United States must make as it enters the third hundred years of its history. I have sponsored an essay contest. Juniors and seniors in both public and private high schools from Iredell, Lincoln, and Mecklenburg Counties, which comprise the Ninth Congressional District of North Carolina, were invited to participate.

The essays were to be based on reflective thought on the purpose of the Bicentennial and what has been accomplished by the United States during that time and how the celebration and the national awareness it raised can help guide the American future.

We often fail to utilize the idea of students, who are frequently the source of refreshing and valid opinion on problems that trouble our society. It is important that we listen to the ideas of our youth.

With these thoughts in mind, I want to call to your attention an essay written by Susan Ann Maag, a senior at Garinger High School in Charlotte, N.C., the winner of the Ninth Congressional District essay contest:

AMERICAN INDIVIDUALISM: THE PRIDE OF OUR PEOPLE

(By Susan Ann Maag)

Abraham Lincoln once reflected on the annual Fourth of July celebrations, saying, "We go from these meetings in better humor with ourselves, we feel more attached, the one to the other, and more firmly bound to the country we inhabit." [1] Because America's biggest birthday party ever evoked these feelings from the American people, it was a success, for behind the political scandals, energy shortages, and foreign crises lies the real power of our great nation, the people. Our people are demonstrating their power by vigorously asking if we have lost the belief in the virtues of hard work, firm moral ideals, self-reliance, and a respect for leadership and institutions. Many citizens today are struggling to find and to keep their identity in a world where individualism is not often respected. The masses of people are important, but only when they are taken apart to become individuals do we find the uniqueness that makes our country great. It was as individuals that Americans approached the bicentennial celebration and as individuals that each derived that which he needed to make himself feel more a part of his country, and more a brother to his fellow citizen.

Independence Day celebrations were marked by the usual festivities, although in this Bicentennial year they perhaps reached a heretofore unheard-of frenzy. U.S. News and World Report described them as "people oriented festivities." [2] highlighted by long treks to sites of historic import, the swearing in of new citizens, fireworks, parades, beard-growing contests, and mock colonial-era battles. Innumerable tourists contributed to the year-long birthday party through trips to those cities where our nation was given birth and meaning—Philadelphia, Boston, Washington, D.C. Others celebrated in a more subtle manner, taking a colonial history course at the local community college, or even just purchasing a bicentennial calendar.

In one of his six Fourth of July addresses former President Gerald Ford was perhaps hinting at this American stamp of approval put on individualism. He emphasized that "our country must never cease to be a place where men and women tried and untried, test the impossible, and take uncertain paths into the unknown." [3] This principle is the backbone of American society, a massive society, yes, but more importantly, a society of individuals striving to attain personal goals.

This emphasis on individualism results from the fact that our nation is indeed a melting pot. Herman Melville described it well when he said, "We are not a narrow tribe of men . . . No: our blood is as the flood of the Amazon, made up of a thousand noble currents all pouring into one." [4] More than a thousand newcomers now come to these United States daily, seeking escape from political conflicts or religious persecution, desiring to get rich, but most importantly, looking for the vague intangible we call freedom. Mstislav Rostropovich, the Russian cellist, once said of America, "Only here can I speak from the heart." [5]

We must protect our right to be ourselves and preserve the goal of self-improvement. As our nation faces grave issues that demand serious and effective actions, the wounds become deep and opposing sides clash for control. On our 200th anniversary we must go beyond the celebrations to the immense problems our nation faces. In the life of nations, America has reached her "middle age" and is showing signs of slowing down. The Bicentennial celebration gave Americans time to consider their past accomplishments, present beliefs, and future hopes. Our pause to consider our troubled situation does not, however signify a downfall. Rather it gives us as a nation a chance to re-evaluate our position and, if necessary, redirect our course. Now our responsibility lies in not letting our convictions fade into oblivion. Each citizen must decide on personal goals and then strive to attain them. Only in this way can the combined forces achieve the continuing progress America needs.

CIVIL ENERGY FROM LASER FUSION: A GROWING REALITY

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. PURSELL. Mr. Speaker, today I am inserting my ninth installment in my series on laser fusion. I think we are all

becoming increasingly aware of the struggle between KMS and ERDA over the continued development of laser fusion as a civil energy project separate from the military oriented programs.

In February of this year—before I even began my series—Industrial Research ran an article on this very matter. I would like to share this article with you today:

CONGRESS, CARTER FACE FUSION FRAY

(By Hal Tufty)

Carter transition initiatives and the new alignment of power from the reorganization of congressional committee jurisdictions will be important power changes to watch in the 1977 federal R&D picture.

An illustrative example is the push-pull struggle over who will dominate future decisions on fusion R&D for energy: the military, the civilian bureaucracies and government labs, or the private sector.

The transfer of legislative functions held since 1954 in the Joint Committee on Atomic Energy, agreed upon in caucus, but still to be approved at this writing, presages more congressional scrutiny by the 95th Congress in various aspects of the energy R&D effort.

The currently foreseen redistribution of legislative responsibilities would give the Senate Interior Committee chaired by Senator Jackson and the House Committee on Science & Technology chaired by Congressman Teague jurisdiction over all civilian energy programs.

The House subcommittee on energy will be headed by Representative Mike McCormack who teamed with Senator Jackson in the Joint Committee last year to question ERDA's assignment of civil energy laser fusion development to the military side of ERDA. All laser fusion work at government installations now is performed in the weapons laboratories, principally the Los Alamos Scientific Laboratory, N. Mex., and the Lawrence Livermore Laboratory, Calif.

Last year the congressional "tilt" toward civilian control was seen in the appropriations conference report last July which listed laser fusion development along with magnetic confinement as civil projects. The Carter transition team already has cited laser fusion as one of the problem areas to be dealt with early in the new administration.

The establishment of laser fusion as a civil energy project separate from the military oriented programs of ERDA has long been sought by KMS Fusion Inc. The Ann Arbor, Mich., group initiated its own laser fusion program for civil energy purposes back in 1969 . . . before the government laboratories acknowledged any application of laser fusion technology for other than military purposes.

The company claims to have invested $20 million in this work before coming to ERDA for support in 1974. KMSK now is dependent on government support for its laser fusion work, but insists that its program will lead more rapidly to commercialization of laser fusion for civil energy than will the "in-house" government program.

Three issues seem to be emerging as points of special congressional interest in laser fusion. One is the question of government laboratories *vs* industrial facilities. Another is the influence of military requirements over a project claimed to have great promise as a new civil energy source.

A third is the lack of stimulation and impetus for the in-house program when there is no competition from outside, which also means delay in starting the building of industrial capacity before the new developments can be exploited for public benefit.

Apparently in response to congressional prodding, and the recommendations of a panel of reviewers led by Dr. Lawrence Hafstad, retired vice president for research and engineering of General Motors, ERDA began funding the KMSF work in early 1975.

The Joint Committee recommended $14 million for KMSF work for FY 1977, more than double the budget request, and the amount was raised by amendments on the floor to $20 million in the House version of the appropriations bill. Although the authorization conference report was never agreed to by both Houses, the appropriations bill itself provided $10 million and the conference report specified it was for the "on going" program of KMSF.

Despite such indications of congressional intent, ERDA thru 1976 kept laser fusion development for whatever purpose, in the domain of the weapons complex. The new 1976 contract according to the ERDA spokesmen was not for the "on going" KMSF program but for a new program aimed at support of the military-oriented programs for the weapons laboratories, at the level of the original budget request.

ERDA's congressional presentations said the laser fusion program managed by the new Office of Laser Fusion, part of the security directorate, was for both military and civil energy purposes. It was called a "scientific" program uninfluenced by the ultimate application, but the promised near-term military payoff, said ERDA, dictated that the two objectives be pursued under military direction.

The result, as one congressional staffer pointed out, is no test of the validity of the KMSF single-purpose concept aimed at civil energy needs with no military application.

The new set-up in Congress, and Carter's nuclear and scientific knowledge, will likely provide an opportunity for private industry to make a case for laser fusion as a new energy source, and at the same time show the way for more flexibility in federal R&D policies.

ANOTHER IRRESPONSIBLE FEDERAL BUDGET

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. KASTEN. Mr. Speaker, in recent years, wasteful and unnecessary levels of Federal spending have placed an unfair burden on the American taxpayer.

The tax burden faced by middle-income Americans is one of the most volatile issues in America today. Survey after survey pegs "taxes" as a major concern of the people.

Far too often, when we approve billion dollar programs and deficits, we forget that the financial burden of Government today goes beyond the Federal level. People back home are paying more and more in State and local taxes, and at every level, inflation has caused excessive taxation of all Americans.

For this reason, decisions concerning the Federal budget for fiscal year 1978 will be among the most important to be made during the 95th Congress. As we face the complex problems of inflation, unemployment, Government reorganization, and the energy crisis, we cannot ignore the impact of the decisions we make on Federal spending. We must act now to reduce the tax burden and put an end to unnecessary Government spending.

RESPONSIBLE FEDERAL BUDGET PROCESS

The Congressional Budget and Impoundment Control Act of 1974 has given Congress a greater opportunity to develop a responsible Federal budget. Under the terms of this act, the First Concurrent Resolution on the budget for each fiscal year must establish aggregate targets for revenues, new budget authority, outlays, the deficit, and the public debt.

It acts as a guide for each of the 13 appropriations subcommittees and establishes the Federal spending priorities for each fiscal year.

In effect, this budget process forces Congress to view the Federal budget as a whole. Its aim is to force Congress to live within budget totals for spending, revenues, and the deficit.

TAXPAYERS LOSE

Unfortunately, Congress has again failed to take advantage of this opportunity. The House Budget Committee has reported the First Concurrent Budget Resolution for fiscal year 1978. The proponents of even more Government spending, bigger deficits, and more inflation have won another victory. The taxpayers are again the losers.

The Budget Committee is recommending that Congress approve a budget for the coming fiscal year in the amount of $462.3 billion. That represents a 10.8 percent increase over last year's spending level. Moreover, if we accept the committee's recommendations, we will be approving a Federal deficit of $64.3 billion.

Mr. Speaker, the budget process was designed to bring discipline to the previously haphazard growth in Federal spending and the national debt. But, the recommendations of the Budget Committee make a mockery of that process.

Rather than providing a blueprint to bring fiscal responsibility back to the Federal Government, the committee resolution ratifies the "business as usual" approach to Federal spending which has placed serious inflationary pressures on our economy.

INCREASE IN DEBT

There has been a deficit in the Federal budget for every year except one since 1960. The committee proposal would allow the total public debt to surpass the $800 billion mark. If we follow the committee, we will be perpetuating the imprudent and wasteful spending practices of past Congresses, and we will have done so by conscious action rather than haphazard design.

This need not be the case. As one of his last acts, former President Ford presented Congress with a budget proposal aimed at fiscal responsibility. Had the Ford administration's budget proposals for the past 2 years been accepted by the majority in Congress, we would have been within grasp of a balanced budget by fiscal year 1978. The committee's recommendations would put attainment of a balanced budget off into the unforseeable future.

The House Committee on the Budget has failed to report a responsible spending proposal for fiscal year 1978. Instead, they have recommended a plan which

very well may result in bigger deficits, spiraling inflation, and, ultimately, recession.

Today, the full membership of the House of Representatives must review the committee report and act to restore fiscal responsibility. Should they fail to take such action, the American taxpayer will be forced to pay the price.

POLL ON ENERGY

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. MARTIN. Mr. Speaker, there are some who contend the President's energy proposals are draconian, and others who contend accepting them would be bravely biting a marshmallow. Both will gain comfort from the results of a poll recently completed by, and published in, the Charlotte, N.C., News. While some people appear likely to conserve, this initial pulse-taking does not show much more than a moderate increase in the public's commitment to conserve more than they are doing. I would like to share the moderately encouraging results with our colleagues:

ENERGY—WHAT DO YOU THINK?

This Charlotte News poll is based on telephone interviews with 116 adults and is balanced to insure all parts of Mecklenburg County are represented. It was conducted by nine professional interviews working for the Marketing Research Department of Knight Publishing Co. The error factor is 5 to 10 per cent.

What do you think of the proposal to tax new cars that get less than 13 miles per gallon while giving tax rebates on new cars that get better than 13 miles per gallon?

	Percent
Agree	47
Disagree	43
Don't Know	10

What about the proposal to increase the gas tax if consumption is not restrained?

	Percent
Agree	37
Disagree	57
Don't Know	6

What do you think of the proposal to give tax rebates to homeowners who winterize their homes?

	Percent
Agree	79
Disagree	15
Don't Know	6

What about tax credits for installation of solar energy systems?

	Percent
Agree	53
Disagree	22
Don't Know	25

If the proposals made by President Carter are passed, will the next car you buy be smaller than the one you now own?

	Percent
Yes	32
No, we already own a small car	23
No, we will not buy a small car	41
Don't Know	4

Will you change your driving habits to use less gasoline than you now use?

	Percent
Yes	49
No	46
Don't Know or Don't Drive	5

Will you install a solar energy system within the next three years if the rebate proposal is passed?

	Percent
Yes	9
No	66
Don't Know or Don't Understand Solar Systems	25

What if anything will you do to improve your home's energy use?

	Percent
Add Insulation	23
Install Storm windows or weather-stripping	12
Other (turn down thermostat, use fireplace, close off rooms)	24
Already done all we can	19
Will do nothing	12
Live in an apartment	7
Don't Know	3

CURBING PHARMACY THEFT

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. LEHMAN. Mr. Speaker, I am today reintroducing a bill which would make the attempted or actual robbery or burglary of a pharmacy a Federal crime. The Controlled Substances Act, which puts narcotics under Federal jurisdiction, also leaves the pharmacist in a most vulnerable position. While curbing the illegal importation of drugs, it has caused criminals to turn to the community pharmacist as their new source.

Within a 3-month period in 1975, the National Association of Retail Druggists received 1,155 reports of drug-related crimes, and they believe this is just the tip of the iceberg.

According to the Drug Enforcement Administration—DEA—in the second half of fiscal year 1976, 74 percent of the total volume of drugs stolen were from pharmacies.

In a survey done by Pharmacy Times, 52 percent of the pharmacists responding had been robbed, a majority more than once.

An additional problem which must be considered is the increase in multidrug use. Drug abusers are now seeking out schedule II drugs available only from drug stores, such as quaaludes, amphetamines, and sleeping pills. Juveniles abusing these drugs are becoming amateur criminals. Because these youths are so easily frightened, they are also more prone to violence.

In many areas, pharmacies are curtailing their evening hours for fear of assault, causing severe hardship to those in need of medication. Unfortunately, this also leaves pharmacies more vulnerable to burglaries.

The pharmacy theft bill would provide stiff penalties under Federal law for burglarizing a drug store to obtain drugs and stiffer penalties for the use of force or violence in drug store robberies.

Mr. Speaker, the Federal Government had already assumed the responsibility for halting illegal drug traffic. I believe that in pursuing this goal, we must now provide protection for the pharmacists who have become prime targets for those seeking to obtain drugs.

The text of my bill is as follows:

H.R. 6676

A bill to amend the Controlled Substances Act to provide penalties for persons who obtain or attempt to obtain narcotics or other controlled substances from a retail pharmacy by force and violence, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Controlled Substances Act (21 U.S.C. 801 et seq., Public Law 91-513) is amended by inserting immediately following section 411 (21 U.S.C. 851) thereof the following:

"THEFT AND OTHER CRIMES TO OBTAIN NARCOTICS OR OTHER CONTROLLED SUBSTANCES

"SEC. 412. (a) It shall be unlawful for any person—

"(1) to break and enter the premises of a retail pharmacy with the intent to steal, or otherwise obtain by unlawful means, a narcotic or other controlled substance; or

"(2) to obtain, or attempt to obtain, from or within the premises of a retail pharmacy, by force or violence, a narcotic or other controlled substance.

"(b)(1) Except as provided for in paragraphs (2) and (3), any person who violates subsection (a)(1) shall be fined not more than $5,000 or imprisoned for not less than two years and not more than twenty years, or both such fine and imprisonment.

"(2) Any person who violates subsection (a) while armed, or by assaulting any person, or by putting in jeopardy the life of any person by the use of a dangerous weapon or device, shall be fined not more than $10,000 or imprisoned for not less than five years and not more than twenty-five years, or both such fine and imprisonment.

"(3) Any person who, in violating subsection (a), kills or maims any other person shall be imprisoned for not less than ten years.".

SEC. 2. The table of contents of the Comprehensive Drug Abuse Prevention and Control Act of 1970 is amended by inserting after the item relating to section 411 the following:

"Sec. 412. Theft and other crimes to obtain narcotics or other controlled substances.".

HANAFI MUSLIM INACCURACIES

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. STEERS. Mr. Speaker, on April 14, the Washington Post printed a story about the Hanafi Muslims who were responsible for the recent hostage-taking incident in Washington. In that article, the Post quoted, at length, an anti-Semitic and highly inaccurate account of the origins of slavery, and I was shocked to see that the Post neglected to offer any alternative interpretations that would have provided a more balanced picture.

I am inserting into the RECORD a letter I sent to the Post protesting this unfair and unbalanced piece of journalism:

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 15, 1977.

The EDITOR,
The Washington Post,
Washington, D.C.

DEAR SIR: I am writing in reference to your news article of April 14 concerning the Hanafi Muslim, Abdul Salim, and, specifically, to the five paragraphs devoted to Salim's anti-semitic and highly inaccurate account of the origins of slavery. I am most upset that the Washington Post, which has a reputation for being a responsible newspaper, has printed, as though it had a factual basis and without rebuttal, an inflammatory and racist "interpretation" of how "Zionist Jews . . . were the cause of us (blacks) being taken out of Africa and being brought to this country."

To provide a balanced article, and thus to avoid the reader's natural supposition that there is some validity in Salim's hate-filled diatribe, the Post should have pointed out, at least briefly, that there are other views which totally refute some of Salim's unwarranted claims. One appropriate source would have been a column by Smith Hempstone which appeared on March 13, 1977, in the Washington Post.

Hempstone points out that slavery existed in Africa long before the Spanish Inquisition, although Salim would have us believe that during the Inquisition, the "Jews led Spanish slave traders to the part of Africa where they could find Muslims who were sold into slavery". Hempstone says, "the thirst for slaving, which the Koran (like the Bible) does not forbid, seemed to be in the very blood of some Moslem Africans."

Hempstone points out that slave "traffic was started by the Arabs over a thousand years before the discovery of the New World", and he cites historical documentation. Copious additional evidence is furnished which, had any of it been quoted, would allow readers to realize that Salim was venting baseless allegations on a par with the reasoning used by the Hanafi leader in avenging himself, for the atrocities committed against him, by committing atrocities against completely innocent and unrelated other persons.

Yours sincerely,

NEWTON I. STEERS, Jr.,
Member of Congress.

ELECTION REFORM

HON. WILLIAM M. KETCHUM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. KETCHUM. Mr. Speaker, President Carter has made public his proposals for election "reform." I, for one, do not share his enthusiasm for universal voter registration or public financing of congressional and senatorial campaigns. The former proposal will insure election fraud while the latter will deprive citizens of their right to participate in the election process—after all, how will you feel when your tax dollars go toward electing someone you do not agree with?

Recently, I received a letter from the county clerk of Yolo County, Calif., expressing his opinions on these issues. His remarks reflect my sentiments and I am sure those of many other Americans. Following is the text of his letter as well as an April 12 editorial from the Sacramento Union which I commend to my colleagues' attention:

COUNTY OF YOLO,
Woodland, Calif., April 15, 1977.

Hon. WILLIAM M. KETCHUM,
House Office Building,
Washington, D.C.

HONORABLE CONGRESSMAN KETCHUM: Enclosed please find a Xerox copy of an Editorial that appeared in the Sacramento Union Newspaper on April 12, 1977, in which I agree 100% and feel we should not be considering this approach.

This is not what Americans want. The concerned citizens of our Great Nation see to it that they are registered and then vote. It is not a hit and miss situation. This type of legislation is for the unscrupulous individuals, whether it is a politician, his backer, or individuals/groups conducting registration drives who are being paid so much for each affidavit. The non-citizen will use this, not really for voting, but as an identification when stopped and will also try to use it as a method of obtaining U.S. Citizenship. He will vote only because it will help document his case or he may be paid to vote for someone or for some proposition.

I am also against my tax dollars being used to support candidates. This country needs money for more useful things, not paying candidates to get themselves elected. If they undertake the responsibility of becoming candidates, then they undertake the responsibility of financing their own campaigns, and not with my tax dollars.

This legislation will also create another layer of bureaucracy, the Federal Election Commissioners, with an Administrator and Associate Administrator, not to mention the "BRIBE" provisions of this act concerning financial assistance. Do you realize the money it will take to finance this? For California several million, and the United States as a whole, I estimate several billion. IT IS NOT WORTH IT.

Congressman, I respect my vote and honor in voting, plus my tax dollars, too much to see these honorable things removed by these meaningless propcsals as reflected in Universal Voter Registration Act of 1977. I can see only that this will bring our country into one of the biggest fiascos it has ever known or seen.

I am confident you will approach this bill with the utmost concern for our citizens and their tax monies. In my opinion, this is not a good bill.

Sincerely,

LAURENCE P. HENIGAN,
County Clerk.

PROPOSALS BY CARTER FINE—FOR DEMOCRATS

President Carter is being a hog about his share of the vote. His election "reform" proposals are designed to pile on the votes for the Democratic party. "Why not the best?" is being followed by "Why not the rest?"

The President wants instant voting. The potential voter needn't bother to register. He need merely appear at the polling place with some kind of identification in hand in order to vote on the spot.

He wants to abolish the electoral college system in favor of direct popular election of the president.

He asks that the Hatch Act be scrapped, permitting federal workers to campaign for politicians.

And he wants citizens to pay for the campaigns of U.S. senators and representatives.

All of his proposals are designed to increase the majority of the Democrats, which already is dangerously large. The plan, drafted by Vice President Walter Mondale, would move the United States further along the road to the one-party state.

It's difficult to say which of the four proposals is worst. They are equally bad. But perhaps the most wretched is that for instant voting.

If persons were allowed to cast their ballots merely by flashing a driver's license or a Social Security card, the possibilities for fraud are immense. The proponents argue that there would be checks on phony credentials and multiple voting, but given the ingenuity of our politicians, you wonder. If there were safeguards, just imagine how long it would take to process a hundred voters through a polling place. With the inevitable challenges, a good guess would be at least a fortnight.

Too, unscrupulous politicians and dedicated party hacks (and they do exist) would be carrying the unconcerned, lazy and uneducated to the polls by the busload. Do we really want to hype the voter turnout in this manner? Is the country not better off if those who are not motivated to vote stay home?

We already have eliminated literacy as a requirement for voting. The voting age has been lowered to 18. Registration has been made as simple as stating your name, address and party affiliation. What more could the President want? Obviously, he wants the rest, although assuredly they will not be the best.

As for subsidizing the election of congressmen, most of us are already of the opinion that we are subsidizing the incumbents. By paying for their election out of taxes, we would virtually insure ourselves of reelecting them until death. Congressmen already have every advantage over an unknown challenger. They have free mailing privileges, easy access to the press and television, travel expenses paid for out of the Treasury (even when they don't travel and large staffs and generous office allowances that are often used for political purposes.

We should not give the incumbents a greater headstart in election campaigns than they already enjoy.

Mr. Carter's argument for scrapping the Hatch Act also strikes us as special pleading for his party. He says the 2.8 million employees are denied the rights of other Americans by not being allowed to hustle votes for politicians. Those who agree with him say the Hatch Act is an anachronism now that we have civil service. On the contrary, the rise of public employee militancy and unionism makes the anti-politicking law more essential than ever.

Finally, Mr. Carter wants to wipe out the election of the president by the states' electors. At first glance, this proposal would seem to have merit. After all, it is possible that a presidential candidate with the most popular vote could lose the electoral vote. Possible, but highly improbable. In fact, it has happened only once in 200 years. That was in 1888 and the difference between the two candidates was only 91,000 votes.

(No, it did not happen in 1824 and 1876 as Mr. Carter asserted. In 1824 we did not have the present system, and it was the House of Representatives that put in John Quincy Adams over Andrew Jackson. In 1876 Samuel Tilden won not only the popular vote but the electoral vote. A rigged election commission shifted the votes of Southern states in a deal to put in Rutherford H. Hayes.)

If there is a danger of the popular-vote winner being denied by the electoral vote, and it is exceedingly slight, it is not as great as the danger of direct election of the president. Direct election would almost certainly be the last blow in the destruction of federalism.

It would increase the fragmentation of the party system and open the way to a multiplication of splinter parties. It is probable that no candidate would get 40 percent of the vote because of the growth of splinter parties. This would lead to runoffs and all the attendant bargaining that leads to the second man becoming the first man. In short, a minority president.

To all four of Mr. Carter's proposals, we say no.

CAN U.N. CLOSE U.S. RHODESIAN OFFICE?

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. McDONALD. Mr. Speaker, as I mentioned on April 22, 1977, on page 11949 of the CONGRESSIONAL RECORD, systematic harassment by the U.S. Government is taking place against the Washington, D.C. Rhodesian Information Office in an effort to censor Rhodesia's side of the story. If this were not bad enough, the United Nations, an institution noted for its high degree of selective indignation and hypocrisy, is now attempting to close the Rhodesian Information Office in the United States by means of a resolution. I deplore this attempt at censorship also and commend Mr. William A. Rusher's recent column on this matter as it appeared in Human Events of April 30, 1977, to the attention of my colleagues:

CAN U.N. CLOSE U.S. RHODESIAN OFFICE?

(By William A. Rusher)

United Nations, N.Y.—This overrated pack of hypocrites, dominated by countries where free speech is unheard of, is preparing to clamp down on certain opinions it dislikes right here in the United States. If the American Civil Liberties Union doesn't take up this issue and battle it all the way to the Supreme Court, it will deserve the Double Standard Prize of 1977.

There has existed in Washington, ever since Rhodesia declared its independence from Britain in 1965, a tiny outfit called the Rhodesian Information Office. It is manned by two doughty Rhodesians, Ken Towsey and John Hooper, and its basic function is to inform Americans on matters concerning Rhodesia, including the views of the Rhodesian government whose (duly registered) agent it is.

If you have any idea how hard it is to obtain information on Rhodesia that hasn't been filtered through the propaganda machines of either the Communist powers or Western liberalism (both of which detest Ian Smith's government), you will appreciate how absolutely priceless this little office has been over the years to those of us who try to report the facts from a different perspective.

Naturally the dissemination of news and opinions about Rhodesia disapproved by the United Nations has annoyed this august assemblage of would-be international bullies, and they have finally hit upon a means of closing down the Rhodesian Information Office and silencing Rhodesia's voice in this country altogether.

There is circulating through the U.N.'s corridors these days a draft resolution whose key provision declares that the Security Council, "Acting under Chapter 7 of the Charter of the U.N., decides that all states members of the U.N. shall prohibit the use or transfer of any funds in their territories by the illegal regime in Southern Rhodesia, including any office or agent thereof, or by other persons or bodies within Southern Rhodesia, for the purposes of any office or agency of the illegal regime that is established within their territories other than an office or agency so established exclusively for pensions purposes."

The intended effect of this resolution if adopted (and it is being held up only because the Russians, who are past masters at stifling dissident opinion, want to make it tougher) would be to prevent the United States from allowing the Rhodesian Information Office to receive, as it now does, funds from Salisbury for the purpose of carrying on its information activities. In short order, the little office would have to close down.

Must this country obey the U.N.'s instructions in this matter? Incredibly, there is a respectable school of legal opinion that believes it must.

The U.S. Senate ratified the United Nations Charter in 1945, and under our Constitution the Constitution itself, plus all laws enacted by Congress, "and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land."

If the U.N. Security Council (so the argument runs) "decides," as it claims the power under the Charter to do, that every member state must close up any information offices of Rhodesia on its territory, then this country is bound to comply. (With Andy Young representing us, a U.S. veto is hardly likely.)

But what about the 1st Amendment to the Constitution, which asserts that "Congress shall make no law . . . abridging the freedom of speech"? Presumably Rhodesia's foes would reply that they are not denying Messrs. Towsey and Hooper the right of free speech they are merely decreeing that they will have to starve to death while exercising it.

By United Nations standards, that argument is downright plausible but of course in reality it is pure poppycock. Just as the power to tax is the power to destroy, the power to deny funds to the holder of a particular viewpoint is in effect the power to prevent him from expressing it. But then Congress isn't actually "making" this law—the United Nations is.

We had better win this fight, or next year may be 1984.

DEPUTY POLICE CHIEF HERMAN XANDER

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. BYRON. Mr. Speaker, all of us on Capitol Hill lost a friend recently with the untimely death of Deputy Police Chief of Washington, D.C., Herman W. Xander. Until his death last week, Mr. Xander served here as assistant chief of the U.S. Capitol Police.

For more than 37 years, Chief Xander served this Federal city and the Capitol with dedication and distinction. I am sure my colleagues and everyone on Capitol Hill mourns his loss and joins in tribute to a man who served well in executing his responsibilities. Allow me to share with my colleagues this article from the Washington Post:

HERMAN W. XANDER DIES; DEPUTY D.C. POLICE CHIEF

(By Eric Wentworth and Alfred E. Lewis)

Herman W. Xander, 62, a deputy chief in the Metropolitan Police Department serving as assistant chief of the U.S. Capitol Police, died of bone-marrow cancer yesterday at Washington Hospital Center.

Mr. Xander, the D.C. department's senior member with more than 37 years of service, came from a family of law enforcement officers. His late father had been a mounted policeman on the city's force, his brother is a retired city policeman and his son is on active duty as a lieutenant.

Other relatives include two brothers-in-law retired from the D.C. force and a nephew still on active duty here, two other nephews with the Prince George's County police, and a deceased brother-in-law who had been a deputy U.S. marshal.

Mr. Xander was born in Washington in 1915, and attended Eastern High School and Strayer business college here. He began his career in law enforcement in 1934 with the Federal Bureau of Investigation, working in the identification section.

He won his appointment to the Metropolitan Police Department on Nov. 1, 1939, and was first assigned as foot patrolman in what was then the 11th precinct—now the seventh district.

Mr. Xander was transferred in 1941 to the special investigations squad of the detective bureau. He was promoted to precinct detective in 1945, and to detective sergeant in the robbery squad a year later. He was promoted to detective lieutenant in 1958 and assigned to the third detective district.

Mr. Xander graduated from the FBI National Academy in 1960. Four years later, he was detailed to the U.S. Capitol Police and assigned to supervise security for the U.S. House of Representatives.

While continuing on detail with the Capitol Police force, Mr. Xander was promoted to the rank of captain on the D.C. force in 1966, to inspector in 1968 and finally to deputy chief. Over the same period, he rose to the rank of assistant chief on the Capitol force, which guards the U.S. Congress, its buildings, and visitors.

"We had confidence in each other when the chips were down," recalled James M. Powell, chief of the Capitol Police and Mr. Xander's partner for many years on the D.C. police robbery squad. "It's like going through a war together. He trusted me and I trusted him, and we knew that neither of us would let each other down."

Through much of his law enforcement career, Mr. Xander was an active and skilled amateur baseball player. A catcher, he played for FBI, Metropolitan Police Department and other amateur teams. Before joining the city's police force, he had considered a professional baseball career and tried out for three major league teams.

Survivors include his wife, Mary Elizabeth, of the home in Indian Head, Md.; his mother, Mae, a brother, Bernard; a sister, Mrs. Amelia Leukhardt; a son Richard, and two grandchildren, all of Oxon Hill.

PERSONAL EXPLANATION

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. PATTEN. Mr. Speaker, due to scheduled meetings and previous commitments, I was not present to record my votes on a number of legislative measures. I list below how I would have voted had I been present:

Rollcall No. 104, "aye."
Rollcall No. 131, "aye."
Rollcall No. 132, "aye."
Rollcall No. 133, "aye."
Rollcall No. 134, "aye."
Rollcall No. 135, "aye."
Rollcall No. 137, "aye."
Rollcall No. 138, "aye."
Rollcall No. 147, "aye."
Rollcall No. 148, "nay."
Rollcall No. 149, "nay."
Rollcall No. 150, "aye."
Rollcall No. 151, "aye."

FISCAL YEAR 1978 DEFENSE AUTHORIZATION

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. FRENZEL. Mr. Speaker, had I been able to be present I would have voted for passage of H.R. 5970, the Defense Department authorization for fiscal year 1978, although I am not thrilled about the 10-percent increase in proposed funding over last year. In particular, I am disturbed by the extent to which this bill shifts the emphasis from spending on research and development toward heavier expenditures for weapons procurement, but, because of the tenor of the SALT talks, I believe we must proceed with procurement.

While I have supported efforts in the past to defer a decision on production of the B–1 bomber, it is very difficult not to go along with the administration's request for an additional five aircraft now that the SALT negotiations have fallen into disarray. I support a review of this program and a careful reassessment of need. But in view of the enormous growth in Soviet military spending coupled with the breakdown in the SALT talks, we have little choice other than to demonstrate that this kind of buildup will lead to a response on our part.

I have consistently supported efforts to scale down our troop commitments overseas and in particular I have favored a gradual withdrawal of our ground forces in Korea. President Carter has also announced that he supports a program of phased withdrawal, making it less urgent that we take legislative action this year. It is probably more appropriate under the circumstances to give the President flexibility to negotiate an orderly withdrawal based on consultation with our allies in Europe and Asia than to write a withdrawal policy into the bill.

I was disappointed that this bill contained a provision preventing DOD from contracting out to private business any further commercial or industrial activities prior to March 15, 1978, pending a study to determine whether these activities should be performed by DOD personnel or by private contractors. The Office of Management and Budget guidelines for making these decisions have been in use for many years. We should encourage contracting with outside firms whenever appropriate as a means of saving money and holding down the size of Government.

The price tag on this bill is higher than I would like it to be, yet it may pale in comparison to future requests, unless we can somehow manage to steer the SALT talks back on course. Presumably both sides share a vital interest in heading off another runaway arms race. Such a development would constitute a serious threat to the peace and security of the entire world. Certainly it would delay indefinitely any realistic possibility of balancing the federal budget.

I hope that by this time next year, progress at the negotiating table will permit us to scale down the growth in defense spending.

NUCLEAR WEAPONS PROLIFERATION

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. TEAGUE. Mr. Speaker, on March 15, Mr. George J. Stathakis prepared a paper which was delivered at the Atomic Industrial Forum Conference in New York City on the nuclear weapons proliferation problem. Under leave to extend my remarks in the RECORD, I wish to include this paper:

THE NUCLEAR WEAPONS PROLIFERATION PROBLEM—CAN WE LEAD WITHOUT LEADERSHIP?

(By George J. Stathakis)

In the current debate on the threat of nuclear weapons proliferation one sometimes gains the impression that proliferation problems arose from commercial nuclear power activities. It seems to have been forgotten that the reverse is true and that the development of peaceful nuclear power was initiated to minimize the risk of widespread weapons development.

In 1953, the U.S. monopoly of nuclear weapons was already broken by the Soviet Union and Great Britain. In the words of President Eisenhower, "the knowledge now possessed by several nations will eventually be shared by others—possibly by all others." The vision facing the United States was that of a world of nations, each able to initiate an atomic holocaust. Our response was the famous "Atoms for Peace" program in which we proposed to lead a world wide effort to develop peaceful uses of atomic power in a manner designed to actually reduce the risk of weapons proliferation. In effect, we attempted to "yield what was impossible to keep" with statesmanship oriented to minimize the risk of atomic wars.

In 1954, the United States had a total electrical generation capacity of a little over 100 gigawatts. It was blessed with large fossil fuel resources, and it was widely believed that these resources were sufficient for the indefinite future. Power generation costs were in the 4 to 7 mills per kilowatt hour region. It was clear that the development of economically competitive nuclear power to meet this target was a difficult task and it was envisioned that nuclear power would have its major benefits in the high fuel cost areas of the world not well endowed with fossil fuel resources.

The atoms for peace approach required that the United States retain its leadership in nuclear power in order to trade technological help with other nations for nuclear weapons forebearance. It was to *this* end that the government supported commercial nuclear power program in the United States was initiated in 1954.

Today we again find ourselves in debates about nuclear weapons proliferation but these seem to inexorably tie commercial nuclear power in with the proliferation problem. However, as was plain in 1954 when there was no electrical nuclear power generation, proliferation is a problem in itself.

At present, six nations are known to possess atomic weapons. In no case was the nuclear material for the bombs obtained from commercial nuclear power facilities. Although we have had difficulty in this country developing commercial reprocessing plants, the fact is that a reprocessing plant designed to produce weapons plutonium and not to meet NRC requirements is a rather simple task. A moderately industrialized nation embarking on a meaningful weapons capability would find it more efficient to utilize dedicated facilities rather than make inefficient use of power reactor facilities.

Today more than 20 nations have the technical and financial resources to develop nuclear weapons without assistance from other nations. A number of these nations are not parties to the Non-Proliferation Treaty and thus are under no legal constraints.

The fundamental proliferation problem then is to influence nations with bomb-making capability not to develop bombs.

The techniques to achieve this end are incentives and disincentives—trying to affect the many factors that may influence a nation to develop nuclear bombs. Mutual security alliances are an important tool, as are any other steps which reduce world tensions and promote world peace. A cornerstone of United States policy has been the effort to get other nations to agree formally to forego nuclear weapons by becoming parties to the Non-Proliferation Treaty.

The effectiveness of efforts to influence nations not to develop nuclear bombs varies from nation to nation. On the positive side, a number of nations with obvious capabilities have to date not chosen to develop bombs, and many of those have agreed to the Non-Proliferation Treaty. On the negative side, for a number of nations the forces pushing toward nuclear bomb development may outweigh the countervailing forces.

The resulting situation has only limited stability. Some nations will not agree to forego nuclear weapons. Even a nation that agrees may change its mind, as a result of a change in its relationships with one of the major powers, a new military threat near its borders or other factors. The Non-Proliferation Treaty itself recognizes the right of a party to withdraw.

Thus on the fundamental weapons proliferation problem, which has nothing to do with power reactors, steps can be taken to reduce the risk. But there are no steps which are certain to be effective, and there is no way to completely eliminate the risks.

How do commercial reactor power facilities impact on the proliferation problem? The answer is that there are both positive and negative aspects.

It was indicated above, that the "Atoms for Peace" program used nuclear technology and equipment supply as inducements to other nations to forego nuclear weapons development. This is one of the few positive approaches available to cause a sovereign nation to willingly agree to give up one of its prerogatives of sovereignty. Indeed, this may be the most important aspect of commercial nuclear power as it bears on proliferation problems; and although it was the cornerstone of our past policy, it seems to be receiving little emphasis today.

The negative aspect of a foreign power reactor program is that it involves knowledge and technology which can be useful in a weapons program. The operation of power reactors provides nuclear engineering experience and a possible source of fissible materials. However, it probably does not have any substantial impact on a nation's *decision* to embark on a bomb program That decision will turn principally on political and security considerations.

Once a nation concludes that it is necessary to develop nuclear weapons it has several avenues open. An industrialized nation would have little incentive to divert power reactor plutonium. A few crude nuclear weapons would be a poor military substitute for the relationships with major powers that would be endangered by such action. And as noted, such nations would have the more attractive option of develop-

ing a more effective nuclear weapons capability through dedicated facilities.

Thus, one concludes that commercial nuclear power impacts negatively on the proliferation issue primarily through the possibility that power reactor plutonium could be diverted to nuclear weapons use by those nations without the capability to develop the more efficient independent dedicated facilities. The specter that most of us fear is a few nuclear weapons, even crude ones, in the hands of such nations.

The problem we face is that many of these nations view nuclear power as necessary to their future welfare, and, in my view, correctly so. Most are critically dependent on oil imports. Even aside from the high cost of the imported oil and the political dependence it engenders, these nations are aware of the future world depletion of oil resources. Most of these nations do not have the large coal supplies of the United States and see no alternative to the increasing use of nuclear power.

Unless we are willing and able to assure these nations of a reliable and economic alternate future energy supply, it does not seem moral, or even possible, to deter them for long from deployment of nuclear power facilities. Further, in view of the international capability for supplying nuclear power plants, any action by the United States to limit nuclear power internationally or influence its manner of deployment, can only be successful in cooperation with the other supplier nations.

But, here too we run into a problem. The international market for nuclear power facilities is highly competitive and has large impacts on balance of trade. Other supplier nations view themselves in leadership positions in such areas as reprocessing and fast breeder development, and as equals in light water reactors. These nations view their future energy needs from a different perspective than we and have different philosophical viewpoints with respect to proliferation and the balance between the risks of proliferation and the need for energy. Attempts by the United States to influence policies with respect to development, deployment, or sales of nuclear facilities are viewed with skepticism by the other supplier nations.

The immediate problem facing us with respect to proliferation and nuclear power involves reprocessing and the availability of plutonium from reprocessing plants. The problem in my view can be addressed through arrangements which involve little sacrifice by those countries interested in obtaining the benefits of peaceful nuclear power.

One solution supported by the Atomic Industrial Forum is that reprocessing centers be restricted to locations in those industrial nations already having weapons capability and that the energy of the reprocessed plutonium be returned to the user nation in the form of low enriched uranium. Thus, the plutonium would remain where it would not add to problems of proliferation.

Since an economically sized reprocessing center could service 50 large nuclear reactors, such an arrangement would have economic benefits to the less industrialized nations and the major concern would be surety of supply. But, such reprocessing centers could be located in several countries in both the East and the West, so as to provide a high degree of assurance of reprocessing services.

Let me suggest one variation to this scenario—I spoke of reprocessing only in weapons states, which does not include some nations with very advanced nuclear power programs. But certainly, there is no substantial risk of power reactor plutonium diversion by nations such as Japan and West Germany whose security interests and treaties with the United States would be jeopardized by such a course. If such countries found the need to become weapon states they would surely follow the example of France using dedicated facilities and a full scale weapons development and testing program necessary to obtain the sophisticated weapons and delivery systems required by a major power. For this reason reprocessing and plutonium use should be permitted there as well.

In effect this approach would keep the door open for other nations, as their industry and nuclear programs develop, to have indigenous reprocessing. This expectation will be especially important for nations looking toward the breeder reactor as a major energy source in the next century.

I do not mean here to address the details of such an arrangement as proposed above. Nor do I mean to indicate that reprocessing will remain the major concern in the future. Advances in centrifuge and laser enrichment, the use of the U-233 thorium cycle, the development of the breeder and indeed the tandem fuel cycle if it is developed, will all bring new proliferation problems.

The point is that proliferation problems can be and can only be effectively addressed on the basis of international arrangements which will involve delicate negotiations among nations with different needs and philosophical viewpoints. Although we may agree that future arrangements must be carefully controlled, Congressional proposals to impose rigid requirements may be counter-productive. These will limit the Executive Branch in being able to respond to particular situations which cannot be covered, or even foreseen, at the present time.

I would suggest that in view of the present disarray in our domestic reprocessing program which is the current proliferation concern, there is time to carefully examine the situation before developing detailed export legislation. But, more important, I want to suggest that if the United States is to play a leadership role in developing international arrangements limiting proliferation, it must be a leader. Of what use will laws governing U.S. exports be if the most reliable and advanced technology and the most meaningful experience is abroad.

If we still share the leadership in nuclear technology and nuclear power, that leadership is today in serious jeopardy. Our share of the export market has slipped dramatically over the past few years. Uncertainty about our foreign and domestic policies have caused even our long-standing customers to question our reliability as a supplier.

It takes ten years in the United States to build a nuclear plant compared to 6 to 8 years overseas, so that foreign suppliers can have three generations of plant designs and experience in the time that we have two. The consequences in terms of technological development are obvious. Furthermore, the uncertain regulatory requirements, the equivocal government positions on nuclear power, the ability of extreme environmental advocates to delay or cause cancellation of nuclear projects, and the consequent financial risks entailed by a utility contemplating a nuclear project have all but caused a de facto stop in the U.S. nuclear power program.

In seven elections this year, and in a number of public opinion polls, the people of the United States have indicated that they understand our energy problem and expect nuclear power to play a major role in alleviating it. Nevertheless, we are in danger of abandoning nuclear power and one of the elements in setting this de facto policy has been our actions, or lack of them, resulting from our concerns over proliferation.

It has been reported, for example, that the State Department and ACDA have, in the name of proliferation, taken positions against proceeding with reprocessing and the breeder reactor. In 1954, the United States embarked on a policy of influencing the direction of nuclear development and deployment through positive leadership. The policy which is apparently being advocated today is one of trying to restrict advances in nuclear development abroad by eliminating them in the United States. This may not be a question of "yielding what is impossible to keep"; it would seem that instead "we are trying to keep what we do not have."

Consider the breeder. André Giraud, head of the French CEA, has expressed not only the need of his own country to develop the breeder, but in his view, the moral requirement that the breeder be developed for the welfare of the world. In this country work in the breeder demonstration plant was initiated in 1966. The Clinch River Project was formally organized in 1972, but it is not expected that Clinch River will operate until 1984, if at all. In France, Phenix started in 1968, and was operating in 1973, and work on the 1000 MW Super Phenix has been initiated.

In Japan, work on their JOYO test reactor started well after FFTF and their reactor is expected to be operating well before FFTF. In view of our performance at home, the U.S. is in a poor position to influence the course of fast breeder development abroad, and it is difficult to see how our future influence can be enhanced by abandonment or continued delay in our own breeder program.

Let me sum up.

The proliferation problem did not arise from commercial nuclear power but there are legitimate concerns that commercial nuclear power may exacerbate the problem.

In my view, the solution must be to develop international arrangements which will allow for the benefits of nuclear power in those nations which believe they need it, while at the same time minimize the risk of proliferation as a result of commercial power facility deployment.

Because there are many supplier nations these arrangements can only be developed in cooperation among the supplier and user nations.

If the United States wishes to retain its ability to exercise a leadership position in developing these arrangements, it must retain its leadership in nuclear power.

Actions taken in the name of proliferation, which in effect reduce our nuclear power capability and technological leadership, can only weaken our future position in influencing arrangements we desire.

I started out by asking whether we can lead without leadership. I believe the answer is obvious. The more meaningful question is, why try? Our foreign policy, and more important, our domestic well being, will depend upon success in the search for solutions to the world energy problem. Should we not continue to lead *with* leadership?

REALISTIC FLOOD PLAIN RELIEF

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. HOLLENBECK. Mr. Speaker, I have introduced legislation today which amends the National Flood Insurance Act of 1968 for the purposes of increasing flood insurance coverage under such act and specifying the kind of substantial improvements to structures which are affected by the act.

I believe that this legislation is a much needed first step to maximize the benefits of the floodplain management program and help protect those homeowners who innocently have invested in flood hazard areas.

The Flood Disaster Protection Act

seeks to provide residents of flood-prone areas with insurance at reasonable rates through Federal subsidy and to require local jurisdictions to make rational use of floodplains as a condition of eligibility for flood insurance. But I am also concerned about the possible property devaluation homeowners in the area face as an effect of the act. My bill will protect homeowners in a floodplain whose lifetime investments have been jeopardized by current Federal land use restrictions. My bill permits rebuilding of seriously damaged structures as long as the damage caused by a single catastrophe does not exceed 80 percent, while the current law forbids the rehabilitation of structures which are more than 50 percent damaged.

I believe that 80 percent is a more realistic limit on rebuilding. This change will help restore property in the floodplains to its proper value and, at the same time, maintain the safety and protection of homeowners.

Furthermore, this bill raises the ceiling on flood insurance coverage to levels more congruent with property values. The 1973 law provides for maximum $35,000 coverage for single-family dwellings and $100,000 for commercial buildings. I believe these limits are unrealistically low. Thus, I have introduced legislation to provide $120,000 coverage for single-family dwellings and $400,000 for commercial buildings under the regular program.

While the intent of the National Flood Insurance Act is commendable, to the extent that this act has caused property values to decline, there exists a need for alterations. This bill offers increased insurance coverage and a more responsible definition of what constitutes substantial improvement as necessary alterations, and I seek the support of my fellow colleagues in the passage of this vital legislation.

RED CHINESE PROPAGANDA

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. McDONALD. Mr. Speaker, on February 27, 1977, the Washington Post ran a full page ad in support of Red China's propaganda campaign to force the United States to abandoned its ally, Free China.

Allan C. Brownfeld in his newspaper column distributed this week has provided valuable information about the origins of the Washington Post ad. Brownfeld revealed that:

Two of the prime movers of the pro-Peking effort are, in fact, registered agents of Communist China.

He identified them as C. Y. Shaw, president of the D.C. Catering Co., Inc., of Washington, D.C., and Van S. Lung, president of the Sino-American Export and Import Co., Inc., of Washington, D.C., who is also executive director of the National Association of Chinese Americans, the organization responsible for the ad.

I have examined the registration statement filed with the Department of Justice, foreign agents registration section for the Sino-American Export-Imports, Inc. This firm which among other things imports propaganda films from Red China shows Van S. Lung as its president-director and C. Y. Shaw as its vice-president, treasurer-director.

The address of the headquarters of the National Association of Chinese-Americans in the ad is 3524 Connecticut Ave., NW., Washington, D.C. This address is that of the Yenching Palace, a Chinese restaurant owned by Lung.

It is also interesting to note that among the non-Chinese signers of the ad is John S. Service, who years ago was removed from the State Department for handing classified documents over to a pro-Red Chinese magazine Amerasia.

Mr. Brownfeld's valuable column and a list of the signers of the ad follows:

IS COMMUNIST CHINA BEHIND THE PRO-PEKING U.S. LOBBY?

(By Allan C. Brownfeld)

A massive campaign is now under way to obtain formal U.S. recognition for Communist China and the abandonment of the Republic of China on Taiwan.

This campaign has taken the form of conferences, full page newspaper advertisements, letter-writing campaigns, and lobbying on Capitol Hill.

A key element in this effort is a group which calls itself "The National Association of Chinese-Americans." This organization placed full-page advertisements in a number of leading American newspapers, including The Washington Post and The Los Angeles Times. The Post advertisement was carried on February 27 with the headline, 'Better To Mend Late Than Never—Complete The Task In US-China Relations." Addressed to President Carter, the advertisement concluded with this message: "Mr. President, a wrong policy toward China has obstructed traditional links between Americans and Chinese for too long, and helped involve the U.S. in two tragic wars in Asia. We urge you to follow the course set by President Franklin D. Roosevelt 44 years ago, who recognized the reality of the USSR and took the necessary step of establishing diplomatic relations with it. The U.S. and China should have full diplomatic relations now. . . ."

This advertisement was signed by a number of individuals identified only as members of the National Association of Chinese Americans, as well as being identified by their own professional associations. Among those on the list were: Chin Pien Li, M.D., of the National Institutes of Health; Dr. Yang-ming Chu, Associate Professor at the George Washington University Medical Center; C. Y. Shaw, President of the D.C. Catering Company; and Van S. Lung, President of the Sino-American Export and Import Company. Mr. Lung, listed also as Executive Director of the National Association of Chinese-Americans, was identified as the major force behind the advertisement.

Leaders of the National Association of Chinese-Americans also came to Washington from as far away as California to lobby for closer U.S.-Peking relations. Albert H. Yee, a southern California physician, says: "Our heritage is that there is only one China. Why is the U.S. insulting China and Chinese-Americans with five years of no progress on normalization?"

If this pro-Peking lobby were simply a group of American citizens of Chinese descent urging a particular Far Eastern policy for the U.S., we might disagree with the policy they urged, but could not criticize the nature of their activity. The fact is, however, that two of the leaders of this group are registered with the U.S. Department of Justice as agents of entities of the Peoples Republic of China. In other words, two of the prime movers of the pro-Peking effort are, in fact, registered agents of Communist China.

The two men who are registered as foreign agents with the Department of Justice are C. Y. Shaw, President of the D.C. Catering Company, and Van S. Lung, President of the Sino-American Export and Import Company, and also Executive director of the National Association of Chinese-Americans. This writer has obtained from the Department of Justice the registration forms filled out by these men. That they are registered as agents of Peking is beyond any question.

Others on the list, while not registered agents, are very close to the Chinese Communist government. Chen Y. Yang, for example, has had audiences with Mao Tse-tung, Chou En-lai, and the present Chinese Communist Party Chairman Hua Kuo-feng. Where did the money come from for these expensive advertisments? No one can be sure. The China News, an English language daily in Taiwan, charged on March 5 that, "The money for this expensive campaign does not come from the pockets of a handful of college teachers. Behind these newspaper ads are the unlimited propaganda funds of the Peiping regime, which is pouring millions into materials addressed to the U.S. Government and people."

There is every possibility that these advertisements are in violation of U.S. law which requires that all material distributed by agents of foreign governments be identified as such. The U.S. Department of Justice should investigate any possible legal violations at the earliest opportunity.

The Communist regime which these Chinese-Americans support is one of the most brutal in the history of the world. Professor Richard Walker notes that, "The Communist movement in China, despite its self-proclaimed high ideals, must be judged on performance, and, as regards, the human equation, there is little to commend it. Those who wish to rationalize public assassinations, purges of classes and groups or slave labor as a necessary expedient for China's progress are resorting to the same logic which justified a Hitler and his methods for dealing with economic depression in the Third Reich."

Much that is fanciful and clearly untrue has been written about life in Communist China by so-called "Asian scholars" who have visited it. They were recently challenged by Professor Edward Luttwak of the Johns Hopkins University, who returned from a visit to Peking and asked: ". . . how could they have missed the central phenomenon of Chinese life: its unique, almost pure totalitarianism?"

The fact is that the pro-Peking lobby in the U.S. seems to have been purchased and paid for in Communist China. To misrepresent itself as a movement of "Chinese-Americans" is clearly false—and probably illegal as well.

WASHINGTON, D.C. COMMITTEE

Chin Pien Li, M.D., Former Chief Virus Biology Section, National Institutes of Health, President, National Association of Chinese-Americans.

Dr. Yang-ming Chu, Associate Research Professor, George Washington University Medical Center, Secretary, National Association of Chinese-Americans.

Dr. Chen N. Yang, Professor, Department of Physics, SUNY at Stony Brook, New York.

Dr. Ping-ti Ho, Professor, Department of History, University of Chicago.

Mr. Lien Y. Ho, Finance Officer, Food and

Agriculture Organization of the U.N., (Ret.), Treasurer, National Association of Chinese-Americans.

Dr. C. K. Jen, Professor of Physics, Johns Hopkins University, Baltimore, Maryland.

Mr. Tang Pe Tsiuen, Assistant Treasurer, National Association of Chinese-Americans.

Dr. Chieh Chien Chang, Professor, Mechanical Engineering, Catholic University of America, Washington, D.C.

Mrs. Helen Fu Hays, Director, Chinese Extension Center, University of the District of Columbia.

Dr. Beverly Hong Fincher, Professor, National University of Australia.

Mr. C. Y. Shaw, President, D.C. Catering Co., Inc., Washington, D.C.

Mr. Van S. Lung, President, Sino-American Export and Import Co., Inc., Washington, D.C., Executive Director, National Association of Chinese-Americans.

FORMER GRAND JUROR NOTES ABUSES OF GRAND JURY SYSTEM

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. EILBERG. Mr. Speaker, today my Subcommittee on Immigration, Citizenship, and International Law continued its hearings on grand jury reform. We heard the testimony of prosecutors and former prosecutors and a district court judge, representing the Judicial Conference of the United States. In addition, we received the testimony of former grand jurors.

I would like to call to the attention of the Members the testimony of William P. Gloege, who was a Federal grand juror in 1975 in California. Mr. Gloege forcefully demonstrated that the Federal grand jury system has become merely an extension of prosecutorial power, with little input and decisionmaking by the grand jurors themselves.

His description of his actual grand jury experience, as presented to the subcommittee, clearly demonstrates the need for the reforms I have proposed in H.R. 94.

The testimony follows:

TESTIMONY OF WILLIAM P. GLOEGE, VICE PRESIDENT, ASSOCIATION FOR EFFECTIVE GRAND JURIES, BEFORE THE HOUSE SUBCOMMITTEE ON IMMIGRATION, CITIZENSHIP AND INTERNATIONAL LAW

Mr. Chairman and Members of the Subcommittee: My name is William P. Gloege. While I am Vice President of a group of former grand jurors from Santa Clara County, California, known as the Association for Effective Grand Juries, I appear today on my own behalf. The views expressed are my own, and are based on my experience as a federal grand juror during the first half of 1975 in San Francisco.

During our term there were two grand juries impaneled to explore special areas (police corruption and income tax matters). Ours was the general grand jury, hearing a variety of routine matters such as bank robberies, mail thefts and crimes committed on federal property. A major part of our work toward the end of our term involved an extensive investigation of airlines selling tickets at prices under those set by the C.A.B.

Let me first give you my overall impression of the federal grand jury system from a vantage point inside the jury room. In my statement I discuss problems I saw during my term as a grand juror, then I indicate how H.R. 94 contributes to resolution of these problems. Additional areas needing reform, from my point of view, are also discussed.

OVERALL IMPRESSION OF THE FEDERAL GRAND JURY SYSTEM

It may be useful to provide some brief details on my personal orientation. I am employed by a large metropolitan police agency as an administrator in the office of the Chief of Police. This experience has shown me that there are individuals in our society that need to be vigorously pursued and prosecuted. It has shown me that lack of such vigor on the part of police and prosecutors can create a vacuum in society into which an undesirable element will flow to the detriment of the rest of the populace.

Prosecutors at the federal, state and local levels need to be vigorous; they need our support and they need all the legitimate tools we can provide them to be successful in the pursuit of lawbreakers.

Having said this, my impression of the grand jury system is that it is a weak link in the fine system of justice we have in the United States. Perhaps the reason is the secrecy of the system which keeps its workings out of the public eye. Perhaps it is due to the feeling of the ordinary citizen who makes up the grand jury that he cannot or should not question the government.

THE ACTUAL JURY ROOM EXPERIENCE

There was never any question who was in charge of our grand jury. The U.S. Attorney (I assume with concurrence of the Court) selected our foreman—a pleasant, older gentleman who was about to retire from his job in the Postal Service. The vice-foreman was selected in the same manner. We received brief instruction from the judge, but it was the prosecutor who told us in detail what was expected.

The United States Attorney was an impressive figure to us—urbane, friendly, intelligent, highly skilled in the law and respectful toward we grand jurors. He never became ruffled, not even after long days of testimony or in the face of a grand juror or two who persisted in disagreement.

The U.S. Attorney explained to us that there had been accusations that grand juries served as a "rubber stamp" for the prosecutor. He didn't want us to be a "rubber stamp," he said. But we got down to business and were soon turning out indictments—in batches. We would hear five or ten cases before deliberating and voting the indictments.

The principal impression I received was that the process is very one-sided. It is designed that way, and it will take major and innovative changes to achieve a more balanced and fair process.

On one side is the prosecutor and his team of able assistants. They were, most of them, very sincere individuals, and it was hard or impossible to imagine them doing anything less than honorable in their pursuit of criminals. Aiding the U.S. Attorney and his assistants, other impressive groups and individuals are brought into play: FBI agents—sober, matter-of-fact, no-nonsense, speaking with authority, but sometimes making deprecating remarks about the accused; Treasuary agents—well trained, technicians; Immigration agents—harried, undermanned and undermined by the Executive, Congress and others. Agents from other departments or agencies fell into similar categories.

The point is, on the prosecutor's side were good-intentioned federal attorneys and agents whose only concern seemed to be to do their job simply and fairly. We could identify with them. Like us, they were middle class, with possibly a little more education than the average grand juror. They treated us in a friendly manner as if we were both there for the same purpose—on the same side of the fence, as it were.

And vaguely lurking in the background was the whole power of the federal government—Army, Navy, Air Force—everything. The U.S. Attorney was with the Establishment—the established order and all the power and prestige it had at its command.

On the other side was the accused. Usually one person, but sometimes three, four or more. The U.S. Attorney and the agents that testified told us what the person had done, and it was obvious that our job was to vote an indictment. On occasion we were read a "rap sheet" of the person's former criminal

history. (This history usually consisted of charges against the person, with no indication of whether he or she had subsequently been found guilty.)

Only on a few occasions out of hundreds of cases did we jurors see the accused. Of these, there were a few who turned out to fit what we expected; but more often the person surprised us by making a *better* impression than expected—based on what we'd heard.

Given the forces on the side of issuing an indictment—their impressive numbers and demeanor, our identification with the establishment, the fact we seldom knew the accused in person and the unsavory light the accused was sometimes cast in—all this made the outcome of our cases and the path every grand jury follows all but inevitable.

CHALLENGING THE U.S. ATTORNEY'S CASE

Questioning the case of the prosecutor was a difficult and thankless job for the few grand jurors who at first tried. One assistant to the U.S. Attorney bristled at any suggestion his case was not airtight. He became so verbally abusive in response to grand jurors' questions, which he seemed to consider "insolent," that he began to alienate otherwise submissive and very pro-prosecution jurors.

Grand jurors seemed to fall into three categories in terms of their attitude toward their role. About one quarter were what might be termed prosecution "hawks"—they were for indictment on every case. Their attitude was that the government would not bring a case before the group that wasn't worthy of an indictment. By definition indictments should be issued on all cases. This group had the upper hand from the start since they had on their side the U.S. Attorney who was in charge of the proceedings, plus the other array of federal forces mentioned above.

Another quarter of the group represented the opposite end of the spectrum. This group, which was much less vocal (except among themselves when they were away from the grand jury room), wanted to face every case with an open mind—which was sometimes hard, given the way cases were presented. Their posture was that of being mildly skeptical of the prosecutor's case. But the questions of this group—at first almost pointed, but later apologetic—often seemed, in the context of the way the proceedings were run, to be out of order and impertinent. The foreman was fair, but he tended to be less patient with this type of questioning. The "hawks" often openly attacked these questioners, or more subtly let them know they were "off base." The U.S. Attorney and testifying agents did nothing to discourage this attitude toward the questioners. Soon this group tired of its role owing to lack of support from other grand jurors (even those who felt the same), the sometimes outright hostility of prosecutors, the regular hostility of the "hawks," and the obvious futility of going against the U.S. Attorney's intention to obtain an indictment.

The remaining half of the grand jurors did not seem involved on one side or the other. Some expressed a waning interest in being a grand juror and seldom asked questions or participated in deliberations. Absences were usually from this middle group.

About half way through the term of the grand jury an interesting event took place. The grand jury returned its one and only "no bill." The case involved an older postal worker, and there were numerous questions about whether a criminal act had actually been committed. In deliberations it suddenly became clear that we were about to return a "no bill" and a feeling of awe, daring and electricity swept the group. It was uncomfortable to go up against the government like this. When the Assistant U.S. Attorney returned to the room and learned of the "no bill" he was concerned and critical. He said something to the effect that we couldn't do it and certain forms had to be filled out which we didn't have. It was an awkward moment for all of us, and everyone was glad to move on with business. I wondered how the attorney would explain this rare event to his boss—the U.S. Attorney.

One closing note on the problems with the system encountered during service as a grand juror. At one point the U.S. Attorney assured grand jurors that those we indicted had another chance—they would get a jury trial, and if they were not guilty would not go to prison. The attorney was asked about percentage of cases he got "true bills"—he replied, "99.9%." "What percent of these resulted in convictions?" He did not know. Later we learned that a sizeable number (we could not get an exact figure) of cases we indicted never went to trial! This came as a shock after thinking everyone would get a second chance. Undoubtedly indictments on numerous counts provided a powerful plea bargaining tool for the prosecutor to obtain guilty pleas and thus maintain a good record for the U.S. Attorney.

REACTION TO H.R. 94

H.R. 94 is a good bill that deserves the support of Congress. As a former grand juror, the reforms it proposes seem moderate and overdue. Below are specific comments or provisions of the bill.

GRAND JURY SIZE

The proposal to reduce the size of the grand jury may not be beneficial. In the larger group more points of view can be expressed, which would be important if grand juries do become vocal and independent. Expenditures for grand juries must represent a small fraction of costs of the federal justice system, so a cost savings argument is not really valid.

IMMUNITY OF WITNESSES

The bill states that any individual required to give testimony may not be indicted by the grand jury before which the individual has testified. However, could the individual be indicted before a concurrent grand jury in that district, or a subsequent grand jury that would hear the compelled testimony?

Under Section 2—Recalcitrance, and Section 3—Immunity, stronger and specific provisions might be built in to protect the news media. Our grand jury had numerous cases whereby the prosecutor attempted to force information out of reporters, station managers and other news media personnel related to a crime, wherein persons claiming to have committed the act transmitted information to the news media.

Such pressure tactics on the news media could inhibit the public's ability to learn the truth. Sources will be less willing to inform the media if media personnel can be successfully compelled to reveal sources.

This method of getting evidence seems heavy-handed in view of the vast machinery at the disposal of the federal government to catch wrong-doers. To replace good investigative tactics with getting an armlock on the media seems unfair and something the public should not tolerate.

Section 6 deals with independence of the grand jury and presents good provisions for achieving independence. However, unless grand jurors have a will to be independent and other means, such as those suggested in other parts of this statement are activated, these important improvisions of H.R. 94 can easily be turned aside by the prosecutor. For example, while an individual who is to be indicted can request to appear before the grand jury, the prosecutor can make this testimony unlikely in the way he presents the request. He can remind the jury of its large volume of business, infer that such a hearing would be a waste of time based on the person's previous record, etc.

The bill indicates the government will be required to advise the grand jury of exculpatory evidence. As a grand juror, I requested exculpatory evidence on several occasions. The response was a somewhat short-tempered reply that a) the government wouldn't bring us cases involving an innocent party, and b) the government, out of a sense of fair play, would surely inform us of any evidence which tended to excuse the individual being investigated from the act in question.

However, I cannot recall a single case of exculpatory evidence being introduced, but it is hard to imagine that in the hundreds of cases we heard there was no such evidence. Will putting this requirement in the bill insure that the prosecutor will turn over such evidence? It seems the key will be having a strong and independent grand jury that will start to ask questions if exculpatory evidence never appears.

REPORTS

The reporting requirements required in the bill are excellent. It may be useful in (b)(2), for example, to require not only the number of requests by United States grand juries to the Attorney General for approval to compel testimony, and the number approved, but also the percentage of all investigations which result in such a request. This number would be the number of investigations the district reports under (b)(1) of this same section. The same percentage of all cases can be reported along with the number for (b)(3), (b)(4), (b)(5) and (b)(6). In this way the Congress can determine how one district compares to another, or to the average in, say, the percentage of all investigations that result in witnesses being held in contempt and confined (b)(5), or the percentage of "no bills" resulting from testimony obtained under immunity. Of course, the Congress could compute these percentages, but it may be instructive and motivating to the U.S. Attorneys to see these percentages in their reports going to the Congress.

ADDITIONAL POTENTIAL REFORMS

While H.R. 94 is a commendable bill, more could be done to correct the pervasive problem with the federal grand jury system—lack of grand jury independence.

It seems to me that independence is the key ingredient needed to make the system work. If the grand jury has the legal protections and machinery to act in an independent manner, and jurors are capable and willing to act independently, other desired reforms will follow: A truly independent grand jury will see to it that it gets needed outside counsel and expertise needed to carry out investigations, it will vigorously question misuse of immunity, it will insure that witnesses are protected and treated in a civil manner, and it will place demands on federal prosecutors and their agents to bring in well prepared cases.

GRAND JUROR SELECTION

The place to start in achieving an independent grand jury is with selection of individuals who comprise the jury. In the Northern District of California jurors are selected at random from voter registration rolls. There is little opportunity for individuals who should or want to drop out to do so. The result is a group containing some unwilling members and many who have a neutral attitude toward service. This condition does not foster a strong cohesive group willing to fight the U.S. Attorney or the courts for their independence if necessary, but instead fosters an attitude that the jury should get through its weekly business and its term as quickly as possible.

A means of improving this situation might be to adopt a means of selection used by some counties in California. Allow inter-

ested individuals to "apply" for service as a grand juror. To insure a wide segment of society had the opportunity to participate, a large group of individuals could first be randomly selected from voter registration rolls. These individuals could receive information on grand jury service—its responsibilities, its educational opportunities, its valuable role in the system of justice and the need for a strong, independent grand jury to be formed. The group would be invited to apply. A panel of jurists or, perhaps, a completely independent body made up of both lay persons and experts could be convened to select jurors from the applications. In making their selection, the panel can apply criteria related to interest, independence, availability, balanced points of view, etc. The selection might take place once each year, thereby doing away with the present costly system of selecting from voter lists several times a year.

The method outlined above would seem preferable to the present system and would undoubtedly produce a more independent jury than the present system.

GRAND JURY TRAINING

Our grand jury received a handbook on being a grand juror (it was very brief and general), a set of instructions from a judge that lasted several minutes and then we were in the hands of the U.S. Attorney.

What is needed is some form of outside training for federal grand jurors that is more thorough, considering the hundreds of cases the jury must hear and decide upon. Again, this training should be carried out by an outside, independent source, not the U.S. Attorney. The intent would not be to alienate the jury from the Government, but to clearly establish in jurors' minds their independent role and how to pursue it as the Constitution intended.

The jury should select its own foreman and vice-foreman after a suitable period when jurors get to know each other. The training could incorporate this selection process.

INDEPENDENT ATTORNEY AND STAFF

Section 3330(b)(1) of the H.R. 94 provides conditions under which the grand jury could request that the court appoint a special attorney to assist in inquiries of the jury.

A regular, permanent independent attorney would contribute even more to grand jury independence. This attorney could be present when the U.S. Attorney presents cases for indictment and could advise the foreman without participating himself. As staff to the grand jury, the attorney could be present during deliberations, not as a participant, but to furnish legal advice as requested by grand jurors.

As a private citizen I appreciate the opportunity to testify before this Subcommittee. The Legislative branch of federal government has many areas of interest and responsibility, but grand jury reform, related as it is to the essence of America—individual freedom—must rank high in priority.

I would be pleased to respond to any questions the Subcommittee may have.

GIVE BERGLAND AND AGRICULTURE A BREAK

HON. DAVID R. BOWEN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. BOWEN. Mr. Speaker, a constituent of mine from Winston County, Miss., Clyde Wallace, has written a very excellent letter to the editor of the Memphis Commercial Appeal, the Midsouth's largest morning newspaper. Mr. Wallace is a dairy farmer, and his viewpoint is worth considering, and I particularly call it to the attention of my urban colleagues, who may not be aware of the problems facing small farmers such as Mr. Wallace.

Those of us who serve on the House Agriculture Committee are privileged to work with our former colleague, the Honorable Bob Bergland, who is now Secretary of Agriculture. Although I do not always agree with every facet of the farm policy espoused by the Secretary and the administration, it is very refreshing to have someone in a policymaking position at the Cabinet level who has firsthand knowledge of the subject and some awareness of the impact policy decisions have on those at the grassroots level.

Mr. Wallace's letter states the case very well, both for the farmer in this country, and for giving Secretary Bergland a chance to help both farmers and consumers. The letter is as follows:

GIVE BERGLAND AND AGRICULTURE A BREAK

To the Commercial Appeal:

I am writing in response to your editorial entitled "Milking Consumers." I am a dairy farmer in Winston County, Miss.

Like Bob Bergland and you, I do not fully understand the working of the milk price support program. I have heard several dairy economic professors say that they didn't either, so I don't feel too badly about this. I do have a clear understanding of several facts.

Today's farmer is a businessman. The minimum investment for a family type dairy farm in my area is $250,000. With that type investment, a farmer will not be a farmer long if he cannot earn a return on his investment. The 40-hour week has a certain appeal to us, too.

You are correct in saying that the 83 percent parity won't quite buy that pair of jeans; nor will it buy that 70-100 horsepower tractor that has doubled in price since 1970. I would also like to point out that feed prices have not declined when compared to six months ago and that feed accounts for only 45–55 per cent of the cost of producing milk.

In summation, I would say that today's farmer will turn elsewhere if he cannot expect reasonable compensation for his labor and investment. Whether or not the consumer buys our product is immaterial, if we cannot sell it at a profit.

It is refreshing to have a man who has been a farmer and faced the despair of drought and other disasters, in a position to deal with the problems that govern the food supply of our great nation and to a lesser extent the world. Why don't farmers and consumers alike give him a chance?

SUPPORTS PRESIDENT'S ENERGY PROGRAM

HON. JOSEPH S. AMMERMAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. AMMERMAN. Mr. Speaker, President Carter has challenged us here in Congress to demonstrate that we can act responsibly on the energy issue and produce a program which will deal with our Nation's energy crisis intelligently and effectively.

I support the President's program and I conveyed my views to my constituents in a column for the newspapers in my district which I wanted to share with you:

President Carter's energy program asks America to do something very difficult—to make sacrifices now because of threats which lie in the future.

This past winter gave us a taste of the sort of crisis this nation could face in the years ahead. Our schools were closed. Our factories were shut. Our homes were cold. Our jobs and our creature comforts were threatened.

This crisis resulted from unusually severe winter weather, the worst in decades. However, the cold wave did ebb and so did the gas shortage. By March, things were almost back to "normal" and the crisis almost forgotten.

But I hope last winter's emergency has not been forgotten entirely because President Carter is warning us that unless we act now, more such crises lie ahead.

Therefore, I think it would be irresponsible of me to do anything other than support the President's energy program. It seems to me to be a sound policy, with realistic goals and reasonable methods for achieving them.

The major energy problem we face is that our principal source of energy is petroleum—oil and natural gas—and our supply of petroleum is becoming increasingly unreliable.

The danger we face is not so much that we will literally run out of oil but that we will not be able to increase our supplies as fast as we increase our demand. We may not be able to afford to buy enough foreign oil (or want to). We may not want to accept the financial or environmental costs of increased domestic energy production.

So it seems only logical that the starting point for a comprehensive national energy program would be to conserve and to slow the rate at which our demand for energy is increasing. That is the heart of President Carter's program.

There are no magic solutions in the President's program.

He is asking for a number of tax incentives and penalties to encourage conservation while at the same time he is promoting the development of alternative sources of energy such as solar power and coal.

Some of the penalties may hurt, but I do not think the damage will be severe. Most of the new taxes proposed by the President will be rebated back to consumers. Other taxes, such as the standby gasoline tax, won't cost anyone anything provided we control our consumption of energy.

In fact, I look upon the gas tax as a sort of national referendum on energy. If we conserve, there will be no tax. If we do not, we will have to pay the price.

Incidentally, I was very pleased to see that the President's proposals include provisions for highway maintenance which means that the special problems of rural districts such as ours have been taken into account in shaping the program. Similarily, our district should be helped by the President's plans to encourage the use of coal and to assist small oil producers.

But most of all, I have been pleased to learn that the initial reaction from the public, as reflected in the letters and communications I have received, has been extremely favorable to the President's program.

In this case, the public seems to be far ahead of those members of Congress who have been hemming and hawing about the energy problem. I believe that my constituents want action on energy from this Congress, and I will do everything I can to see that they get it.

UNIVERSAL VOTER REGISTRATION

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. LEDERER. Mr. Speaker, I would like to insert in the RECORD the testimony of Margaret M. Tartaglione, chairwoman, Philadelphia County Commissioners, given before the Committee on House Administration on H.R. 5400. This legislation will provide for the universal registration of voters. I know many of my colleagues in the House will benefit from Mrs. Tartaglione's remarks:

UNIVERSAL VOTER REGISTRATION ACT OF 1977

(Testimony of Margaret M. Tartaglione, Chairwoman, Philadelphia City Commissioners, Commonwealth of Pennsylvania, With Respect to H.R. 5400, Before the Committee on House Administration of the House of Representatves)

To the Honorable Members of the Committee on House Administration of the House of Representatives:

I am Margaret M. Tartaglione, Chairwoman of the City Commissioners of Philadelphia, director of the bureau responsible for administering the registration and election of close to one million citizens of Philadelphia, Pennsylvania. The annual budget of the City Commissioners of Philadelphia is $6,738,220, without allowing for emergency and capital expenditures. My Commission, its employees, and the City of Philadelphia would like to thank the House Administration Committee for this opportunity to address this Body regarding the proposed legislation.

Philadelphia is designated as a city of the first class in the Commonwealth of Pennsylvania having a population in excess of one million. As such, our Legislature has recognized the special problems of the registration and election process by passing an election code for cities of the first class and a separate election code for all other cities, townships, etc. in Pennsylvania. In Philadelphia we have 1783 election districts. A typical district averages 600 registered voters, requires the use of at least two voting machines. Each polling place is located within a separate district and are typically located in buildings such as schools, churches, or private facilities which are rented for one day. Generally, polling places can be characterized as small and sometimes inadequate in terms of space. On election day in Pennsylvania, five election officials conduct and supervise the balloting and the election code requires a watcher from each party or political body be permitted at the polling place. (There are currently five political parties in Philadelphia: Democrat, Republican, Philadelphia Party, Consumer and McCarthy Party).

The County Commissioners seek to establish polling places for the public which are convenient and are organized in a fashion to encourage easy and pleasant voter participation. Unfortunately, it is virtually impossible to find a sufficient number of public and private buildings that are available to accomplish this purpose regardless of the compensation involved and often polling places are housed in locations which are inadequate in terms of space.

Prior to each election, the Registration Division of the County Commissioners actively solicit registration through decentralized traveling registrars and recently through the use of non-personal registration applications (Mail Registration).

Under the current Pennsylvania Election Code all registration in Pennsylvania ceases thirty days prior to election. This is necessary in order to prepare street lists, polling places, certificates, binders and other printed matter for use on election day. This 30 day period of non-registration is also used by the Election Board to instruct and train election officials and disseminate the necessary election paraphernalia. The Pennsylvania Legislature is seriously considering making this type of training mandatory for our election officials thereby further handicapping our staff during the critical thirty day pre-election period. Therefore, we feel proposed legislation must in some way be able to integrate easily with existing state registration requirements. Although, generally speaking, the duties of the County Commissioners of Pennsylvania are ministerial regarding the registration and election process, our employees are also given quasi police and administrative powers. H.R. 5400 in some way should address itself once again to integrating the investigative and quasi police powers of the Commission with those of the U.S. Attorney's Office. We in Philadelphia have a very serious concern for problems involving fraudulent registration and subsequent voting which on the surface seems to be far easier to perpetrate under H.R. 5400 than the existing election code in Pennsylvania. Despite Commission diligence and the aid of our civic "watch-dog" organizations, we feel that fraud would become far more pervasive under H.R. 5400 if it is adopted in its present form.

Present Pennsylvania law provides access to the registration process for the physically handicapped and incapacitated and for those absent from their domiciles because of duties, obligations, schooling or military service. The Commonwealth also has since August 1, 1976 a system of non-personal letter application for registration which has been implemented in Philadelphia at a substantial cost to the taxpayer. In summary, every qualified citizen, regardless of physical disability or private inconvenience, can easily register to vote if in fact they desire to do so. It is to be noted that we are a permanent registration state and unless a change of name or address occurs, or failure to participate within three years in the electoral process should happen, once registered will always remain registered in Philadelphia. We would, therefore, object to the suggestion that voter registration on election day will in fact encourage participation in the electoral process. This entire concept seems to address itself to a media-induced phenomenon of heightened voter interest within the thirty day non-registration period for the election. We feel that while the data available indicates some metropolitan areas have in fact realized greater voter participation because of recent use of registration on election day, that in the long run citizens will neglect to register in person or by mail before election day and will in fact crowd the polling places in an effort to accomplish registration and voting in one stop. Thus, ironically, H.R. 5400 may in fact result in frustrating its very intent by crowding the polling places with registrants on election day. Many citizens will in fact neglect to participate in the election.

A further criticism must be levelled at the lead time provisions of H.R. 5400. While it may be practicable for smaller political subdivisions to implement it by 1978, it would be virtually impossible for Philadelphia to do so without staggering costs. In the alternative, a 1980 deadline with the option to participate sooner, including state elections would probably be more realistic.

We have estimated that 60¢ per vote incentive paid to each state will in no way encourage Philadelphia as a political sub-division to participate in H.R. 5400. The grant is financially inadequate and the method of payment oblique. Under Pennsylvania law each county pays its own costs for registration and elections. Therefore, a grant to the city directly would be far more appropriate; particularly if the subsidy were to reflect the true dollar cost of implementation not only in the federal elections, but the local elections which must in fact follow the lead of the federal code. The two year payment period of course imposes a de facto lending policy of money to the federal government until in fact the bill is paid. The financial state of every American city is so well known to this body that it needs only to be mentioned in passing that this is an unfair burden to the citizens.

With this in mind, we in Philadelphia sincerely feel that if the Government is to expand any funds or resources in the worthwhile effort to encourage citizen participation in the electoral process that those funds and resources be directed to the streamlining and encouraging of the present system which affords every interested citizen complete and easy access to the registration rolls long before election day.

In person and mail registration prior to election day are the real answers to voter access to the polls, not the cluttering of the polling place on election day and late registrants.

In summary, Philadelphia will ask its congressional delegation to oppose H.R. 5400 as it is presently structured and we will ask our Congressman to encourage federal subsidies to aid the Registration Commission in their request to enroll voters to vote during the normal registration periods, particularly through mail registration.

A projection of the estimated cost factors involved indicate the cost of manning the polling places in Philadelphia with a team of three registrars pursuant to the Pennsylvania Registration Code would cost $482,891 each election.

If the Pennsylvania legislature would fail to conform local election procedures with H.R. 5400, our election board may be faced with capital expenditures of more than $4.5 million dollars to equip polling places with separate machines for federal offices. Hauling, maintenance, and storage costs of these machines would be $769,000 annually.

These expenditures are not covered by the $390,000 anticipated stipend under the H.R. 5400 reimbursement formula.

The facts are clear to Philadelphia. We cannot support a bill which financially attacks our community.

Respectfully submitted,

MARGARET M. TARTAGLIONE,
Chairwoman, City Commissioners.

MINIMUM WAGE

HON. SHIRLEY N. PETTIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mrs. PETTIS. Mr. Speaker, it has been said that those who are unwilling to defend their freedom will soon lose it. This is true not only of personal freedom but of economic freedom as well. We have coming before us an assault on the economic freedom of those who are least able to withstand it. I am speaking of the proposed increase in the minimum wage.

Who will suffer hardships if the increase goes through? Certainly not anyone in this Chamber; I am sure it is a long time since any of us have had to concern ourselves with the minimum wage level. Certainly not the skilled union members who earn far more than

the minimum, not the professionals, the bureaucrats, or the executives. No, it will be those least able to endure the hardships that will result from diminished employment opportunities: The teenager, who wants to develop some marketable skill, but cannot get the first opportunity to break into the labor market; the housewife looking for some sort of partime work to supplement the family income; the elderly person trying to make ends meet on a social security check. These individuals—the last hired and the first fired—are the marginally employable, the ones who will suffer as a result of the increase in the minimum wage.

For those of you who may have doubts, let us take the example of teenage unemployment. In a study done by Yale Brozen, covering the period from 1949 through 1968, it was demonstrated that each increase in the minimum wage was accompanied by an increase in the unemployment rate for teenagers. Further, the Brozen study clearly demonstrated an upward trend in the overall level of unemployment among this group. This, it should be noted, is in spite of a general increase in the level of education among teenagers. The Brozen study also indicated that nonwhite teenagers suffered more than any other group as a result of the increases in the minimum wage. Perhaps Brozen's own words are the best summary of his findings:

Minimum wage statutes have increased incomes for a few workers at the time of their imposition. These increases would have come anyway, in most cases within two to five years. . . . In the interval between the time that the minimum wage is raised and the time that productivity and inflation catch up with the increase, thousands of people are jobless, many businesses fail which are never revived, people are forced to migrate who would prefer not to, cities find their slums deteriorating and becoming overpopulated, teenagers are barred from obtaining the opportunity to learn skills which would make them more productive, and permanent damage is done to their attitudes and their ambitions.

I might add, Mr. Speaker, that since the Brozen study with the advent of the $2.30 minimum wage, the problem of teenage unemployment—especially nonwhite teenage unemployment—has reached crisis proportions.

We must recognize the minimum wage for what it really is: a way to keep a certain number of persons from entering the labor market and, as such, a limitation on the freedom of our populace to go into enterprises of their own choice.

Further, it is clearly demonstrated that States with wider minimum wage coverage tend to have more unemployment. In a study by Colin and Rosemary Campbell, which dealt with State minimum wage laws as a cause of unemployment, the authors concluded that for the entire period from 1950 to 1965, the rate of unemployment in areas with minimum wage laws was on the average six-tenths of a percentage point higher than areas without such laws; in addition they found that the weighted rate of unemployment in the major labor market areas in States with coverage restricted to women and minors; and they also discovered that the average rate of unemployment in areas with minimum wages by five-tenths of a percentage point for the period studied. These figures are not the most important aspect of this study with regards to the question of whether or not to raise the minimum wage. However, what is more important is the study concluded that—

There is evidence that when states raise their minimum wages, unemployment in these states tends to rise relative to the rate of unemployment in other states.

In the face of such evidence, Mr. Speaker, how can we in good conscience take an action which is likely to further aggravate the unemployment problem? How can we move to raise the minimum wage when there is a substantial body of evidence to indicate that the primary result of that action is to put people out of work—and especially people whom we are trying to bring into the job market through other means? There is no sense to it.

Does it not strike anyone as ironic that on the one hand we are presented with proposals to create a National Youth Conservation Corps, similar to the Civilian Conservation Corps of the Great Depression, and a program of Youth Community Conservation and Improvement Projects in order to alleviate the problem of teenage unemployment, while, on the other hand, we are taking action which will undoubtedly increase it?

Mr. Speaker, it is this sort of contradictory, senseless, counterproductive activity which has lowered the esteem of this body and the Federal Government in the eyes of the public. I must say that I cannot blame them. If we cannot, in light of all the evidence indicating the deleterious effects of increasing the minimum wage, resist the temptation to do so, then perhaps the public is right in their opinions of their Representatives in Washington, and we may see a demonstration of those opinions in the next election.

VALUES IN RURAL AREAS

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. JONES of Tennessee. Mr. Speaker, recently, at a banquet for Eagle Scouts held in Jackson, Tenn., Dr. Larry McGehee, the chancellor of the University of Tennessee at Martin, gave a very inspiring speech that I would like to share with my colleagues.

I want to share with other Members of this body, because I think it exemplifies as well as anything I have ever heard or read a great many of those values that many of us who hail from rural areas hold dear. It places in perspective the role that rural areas such as the one I represent plays in this world, and it espouses those inner values that we as individuals aspire to. Dr. McGehee has a reputation as an eloquent speaker and I think that this particular speech is indicative of his talent and the depth of his feelings for other people:

VALUES IN RURAL AREAS

While the Bicentennial last year celebrated the glorious settling of this nation, the political platforms put forth by the major parties last summer were busy promising to save America's cities. The mayors of the major cities met within a week after the election to demand relief.

There's no doubt that most of American is urban America. Ninety per cent of America's people live on 10 per cent of America's land; 80 per cent of England's population live in English cities; and practically all of Europe, from which America has drawn its model of civilization, is urban.

It may be too much to ask our political leaders not to try to save the large cities, since that's where the voters live, but is it too much to ask that they concentrate more attention on saving the people in the cities than on trying to save the physical bodies of the cities in which people are forced to live and work?

It may be that the cities are dead and cannot be saved, but that no one has yet had the courage to give a coroner's report or to design ways to transplant the hearts of cities (their people) to healthier bodies.

The deadening effects of cities have been predicted ever since their creation. Thomas Jefferson warned very early, "The mobs of great cities add just so much to the support of pure government, as sores do to the strength of the human body. It is the manners and spirit of a people which preserve a republic in vigor. A degeneracy in these is a canker which soon eats to the heart of its laws and constitution."

A century and a half after Jefferson's warning, historian Carl N. Degler examined the literature of the cities from the Civil War to the 1960's, a century of what Americans thought and wrote about their own urban environment; and Degler summarized the most frequent descriptions:

Filth; poor sanitation, streets and recreation; tenements; monotony of scenery and of work; loss of privacy; business cheating; impersonality and anonymity; anxiety and loneliness; theft and murder; high accidental death, injury, suicide, divorce, and juvenile delinquency rates; destruction of family life; decreases of reflective planning and increases of reflective responses; loss of traditions;

Class-consciousness and possession-consciousness; noise pollution and air pollution; lack of neighborliness; unproductive competitiveness; lack of outdoor activity; loss of rhythm of the reasons and weather that help people pace themselves; decline of morality; decline of stability; conspicious consumption and conspicuous poverty; and inadequate mental and physical health care.

If we have reached the point where giant cities produce more negative than positive results for people, we may also be approaching a similar point in our growth-oriented economy.

In his 1973 book, Small Is Beautiful: Economics As If People Mattered, E. F. Schumacher says such things as, "How much further 'growth' will be possible, since infinite growth in a finite environment is an obvious impossibility?" "Today we suffer from an almost universal idolatry of giantism."

This 20th century, our non-renewable natural resources have been used more than in all previous centuries of world history put together.

President G. M. Sawyers of Texas Southern University summarized the problem tersely but well: "When one thinks in terms of a

doubling of the population in 25 years and of competition for the earth's shrinking resources, the final horrors of ill-conceived and unconscionably applied management decisions in government become apocalyptically real."

A recurring Old Testament warning says, "He that diggeth a pit shall fall into it." Our biggest cities are almost, if not quite, dead; our resources are almost, not quite, depleted; we have dug our pit. So we face two crises: the death of our cities and the decline in the growth rate in our economy. I want us to consider three responses we can make to these crises.

RESPONSE I. EDUCATION

Given the crises of modern life, the need for education is rather apparent.

We're in the business this year of educating students to work in the years 1977 to 2020 A.D., not to work in the 1950's or 1960's.

If we assume there'll be no catastrophe that will wipe out half the world population, then we have to educate for a world that needs new options in city life,

A world that must have international involvements, because what happens to population in one country or to natural resources in another country or to inflation in yet another affects what happens in all countries,

A world that cannot drift too much to "have-have not" ways of life without risking revolutions,

A world in which it is probable that the average age of death will be 100 instead of 40 as it was last century or 60 as it is today.

A world of ten billion people instead of four billion,

A world that will require more planning with fewer options available to choose from,

A world in which the only protection of the individual is his mind and his command of knowledge,

A world that needs to rediscover morality and ethics.

To send our graduates into that kind of world uneducated is to send Custer against Sitting Bull or Pickett against Meade. They have virtually no chance at all, if we've limited their education.

RESPONSE II. THE RURAL LIFESTYLE

But what has all of this talk to do with West Tennessee?

Just this: by some miracle, this region in which you and I have elected to live has escaped absorption into the mainstream maelstrom of modern society and, although isolated from it, is not so insulated against it as to be unaware of it. That means we live in a region that is rare in today's world and that is also needed in today's world.

West Tennessee is not divorced from the larger world, although the acres of crops, the presence of wild and tame animals, the silence of evenings, the absence of traffic and smog, the hum of tractors and lawnmowers and sprinklers, and the distance to large cities may lead people who know us only as the Beverly Hillbillies or Billy Carters to think we are.

Television and highways, newspapers and travel, tourists, visiting businessmen from urban centers, regional government agencies, all serve to make us aware of the world outside; but most of all our own interest and curiosity keep us constantly alert to the contrasts between our immediate environment and the larger global environment.

Once we're forced to face the fact that using all our unrenewable resources today leaves nothing for our children and grandchildren tomorrow, our insatiable appetites for growth will be replaced by our frentic panic to survive. We are already entering a no-growth economy.

We're now approaching a crisis stage on this issue, which we've been able to forestall as long as possible by ignoring the loss of resources until they're gone or by developing short-term solutions for each resource depletion as it arises.

We've not had to answer the Biblical question, "For which of you, intending to build a tower, sitteth now down first, and counteth the cost, whether he have sufficient to build it?" and thus the cost has been left to be paid at a very high price by later generations.

The arena of our immediate movement is in 20 low-density counties of West Tennessee, of which 16 have average per capita income levels below the average for the state, in a state where the average income is below the national average.

It is a region with only one intermediate size city, Jackson, and a region that currently is properly engaged in promoting better highways, better health care, and more job opportunities.

But because we are in a region that is still developing rather than declining the sphere of our influence and mission is also global, because what we accomplish in developing this region here could give aid and relief to overdeveloped, dying sectors of society elsewhere looking for new models for retrenchment, values, style of life, and survival.

Is it possible, for example, that small and intermediate sizes are better than giant sizes? Can one have fun without a stadium to seat 100,000 people at ten dollars each and without parking lots covering the grass for miles around such stadia?

Can one find culture in books, records, movies, television, touring groups, visiting lecturers and artists, and locally produced drama and concerts, without having to build gigantic cultural centers?

Is God present in the worship of small congregations as much as in churches of 10,000 members with 20 ministers and eight Sunday services?

Is government more responsive to and less costly for the governed in many small towns of 20,000 near a middle size city of 100,000 than in the inner sanctums of million-person metropolises?

Is there more value in a front lawn to mow than in a doormat to vacuum?

Do ethnic groups integrate better in smaller towns than across miles of separated housing districts?

Are the pride and joy of craftmanship found more in the large community-less communities than in smaller communities?

Where do city dwellers spend their weekends and vacations and where do they retire, and why should those places happen to be so different from their urban environment?

How do attendance figures at Shiloh, Natchez Trace, Paris Landing, Pickwick, Reelfoot, and Land Between the Lakes compare with those for Opryland or Libertyland?

What are the proportionate rates between small towns and large cities on indebtedness, suicide, delinquency, crime, drug abuse, dishonesty, cost of living, psychiatric counseling, literacy, or entertaining?

Why is it that the Gallup Poll for November 1976 showed 87 per cent of the American people want to live in communities of less than 100,000 people, and 56 per cent of the American people want to live in communities of less than 10,000?

If it's true that the hopes and desires of humanity are more realizable in developing semi-rural regions such as ours than in burned-out sectors of urban society, how do we educate our children to cherish and cultivate those styles of thought and action, how does each of us apply his or her skills to building a rural option to urban blight, and how do we package and merchandise this model into something to serve our global community as an option to mass mediocrity?

When I consider the world that has been and the world that is at hand, when I consider how West Tennessee of all unpredictable places bestrides both these worlds—the old and the new—in ways most regions cannot, I am possessed by a vision of a quality of life the world is about to lose and longs to retain.

We need desperately to find ways to talk more with one another about our common visions and dreams. We need urgently to clarify our personal and our regional goals for the next year, the next five years, and the next 50 years We need agonizingly to wrestle with the elusive meaning of quality and excellence.

But the solutions we seek, the options we can give the world from the individual and the collective efforts of this small region, and the findings of quality for a society that may not even be aware it has lost it, are not tasks we can tackle if we ourselves are overwhelmed by what we see in the world outside or if we are underwhelmed by our own complacency.

We must escape being engulfed by the intensity and immensity of the world outside West Tennessee, and we must buy time we'll need if we're to transcend that world outside and give it some ideas on how life can be better than it now appears life is going to be in the world as cities decay and growth declines.

Education can help, but the major edge we have is a location in place and time which allows us to contrast the best that we have with the worst of what we could become if we were to be overrun by what has already happened elsewhere, especially by boredom and loneliness.

RESPONSE III. OUR INNER SELVES

The third asset we have going for us in West Tennessee that has drowned elsewhere in the tidal waves of bigness is something I don't know how else to label except as Inner Peace.

I don't know exactly how to describe what Inner Peace is. I sense that other people know intuitively and inarticulately what I try to describe when I talk about it. I don't know whence it comes. If it comes from outside of us, it comes not from the turmoil of the world that touches us on every side, but in spite of that turmoil and from some power that transcends that world.

Even if it comes from inside us, it comes from some power that transcends the ordinary us in an extraordinary way. Whatever the source, it resides within us, so I call it Inner Peace.

I know, too, why it's there. It's there because we had to have it, couldn't endure without it, because the weights of life and the stretching of the mind are too unbearable without the peace that gives us perspective and internal order when confronted with complexity, selfishness, and external disorder, in day-to-day activities.

I know further that Inner Peace is something that produces Quality. Or, as Robert Pirsig puts it, "The way to see what looks good and understand the reasons it looks good and to be at one with this goodness, as the work proceeds, is to cultivate an inner quietness, a peace of mind so that goodness can shine through."

And he adds something else about it that makes good sense, too: "Peace of mind produces right values, right values produce right thoughts. Right thoughts produce right actions and right actions produce work which will be a material reflection for others to see the serenity at the center of it all."

I know further that Inner Peace is something of value to others as much as to myself, and that the best wish we can make for others is that they too possess it.

And more. I know enough of us in West Tennessee have this thing I call Inner Peace, the quality of our work and the meaning our lives will be such that this little outpost of ours can change the world. West Tennessee can change the world by insisting upon

caring, upon developing and preserving individuality, upon pride in craftsmanship of what we make or do, upon quality, and upon smallness as an attribute.

And finally, I have learned that a large part of Inner Peace comes from no longer counting and recounting my own accomplishments but from rejoicing with genuine joy in the accomplishments of others around me, and in encouraging and applauding every effort they make to improve and preserve the good and erase the bad.

CHILD HEALTH ASSESSMENT PROGRAM

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. ROGERS. Mr. Speaker, I have today introduced legislation, the Child Health Assessment Act, an administration proposal designed to expand the availability of health care, particularly preventive health care, to financially needy children. I hope to schedule hearings on this proposal in the near future.

No segment of our population is in greater need of health care, or less able to afford it, than the children of the poor. Such children are more likely to have chronic diseases, spend twice as much time in hospitals, and are bedridden more often than children of families with higher incomes. With adequate preventive care, the health status of poor children could be considerably improved, but, because most poor children do not have regular access to physician care, chronic conditions which often could be prevented are only identified when they become acute and require hospitalization.

The major existing program designed to provide health screening and treatment for financially needy children, the early and periodic screening, diagnosis and treatment program—EPSDT—has been proven to be inadequate. EPSDT presently screens only 30 percent of the 12 million children currently eligible under medicaid and fails to provide treatment for approximately 22 percent of the children found to need treatment. In addition, EPSDT fails to cover the nearly 700,000 children under the age of 6 who are in families whose income meets State financial requirements for medicaid eligibility but whose family structure makes them ineligible.

The proposed new child health assessment program—CHAP—would substantially strengthen the EPSDT program by:

Requiring States to provide medicaid and EPSDT services to the estimated 700,000 poor children under 6 whose family structure makes them ineligible for medicaid.

Providing an incentive to States to improve their current service to all poor children by increasing the Federal medicaid matching rate for all assessment performed for currently eligible children by the States, all such assessment for new children who will not be eligible for the program, and for all ambulatory—nonhospital—medical care required by children who have been assessed. The new Federal match will average over 75 percent of the cost of providing these services, as opposed to the current nationwide average Federal share of 55 percent of all services.

Providing net fiscal relief to the States of some $18 million in fiscal year 1978. The increase in the Federal match will more than offset the higher costs to States of serving more children.

Improving the quality of care for children assessed under this program by gradually phasing in over the next 3 years the requirement that assessments be performed through comprehensive health care centers or primary care physicians capable of delivering necessary follow-up diagnosis and treatment.

Requiring that all children reached by this program be immunized against childhood diseases.

Providing additional incentives to States to meet certain goals and standards by increasing the Federal matching payments from 50 to 75 percent for all medicaid administrative expenses in States which meet such goals while assessing a penalty against the Federal share of medicaid administrative costs for failure to meet certain standards under the current law.

While I look forward to hearing from interested members of the public with respect to the provisions of this proposal and any revisions which may be suggested, I applaud the intent of the proposal to provide badly needed preventive health care and treatment to millions of American children desperately in need of such services. By reaching these children now, they can be better assured of a healthy and productive future.

The following is a brief, section-by-section summary of the Child Health Assessment Act:

SECTION-BY-SECTION SUMMARY

The first section of the bill would provide the short title of the Act—the "Child Health Assessment Act".

Section 2 of the bill would provide the purposes of the Act—to expand the availability of health care to financially needy children, to improve the quality of such care, and to increase immunization levels of children.

Section 3 of the bill would amend section 1902(a)(13) of the Social Security Act by adding two new subparagraphs to the Medicaid State plan requirements. The first would require that, effective October 1, 1977, all children under the age of six who are members of families who meet the income and resources eligibility requirements in each State for aid to families with dependent children (AFDC) be eligible under the State plan for the program currently referred to as early and periodic screening, diagnosis, and treatment (EPSDT). Other provisions in the bill are designed to improve the quality of care under this program and would modify the terms used to describe the program. Currently, the federal law requires that the EPSDT program and Medicaid be made available only to recipients of federal categorical cash assistance, although States may, at their option, make eligible for Medicaid and EPSDT other children under 21 whose families are within the federal income limitations for Medicaid.

The second new paragraph which would be added to the State plan requirements by section 3 of the bill would require each State to make available to any assessed child—whether the child was assessed as required by federal law or at the option of the State—all medical care and services for which federal financial participation under Medicaid is available, other than those for the treatment of mental illness, mental retardation, development disabilities and dental problems not discovered during an assessment. Currently, services which are required to be provided are specified in regulations and are limited to services each State already makes available under its Medicaid plan, as well as services for the treatment of vision, hearing, and certain dental problems.

Section 4(a) of the bill would amend section 1902(a)(10) of the Social Security Act to require that States make eligible for Medicaid all children under the age of six who are members of families who meet the income and resources eligibility requirements for AFDC in each State.

Section 4(b) of the bill would make conforming changes in title XIX of the Social Security Act to make clear that child health assessments and follow-up services provided as a result of amendments contained in the bill are not thereby to be required to be provided to individuals not meeting the appropriate age requirements.

Section 5 of the bill would add a new section to title XIX of the Social Security Act. That section describes the child health assessment program which would be required by the law. The program would be available to AFDC recipients under 21 (as under current law), certain income eligible children under 6 as previously described (currently optional in each State), and other income eligible children under 21 at each State's option. The section would require each health care provider in the program to enter into an agreement with the State Medicaid agency to (1) perform periodic health assessments as required by regulations of the Secretary; (2) assume over the next three years gradually increasing responsibility for the provision of a minimal range of diagnostic and treatment services as required by regulations of the Secretary so that (except in areas where the Secretary grants a waiver) diagnostic and treatment services will be provided directly at the end of the three year period; (3) refer children for other appropriate services; (4) take responsibility for case management; (5) be available to meet the continuing health needs of assessed children; and (6) make reports required by the State or Secretary. The new section 1912 would also make eligible for continued Medicaid services for a period of six months any child who has been assessed but whose family income has increased, or who has become ineligible for AFDC, and would thereby otherwise become ineligible for Medicaid.

Section 6 of the bill would add an additional State plan requirement that States encourage participation by physicians and health care centers in the child health assessment program. It also would require appropriate coordination among relevant State and local agencies and arrangements for the provision of appropriate support services.

Section 7(a) of the bill would provide for increased federal financial participation in the cost of health assessments and all related or follow-up care and services provided to assessed children. Currently, the federal share of the cost of such care is the "medical assistance percentage" for each State. The range of that percentage is between 50 percent and 78 percent (and averages 55 percent). Section 7 would increase the percentage for purposes of the child health assessment program to the average of the current medical assistance percentage in each State and 90 percent or to 75 percent, whichever is greater.

Section 7(b) of the bill would provide a fiscal sanction for any State which fails to meet certain program standards specified in the bill. The sanction would be a reduction by 20 percent of the amount payable to a State for administration of the Medicaid program. Currently the reduction is one percent of federal financial participation in a State's AFDC costs. Other changes in the fiscal reduction provision are that it would be applied only with respect to fiscal quarters after a State is notified of a shortcoming (currently the sanction applies retroactively as well) and that the Secretary could postpone any reduction for up to six months to permit a State to correct its program. The amendment also would allow the Secretary to set by regulation the standards of performance a State must attain.

Section 7(b) would also provide a financial bonus to any State meeting the standards of good performance which the Secretary would specify in regulations. The bonus would be an increase from 50 to 75 percent in federal reimbursement for general State administrative costs for Medicaid.

Section 8 contains three conforming amendments. One would repeal, effective with respect to fiscal quarters after September 30, 1977, the current financial sanction applicable to the AFDC program. The others would modify the terms currently used in title XIX to refer to the child health program and would provide for the transition into the revised program of children currently being served under EPSDT.

MINIMUM WAGE IMPACT ON THE 50 STATES

HON. RICHARD KELLY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. KELLY. Mr. Speaker, I commend to the immediate attention of my colleagues in the House the following statistical analysis of the impact that proposed minimum wage hikes would have on each of the 50 States, prepared by Dr. Jack Carlson of the U.S. Chamber of Commerce.

This chart details the job loss, labor cost increase, and consumer price increase that would occur in each State subsequent to an increase in the Federal minimum wage.

It is high time Congress took a hard look at its priorities for reducing unemployment in this country. Over past years, legislation approved by Congress has resulted in making it more costly for employers to hire workers, while subsidizing to the point of encouraging people not to work. We have been taxing people and subsidizing nonwork.

It is my fervent hope that each Member will look closely at the following material, in anticipation that we may be called upon to vote on a minimum wage bill during the 95th Congress.

FEDERAL MINIMUM WAGE AND ITS IMPACT ON THE STATE OF FLORIDA

(By Dr. Jack Carlson)

An increase in the minimum wage is not like an increase in welfare payments. Wages are paid on the basis of the value of a worker's contribution to a product or service that a consumer is willing to purchase. Consequently, government-directed increases in wages make it impossible for business to hire inexperienced or less skilled workers. As a result, these workers become discouraged and can not find jobs anytime now or in the future. This is a key reason why participation in the labor force and unemployment rates remain unsatisfactory even during good times and why public sector jobs are proposed by the same lawmakers that caused the problem by increasing the minimum wage.

Rep. Dent (D-Pa) and the AFL-CIO support an increase in the minimum wage from $2.30 to over $3.00 an hour with a built-in automatic increase each year to maintain the minimum wage at 60 percent of manufacturing wages, elimination of the tip credit, and elimination of a lower minimum wage for youth workers.

Applying the best study available,[1] if the reaction to this increase is similar to what resulted from minimum wage increases in the past, this proposal could cause the loss of 2 million job opportunities that will not be created as a result of the higher minimum, plus 700,000 layoffs, 4.4 percent higher labor costs for all businesses, but 5.4 percent higher labor costs for small businesses which would reduce competition, and 2.9 percent higher consumer prices for all Americans.

The State of Florida could lose about 121,000 jobs—25,000 jobs for adult women; 28,000 jobs for blacks and other young male minorities (through age 24); and 6,000 jobs for older workers (65 and over).

Florida would also experience a 4.4 percent increase in labor costs for all businesses; 5.5 percent increase for small business; and 3.2 percent increase in consumer prices. Of those workers still employed and at or near the minimum wage, only about one-half would be from households receiving low incomes.[2] Increases in the minimum wage is an undesirable and cruel way to help a few households increase low incomes.

The Administration proposed a more reasonable increase in the Federal minimum wage from $2:30 to $2.50 with automatic adjustments to maintain 50 percent of average manufacturing wages. However, even this seemingly moderate increase could cause a loss of 900,000 full and part-time jobs, an increase in labor costs of 1.4 percent for all businesses and 1.8 percent for small businesses, and an increase in consumer prices of 0.9 percent for Americans.

Under this proposal, Florida would lose about 38,000 jobs: 8,000 adult women; 10,000 white teenagers; 7,000 nonwhite teenagers; 10,000 white workers ages 20–24; 2,000 nonwhite workers ages 20–24; and 2,000 older workers (over 65). Labor costs would increase by 1.4 percent for all businesses, 1.7 percent for small businesses, and consumers would have to pay about 1.0 percent higher consumer prices.[3]

By way of contrast, the stimulus program proposed by President Carter in January was expected to create about the same number of jobs. What government giveth, government can taketh away.

Florida would be better off without an increase in the minimum wage. If an increase is enacted it should be modest, not tied to automatic adjustments and recognize the importance of retaining a full tip credit and provide a 25 percent youth differential.

Footnotes at end of article.

States	Representative Dent and AFL-CIO bill			Administration bill		
	Job loss (thousands)	Labor cost increase, percent	Consumer price increase, percent	Job loss (thousands)	Labor cost increase, percent	Consumer price increase, percent

WASTEFUL CONSUMER AGENCY

HON. CHARLES E. GRASSLEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. GRASSLEY. Mr. Speaker, my colleague from the State of Wisconsin (Mr. STEIGER) pointed out yesterday that more than half of the articles inserted in the CONGRESSIONAL RECORD are taken from either the Washington Post or the New York Times. I will allow that these two newspapers are reasonably well-informed at least part of the time.

There are hundreds of newspapers across the United States whose circulation is no match for the Post or the Times. However, their grasp and understanding of the issues of the day, as exemplified by editorials and opinion columns, is at least equal to that of their eastern seaboard counterparts.

The following editorial which appeared in the April 21, 1977, Waterloo Courier is a good example of what I am talking about. Its analysis of the proposed agency for consumer protection is worthy of review by Members of the House. Perhaps we ought to begin paying more attention to what the writers back home are saying.

MONSTER AGENCY FOR CONSUMERS WOULD BE WASTE

Creation of a national super consumer protection agency would be a terrible waste of energy and money, especially at a time when energy of all kinds should be directed to fruitful and efficient production.

Yet many Washington observers expect legislation to create such an agency to reach President Carter's desk by mid-summer.

And unlike Presidents Richard Nixon and Gerald Ford who stymied such measures for the past seven years, President Carter has promised to support a separate agency whose stated goal is to "safeguard" consumer interests.

But which consumers? All consumers? Every American is a consumer and yet Americans have a multiplicity of interests, tastes, life styles and buying habits.

There is no such thing as a "consumer interest" which can be represented by a single agency.

Each group of consumers has its own platform which the majority of other Americans do not espouse. Aggressive minority groups would use such a "super agency" to force their views and wishes on the majority.

And make no mistake about this. The proposed Agency for Consumer Advocacy (ACA) would have super powers. For example, critics note, it would have open-ended litigation authority which would permit it to challenge and overturn any governmental decision in the courts—from Defense Department procurement to foreign trade.

The ACA would have absolute power to interfere in the affairs of all governmental agencies, second-guessing their decisions and operating independently of the Executive Branch and Congress.

To give such unlimited power to one agency—and thus to the narrow special interest groups whose pleas it might heed—is both dangerous and potentially chaotic.

Existing agencies probably would be even more reluctant to act than they are now, fearing they might reach decisions that the ACA would not approve.

In addition, the ACA's power to appeal decisions to the courts would delay final actions by governmental agencies for years.

The ACA also would be both inflationary and costly. It would cost a minimum of $60 million to set up and operate for three years, plus the additional costs to other agencies responding to ACA demands and the costs to business and consumers of meeting ACA regulations.

Even more to the heart of the issue, however, is this question: Isn't one prime purpose of all government branches and agencies to protect consumers in as many ways as feasible?

The federal government has 33 agencies and about 400 bureaus and sub-agencies running more than 1,000 consumer-oriented programs.

Congress also has established a dozen more regulatory agencies with the purpose of protecting consumers.

Establishing another agency—this one with super powers and the clear potential of super-growth—hardly squares with President Carter's campaign pledge to reduce the scope and activities of the federal government and to trim bureaucracy.

Government can't protect everyone from everything. Enough is too much already.

CAMPAIGN TO OUTLAW U.S. FOREIGN AND DOMESTIC INTELLIGENCE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. McDONALD. Mr. Speaker, at the National Lawyers Guild's "Conference on Government Spying," held in Chicago, January 20–23, 1977, an elite group of NLG members unveiled a new pressure group to seek the outlawing of U.S. foreign and domestic intelligence gathering.

The new pressure group is called the Campaign to Stop Government Spying (CSGS); and although the organization claims to have been formed "in response to the need for unified action around the country to stop political spying," it was actually developed by a small elite group of NLG members, a number of them associated with the Institute for Policy Studies (IPS) and the Center for National Security Studies (CNSS) and others who have been representing the Cuban and other Marxist-Leninist governments as well as the U.S. section of the Fourth International, the Trotskyite communist coordinating body which has been engaged in terrorist "armed struggle" operations in Latin America and Europe in coordination with the Cuban regime. At least two of the attorneys involved, Ralph Stavins and Robert Borosage, were involved with Orlando Letelier, an "agent of influence" and covert conduit for Soviet and Cuban funds.

The CSGS calls for ending all American "covert operations" abroad, noting that—

> Many of the organizations and individuals involved in the Campaign believe that the end of secret government can only be accomplished by a prohibition of all secret spying in peacetime.

A second CSGS demand is that all intelligence gathering in the United States by Federal, State, or local law enforcement agencies should be "clearly prohibited." The third demand is that detailed budgets and reports on all intelligence agencies be made public.

As the CSGS staff has informed my staff, the organization does not necessarily expect to win those demands—at least not immediately. The demands are considered by the CSGS strategist as a sort of "left stalking horse" to be used in winning other demands which would effectively cripple the foreign and domestic intelligence community.

The goals that the CSGS organizers feel are attainable are requiring detailed disclosure of the budgets for the Federal intelligence gathering agencies, persuading Congress to enact such strict "guidelines" as to make covert intelligence gathering too costly in time and effort to be feasible, and persuading States and local communities to either forbid intelligence gathering or to enact such strict guidelines as to make it unfeasible.

The CSGS "chairperson" is Morton Halperin, director of the project on national security and civil liberties operated jointly by the Center for National Security Studies and the American Civil Liberties Union (ACLU). Other staff includes the Washington organizer and lobbyist for the Communist Party, U.S.A.'s legislative action front, the National Committee Against Repressive Legislation (NCARL), Esther Herst. Her role is to "contact national groups to join the campaign and assists them in the formulation of program and policy relating to the campaign and assists them in the formulation of program and policy relating to intelligence abuse."

In other words, Esther Herst, who since the early 1970's has been an organizer for a CP front, having previously worked for NCARL's Chicago chapter called the Chicago Committee To Defend the Bill of Rights, is responsible for recruiting new groups to join CSGS, for directing them in producing an anti-intelligence gathering policy, and then drafting an anti-intelligence program for them.

Other CSGS staff includes Peggy Shaker, coordinator; Linda Lotz and Claudia Comins, "speaker/organizing associates"; Charles Preston, field organizer; and Margaret Van Houten, formerly with the Organizing Committee for a Fifth Estate (OC–5) and Counter-Spy magazine, as CSGS's "speaker consultant."

CSGS is currently developing funding

sources and a speakers program to gain publicity. Morton Halperin went to Great Britain to meet with CIA turncoat and self-styled "revolutionary Socialist" Philip Agee who is still appealing his deportation order. Halperin hopes that if Agee does return to this country now that the Department of Justice has informed Agee's lawyers that no charges are pending, Agee will be the nova in his speakers galaxy of anti-intelligence stars who could clean up on the college lecture circuit.

Of the 20 listed speakers, 7—Eqbal Ahmad, Jerry Berman, Robert Borosage, Courtland Cox, Halperin, John Marks, Ralph Stavins—are from the Institute for Policy Studies/Transnational Institute apparatus; 8 are with the Center for National Security Studies—Berman, Borosage, Cox, Halperin, Macy, Marks, Marwick, and Shattuck; Butz, Osborn, and Van Houten from the Public Education Project on the Intelligence Community (PEPIC); and the Stalinists' position against intelligence gathering is represented by identified CPUSA functionary Frank Wilkinson, head of NCARL, and by NCARL staffer Esther Herst.

CSGS speakers include:

Eqbal Ahmad, Director, Transnational Institute (TNI); Fellow, Institute for Policy Studies; editor of *Afrique Asie;* specialist in counter-counter-insurgency in "Third World" revolutionary activities.

Jerry J. Berman, co-director of the Center for National Security Studies (CNSS) Project on Domestic Surveillance; attorney for the Institute for Policy Studies in a lawsuit against the government being handled by the National Emergency Civil Liberties Commitee (NECLC), a CPUSA front. He is co-counsel with the American Civil Liberties Union (ACLU) on "surveillance litigation." Berman is a principal author of "model" legislation which has now been introduced in Congress which would by statute outlaw intelligence collection by covert means except in time of formally declared war. CNSS has frankly said that the bill is to serve as the legislative "left stalking horse" for other regulations which would so restrict and oversee any covert intelligence activities that they would be unfeasible.

Nancy Borman, co-publisher of *Majority Report;* member of the Working Committee on Women Against Government Surveillance Project; and specialist in objecting to law enforcement investigation of the sort which harbored Weather Underground and other terrorist fugitives during the 1970s.

Robert Borosage, Co-director of the Center for National Security Studies; trustee of the Institute for Policy Studies and former member of the IPS staff; member of the National Lawyers Guild and attorneys for IPS in its lawsuit being handled by the NECLC.

Timothy Butz, Public Education Project on the Intelligence Community; former VVAW activist and founder of the Organizing Committee for a Fifth Estate (OC–5 and its Counter-Spy magazine).

Courtland Cox, Director of the Center for National Security Studies' Southern Africa Project; secretary-general of the Sixth Pan-African Congress in Tanzania; commentator on southern African matters for the taxpayer-funded Public Broadcasting System; former IPS "fellow."

Hope Eastman, Associate director of the ACLU's Washington office; formerly active in the ACLU's "Impeach Nixon Campaign"; and vice-chairperson of the American Bar Association Committee on Rights for Women.

Morton Halperin, Director of the joint ACLU/CNSS Project on National Security and Civil Liberties; former member of the senior staff of the National Security Council; former Assistant Secretary of Defense who was in part responsible for setting up the conditions under which Daniel Ellsberg was able to steal the Pentagon Papers.

Esther Herst, Washington coordinator of the National Committee Against Repressive Legislation (NCARL), a CPUSA front; and executive coordinator of the Anti-Senate Bill 1 Coalition, an effort to block enactment of stronger laws against the unauthorized disclosure of classified government information.

Christy Macy, Center for National Security Studies staff; former editor of *Indochina Today,* which supported the Vietcong and Communist aggressors. Her special interest is campus agitation against intelligence gathering.

John Marks, Director of the Center for National Security Studies' CIA Project; co-author of the *CIA and the Cult of Intelligence* with Victor Marchetti. Marks lectures on "any aspect of CIA activity from assassination plots to propaganda." He also bills himself as an "investigative journalist."

Jay A. Miller, Associate Director of the ACLU's Washington Office; director of the ACLU Campaign Against Senate Bill 1 and field director of the ACLU's anti-intelligence campaign.

K. Barton Osborn, of the Public Education Project on the Intelligence Community (PEPIC), formerly with OC–5/Counter-Spy and published as an "ex-CIA agent with the Phoenix Program" speaking on the "history of CIA assassinations" and the "CIA's Phoenix Assassination Program."

Christine Marwick, editor of the Center for National Security Studies/ACLU newsletter, *First Principles.*

John Shattuck, Director of the American Civil Liberties Union's Washington national office.

Daniel Sheehan, General counsel of the National Jesuit Office of Social Ministries whose "credits" include serving as a counsel for the defendants in the New York Times Pentagon Papers case, the Attica Prison riot case.

Ralph Stavins, Director, Project on Official Illegality at the Institute for Policy Studies. Co-author, *Washington Plans an Aggressive War.* Focus: Efforts to Suppress Disclosures of Illegal Activities by Employees of National Security Agencies. Topics: Structural Abuses Within the CIA; The CIA as an Instrument of U.S. Foreign Policy; Foreign Intelligence Agencies and the CIA.

Margaret Van Houten, Coordinator, Public Education Project on the Intelligence Community. Co-author, "CIA as White-Collar Mafia." Focus: Criminal Justice Data Banks. Surveillance of Women's Organizations. Topics: The FBI's View of the Women's Movement; The Use of Agents and Informers; Tactics and Strategies for Local Organizing.

Frank Wilkinson, Executive Director and Field Representative, National Committee Against Repressive Legislation.

Anne Zill, Executive Director, Fund for Constitutional Government, Chairperson, Women's Campaign Fund. Author, "The Closet Chauvinists in Washington."

The CSGS is working closely with the American Friends Service Committee (AFSC) which has targeted Los Angeles; Jackson, Miss.; Seattle; Minneapolis; Cleveland; Baltimore and Philadelphia "for special organizing attention." AFSC's "special organizing attention" is being developed through its "Program on Government Surveillance and Citizens Rights" whose coordinators are Thelma Segal and Zoharah Simmons. AFSC's antisurveillance program is working in close association with the ACLU and NLG from AFSC's national offices at 1501 Cherry Street, Philadelphia, Pa. 19102. The AFSC anti-intelligence program has announced four goals, identical with those of the CSGS:

To abolish the CIA, the Internal Security Division of the FBI, and all other Federal, State, and local intelligence units;

To end "political spying" in the United States;

To end secret budgets and secret charters of intelligence agencies;

To develop a campaign for intensive congressional monitoring of all intelligence agency activities with a view toward preventing any covert activity and encouraging criminal prosecution of any intelligence agency employee who performs any act in the United States or abroad in violation of the strictest interpretation of the U.S. Constitution.

In the target cities—selected by reason of local AFSC capability and the expansion potential of local New Left groups—the AFSC anti-intelligence campaign will include holding teach-ins and "community" meetings to publicize selected information on law enforcement intelligence activities to be obtained from discovery proceedings in lawsuits which have been or are about to be filed.

The campaign organizers will also seek to develop a pressure campaign on local government bodies to pass CNSS-drafted "model" legislation banning or severely limiting police intelligence gathering.

In addition to the AFSC program, local anti-intelligence coalitions with similar goals are already operating in Chicago, Cleveland, Detroit, Milwaukee, Minneapolis, Pittsburgh, Seattle, and Jackson, Miss.

The Mississippi project is based around a class action suit filed by the local ACLU chapter with additional plaintiffs including Ken Lawrence, formerly of the staff of the Southern Conference Educational Fund (SCEF); the Delta Ministries and its leader Owen Brooks. That suit demands that the records of the former State Sovereignty Commission be made available to an alleged 10,000 individuals who may have been surveilled during the Commission's active years—1956–73. A second suit alleges that the State Community Relations Service was used to gather information on "political activists" in northern Mississippi.

The Campaign to Stop Government Spying has begun circulation of a "members-only" newsletter called Organizing Notes. The newsletter has provided a summary of CSGS's initial activities and interests:

In Chicago, the Alliance to End Repression, a coalition of 50 groups, has been organizing around their anti-Red Squad class-action suit, as well as other criminal justice issues. For information about their work contact the Alliance at 22 E. Van Buren, Chicago, IL 60605 (312/427–4064), Richard Gutman, or their Chicago Police Surveillance

Litigation and Education Project at 407 S. Dearborn, Chicago, IL 60605 (312/663-6392).

Cleveland has just begun its Campaign to Stop Government Spying, bringing together the ACLU, AFSC, ADA [Americans for Democratic Action] Clergy and Laity Concerned (CALC), Women Speak Out for Peace and Justice, and others. They just had a kick-off meeting with Morton Halperin and more information can be had from Roma Foldy, Cleveland ACLU, 2108 Payne Ave., Room 501, Cleveland, Ohio 44114 (216/781-6276).

In Detroit, the Citizens Committee to End Political Surveillance, 506 Monroe Street, Detroit, Michigan 48226 (313/963-0843) is a coalition of groups like the ACLU, AFSC, and the National Lawyers Guild (NLG). They have been taking legal action against local police harassment and making available secret police files gathered on Detroit residents. George Corsetti is the person to contact.

Milwaukee has a group called Protect Political Rights, which has been trying to stop Milwaukee Common Council from funding the local police intelligence squad and has sued to open the secret police files. Political Rights wants to reach out to other Milwaukee and Wisconsin groups, and, if you would like to help or want more details contact Jess Kleinert, P.O. Box 12388, Milwaukee WI 53212 (414/372-3492).

The Minneapolis Citizens' Review Commission on the FBI, 122 W. Franklin Ave. Room 392, Minneapolis, MN 55404 (612/871-8033), is a coalition of 27 groups including ACLU, CALC, and Twin Cities NOW, which will investigate the FBI's actions in Minnesota, North and South Dakota. It held public hearings on February 3-6 to publicize FBI harassment of Native Americans on the Pine Ridge Reservation, South Dakota. A panel of respected citizens heard testimony from representatives of AIM, AFSC, the Political Rights Defense Fund, and the United Methodist Church. The hearing was held to increase pressure for official investigations into FBI abuses.

The Pittsburgh Campaign Against Government Spying is just beginning to contact other groups around the city to form a coalition. So far, the ACLU, AFSC, and the Unitarian Universalist Assn. have agreed to join. Contact: John Livengood, 154 N. Bellefield Apt. 7L, Pittsburgh, PA 15213 (412/621-0453) or Ellen Doyle, ACLU, 237 Oakland Ave., Pittsburgh, PA 15213 (412/681-7736).

In Seattle, a Coalition on Government Spying has been formed including the ACLU, AFSC, and NLG. It is working with the Seattle City Council on hearings to regulate "red squad" activities by local police. The Coalition is located at 814-NE 40th St., Seattle, WA 98105 (206/624-2180) and Betty St. Clair is the person to contact.

The Campaign to Stop Government Spying now has 36 member organizations which include:

MEMBER ORGANIZATIONS OF THE CAMPAIGN TO STOP GOVERNMENT SPYING

American Civil Liberties Union, 410 First St. SE, Washington, DC 20003, 202-544-1681, Jay Miller.

Americans for Democratic Action, 1411 K St. NW, Washington, DC 20005, 202-638-6447, Leon Shull.

American Friends Service Committee, 1501 Cherry St., Philadelphia, Pa. 19102, 215-241-7000, Thelma Segal and Zoharah Simmons.

Black Panther Party, 8507 E. 14th St., Oakland, PA 94621, 415-638-0195, Elaine Brown.

Center for Constitutional Rights, 853 Broadway, New York, NY 10003, 212-674-3303, Rhonda Copelon.

Center for National Security Studies, 122 Maryland Ave. NE, Washington, DC 20002, 202-544-5380, Robert Borosage.

Center for Science in the Public Interest, 1757 S. St. NW, Washington, DC 20009, 202-332-4250, Donna Warnock.

Church of Scientology, Commission on Law Enforcement and Social Justice, 2125 S. St. NW, Washington, DC 20008, Judy Cranford.

Commission on Social Action for Reform Judaism, 2027 Massachusetts Ave. NW, Washington, DC 20036, 202-387-2800, Rabbi David Saperstein.

Counter Spy, Box 647, Ben Franklin Station, Washington, D.C. 20044, Winslow Peck.

Department of Law, Justice and Community Relations of the Board of Church and Society of the United Methodist Church, 100 Maryland Ave. NE., Washington, D.C. 20002, 202-488-5600, Rev. John Adams.

Environmental Policy Center, 317 Pennsylvania Ave. SE., Washington, D.C. 20003, 202-547-6500, Bob Alvarez.

Federation of American Scientists, 307 Massachusetts Ave. NE., Washington, D.C. 20002, 202-546-3300, Michael Mann.

Friends of the Earth, 620 C St. NE., Washington, D.C. 20002, 202-547-4312, Pam Lippe.

Friends Committee on National Legislation, 245 2nd St. NE., Washington, D.C. 20002, 202-547-4343, Ed Snyder.

Fund for Constitutional Government, 122 Maryland Ave. NE., Washintgon, D.C. 20002, 202-546-3732, Anne Zill.

Grand Jury Project (NLG), 853 Broadway, Room 1415, New York, N.Y. 10003, 212-533-2299, Julie Schwartzberg.

La Raza Unida Party, 551 S. Maclay, San Fernando, Calif. 91340, 213-361-7341, Eugene Hernandez.

MARTIN LUTHER KING, JR.: THE LEGACY MUST BE CARRIED ON

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. RANGEL. Mr. Speaker, I am sure my colleagues will never forget the brutal assassination, in 1968, of the great American civil rights leader, Dr. Martin Luther King, Jr. His leadership helped change many of the wrongs which faced our Nation in those bleak days of the 1960's civil rights movement.

Although his death is what shocked many, his success and dream is what must be remembered. Many of the inequalities he tried to change have not yet been corrected. Blacks still live on a margin of economic existence, with discrimination and prejudice still tainting our society. Blacks must still have hope, the hope that Dr. King possessed.

To this end I would like to share with my colleagues a speech by Eddie N. Williams, president of the Joint Center for Political Studies at the U.S. Department of Health, Education, and Welfare on January 14, 1977. I am sure the speech will be very interesting and informative to my colleagues.

The text of speech follows:

FROM PROTEST TO POLITICS: THE LEGACY OF MARTIN LUTHER KING, JR.

(Remarks by Eddie N. Williams)

His struggles were inspired by his religious faith and his commitment to the brotherhood of man. Without his faith he would never have had strength to climb mountains, to move powerful men, or to walk so long and so tall in the valley of the shadow of death. It was this central element in his life of struggle which rewards every new examination of it. The depth of meaning of his life is unfathomable, inexhaustible and fertilizing—from one generation to another. Those who survive must confront the power of his character and moral presence, the force of his personality, the charisma of his being, the creativity of his thought, and the invincibility of his belief that God called him and therefore he knew no fear in his struggle.

These words are inadequate to honor Martin Luther King, Jr. They were equally inadequate to record the meaning and impact of another powerful leader and theologian, Martin Luther, who wrote his own epitaph in words fitting to our leader: "I neither can nor will recant anything, since it is neither right nor safe to act against conscience." *"Here I stand. I can do no other."*

Martin Luther King, Jr.—at a later time, another place—stood his ground, and could do no other, in the struggle against bigotry, injustice and immorality. Clear vision, courage, and determination were the hallmark of his life.

We meet today to pay tribute to his leadership—for Black Americans, yes—but indeed for all Americans and all people. It is a symbolic occasion to reaffirm our own commitment to the brotherhood of man and to rededicate ourselves to his dream for America.

We meet to gain strength from his courage, from the beginning in Montgomery, Alabama, in 1955, to the end, in Memphis, Tennessee, in 1968—thirteen years which changed and are still changing the life of a nation.

We meet to say thanks for his victories on so many battlefields: Montgomery bus boycott; public accommodations; voting rights; equal employment opportunity. We are fired by his inspiration, his sermon of love and hope. We continue to share his dream that one day "sons of former slaves and sons of former slaveowners will be able to sit down together at the table of brotherhood" and that "little black boys and black girls will be able to join hands with little white boys and white girls as sisters and brothers."

We meet to pay tribute to this southern son of a former slave before we inaugurate a southern son of a former slaveowner who owes, and knows that he owes, his presidential fortune, in large part, to the vision and sacrifice of Martin Luther King.

We meet to excuse harsh criticism of King's courageous stand against an immoral war, before we accept the confirmations of those who waged that war.

And we meet to forgive those American diplomats who told King to keep his nose out of foreign policy, before we swear in one of King's chief lieutenants as American Ambassador to the United Nations.

But above all, we meet to rededicate ourselves to the proposition that Martin Luther King's dream cannot, must not be deferred.

It is with these things in mind that we mark the 48th anniversary of his birth.

We could honor his memory in a thousand ways. As for me, a son of the south, an Atlanta newspaper reporter in the late fifties, and an occasional interviewer of Dr. King, I would like to honor him today for the political legacy he gave to the disadvantaged in America.

His legacy challenges each of us to use the power of politics and public office to pursue equal justice, due process of law and true liberation for all Americans. It challenges us to believe—as he did—that "Injustice anywhere is a threat to justice everywhere" and that "we are caught in an inescapable network of mutuality tied in a single garment of destiny."

What King knew, as did others before him, was that in America political participation is the shortest road to power-sharing and to improving the human condition. Law has its limits. Moral suasion has its limits. But politics endures so long as we profess to be a democratic society.

"For years," he said in 1967, "I labored with the idea of reforming the existing institutions of the society, a little change here, a little change there. Now I feel differently. I think you've got to have a reconstruction of the entire society, a revolution of values."

This non-violent revolution must rely, in part, on law and moral suasion, but it most certainly must rely on direct political action. Clearly, this is the new cutting edge of the civil rights movement which was envisioned in King's call for a new thrust "powerful enough, dramatic enough, morally appealing enough, so that people of good will, the churches, labor, liberals, intellectuals, students, poor people themselves would begin to put pressure on congressmen" to achieve the goals of a just society. As one author put it, "Racial compassion had to be reinforced by old fashioned American political *quid pro quo.*"

This strategy is as old as America and as American as apple pie. What is new in our day is the use of political power and public office to pursue the hopes and aspirations of black people.

Martin Luther King gave focus and leadership to this struggle for political empowerment. The cause may have been education, or food, or jobs, or the right to sit in a restaurant or take any seat on a bus, but the objective was always the same: to achieve true equality and justice; to be heard, to be taken seriously, to be respected; to sit in the legislative and executive chambers and take part in the decisions on who gets what, when and how in our society.

And King knew, as do we, that it is one thing to get the laws on the books but quite another to have them implemented. Implementation is what the political process is all about.

Just before he died, Dr. King saw his dream beginning to become reality. Street politics moved indoors into Congress, into state houses, into city halls. And today the number of black elected officials has more than quadrupled.

No, the civil rights movement is not dead. It is marching to the beat of different drummers. Its leaders are *sitting-in* at city halls and state legislatures and the U.S. Congress. They are *marching* into executive offices. They are *burning* the political system with their ideas.

And even before black voters went to the polls and cast 92 percent of their votes for Governor Jimmy Carter, James Baldwin wrote:

"No matter how diversely, and with what contradiction, the black vote is cast in the 24 years left of this century's life, the impact of the visible, overt, black presence on the political machinery of this country alters, forever, the weight and meaning of the black presence in the world."

Yet, so much remains to be done.

For blacks and the poor it is a time of despair as well as a time of hope. It is the convergence of these two realities—despair and hope—which confronts, challenges, and mesmerizes us today:

There is despair—

Because, in this land of plenty, we still live on the margin of economic existence;

Because talent continues to be wasted through prejudice and discrimination;

Because there remain in the land of the free visible vestiges of slavery and racism;

Because we must continue to fight for quality education;

Because we bear the brunt of much that is wrong in America;

The litany could go on.

But there also is reason for hope. Significant gains have been made. The promised land is not yet in sight. But perseverance has brought us this far along the way, and the time has come for us to give political participation a chance, to use our talents, forged out of necessity in slavery and segregation, and to use our numerous ballots in lieu of our limited bucks.

This is why I celebrate the birth of Martin Luther King, the human catalyst for the Voting Rights Act of 1965, with pleas for aggressive political participation, not only because it is our legacy, but because it represents perhaps the most effective way to empower the disadvantaged, to give voice to the voiceless, to give substance to the invisible, and, in the process, to achieve true greatness for America.

1976 will be a year long remembered for many reasons, not the least of which was the impact of the black vote. But we must demonstrate in 1977 and beyond our continuing determination to be taken seriously in the political process.

There is, I believe, a new consciousness among us, a new reality in our communities. But the fundamental premise is not new at all. King lived it, but Frederick Douglas stated it most eloquently when he said: "Power concedes nothing without a demand. It never did and it never will. Men may not get all they pay for in this world, but they most certainly pay for all they get."

King and all of our most effective civil rights leaders and most courageous citizens understood this premise clearly and acted accordingly.

They and their allies agitated all over America, and lynching ended. They fought in the courts, and legal segregation of public facilities crumbled. They protested in the streets of Memphis, on the boulevards of Atlanta, on the avenues of Birmingham . . . and public accommodations went from lily-white to polka dot overnight. . . . They marched on Highway 80 from Selma to Montgomery, and their right to vote was re-established. And in 1964 a President of the United States said: "We Shall Overcome;" and in 1976 a President-elect said: "I shall not forget your support."

The purpose of our support and the nature of our cause are not to seek power for power's sake; nor notoriety for the sake of massaging big egos. Rather, our goal is the goal of America: to achieve freedom, justice and equality for all of us, lest none of us have true freedom, justice and equality. Our goal—in prayer, in protest, and in politics—is to make government moral and responsive—in employment, in education, in health, in public services, and in our relations with other peoples and other nations. Government must be the court of first resort everywhere it touches our lives.

If President-elect Carter wants to show black Americans that he is aware of the role they played in his election, he could start by insisting that all of his people, policies and programs are infused with a sensitivity to the special hurts of blacks and the poor. It is this sensitivity which blacks responded to during his campaign and which ultimately got him elected.

He can give moral leadership to a nation that sometimes seems too tired to fight on for true justice and equality for all of us.

The need for courage and conviction is just as great today as it was in 1776, 1956, and 1976. The legacy of Martin Luther King is just as much Carter's as ours.

As a first step in the new beginning, it is important to recognize and accept the new black consciousness: to the extent we are part of the problem, we insist upon being part of the solution. This is true in the areas of education, health, welfare, crime and employment, to name a few. We want to be full partners in the eradication of ills that beset this nation. We must be full partners in the nation's policy—making franchise and equal beneficiaries of the fruits of our democratic society.

As we meet in this great department which touches the lives of all Americans, in this building in which the presidential transition is taking place and on this solemn occasion, we must know that these things will not happen by themselves.

It is our responsibility to assure that those who govern, govern wisely and fairly. It is up to us to carry on the often unpopular political tradition of Martin Luther King to search for justice and equality in every nook and cranny, and to speak our piece courageously.

It is up to us to say, as Kenneth B. Clark did against a backdrop of black nationalist boos, that "at this demanding put-up-or-shut-up stage of the civil rights movement," we must prepare ourselves "to bear an additional burden of helping America to save itself from its past mistakes and help to develop new and higher standards of political morality and performance."

It is up to each one of us to say: "Here I stand. I can do no other."

It is up to us to fulfill the dream.

THE 100TH BIRTHDAY OF HORTENSE FAGLEY

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. OTTINGER. Mr. Speaker, last week I had the pleasure of visiting the Bethel Methodist Home in Ossining, N.Y. During my stay I met a most remark-

able woman, Hortense Fagley, who celebrated her 100th birthday on April 9.

On April 17 an article by Beth Smith about Mrs. Fagley appeared in the Ossining Citizen Register which I would like to share with my colleagues:

AT 100, A BRIEF PAUSE TO REFLECT . . . IT'S BEEN "AN INTERESTING LIFE"

(By Beth Smith)

Hortense Fagley is an active woman, both physically and intellectually. She works on the New York Times crosswords, reads the newspapers, knits continuously, discusses current events with insight and warmth, and until a few years ago visited her summer home in New Hampshire regularly.

Mrs. Fagley turned 100 on Saturday, April 9.

"I'm through with my first century," she laughed, and seems ready for the second.

She lived most of her life in Gramercy Park in New York City and in White Plains. Seven years ago she came to Bethel Methodist Home in Ossining.

County Executive Alfred DelBello proclaimed April 9 Hortense Fagley Day, noting in his announcement the woman's "warm wit and lively interest in the world around her."

She prefers to live in the present, and takes great interest in her family and in world happenings. She considers President Jimmy Carter an honest, wise man with the proper motives. In the papers she looks for the stories about people, particularly those who have achieved fame and those in difficulty, and for the stories about events that have led up to the present condition of the world.

But she's done more in her lifetime for people in trouble than read about them. The wife of one of the top officials of the Congregational Church, she was the first director of the women's branch of the New York City Mission Society of the church and chairman of its Spanish refugee work and also chairman of the citywide Spanish refugee committee. She organized clothing and food drives for immigrants from the Spanish Civil War of the 1930s.

She belonged to the American Women's Committee for Republican Spain, the North American Committee to Aid Spanish Democracy, the American International Institute, New York Council of Church Women for Emigres, the Self-Help Committee of the Emigres of America and was chairman of Social Action for New York State.

During this time she was working side by side with her husband, Dr. Frederick Fagley, organizer of the National Council of the Churches of Christ in the USA and was founder of the Congregational Christian Historical Society. He died in 1958.

Mrs. Fagley was born April 9, 1877 in Indiana and lived for many years in Madison, Ind., where her father served as president of Moores Hill College. She was graduated from Moores Hill and worked as a secretary in the mathematics department at the college, and it was there she met her future husband.

When she turned 99 Mrs. Fagley wrote out a five-page note on her early life during the late 1800s. She easily recalled looking out her second-floor and greeting face to face a boy on stilts, the absent minded man who filled his charcoal bucket with water, and a woman crashing her sled against the gate post and ending up crippled for life ("Sounds dangerous but it was before automobiles," Mrs. Fagley said.)

Now she communicates regularly with her children, Richard Fagley and Mrs. William Coury, both of Chappaqua, and Robert Fagley of Haverford, Pa. Richard, a minister, works with the World Council of Churches, and Robert is a management engineer. She also has six grandchildren and four great-grandchildren.

"They're all serious-minded and well conditioned," Mrs. Fagley says of her descendants. "They've gotten good educations, and they're engaged in good work. It's important to me that young people study conditions of the world and do what they can to solve its problems."

She used to participate in family reunions at the summer home at Lake Sunapee, N.H., but stopped making the long journey when she was 97, after 53 consecutive summers there.

"I've had an interesting life," she says, "and I'm grateful for the privileges I've had. I'm not as eager as when I was young, and my hearing and sight aren't as good, but I've had my fun."

What's her secret for living so long?

"Heaven knows," she laughted. "I don't."

WILL THE U.S. BETRAY AN ALLY?

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. ASHBROOK. Mr. Speaker, once again the question is being raised will the U.S. Government dump our friend and ally the Republic of China on Taiwan. Some people maintain that the United States should break relations with our ally the Republic of China and scrap the Mutual Defense Treaty to gain diplomatic relations with Communist China. That would be a sellout.

Our ally, the Republic of China, would be seriously weakened. Recently the New York Times carried a front page story detailing some of the problems our ally on Taiwan already has in purchasing from the United States modern weapons to defend itself with. If diplomatic relations were broken, present problems would be minuscule. The result would be the scrapping of a defense treaty which has brought peace to that region of East Asia.

Breaking diplomatic relations with Taiwan would also cast doubt on our commitments to other countries throughout the world. Little defense can be made for such a shortsighted policy.

Also, if the United States handed Taiwan on a platter to Communist China, U.S. foreign policy would be void of any moral standing. The breaking of diplomatic relations with Taiwan in the hope of some unknown gain from Communist China is a policy that is bereft of sensibility.

Recently my friend William F. Buckley, Jr., wrote a column on some of the background of this country's China policy—particularly the deceptions of former President Nixon. Below is its text:

[From the Washington Star, Apr. 19, 1977]

WILL CARTER IMPLEMENT NIXON ON TAIWAN?

On February 28, 1972, Senator James Buckley said on the floor of the Senate that the Shanghai Communique signed by President Nixon and Chou En-lai was being widely interpreted both at home and abroad as signaling the ultimate abandonment of Taiwan."

Senator Buckley was not alone. Mr. Joseph Kraft had written from Shanghai, "The big American loss, of course, came with respect to Taiwan. The final communique makes no mention of the security treaty that binds the United States to support Taiwan against a takeover by force. It was the first time Mr Nixon himself has climbed down in so explicit a fashion." Mr. Karnow of the Washington *Post* had written, "Mr. Nixon acknowledged that the United States 'does not challenge' Peking's claim that Taiwan is Chinese territory, and that there is only one China. He further reaffirmed that the Taiwan question should be resolved 'by the Chinese themselves,' thereby emphasizing that the United States no longer bears responsibility for the problem. These U.S. positions thus concede to the Chinese government what it has been requesting for years."

Now all this deeply alarmed President Nixon. He was being challenged in New Hampshire in the Republican primary by Representative John Ashbrook, and he was otherwise nervous about the forthcoming political contest and the possible defection of American conservatives. So what did he do? He called in Senator Goldwater and lied to him.

Senator Goldwater, on March 1, addressing American conservatives in general, cautioned them not to heed the "terrible distortions" of the communique made by "newspaper reporters and news commentators." He told us all that he had talked "personally" to President Nixon and to Henry Kissinger, (then National Security Adviser) and to William Rogers (then Secretary of State), and that they reassured him that nothing was lost, no change in attitude toward Taiwan was in prospect. "We have not given away one single thing to the Red Chinese," said the Senator, serving as Charlie McCarthy to Richard Nixon.

We now know that Senator Goldwater was bamboozled. Hardly his fault, inasmuch as one tends to believe statements made eye-to-eye by presidents of the United States, notwithstanding the historical case for skepticism.

In February of this year Joseph Kraft wrote that "It now seems apparent that Nixon, and Kissinger virtually assured Peking that they would scrap the Taiwan connection in a couple of years."

This didn't surprise Kraft, who had interpreted the communique as promising that, in effect. But—interestingly enough—it did surprise Carter, whose aides called on Nixon's lawyers to come up with the working papers drafted after the meetings between Nixon and Chou. And, sure enough, there it was: Nixon promising to "normalize" relations with mainland China.

"Normalize" means: rescinding the mutual defense treaty with Taiwan and withdrawing diplomatic representation—at which point China would vouch-safe to receive our ambassador. We shall see whether President Carter proceeds to bring on "normalization." There is time to argue the merits of the matter since the word is Mr. Carter does not intend to move until the fall.

Tricky Dick. I remember, a fortnight before we all packed off for China, an hour with Mr. Robert Abplanalp, one of the two closest friends of the President, a genial, intelligent man, devoutly anti-Communist. "If Nixon sells out Taiwan, he's going to lose the conservative vote," one man in the room said. Abplanalp commented confidently, "If Nixon sells out Taiwan, he's going to lose my vote!"

Nixon would never do anything like that, the majority of American conservatives believed, along with Abplanalp, even as they never believed that Nixon would be the principal agent in the postwar era for the detoxification of Communism. Well, he fooled Barry Goldwater. He fooled Bob Abplanalp. He fooled the American people.

After the election he was stopped from proceeding with normalization only by—Watergate. He needed conservative support

in Congress, with all that talk of impeachment. So add one more thing to the effects of Watergate. It led not only to the loss of Southeast Asia but—ironically—to a reprieve for Taiwan. We shall now see whether President Carter lives up to President Nixon's promise to betray our ally.

VA BENEFITS FOR WASPS

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. HILLIS. Mr. Speaker, as a member of the Veterans' Affairs Committee, I have taken particular interest in recent efforts to grant VA benefits to the women who served as WASP's—Women Air Force Service Pilots—during World War II. On March 17, I, along with 24 other cosponsors, joined with Congresswoman BOGGS in introducing a measure which is designed to recognize the special efforts of the WASP's by entitling them to VA benefits To date, 10 bills have been introduced in the House and one in the other body on this subject.

Support for these measures continues to grow. Hopefully, enough interest can be generated so that the Veterans' Affairs Committee will hold hearings on these measures. I am sure that once the entire story of the WASP's is made known to the committee, a bill will be reported to the full House for consideration. These women, who did so much to support our military efforts during the Second World War, are truly our "forgotten veterans." Congressional action to correct this situation is long overdue.

It is important that the history of the WASP's be understood and made public. In the April 21 issue of the Stars and Stripes, there is an excellent article summarizing the efforts of the WASP's that I am at this point inserting in the RECORD. I urge the Members of the House to take the time to read this article and lend their full support to the efforts of Congresswoman BOGGS to grant VA benefits to these women—our "forgotten veterans."

The article follows:

WASPs SEEK PUBLIC SUPPORT PRIOR TO MAY CONGRESSIONAL HEARINGS

Can a person be a wartime military pilot and still not be a wartime military pilot?

The nation's 800 and more WASPs (Women Air Force Service Pilots) say this was the over-simplified case with them in WWII and they want their brilliant service record of 35 years ago recognized and their status as full-fledged Army Air Force pilots confirmed belatedly by the Congress.

At present numerous bills supporting the WASP bid for recognition have been introduced in the Senate and the House and are awaiting Committee hearings.

To help those who are studying the question of their wartime status, the WASPs are relying on documentation of their extraordinary 28-month uniformed service with the Army Air Forces. For example, they are ready to prove that the 1,074 women pilots, who successfully completed the AAF's standard flight training course, were assigned regular flying missions in airplanes in common use by male pilots of the WWII era. And, that with the sole exception of combat, no restrictions were placed on women pilots as to type of aircraft or AAF missions.

They are ready to show that the small WASP contingent compiled an amazing total of 60 million miles of flying on operational duty with the Army Air Forces and, while their safety record bettered that of their male pilot counterpart, they suffered 38 fatalities on active duty missions. Not one of the fatalities resulted in any death benefits for the victim or her survivors.

In ferrying wartime combat aircraft from factories to various bases—one of their principal AAF missions—the WASPs flew the complete inventory of AAF models, including the P-38, P-47, and P-51; medium bombers such as the A-26 and B-25; and heavy bombers such as the B-17 and B-29. They still point with pride to the fact that one of the WASPs was awarded the exclusively-military Air Medal for delivering—in one 5-day period—a P-51, two P-47's and a C-47 to destinations totalling 8,000 miles of flying.

On other AAF assignments, they had key roles in towing targets for live gunnery and anti-aircraft training and in towing glider pilots who were readying for the Normandy operation. And, they were used routinely on tracking and searchlight missions, test flying and some were taken into the AAF Training Command to serve as flight instructors.

While their pilot roles were clear-cut, the WASPs agree their wartime organizational status was obscured by an AAF promise of full militarization—if and when the women pilot program proved successful. One of the key points they hope to make is that the Army Air Forces considered the WASP achievements so successful that, in 1944, plans were made to expand their numbers as well as commission them as Army Reserve Officers. Near the end of WWII, a House bill to this effect was narrowly defeated in spite of full support by ranking military leaders and subsequent efforts were lost in the commotion of the Allied victory and peacetime apathy.

In their current bid for long overdue recognition, the WASPs are placing new emphasis on what they call the "little facts" of their wartime lives. They want it known that women pilots took the same oaths as their male counterparts, received the same training, wore uniforms, attended the same drills, carried the same firearms, were subject to the same regulations and responded to the same written orders.

The WASP story does contain some differences but they believe these support their case. They were paid considerably less than their male counterparts for doing the same job and casualty compensation was nonexistent. A prime example they intend to offer took place near Victorville, Calif., on October 2, 1944, when an AAF B-25 crashed and burned. The pilot and crew chief, who were male and the WASP co-pilot were all killed. The two men received full military honors and their families received all of the various veterans' benefits but the WASP and her family received nothing.

This is just one of the inequities they believe Sen. Barry Goldwater had in mind in January when he presented his bill (S. 247) to the Senate. He remarked on that occasion: "Now, no other organization that I know of, who has not eventually been taken into the military service, had circumstances like these. The very reason the group was organized from the outset was for militarization; the group proved their military capabilities to the satisfaction of the Army Air Corps and they had a militarization bill favorably reported to a congressional committee . . . there is no sound nor reasonable basis on which a bill giving recognition to the WASP for their service to their country can be turned down."

As far as the nation's first group of women military pilots is concerned, these are welcome words—they represent the answer the WASPs of WWII have been seeking for a long, long time.

THE CHESAPEAKE BAY: A BEAUTIFUL PART OF AMERICA

HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. BAUMAN. Mr. Speaker, since its first written discovery by Capt. John Smith, about 300 years ago, the Chesapeake Bay has captured the interest of every generation of writer concerned about the life and history of our country. The recent Pulitzer Prize winning book by William Warner, "Beautiful Swimmers: Watermen, Crabs, and the Chesapeake Bay," has once again chronicled the seasons and beautifully depicts the color of bay life. Mr. Warner's book has in itself inspired journalistic studies and stories about the Chesapeake, including an article in the April 10, 1977, issue of the New York Times Magazine. I hope every one of my colleagues will read it, for there is a great deal we could learn about life from the wise citizens of Smith Island, Md.:

THE CHESAPEAKE BAY: A BEAUTIFUL PART OF AMERICA

SMITH ISLAND, MD.

When the herring come out of northern waters to foray in Chesapeake Bay, it's a sign that spring has arrived. This intelligence is passed along to the fish hawks, and by the time they are spotted by the human pliers of watermen, the season of the mollusk is almost done. The waterman's fancy turns to thoughts of the crustacean: In his own life cycle, he starts to molt from oysterman to crabber.

Edward Harrison is now going through that cycle for the 52d time. Nearing 66, he is old enough and prosperous enough to think of retiring, but that would not just mean that he could work less. It would mean changing his relation to the water and seasons; it would mean finding a new life cycle. "If you've been used to work all your life, why, it's a job to give it up," he says. "Fact is, I don't want to give it up. I believe 50 percent of the people give up work too early. Yes sir, 'deed I do. I think you should have something to do every day of your life."

He speaks slowly and reflectively and there is music in his voice, which resonates back in the nasal cavity so that the " 'deed I dos" and "no indeedies" that punctuate his conversation seem to carry the vibrations of an archaic stringed instrument. If you were a folklorist interested in the preservation of vanishing human breeds, Edward Harrison's intonations and life cycle might inspire you to start a campaign to save him. Well, don't bother. The 725 residents of this marshy outcropping, 12 miles off Maryland's Eastern Shore, are not about to vanish or look to outsiders to preserve their way of life, which seems secure, thanks to no one but themselves.

As a city person drives down the Eastern Shore, he passes through country that has a look he can remember from boyhood summers in other places 25 or 30 years ago; the plastic face lift is still to come. But Smith Island isn't just unspoiled; it's different. And what it evokes runs deeper than nostalgia, almost to remorse, for what the island has to withstand might be summed up in a single word—us.

The islanders know this, which is one reason there are no real-estate agents, no bars and no motels. Finally the mainlander wonders: Who is cut off from whom? Don't talk to Edward Harrison about isolation; he thinks of it, perspicaciously enough, as a problem for the mainland. Nominally a member of the most atomized and mobile society the world has known, his next-door neighbors are his married son on one side and married daughter on the other; his sister, brother and nephew live directly across the lane. The six adjacent buildings, occupying little more than an acre, stand on land Harrison's grandfather owned.

Harrison would deem it a tragedy if his house were sold to someone outside his family. He does his oystering with his son Ralph and fully expects his crabbing boat to be inherited by his grandson Alan, now only 8. A succession of generations, in his view, is like the succession of seasons. On Chesapeake Bay, both are part of the natural order.

The watermen read that order in the tides and the harvests they pull from the bay. Spring, such sources tell them, was meant to be the easy season. In the old days, they would take a break of a month and a half, at least, between oystering and crabbing, working on their boats and crabbing sheds, and laying in firewood for the next winter, all at a leisurely pace. But that was before they established their credit on the mainland. Now that they have payments to make on diesel-engine boats, C.B. radios, color TV's, fancy electric kitchens and even, in a few cases, jaunts to Hawaii and Las Vegas, spring has become the season of cash-flow problems.

Still, the natural order is not to be denied. Any waterman who could forget that truth got a reminder during the savage winter just ended. Smith Island was encased in an awesome tundra of ice, giving it an experience of Siberian isolation that would have proved devastating had National Guard helicopters not been called in to keep it from running out of fuel and food. The long freeze idled the watermen for seven weeks, forcing some of them on to food stamps. When finally they got back to oystering, they found dead crabs showing up with worrisome regularity in the scoopings they took from oyster beds. No one knows how long it will take now before the diminished hordes of crabs begin to emerge from the sands and mud at the bottom of the Chesapeake.

So there's a touch of foreboding in the spring, a sense that the winter's toll has yet to be fully assessed. And that's not entirely in terms of crabs. It also has to do with the community's sense of itself, which was jarred by something as rare in its direct experience as the long freeze—a felony.

The victim was Shelton Evans, a retired waterman who evidently never learned to trust mainland institutions such as banks. Off the island during the freeze, Evans returned to find that his safe had been emptied of $30,000 in cash. It was the kind of heinousness a waterman expects to hear of when he flips on his radio for the early-morning weather report from Baltimore, not something a neighbor might report. But the crime had happened when the island was cut off, so outsiders couldn't be blamed. "The terrible thing is that it had to be one of us. Probably two or three," commented Schim Becker, an Australian who feels entitled to speak in the first person plural after six years as the island's nurse.

The first hints of spring brought an even worse shock. Hastening the end of winter, a young waterman named Allison Evans went out in a small boat to hang some gill nets for the herring that were due to show up. His eagerness caused him to misread the treacherous March winds and he never returned. For three days, more than 40 Smith Island boats dragged the bay for the young man's body. It was a grisly task, but the sight of the island's fleet working together, not for profit but to help a stricken family cope with its grief, gave the watermen a measure of solace. Not many communities, they reflected, would have taken a single robbery and a single death so hard. "Anybody gets in need on this island," said Edward Harrison, "we all come to his rescue. Yes, sir, if I can't help somebody, I wouldn't crave the world."

Crave the world. How often do you meet a man who can summon a phrase like that? When you do, you should cheer. But it's not just a phrase; it's a description of a life. "It's been hard and it's been rough," the waterman said, "but I still enjoy it. It's something you have to be brought up into. I don't believe I could have worked under a whistle. "Deed I don't."

OUR GREATEST DANGER

HON. PHILIP E. RUPPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. RUPPE. Mr. Speaker, one of my good friends, Carl L. Shipley, who is not only one of Washington's outstanding lawyers but who served with distinction for many years on the Republican National Committee has called to my attention a recent speech by Henry Ford, chairman of the Ford Motor Co., pointing up some of the problems that lie ahead for our Nation. I was struck by Mr. Ford's observation that—

In 1957, total government spending—Federal, State and local—absorbed just under 30 percent of national output. Today, government spending takes 40 percent of the national output and is still rising. In Great Britain, it took less than 15 years for Government spending to rise from 40 percent to 60 percent of the national output. If we continue on the same path, we can expect the same distressing result.

Mr. Ford makes other observations in his speech which should be of interest to Members of Congress and to the public at large. For example, he points out that just about everybody is in favor of new Government programs that benefit themselves. He rightly observes that everybody is fed up with inflationary consequences of Federal deficits financed by printing more and more money. I agree with Mr. Ford that we all have an obligation to devote some of our time and effort to the general welfare rather than our personal interests, but that when we are all working more than half the time for the Government, a serious loss of freedom has occurred:

OUR GREATEST DANGER

(By Henry Ford, II)

As we begin the third American century, it is increasingly clear that our liberties are threatened at least as much by internal forces as by external foes.

We must still maintain our defenses against potential foreign aggressors, but our greatest danger comes from ourselves—from the governments we all help elect, from the demands we all make on government, and from our collective failure to remember that the Constitution of the United States was ordained and established, in the words of the preamble, "in order to . . . secure the Blessings of Liberty to ourselves and our posterity. . . ."

I believe that the Blessings of Liberty have been seriously diminished and are further threatened by the unprecedented growth of government spending and government regulation in the past 20 years.

In 1957, total government spending—Federal, state and local—absorbed just under 30 percent of national output. Today, government spending takes 40 per cent of national output and is still rising. In Great Britain, it took less than 15 years for government spending to rise from 40 per cent to 60 per cent of national output. If we continue on the same path, we can expect the same distressing results.

As for the growth of government regulation, you haven't seen anything yet. If you think we're now building too many small cars and not enough big ones—just wait. As the fuel economy requirement mandated by Congress rises toward 27.5 miles per gallon, the number of big cars we can build will be limited more and more tightly by the number of small cars dealers can sell. And, if the customers won't buy the small ones, we'll all be out of luck.

While I'm on the subject of Federal vehicle standards, let me also remind you once again that Congress still hasn't done anything about 1978-model emission standards that will keep the factories from building anything—big or small—unless the standards are changed and changed quickly.

Now, I'm well aware of the fact that when I complain about the growth of government spending and government regulation I sound like the traditional Neanderthal Republican businessman. But, I don't think I'm a Neanderthal, and I know I'm not a Republican—or a Democrat either, for that matter. The issue of government growth is not a partisan issue. It's not a question of business interests vs. human interests. It's not even a matter of left vs. right.

A couple of weeks ago, Democratic Governor Carey told the New York State Legislature that the state's economic problems were caused by 20 years of rising taxes and public spending. "We have built a wall around our state," said the Governor, "a wall of high taxes, high spending and cumbersome regulations."

Here's another quote that sounds like it might have come from the U.S. Chamber of Commerce: "We used to think that you could just spend your way out of a recession and increase employment by cutting taxes and boosting government spending. . . . That option no longer exist and . . . insofar as it ever did exist, it worked by injecting inflation into the economy. And each time that happened . . . unemployment has risen. Higher inflation, followed by higher unemployment. That is the history of the last 20 years." That's not from the U.S. Chamber of Commerce or even from the U.S. It's James Callaghan, socialist Prime Minister of Great Britain, talking to the British Labor Party conference last September.

Here at home, at about the same time, both President Ford and Governor Carter were promising to cut spending, balance the budget, curb inflation, reduce taxes, reform welfare, streamline the bureaucracy and get rid of redtape and unnecessary regulation.

We've all heard similar promises before, but President Carter tells us that he means precisely what he says. Among other things, he says that he intends to cut the Federal share of Gross National Product from 23 per cent to 21 per cent in four years. The Democratic Congress, with its new budget procedures, is also showing some interest in slowing the rise in government spending. With the same party in control of both the Executive and Legislative branches, for the first time in eight years, maybe there's a chance. Maybe something really can be done to reverse the direction in which we've been going for 20 years.

Our nation was founded on the proposition that each individual is the best judge

of his or her own interests, and that all of us should be free, so long as we do not harm others, to devote our time and energy to our own purposes and even to make our own mistakes. Our history shows that freedom works. For 200 years, we have been a magnet to the poor and oppressed of the world because no nation has ever provided a better opportunity for people to earn and enjoy whatever it is they want out of life.

As I've already observed, however, government spending at all levels has now risen to 40 per cent of national output. On average, each of us who is employed works two days out of every five for purposes determined by government. When we add in the soaring private costs of compliance with government rules and regulations, we're all probably working more for government than for ourselves.

We all have an obligation to devote some of our time and effort to the general welfare rather than to our personal interests. I don't know what the balance should be. But I suspect that when we're all working more than half the time for government, a serious loss of freedom has occurred. And the loss is all the greater when much of our work for governmental purposes is devoted not to the general welfare but to special interests.

Of course, all the additional taxing and spending and regulating over the past 20 years has been intended to serve worthy goals and deserving interests. My purpose today is not to pass judgment on particular governmental goals or programs. I merely want to suggest that no matter how good the intentions or how worthy the goals, too much government leads to bad results.

In the economic sphere, freedom is valuable not only in itself but also because it provides the incentives for work, savings, investment and the growth of jobs, productivity and real income. Economic freedom is the source of economic security, without which no person is truly free. It is also the source of the revenue available to serve the worthy goals of government.

It is not a coincidence that the recent period of rapidly rising government spending and regulation has also been a period of high unemployment, slow productivity improvement, slow growth in real personal income, slow growth in government revenue, soaring government deficits and unprecedented peacetime inflation. All of these unfortunate developments reflect the fact that the United States has been devoting a smaller portion of national output to productive investment than any other industrial nation, and has had the lowest rate of productivity improvement.

As Governor Carey and Prime Minister Callaghan have testified from bitter experience, too much government leads inevitably to economic decay. The links between big government and economic failure are many.

The more government spends, the less wealth is left for productive investment as well as for private consumption. Private spending to meet government requirement has exactly the same consequences.

The air-bag test agreement announced last week between Ford and the Department of Transportation is expected to cost us at least $44 million. The total cost to all participating manufacturers will undoubtedly be several times that amount. And that's not even the cost of meeting a Federal requirement. It's the cost of helping the government to decide whether or not there should be an air-bag requirement.

The Federal Task Force on Motor Vehicle Goals has estimated that the capital cost of meeting statutory fuel economy requirements will be $5-to-$10 billion. But you can't really separate the costs of fuel economy standards from the costs of emission standards. Based on our plans, I'd guess that the auto industry will be spending something like $20 billion over the next five years to meet these two sets of requirements.

I've seen estimates of the cost of meeting noise standards in industrial plants ranging from $10-to-$15 billion.

The total capital investment for all pollution control requirements administered by the Environmental Protection Agency over the decade from 1972 to 1981 has been placed at well over $100 billion.

To put these costs in some perspective, let me remind you that the total profits of all U.S. non-financial corporations in 1975 came to just $37 billion.

It is, of course, important to conserve petroleum, reduce pollution, and protect the health of workers. I am not arguing with the need for government action to achieve such ends. But I am arguing with the tendency to sanctify each goal—to seek instant perfection with little regard for costs and consequences. When the costs of regulation exceed the benefits, the burden does not fall on industry alone. The more industry is forced to spend to meet government requirements, the less it is able to spend on productive investment that would create jobs, improve productivity, raise personal incomes, enlarge the tax base and increase government revenues.

I've talked long enough about the harm done by the growth of government over the past 20 years. Let me turn now to some suggestions for the future.

As the new Administration and the new Congress work out their program to stimulate the economy, I hope they will take a lesson from both the Kennedy Administration and the Nixon Administration. The Kennedy Administration showed that a tax cut aimed at stimulating private sector investment can provide the basis for sustained growth without inflation. The Nixon Administration showed us the other side of the coin. Its efforts to reduce unemployment by stimulating consumption and controlling prices and wages led to a temporary fall in unemployment, followed by the worst recession and highest unemployment since the great depression and the worst peacetime inflation in our history.

I suggest also that our government could take a lesson from West Germany, which has found a way to control inflation and maintain high levels of investment, economic growth and productivity improvement even though the tax burden is about as heavy as it is in the United States. The main reason, I think, is that the German economy carries a much lighter burden of government regulation. German government recognizes that rising government revenue is best assured by preserving economic freedom and encouraging economic efficiency.

I hope that many in Washington will study the remarkable speech by British Prime Minister and Labor Party leader James Callaghan, from which I've already quoted. That speech has received far too little attention in this country, and therefore I'm going to take the liberty of quoting a little more of it.

"The willingness of industry to invest in new plant and machinery," said Mr. Callaghan, "requires not only that we overcome inflation but that industry is left with sufficient funds and sufficient confidence to make the new investment. . . . If industry cannot generate sufficient funds to buy its new plant and machinery then you will not get the investment and we shall continue to go downhill. These are elementary facts of life. . . ."

It's not just liberal do-gooders. Democrats, unions, consumerists and environmentalists who are responsible for the growth of government. It's also conservative politicians who favor increased defense programs, especially if the money is spent in their own districts. It's businessmen who want government contracts. It's bankers and transporters and retailers and manufacturers who want protection from competitors. It's insurance companies that lobby for bumper and air bag regulations that might lower their claims costs. It's catalyst suppliers who lobby for tough emission standards. It's even, if you'll forgive me, car dealers who want state government to protect them from the factory or from new dealers in their territory.

It was a Republican Administration that gave us price and wage controls—and did so, I might add, with more support from business than from labor. It was the same Republican Administration that gave us record deficits and the concept of revenue sharing—which is really deficit sharing, since the Federal government hasn't had any net revenue since the program began. It was another Republican Administration which launched, 21 years ago, the biggest public works program in the history of the world. I'm talking, of course, about the Interstate Highway system, which most of us here today have consistently supported. And, it would be hard to say whether it was bankers, brokers and Republicans or labor leaders, civil servants and Democrats who did more to grease the slide toward fiscal chaos in the City and State of New York.

So let's not blame other people for the growth of government spending and control, and the resulting erosion of liberty. Whenever our role in life and wherever we stand on the political spectrum, almost all of us Americans have been all too ready to call on government to serve our own special interests.

Instead of blaming others, we should consider why it is that the general tendency to call on government has gotten out of control in the last 20 years. That's a bigger question than I can answer, but it does seem obvious that the growth of government is one of those self-perpetuating processes that's hard to stop once it really gets going.

The more government spends and does, the greater the incentive to spend time and money and effort to influence government decisions in one's own behalf. The more the government takes from Peter to pay Paul, the bigger the reward if you can persuade government that your name is not Peter, but Paul. The more the government regulates, the greater the opportunity to turn regulation to your own advantage. The more civil servants there are, the greater the number of voters who have a personal stake in big government rather than good government.

Again, I want to emphasize that I'm not blaming other people. I can see the same process at work in my own company. We're not often very successful in our efforts to affect government policy, but we sure try a lot harder than we used to.

I have no apologies for our efforts to have some effect on government decisions. In a world where the government can make you or break you, it would be suicide to stand by and let other people pull all the strings. In the first two weeks of the new Congress, 400 bills were introduced that would have some effect on our taxes and business operations—and we've identified 70 bills that would have a substantial impact, for better or worse. In those circumstances, we have no choice but to stand up and be counted.

I've been arguing that one reason for the growth of government is that just about everybody is in favor of new government programs that benefit themselves. I think that's true, up to a point, but perhaps that point has been reached. In the last few years, it's begun to look as though just about everybody is getting worried about the cumulative effect of 20 years of government growth.

It's not only conservatives, Republicans and businessmen who are up in arms against government spending and regulation. There's a nationwide taxpayer revolt. Everybody is fed up with the inflationary consequences of Federal deficits financed by printing more

and more money. Ralph Nader complains that government regulation often serves to stifle competition and protect monopoly. There's even a rising chorus of protest against bureaucratic interference and red tape from the academic community which has done so much to promote big government.

President Bok of Harvard University complains, for example, that "every rule imposed on higher education takes authority from educators and gives it to civil servants who lack comparable experience in academic matters."

"Wealth must be created before it can be distributed. . . . It is from a healthy and expanding manufacturing industry that we shall be able in due course to resume the growth and improvement of our social services and also create the jobs that are necessary. . . . There is no other way. And if we follow it to the end we shall save not only our party, but our government and our country."

I hope that America does not have to suffer as Britain has suffered before we, too, discover that there is no other way.

Finally, I should like to suggest that we all take some lessons from the founding fathers of our nation. We cannot go back to the simple days, the low taxes and the small government of the 18th century. But we can still learn from the wisdom of the founders.

It would be well to remember that the purpose of the Federal government is not to tax the general public for the benefit of a host of special interest groups, but—as the Constitution says—"to establish Justice, insure domestic Tranquility, provide for the common Defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our posterity."

We might also recall that Article I, Section 8 of the Constitution identifies a short and specific list of Federal powers, while the 10th Amendment reserves all other powers to the states or to the people.

The men who wrote our Constitution knew from their study of more than 2,000 years of Western civilization that a people cannot remain free and prosperous if its rulers—however chosen—have unlimited power. They recognized that tyranny is not only possible but probable in a democracy as well as in a monarchy.

They were idealists. They respected the dignity and valued the liberty of each individual human being. But they were also realists. They knew that people generally pursue their own advantage. In framing the Constitution, they sought to limit government in order to limit the opportunity sought for special interests to capture and abuse the powers of government to their own advantage and to the detriment of others and of the common good.

Nothing has happened in the past 200 years to discredit those principles. But we have been losing sight of them for the past 20 years. The results have been bad, but are not yet disastrous. If we cherish our freedom, there is still time to make government our servant and not our master.

CRIME CONTROL—CONGRESSIONAL COMMITMENT NEEDED

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mr. BLANCHARD. Mr. Speaker, to millions of Americans crime is the No. 1 concern and problem. We often lose sight of that fact in our debate about tax cuts, energy legislation, SALT talks and jobs bills. One reason fighting crime is often ignored here in Washington is that historically the enforcement of criminal laws is by State and local governments. That is the situation today, but this does not mean that the Federal Government cannot financially assist State and local governments to step up the war on crime. I think we should, and I believe the overwhelming number of Americans feel the same way.

During the past year less than 1 percent of the Federal budget was devoted to crime control. That is not only unbelievable but, I believe, reflects distorted priorities by the Federal Government.

Today's debate and voting on the Budget Act is a case in point. We are talking about a $500 billion budget with only $3.6 billion, or less than 1 percent, devoted to all of law enforcement and justice. Worse yet, the House Budget Committee cut $200 million from the administration request for law enforcement. It recommends this money come out of the already reduced budget of the Law Enforcement Assistance Administration—LEAA.

I am very disturbed by this apparent disregard of the fact that LEAA is trying to improve its operations and is active in assisting local communities to fight crime. In fact, in my district in Oakland County, Mich., LEAA has just recently awarded a grant to help and encourage ten different local units of government to cooperate in a comprehensive investigation to track down a bizarre child killer. I was happy to expedite and assist these communities in receiving Federal help.

A recent survey of my congressional district reveals the following preliminary results when the people were asked:

Would you rather see more or less of your tax dollars spent on crime control?

(In percent)

More	78
Less	3
The same	19

Given strong opposition to excessive Government spending this response is an exceptionally strong mandate for Congress to support greater efforts for crime control.

The Federal budget reflects today's priorities and realities. It is not always easy to legislate all of our priorities in the face of difficult realities. But certainly restoring LEAA to its earlier level of funding is the least we can do to address the priority of fighting crime. Failure to restore the money to LEAA moves us further away from the real priorities this Government should address. That is why I strongly supported today's amendment to increase and restore funds for LEAA and crime control.

I am happy that we prevailed, giving LEAA a chance to operate. I also commend Ms. HOLTZMAN of New York for taking the initiative on this matter in the Budget Committee.

It is time to put our people's money where the problems are . . . back home in America's neighborhoods so people can live in safety and security without fear.

50TH ANNIVERSARY OF MARYLAND-NATIONAL CAPITAL PARK AND PLANNING COMMISSION

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1977

Mrs. HOLT. Mr. Speaker, the Maryland-National Capital Park and Planning Commission yesterday celebrated its 50th year of service to the citizens of Prince Georges County, Md.

Since 1927 the Commission has played a major role in providing planning and park services to the citizens within its regional boundaries. Since 1970 the Commission has also provided recreation services in Prince Georges County. Throughout its history the Commission has performed admirably with its most recent recognition occurring in 1973, when it received national attention as it was awarded the National Gold Medal award for excellence in park and recreation management. This award is considered to be the top award in the United States in the field of recreation and parks. In addition, in 1976 the Commission was presented the Outstanding Comprehensive Planning Award by the National Capital Chapter of the American Institute of Planners.

I congratulate the Maryland-National Capital Park and Planning Commission on its 50th birthday and am pleased to share its accomplishments with my colleagues.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest prepares such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD. Beginning on May 2, 1977, this information will be printed only on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, April 28, 1977, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 29

8:00 a.m.
Agriculture, Nutrition, and Forestry.
To continue markup of S. 275, to amend and extend through 1982, the Agriculture and Consumer Protection Act of 1973.
